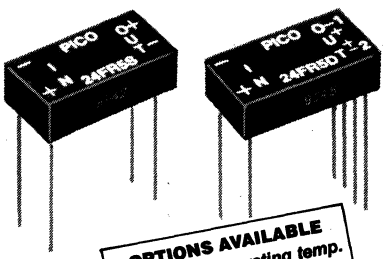
SERIES FR Hi Reliability Isolated Regulated DC-DC Converters



FEATURES:
- Excellent voltage regulations ±0.1% single/±0.2% dual
- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Excellent load regulations 0.2% single/0.4% dual
- Up to 1.0 watts output power at 70°C ambient
- Low output ripple
- 100 megohm 500V DC isolation
- Single and dual isolated outputs
- Low profile, ultra-miniature size
- No output capacitor required • No heat sink required

Low Profile .5" × 1" × .3" ht. up to 1 Watt

This series of encapsulated converters come in 24 different models. The highly regulated output is isolated from the input. The units will operate over the temperature range of −25°C to +70°C. No heat sink is required. These units are excellent for applications where the input voltage varies ±10% and the output must be held to ±0.1% single/and ±0.2% dual. The output voltage is maintained to within 0.2% from no load to full load for single and 0.4% for dual.

OPTIONS AVAILABLE
- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

TYPICAL CHARACTERISTICS FOR ALL MODELS:

Test conditions: 25°C ambient
Output voltage tolerance: ±1% on all single/±2% dual
Line regulations: ±0.1% single/±0.2% dual
Load regulation: 0.2% single/0.4% dual
Converter frequency: 20-40K Hz.
Operating temperature: −25°C to +70°C
Output voltage temperature coefficient: 0.01%/°C
Storage temperature: −55°C to +125°C
Isolation: 100 megohms minimum at 500 volts DC
Short circuit protection: Temporary

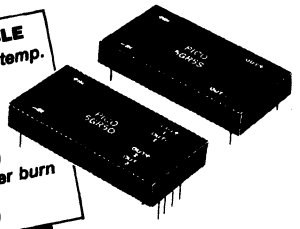
SERIES GR Hi Reliability Isolated Regulated DC-DC Converters

OPTIONS AVAILABLE
- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- HI Temp, full power burn in (100% power, 125°C case temp)



Low Profile 0.35" Height! Up to 3.5 Watts

FEATURES:
- Excellent voltage regulation ±0.1%
- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Excellent load regulation 0.2%
- Up to 3.5 watts output power at 70°C ambient
- Low output ripple
- 100 meghom 500V DC isolation
- Single and dual isolated outputs
- No heat sink required
- Miniature size
- No output capacitor required

This series of encapsulated converters come in 24 different models. The units feature single and isolated dual outputs. They will operate over a temperature range of −25°C to +70°C. No heat sink is required. These units are excellent for applications where the input voltage varies ±10% and the output must be held to ±0.1%. The output voltage is maintained to within 0.2% from no load to full load.

TYPICAL CHARACTERISTICS FOR ALL MODELS:

Test conditions: 25°C ambient
Output voltage tolerance: ±1% on all units
Line regulation: ±0.1% (for the input voltage range of ±10%)
Load regulation: 0.2% (from full load to no load)
Converter frequency: 20-40K Hz.
Operating temperature: −25°C to +70°C
Output voltage temperature coefficient: 0.005%/°C
Storage temperature: −55°C to +125°C
Isolation: 100 megohms minimum at 500 volts DC
Short circuit protection: Temporary

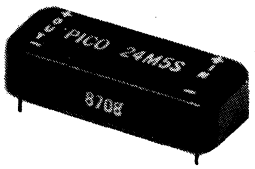
SERIES M PICO MILITARY DC-DC CONVERTERS

Hi Reliability Ultra-Miniature DC-DC Converters -55°C + 85°C

- *Diodes JAN TX*
- *Transformers Manufactured to MIL-T-27 (TF5S40ZZ)*
- *Capacitors MIL-C-39003; MIL-C-55681*
- *Resistors MIL-R-39008*
- *Transistors Hermetically Sealed*



OPTIONS AVAILABLE PER MIL-STD-883
- Stabilization Bake
- Temperature Cycle
- Hi Temperature Burn In 160 Hours at Full Power

FEATURES
- Up to 1.25 watt output at 85°C ambient
- Ultra-miniature size (0.3" Height)
- 4 input voltage ranges 5, 12, 24 and 28 V DC
- 100 megohm @ 500V DC isolation
- Input/output isolation
- Single and dual output
- No heat sink required
- Shielded
- 24 Pin Dip compatible

This series of unregulated DC-DC converters are encapsulated in an ultra-miniature 5 sided shielding package. 54 different models are available. The units feature single and dual outputs. They will operate over the temperature range of −55°C to +85°C. No heat sink is required.

*RIPPLE IS MEASURED WITH 10µF, 75 VOLT HIGH QUALITY TANTALUM CAPACITOR CONNECTED ACROSS EACH OUTPUT.

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: *OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT*

Input voltage range: 5V models 4 to 6.5V DC
12V models 9 to 15V DC
24V models 17 to 28V DC
28V models 21 to 32V DC

Output voltage tolerance at full load:
5V models ± 0.25V
9V models ± 0.3V
12V & 15V models ± 0.4V
24V & 28V models ± 0.5V
48V models ± 0.7V

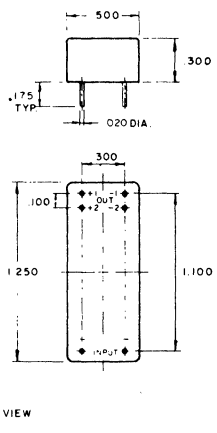
Converter frequency: 20 – 40 KHz

Output temperature coefficient:
0.05%/°C for 5V and 9V outputs.
0.02%/°C for 12, 15, 24, 28, 48V outputs.

Operating temperature: –55°C to +85°C ambient.
No heat sink is required.
No electrical derating required.

Storage temperature: –55°C to +125°C

Isolation: 100 megohms min. @ 500V DC



Typical Weight: 9.0 Grams

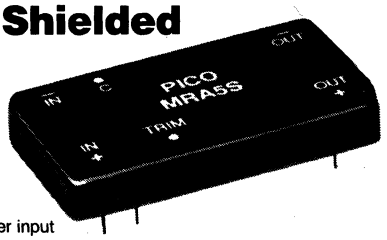
SERIES MR

Hi Reliability Ultra-Miniature Fully Regulated 2.5 Watts DC-DC Converters −55°C to +85°C Wide Input Range All Units Shielded

Wide Input–Low Profile .300"

MILITARY DC-DC CONVERTERS

- *Diodes JAN TX*
- *Transformers Manufactured to MIL-T-27 (TF5S03ZZ)*
- *Capacitors MIL-C 55365/4 MIL-C 39003/03 MIL-C 20/27E MIL-C 39014/05*
- *Resistors MIL-R-39017 MIL-R-22097*
- *IC Hermetically Sealed (MIL-STD-883 Screened)*



FEATURES:

- Voltage regulation over input of

	LOW	HI
MRE	5V	15V
MRF	8V	24V
MRA	18V	36V

- Load regulation (see table for typical variation at different loads
- Line regulation = Typical values
  5-15V DC = ±1.0%
  8-24V DC = ±1.0%
  18-36V DC = ±2.0%
- High efficiency—up to 78%
- Will operate over a temperature range of −55°C to +85°C with no heat sink or electrical derating
- 6 sided shielding
- Isolation—100 megohms at 500 Volts DC
- External output trimming pin standard, +5%
- Single and dual isolated outputs
- Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (−) input, will disable the unit, allowing for remote shutdown.

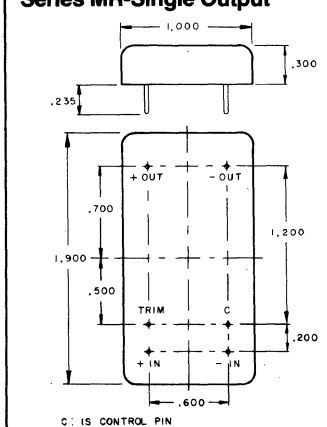
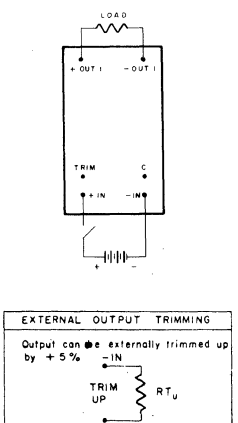
Series MR-Single Output



TYPICAL. WEIGHT. 26 Grams



Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (−) input, will disable the unit, allowing for remote shutdown.

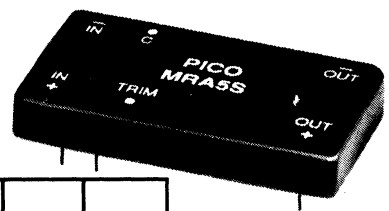
This series of high efficiency wide input range, encapsulated regulators come in 36 different models. Manufactured using high grade military components, this unit will operate from −55°C to +85°C with no heat sink or electrical derating required. The 6 sided shielding and 32 pin DIP compatability combined with input/output isolation and the wide input range capabilities will meet your most stringent military requirements.

Wide Input Range Isolated – Regulated MILITARY DC-DC CONVERTERS

Low Profile .300" up to 2.5 Watts

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient
Operating temperature: −55°C to 85°C
Output voltage tolerance: ±1% at typical input voltage
Output voltage temperature coefficient: 0.02%/°C
Storage temperature: −55°C to +125°C
Short circuit protection: Temporary



(1.9" x 1.0" x .300")

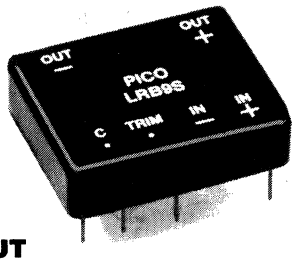
SERIES LR

Regulated up to 5 Watt DC-DC Converters
Wide Input Range/up to 3.33:1
Fully Regulated
All Units Shielded



New 100 VDC Output Models

FEATURES:

- Voltage regulation over input of

	LOW	HI
LRE	5V	15V
LRF	8V	24V
LRA	18V	36V
LRB	36V	60V
LRC	18V	60V

- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Load regulation (see table for typical variation at different loads)
- Line regulation = Typical values
  - 5-15 V DC = ± 1.5%
  - 8-24 V DC = ± 1.5%
  - 18-36 V DC = ± 1.0%
  - 36-60 V DC = ± 1.0%
  - 18-60 V DC = ± 1.5%
- High efficiency—up to 80%
- Will operate over a temperature range of −25°C to +70°C with no heat sink or electrical derating
- 6 sided shielding
- Isolation—100 megohms at 500 volts DC
- External output trimming pin standard, + 5%
- Single and dual isolated outputs
- Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (−) input, will disable the unit, allowing for remote shutdown.

OPTIONS AVAILABLE
- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

Low Profile Less Than 0.5" ht.
For 0.3" ht. see pages 1940 & 1941

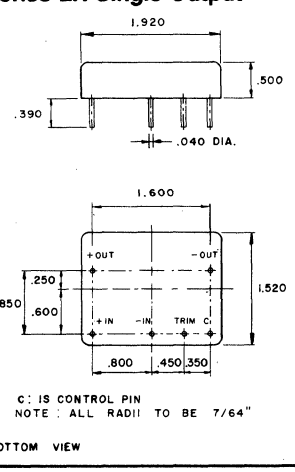
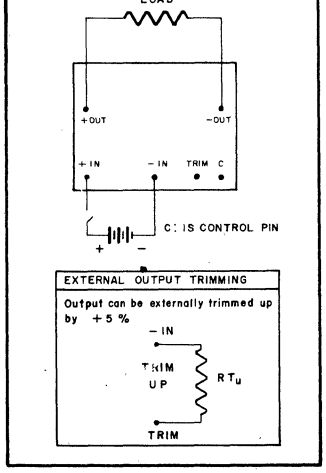
Series LR-Single Output





Typical Weight: 65 Grams

This series of high efficiency, wide input range, encapsulated regulators come in 75 different models. These units feature a 500 VOLT DC input to output isolation in both single and dual output models. The LR Series will operate over a temperature range of −25°C TO +70°C with no heat sink or electrical derating. These units are excellent for applications where input voltage varies dramatically, yet a high efficiency and output voltage regulation must be maintained.

TYPICAL CHARACTERISTICS:
Test conditions: 25°C ambient
Operating temperature: −25° C to +70° C
Output voltage tolerance: ± 1% at typical input voltage
Output voltage temperature coefficient: 0.02%°C
Storage temperature: −55°C to 125°C
Short circuit protection: Temporary

SERIES PLR- Lowest Profile Series 0.300"

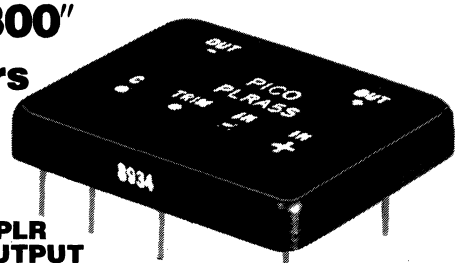
Regulated up to 5 Watt DC-DC Converters

Wide Input Range/up to 3.33:1

Fully Regulated

All Units Shielded

New 100 VDC Output Models



FEATURES:

- Voltage regulation over input of LOW HI
  PLRE 5V 15V
  PLRF 8V 24V
  PLRA 18V 36V
  PLRB 36V 60V
  PLRC 18V 60V
- .300" Height
- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Load regulation (see table for typical variation at different loads)
- Line regulation = Typical values
  5–15 V DC = ± 1.5%
  8–24 V DC = ± 1.5%
  18–36 V DC = ± 1.0%
  36–60 V DC = ± 1.0%
  18–60 V DC = ± 1.5%
- High efficiency—up to 80%
- Will operate over a temperature range of –25°C to +70°C with no heat sink or electrical derating
- 6 sided shielding
- Isolation—100 megohms at 500 volts DC
- External output trimming pin standard, +5%
- Single and dual isolated outputs
- Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (–) input, will disable the unit, allowing for remote shutdown.

OPTIONS AVAILABLE
- Expanded operating temp (–55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (–55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

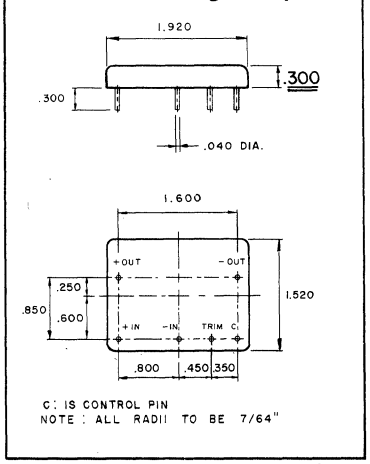
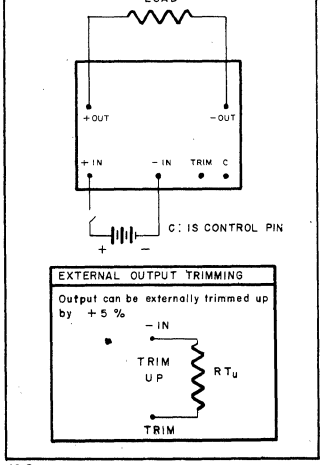
Series PLR-Single Output





Typical Weight: 40 Grams

This series of Low Profile 0.300, high efficiency, wide input range, encapsulated regulators come in 75 different models. These units feature a 500 VOLT DC input to output isolation in both single and dual output models. The PLR Series will operate over a temperature range of –25°C TO +70°C with no heat sink or electrical derating. These units are excellent for applications where input voltage varies dramatically, yet a high efficiency and output voltage regulation must be maintained.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient
Operating temperature: –25°C to +70°C
Output voltage tolerance: ± 1% at typical input voltage
Output voltage temperature coefficient: 0.02%/°C
Storage temperature: –55°C to +125°C
Short circuit protection: Temporary

Lowest Profile Series 0.300"

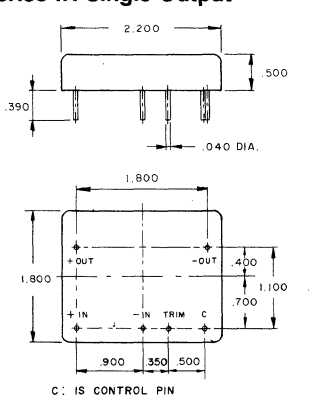
Series IR-Single Output

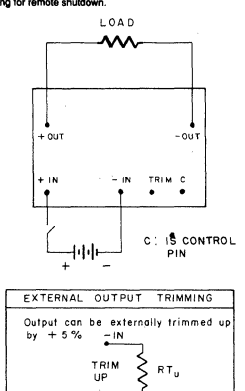


C: IS CONTROL PIN

NOTE: ALL RADII TYP. 7/64"

BOTTOM VIEW

Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (–) input, will disable the unit, allowing for remote shutdown.



Typical Weight: 95 Grams

This series of high efficiency, wide input range, encapsulated regulators come in 75 different models. These units feature a 500 VOLT DC input to output isolation in both single and dual output models. The IR Series will operate over a temperature range of −25°C TO +70°C with no heat sink or electrical derating. These units are excellent for applications where input voltage varies dramatically, yet a high efficiency and output voltage regulation must be maintained.

TYPICAL CHARACTERISTICS:
Test conditions: 25°C ambient
Operating temperature: −25° C to +70° C
Output voltage tolerance: ± 1% at typical input voltage
Output voltage temperature coefficient: 0.02%°C
Storage temperature: −55°C to 125°C
Short circuit protection: Temporary

FEATURES:

- Voltage regulation over input of

	LOW	HI
JRA	18V	36V
JRB	36V	60V
JRC	18V	60V

- Encapsulated semi-conductors, conservatively rated for maximum reliability.
- Load regulation (see table for typical variation at different loads
- Line regulation = Typical values
  18–36V DC = ±1.0%
  36–60V DC = ±1.0%
  18–60V DC = ±2.0%
- High efficiency—up to 84%
- Will operate over a temperature range of −25°C to +70°C with no heat sink or electrical derating
- 6 sided shielding
- Isolation—100 megohms at 500 Volts DC
- External output trimming pin standard, +5%
- Single and dual isolated outputs
- Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (−) input, will disable the unit, allowing for remote shutdown.

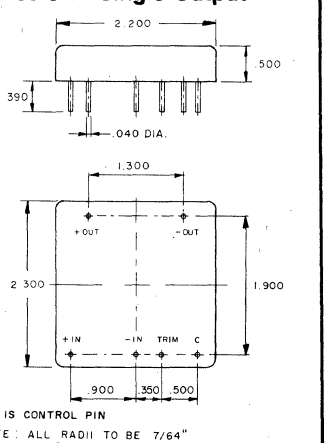
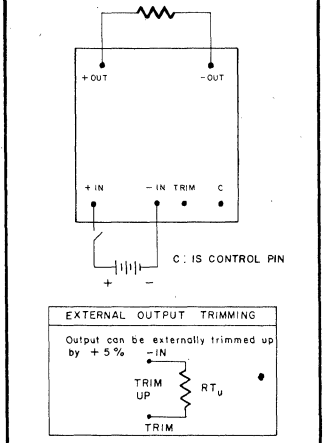
Series JR - Single Output



Typical Weight: 115 Grams



Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (−) input, will disable the unit, allowing for remote shutdown.

This series of high efficiency, wide input range, encapsulated regulators come in 45 different models. These units feature a 500 Volt DC input to output isolation in both single and dual output models. The JR Series will operate over a temperature range of −25°C to +70°C with no heat sink or electrical derating. These units are excellent for applications where input voltage varies dramatically, yet a high efficiency and output voltage regulation must be maintained.

OPTIONS AVAILABLE
- Expanded operating temp (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient
Operating temperature: −25°C to +70°C
Output voltage tolerance: ±2% at typical input voltage
Output voltage temperature coefficient: 0.02%/°C
Storage temperature: −55°C to +125°C
Short circuit protection: Temporary

FEATURES

- Voltage regulation over input of

	LOW	HI
KRA	18V	36V
KRB	36V	60V
KRC	18V	60V

- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Load regulation (see table for typical variation at different loads
- Line regulation = Typical values
  18–36V DC = +1.5%
  36–60V DC = ±1.5%
  18–60V DC = ±3.0%
- High efficiency—up to 84%
- Will operate over a temperature range of −25°C to +70°C with no heat sink or electrical derating
- 6 sided shielding
- Isolation—100 megohms at 500 Volts DC
- External output trimming pin standard, +5%
- Single and dual isolated outputs
- Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (–) input, will disable the unit, allowing for remote shutdown.

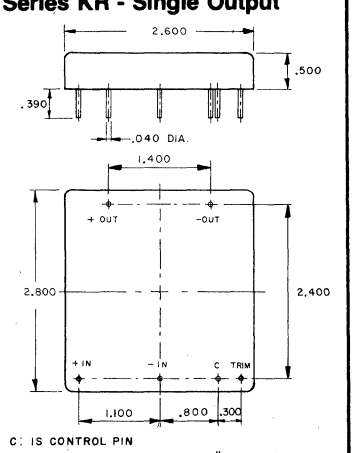
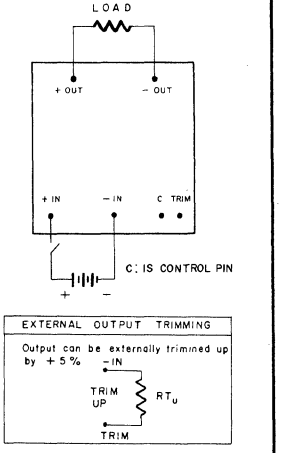
Series KR - Single Output



Each unit is supplied with an external control pin. This "C" pin, when connected to the negative (–) input, will disable the unit, allowing for remote shutdown.



Typical Weight: 165 Grams

This series of high efficiency, wide input range, encapsulated regulators come in 45 different models. These units feature a 500 Volt DC input to output isolation in both single and dual output models. The KR Series will operate over a temperature range of −25°C to +70°C with no heat sink or electrical derating. These units are excellent for applications where input voltage varies dramatically, yet a high efficiency and output voltage regulation must be maintained.

OPTIONS AVAILABLE
- Expanded operating temp (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient
Operating temperature: −25°C to +70°C
Output voltage tolerance: ±3% at typical input voltage
Output voltage temperature coefficient: 0.02%/°C
Storage temperature: −55°C to +125°C
Short circuit protection: Temporary

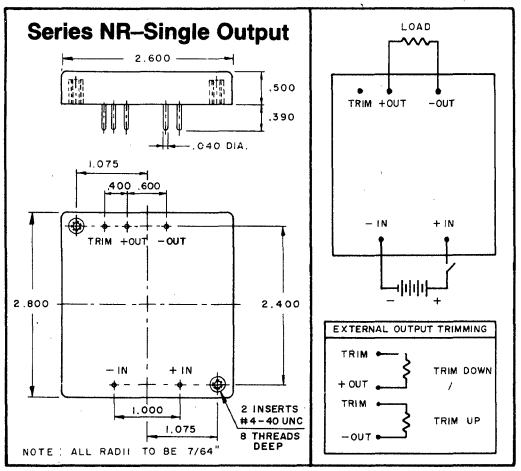
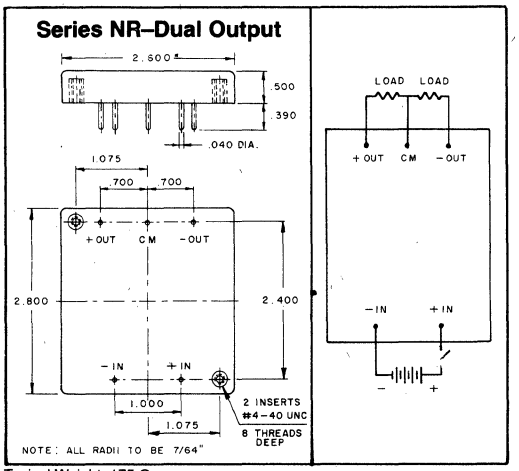
Series NR–Single Output



Typical Weight: 175 Grams

Series NR–Dual Output



Typical Weight: 175 Grams

This series of high efficiency wide input range, encapsulated regulators come in 50 different models including 30 Triple Output Models to ease board designs. These units feature a 500 Volt DC input to output isolation in both single, dual and triple output models. The NR Series will operate over an ambient temperature range of −25°C to +70°C with no heat sink or electrical derating. These units are excellent for applications where input voltage varies dramatically, yet a high efficiency and output voltage regulation must be maintained.

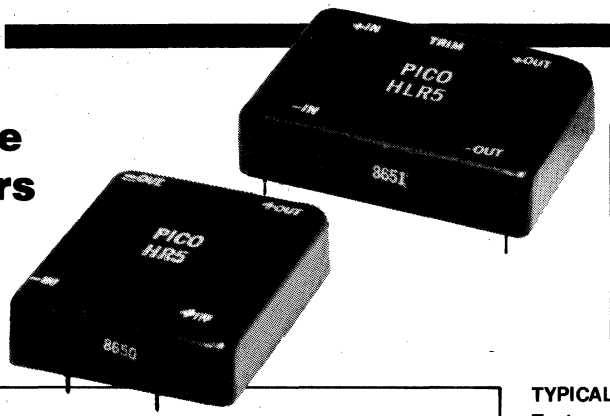
SERIES HR/HRL
Hi Reliability
Wide Input Range
DC-DC Converters
up to 12 Watts



OPTIONS AVAILABLE
- *Expanded operating temp. (−55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (−55°C to +125°C)*
- *Hi Temp, full power burn in (100% power, 125°C case temp)*

FEATURES:
- Excellent voltage regulation.
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Excellent load regulation
- Up to 12 watts output power at 70°C ambient.
- No heat sink required
- 6 sided shielding
- High efficiency (up to 90%)
- Low no load currents

This series of non-isolated encapsulated converters come in 6 different models. The units are single output and will operate over a temperature range of −25°C to +70°C. No heat sink is required. These units are excellent for applications where the input voltages varies over a wide range, yet they maintain a high efficiency and offer low no load currents.

TYPICAL CHARACTERISTICS:
Test conditions: = 25°C ambient
Output voltage tolerance: ±1% on all units
Line regulation: (see table below)
Operating temperature: −25°C to +70°C
Output voltage temperature coefficient: 0.01% HRL 9 volt unit
0.005% all other models
Storage temperature: −55°C to +125°C
Short circuit protection: Temporary

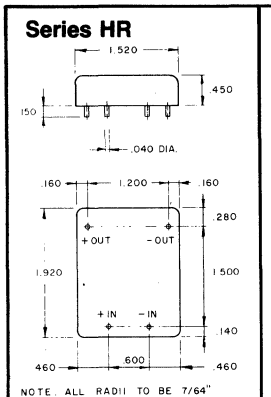
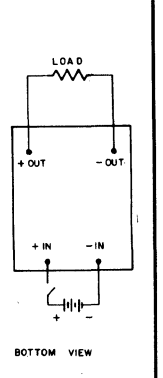
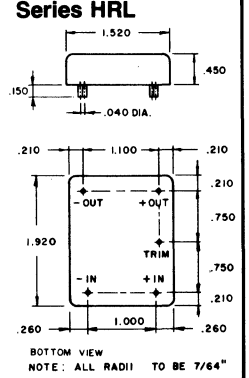
Series HR



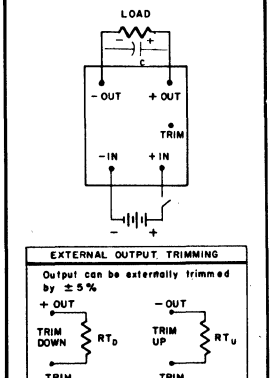
Typical Weight: 60 Grams



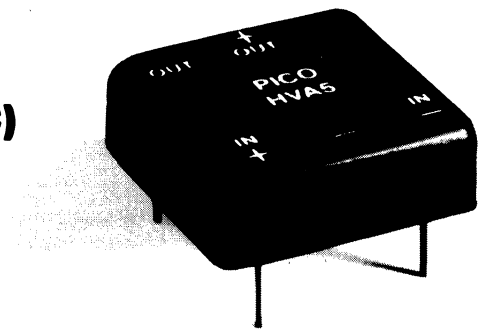
Series HRL



Typical Weight: 60 Grams



Series HVA
Hi Reliability
Hi Input Voltage (70–170 VDC)
Isolated 1000 VDC
Fully Regulated—3 Watts
Short Circuit Protected



FEATURES:

- Excellent line regulation ±0.5% (70 VAC–170 VAC)
- Excellent load regulation, from 25% to 100%, ±2%
- Continuous short circuit protection
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Isolation: 100 megohms at 1000 VDC, 6 sided shielding
- Wide input 70 VDC to 170 VDC

PICO's Series HVA of isolated, encapsulated converters offer you the opportunity to convert a 70 volt DC thru 170 volt DC input into 3 different output voltages. Rated for 3 watts, these units will operate from −25°C to +70°C with no heat sink or electrical derating required, while still maintaining excellent line and load regulation. These units are excellent for application where you have a rectified output from a 110 VAC source.

TYPICAL CHARACTERISTICS:

Test conditions: = 25°C ambient
Output voltage tolerance: ±2%, on all units
Line regulation: ±5%, on all units
Load regulation: ±2%, from 25% to full load, minimum load 10%
Operating temperature: −25°C to +71°C
Storage temperature: −55°C to +125°C
Output voltage temperature coefficient: 0.02% per °C
Short circuit protection: Continuous
Operating frequency: 1 MHz
Input voltage range: 70 VDC–170 VDC

DC-DC Converters & AC-DC Power Supplies

OPTIONAL ENVIRONMENTAL SCREENING

All Pico DC-DC Converters and AC-DC Power Supplies are available with high reliability Screening options to insure the maximum quality unit for your system. Select from the list below or call factory for review of your specific applications.

OPTIONS AVAILABLE

Operating Temperature: expanded −55°C to +85°C

Reduced QA Lot Acceptance: 0.25 AQL per MIL-STD-105D

Stabilization Bake: per MIL-STD-883, method 1008, 24 hours TA = 125°C

Burn In: per MIL-STD-883, method 1015, 160 hours at 125°C (case temperature of unit 125°C)

Isolation between input and output: 100 megohms at 1000V D.C.

Temperature Cycle: per MIL-STD-883, method 1010, Cond. B. (−55C to +125°C)

All Transformers manufactured to MIL-T-27. All assembly and testing done in U.S.A.

Call today for price and delivery of your custom screened unit. Call factory to review any of your other military requirements

ORDERING INFORMATION

GENERAL: PICO ELECTRONICS Transformers, Inductors, DC-DC Converters and AC-DC Power Supplies are marketed on a direct factory basis and through authorized independent sales representatives in the United States and overseas. Our Sales and Engineering Departments will be pleased to assist you in choosing the correct unit for your particular application and in placing a purchase order. Call factory to review any of your other military requirements.

TRANSFORMER DISCOUNTS: 1-9 net, 10-24 net less 10%, 25-49 net less 16%, 50-99 net less 23%, 100-499 net less 30%. Contact factory for quantities over 499 pieces.

NO MINIMUM BILLING: PICO will be glad to accept your order for one unit.

DELIVERY: Most Transformers, Inductors, DC-DC Converters and AC-DC Power Supplies are in stock for same day delivery. If unit is not in stock, shipment will be made in one week or sooner.

TERMS: Net, 30 days. FOB Mount Vernon, N.Y.

GUARANTEE: We warrant each product manufactured by us and sold by us or our authorized agents, to be free from defects in material and workmanship and that, if operated properly, it will perform within applicable specifications for a period of one year after original shipment. Our obligation under this guarantee is limited to repairing or replacing our product within one year of delivery to the original purchaser.

This warranty is in lieu of all other warranties, express or implied and constitutes fulfillment of all our liabilities to purchaser. We do not warrant that the products can be used for any particular purpose other than those covered by the applicable specifications. We assume no liability, in any event, for consequential damages, for anticipated or lost profits, incidental damages or loss of time or other losses incurred by purchaser or any third party in connection with products covered by this warranty or otherwise.

We reserve the right to discontinue products without notice, and to make modifications in design without incurring any obligation to make such modifications to products previously sold.

SPECIAL DESIGNS: Custom designed transformers and inductors are available for delivery in 9 days. Special designed features that are available include multiple magnetic shields, silicone rubber construction, electrostatic shielding, modification of turns ratio for better impedance match, addition of extra windings and taps, extended frequency range, broader temperature range, smaller size. Check with factory for delivery of custom designed DC-DC Converters and AC-DC Power Supplies.

SERIES LAC

Hi Reliability Isolated Regulated AC-DC Linear Modules

Single, Dual & Triple Outputs Up to 10 Watts

TYPICAL CHARACTERISTICS:
Test conditions: 25°C ambient
Input voltage: 105-125 VAC
Input frequency: 50 to 440 Hz
Line/load regulation: Consult chart
Output voltage tolerance: ±1.0%
Operating temperature: −25°C to +70°C
Output voltage temperature coefficient: 0.02% 1°C
Storage temperature: −55°C to +85°C
Typical isolation: 100 megohms
Short circuit protection: Continuous

Series LAC AC-DC Linear Modules

FEATURES:

- Low output ripple = 1 to 2 MV RMS
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Excellent voltage regulation
- Excellent load regulation
- Up to 9 watts output power at 70°C ambient
- Typical isolation 100 megohms
- Single, dual and triple outputs
- No heat sink required
- Terminal strips available
- No output capacitor required

This series of linear AC to DC Power Supplies are available in 19 different models. All single, dual and triple output models offer excellent line and load regulation, while maintaining the output voltage ripple at a minimum. Continuous short-circuit protection and isolation are also standard on all models. The convenience of PC mounting, with mounting inserts, allows the use of this encapsulated unit in harsh environments.

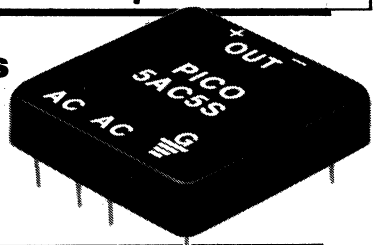
SERIES 5AC

Hi Reliability
Hi Efficiency/Isolated
Single and Dual Outputs
Regulated
5 Watt AC-DC Switchers

Lowest Profile!
0.5"ht. up to 5 Watts



TYPICAL CHARACTERISTICS:
Test conditions: 25°C ambient
Input voltage: 90-130VAC (47-440Hz)
Line/load Regulation: See specifications below
Converter frequency: 25-35 KHz typ.
Operating temperature: −25°C to +70°C
Output voltage temperature coefficient: 0.02%/°C
Storage temperature: −55°C to +125°C
Isolation: 1200V RMS
Short circuit protection: Continuous

OPTIONS AVAILABLE
- *Expanded operating temp (−55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (−55°C to +125°C)*
- *Hi Temp, burn in*

Low Capacity Option
All units can be manufactured with isolation capacity of 50pF. Contact factory.

5 Watt AC-DC Switchers

FEATURES:
- Low profile 0.500"
- Low weight
- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Excellent voltage regulation
- Excellent load regulation
- Up to 5 watts output power at 70°C ambient
- Low output ripple
- Isolation 1200V RMS
- Single and dual outputs
- No heat sink required
- Miniature size
- No output capacitor required
- Shielding

This series of low profile, 5 Watt AC to DC switchers come in 7 different models. These units offer high efficiency and precise regulation throughout the operating temperature range of −25°C to +70°C ambient, with no heat sink or electrical derating required. The 5 AC series keeps a maximum *0.500"* height while still offering you 1200 volts RMS isolation in a rugged encapsulated case. The convenience of PC mounting and the availability of three outputs should aid your circuit design.

Hi Reliability
Hi Efficiency/Isolated
Single, Dual and Triple Outputs
Regulated
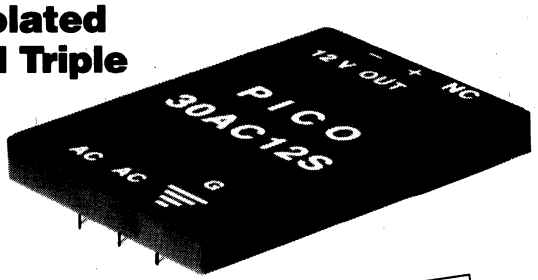
30 Watt AC-DC Switchers

Lowest Profile!
0.5" ht. up to 30 Watts



TYPICAL CHARACTERISTICS
Test conditions: 25°C ambient
Input voltage: 90-130VAC (47-440Hz)
Line/load regulation: See specifications below
Converter frequency: 25-35 KHz typ.
Operating temperature: −25°C to +70°C
Output voltage temperature coefficient: 0.02%/°C
Storage temperature: −55°C to +125°C
Isolation: 1200V RMS
Short circuit protection: Continuous

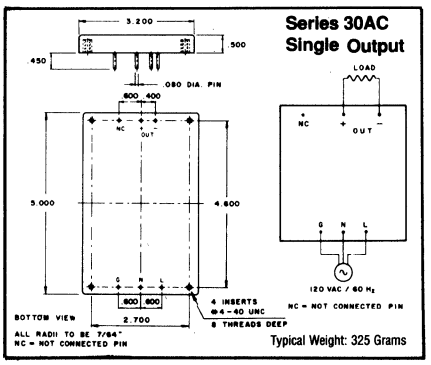
Low Capacity Option
All units can be manufactured with isolation capacity of 70pF. Contact factory.

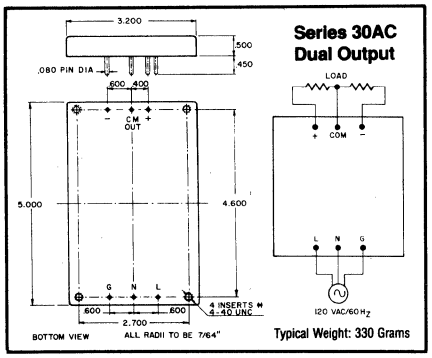
30 Watt AC-DC Switchers

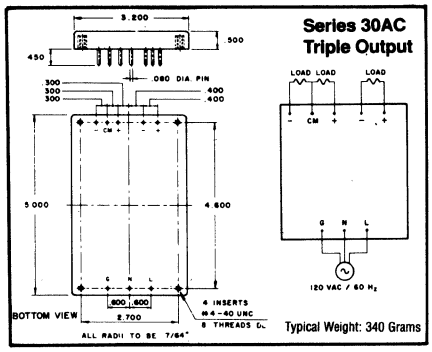
FEATURES:
- Low Profile *0.500"*
- Low weight
- Encapsulated semiconductors, conservatively rated for maximum reliability.
- Excellent voltage regulation
- Excellent load regulation
- Up to 30 watts output power at 70°C ambient
- Low output ripple
- Isolation 1200V RMS
- Single, Dual and Triple Outputs
- No heat sink required
- Miniature size
- No output capacitor required
- Shielding

OPTIONS AVAILABLE PER MIL-STD-883
- *Expanded operating temp. (−55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (−55°C to +125°C)*
- *Hi Temp, burn in*

This series of low profile, 25-30 Watt AC to DC switchers come in 11 different models. These units offer high efficiency and precise regulation throughout the operating temperature range of -25°C to + 70°C ambient, with no heat sink or electrical derating required. The 30AC series keeps a maximum 0.500" height while still offering you 1200 volts RMS isolation in a rugged encapsulated case. The convenience of PC mounting and the availability of three outputs should aid your circuit design.







SERIES 30AC SINGLE OUTPUT
INPUT VOLTAGE 90-130VAC (47-440Hz)
(OPTIONAL 170-240VAC, 47-440Hz**)

PILLAR INDUSTRIES Manufacturer of AC ADAPTORS

- **UL, CSA Approved Power Supplies**
- **JIS Approved Japanese Power Supplies**
- **VDE Approved European Power Supplies**
- **British (U.K.) Style Power Supplies**

GENERAL SPECIFICATIONS

- Input:
  120VAC 60Hz UL/CSA North America
  220VAC 50Hz VDE/TÜV Europe
  100VAC 50Hz JIS Japan
  240VAC 50Hz BSI/SAA UK, Australia, S. Africa
- Output: ±0.5VCD rated load.
- Temperature: 0°C to +40°C full load condition
  −40°C to +70°C storage condition
- Humidity: 10% to 90% non-condensing
- Altitude: 0-10000 ft
- Vibration: Standard Export drop test
- Dielectric Withstand Voltage:
  UL CSA JIS 1500VAC 1 Minute
  VDE BSI TÜV SAA 4000VAC 1 Minute
- Enclosure: Noryl SE-100J, Cyclolac ABS or Equivalent.
- O/P Cord: 6 feet Awg 24 or heavier.
- Safety: UL, CSA, JIS, VDE, TÜV, BSI, SAA.
- MTBF: 30000 Hours at 25°C full load.
- QA: MIL-STD-105D

OPTIONS
Special enclosure colors, cord length and colors are available on request at higher price and longer delivery.

Customer brands are acceptable.

Special connectors are acceptable with cost separate tooling charge. (Approx. 4 weeks tooling leadtime).

CUSTOM DESIGN
Are available on request to meet exact specification.

24 PAGE PRODUCT INDEX BOOK LISTS 3,800 ITEMS

62 CROSS REFERENCE CARDS

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

NEW! High-Power Switchers Provide >.99 Power Factor Correction.

MEETS PROPOSED IEC 555-2.

If you're seriously interested in Power Factor Correction, you owe it to yourself to investigate Pioneer's new high-power switchers that use a patented resistor emulation PFC technique. It has made available a full range of single and multiple output switchers able to provide up to 42% more output power — 1 kW from any standard 120 VAC, 15 A wall outlet and comply with UL's 12 A limitation.

Check these outstanding features:

- Meets UL1950, CSA 1402C and 220, IEC 380 and 435 and EN60950 safety standards.
- Meets VDE and FCC EMI specifications.
- Standard 5" x 8" package, 23 lbs. max.
- Insensitive to input voltage and frequency variations — 90-264 VAC, DC and 43-120 Hz.
- Eliminates input switching or strapping.
- Wide range of output power — 500 to 2500 W.
- No minimum load.
- 0 to 50°C operation at full load.
- AC input fuse.
- Overvoltage/overcurrent/overtemperature protection.
- Soft start.
- Remote sense.
- No turn-on or turn-off overshoot.
- Completely isolated outputs.
- Self-contained forced-air cooling.

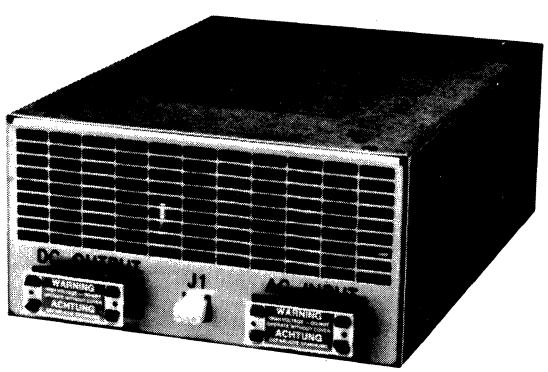
NEW! PFC Bulk Power Converters.

PROVIDES 375-390 VDC TO CONVENTIONAL DC/DC CONVERTER OR DISTRIBUTED DC BUS NETWORKS. MEETS PROPOSED IEC 555-2.

- Meets UL, CSA and IEC safety standards.
- Meets VDE and FCC EMI specifications.
- >.99 active power factor correction.
- Eliminates input switches or jumpers.
- 90-264 VAC or DC and 43-120 Hz @ 20 A max.
- Single Output: 1680 W from 96 VAC to 150 VAC input. 2100 W available for 180-264 VAC input.
- 4" x 8" x 11" package, 10 lb. max.
- Overvoltage/overcurrent/overtemperature protection.
- 0 to 50°C operation at full load.
- Input and output fuses.
- Brownout to 75 VAC.
- Holdup performance improved up to 200%.
- Self-contained forced-air cooling.



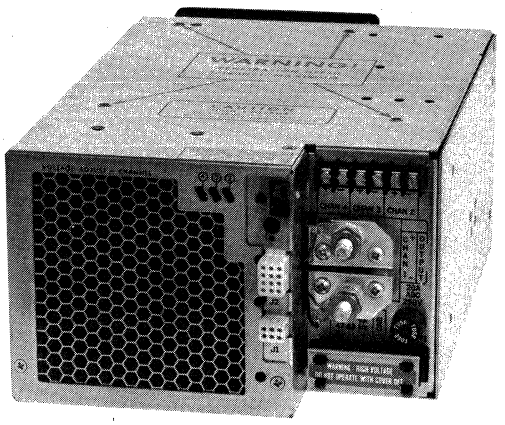
Pioneer Magnetics

800-233-1745

See our complete line of International Power Supplies on the following Page.

Pioneer Magnetics

Your best choice in high power switching supplies



It's the broadest line in the industry. From 500 to 2500 watts, single or multiple output, AC/DC or DC/DC. All the standard features and options you'll ever need or want. You can optimize your design with the International Line supplies, designed to meet tough noise and safety specs for worldwide applications. Pioneer power supplies are setting industry standards for reliability, performance and affordability.

- More than 350,000 units in the field.
- Over 250,000 hours MTBF.
- Conservatively rated for full performance at maximum output.
- Internal EMI filtering.

The International Line—

First choice for precise DC output power.

- >.99 active power factor correction.
- Meets FCC and VDE level A conducted noise (150 kHz to 30 MHz) and level B radiated noise specs.
- Meets SELV level of IEC/VDE, UL and CSA safety standards (standard models approved).
- Certifications provided upon request with volume orders.
- Full output rating at 50° C ambient.
- 85% efficiency.
- Completely isolated output.
- OV, overload and reverse voltage protection.
- Soft start; no turn-on or turn-off overshoot.
- Self-contained forced-air cooling.
- No minimum load required; each channel independently regulated.

Specifications

AC Input

Selected or Dedicated Input:
90-135 VRMS or 180-264 VRMS,
47-63 Hz, Single Phase. Line dips to 70-140 VRMS.

DC Input

38-63 V continuous (70 VDC short term).

Pioneer Magnetics

Number one in high power switching supplies.

800-233-1745
1745 Berkeley St., Santa Monica, CA 90404
(213) 829-6751
FAX (213) 453-3929

Dynamic Regulation:

International Line Units: Output Transient Response. 2% deviation (100 mV deviation for units under 5V) with recovery to ½% in less than 500 µsec for a 25% load step, 1A/µsec slew rate.

P-P Ripple and Noise: 1% of nominal output at full load current, 20 Hz to 20 MHz bandwidth for 5V to 48V outputs. 50 mV for outputs less than 5V.

Static Regulation:

- Line: ± 0.25% over full line range.
- Load: ± 0.25% over no load to full load.
- Voltage Stability: ± 0.1% after 30 min. warmup for a 24-hr. period.
- Temperature Coefficient: ± 0.02%/ °C from 0° C to 50° C.

Over-Temperature Protection:

Supply is automatically latched off in the event of an over-temperature condition.

Standard Options

- Switch-selectable input voltages.
- Power fail signal.
- Logic on/off.
- Crowbar.
- Remote programming/margining.
- Local margin check.
- Output tolerance status.
- Output power good signal.
- OV secondary channels.

Special Options

- Single channel battery backup.
- Single wire current sharing.
- Load sharing for power or redundancy.
- Tailored EMI filtering for system requirements.
- "Hot Pluggable" Power Shelf — 19" or 24" rack.

Custom options can be designed to your exact requirements.

Fast Delivery.

Most popular models available from immediate stock.
Consult factory.

LINEAR ENCAPSULATED POWER MODULES

50VDC TO 250VDC

FEATURES:

- SHORT CIRCUIT PROTECTION
- HIGHLY REGULATED FLOATING OUTPUT
- P.C. CARD OR CHASSIS MOUNTING
- DOMESTIC AND/OR EUROPEAN LINE VOLTAGE

SPECIFICATIONS:

All electrical specifications are at 25°C and nominal input voltage unless otherwise noted.

- **INPUT VOLTAGE AND FREQUENCY**
  115VAC nominal (105 to 125VAC) 50 to 60Hz
  Other optional input voltages are available.
  Use designated suffix to order these units:
  220VAC nominal (200 to 240VAC) suffix X
  240VAC nominal (220 to 260VAC) suffix XE
  100VAC nominal (90 to 110VAC) suffix Q
  115/220VAC nominal (105 to 125VAC or 200 to 240VAC) suffix AX
- **VOLTAGE OUTPUT TOLERANCE**
  Factory set at ± 1% (fixed)
- **TEMPERATUE COEFFICIENT**
  0.02%/°C typical
- **INPUT ISOLATION RESISTANCE**
  100 Mohms
- **ISOLATION VOLTAGE**
  2500VDC
- **OPERATING TEMPERATURE**
  – 25°C to + 71°C
- **STORAGE TEMPERATURE**
  – 55°C to + 105°C

REGULATED DC/DC CONVERTERS

WIDE INPUT VOLTAGE RANGE 15W

FEATURES:

- WIDE INPUT RANGE
- INPUT/OUTPUT – ISOLATION
- EFFICIENCY UP TO 87% @ FL
- OVER CURRENT PROTECTION • SIX SIDED SHIELDING
- SHORT CIRCUIT CURRENT LIMITING • COMPACT SIZE

APPLICATIONS:

- BATTERY OPERATED EQUIPMENT
- TELECOMMUNICATIONS
- PROCESS CONTROL
- INSTRUMENTATION
- ROBOTICS

SPECIFICATIONS:

Typical @ 25°C Under Full Load and Nominal Input Voltage Unless Otherwise Specified.

REGULATED DC/DC CONVERTERS

FEATURES:

- HIGH PERFORMANCE TT INPUT FILTER
- SHORT CIRCUIT PROTECTED
- EXTREMELY LOW OUTPUT NOISE
- HIGHLY REGULATED FLOATING OUTPUTS
- LOW INPUT REFLECTED RIPPLE
- P.C. CARD MOUNTING

SPECIFICATIONS:

- **INPUT REFLECTED RIPPLE** 1% of input voltage (max.)
- **OUTPUT VOLTAGE TOLERANCE** Factory set at ±1% (fixed)
- **REGULATION** Line-0.05% Load-0.05%; 0.1% for PR87S
- **RIPPLE AND NOISE** 1 MV RMS (max.)
- **INPUT—OUTPUT ISOLATION** 500 VDC (min.)
- **OPERATING TEMPERATURE** −25°C to +71°C
- **STORAGE TEMPERATURE** −55°C to +85°C
- **EFFICIENCY** Nominal line at full load 55-65%

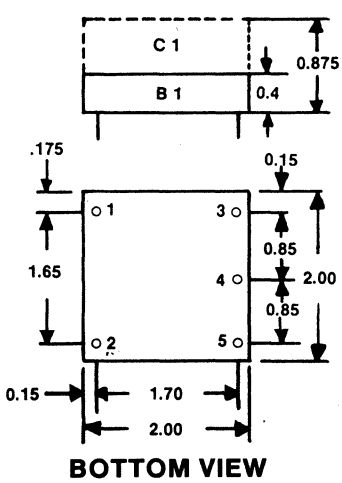
CASE B1, C1

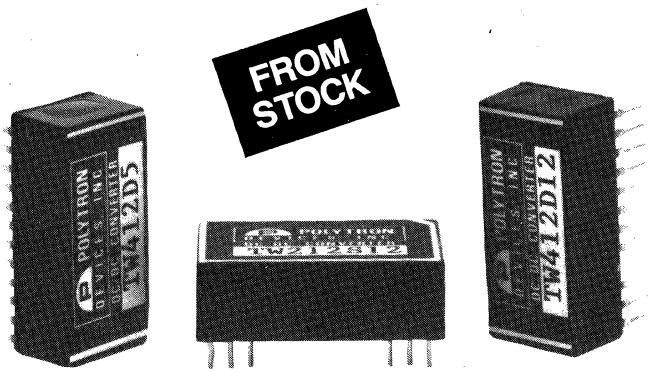


TW SERIES
1.8W-3W

REGULATED DC/DC CONVERTERS 24 PIN DIP

FEATURES:

- HIGH PERFORMANCE TT INPUT FILTER
- SINGLE AND DUAL OUTPUTS
- HIGHLY REGULATED ISOLATED OUTPUTS
- 100% BURN IN
- HIGH EFFICIENCY
- HIGH RELIABILITY
- NO EXTERNAL COMPONENTS



SPECIFICATIONS:

- **OUTPUT VOLTAGE STABILITY** 0.02%/°C Max.
- **OUTPUT VOLTAGE ACCURACY** ±5%
- **REGULATION** Line: ±0.5% Max. Load: ±1% Max.
- **RIPPLE AND NOISE** 50 mVP-P Max.
- **INPUT-OUTPUT ISOLATION** 500 VDC Min.
- **OPERATING TEMPERATURE** −25°C to + 71°C
- **STORAGE TEMPERATURE** −40°C to +100°C
- **EFFICIENCY** 55% Min.

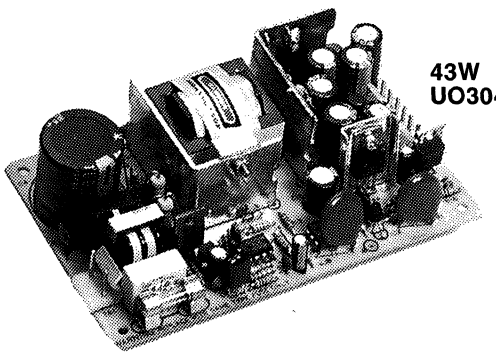
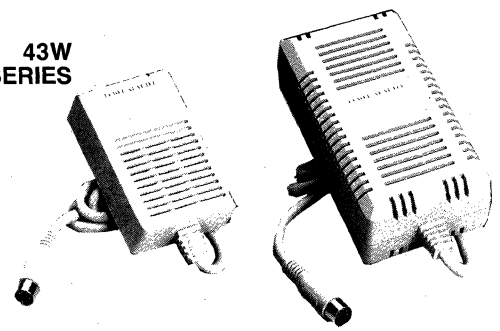
POTRANS

SWITCHING POWER SUPPLY SERIES



43W
UO3043x SERIES

43W
UP3043x SERIES



GENERAL SPECIFICATION:

Input voltage . . . . . 90VAC to 270VAC
Input frequency . . . . . 47Hz to 440Hz
Inrush current . . . . . 15A at 110VAC
30A at 230VAC
Operating temperature . . . . . 0°C to 50°C
Storage temperature . . . . . – 20°C to + 85°C
Temperature coefficient . . . . . ± 0.02°C
Efficiency . . . . . 73% Min
Cooling . . . . . Free air convection

Hold up time 20mS
Overvoltage protection rate . . . . . Crowbar
At main rated output + 15%
Overcurrent protection . . . . Hiccup at 150% load
Safety standard . . . . . UL 1950
CSA C22.2 NO 950
VDE EN60950
EMI . . . . . Meets FCC 15 class "B"
VDE 0871 class "B"

eem SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

Argentina (IRAM) Instituto Argentino de Racionalization de Materiales

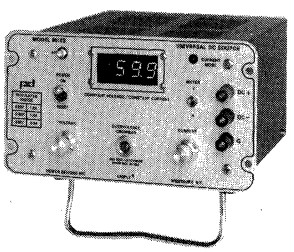
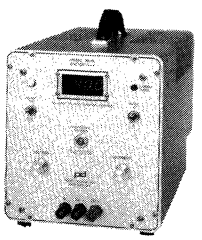
POWER DESIGNS

LABORATORY POWER SOURCES

SINGLE OUTPUT LABORATORY POWER SOURCES

- **Constant Voltage/Constant Current**
- **Digital Panel Meter Available**
- **Adjustable Overvoltage Crowbar**
- **1 Millivolt Peak To Peak Ripple**
- **5 Year Guarantee**
- **IEEE-488 Programmable***





These regulated DC power sources feature constant voltage/constant current operation with automatic crossover. A patented regulator technique trademarked "uniply" is utilized to provide operating features not obtainable with conventional dissapative regulator type circuits and constant output power characteristics not available in SCR or switching regulator systems. The regulator is RFI free and employs linear circuits only. No triacs, SCR's or switching circuits are used. Power output capability increases with increasing AC line voltage. Useful regulated output at reduced levels is available at line voltages as low as 85 volts.

Ten turn potentiometers for voltage and current controls are provided for high resolution. Metering is provided by means of an analog meter. An optional 3½ digit LED meter is available. The meter is switch selectable for either voltage or current monitoring. A front panel adjustable crowbar protects the load circuits against overvoltage conditions. An indicator lamp is activated when either the current mode function is in operation or the overvoltage crowbar fires.

Panel mounted binding posts are provided for ease of connection. The output terminals are floating with respect to the chassis permitting positive or negative output polarity. Rear terminals are provided for DC output, remote sensing and remote voltage and current programming by resistance. No derating of the output current is required when remote programming over the entire voltage range of the supply.

These power sources are housed in portable steel cabinets designed for bench use, stacking or rack mounting. Rack panel adaptors are available.

ELECTRICAL SPECIFICATIONS:
Input: 105-125 /210-250 VAC, 47-440 Hz

*With optional PD-488 controller.

POWER DESIGNS

LABORATORY POWER SOURCES

SINGLE OUTPUT LABORATORY POWER SOURCES

- **Voltage Regulated**
- **Adjustable Current Limiting**
- **Low Ripple & Noise**
- **Digital Panel Meter Available**

These regulated DC power sources feature constant voltage operation with continuously adjustable over current protection.

Stable, low noise DC power is provided through the use of linear regulator techniques. Continuously adjustable voltage controls provide better than 20 millivolt resolution. Adjustable current limiting is accomplished by means of a front panel mounted control. An overload lamp indicates when an overcurrent condition has occurred. Metering is accomplished by means of a dual scale analog meter. A 3½ digit LED meter is available as an option. The meter is switch selectable for either voltage or current monitoring.

The output terminals are floating with respect to the chassis permitting positive or negative output polarity. The output may be continuously shorted without damage to the power source. Panel mounted binding posts are provided for ease of connection.

DUAL OUTPUT LABORATORY POWER SOURCES

- **Constant Voltage/Constant Current**
- **Digital Panel Meters Available**
- **Adjustable Overvoltage Crowbar**
- **Low Ripple & Noise**

These regulated DC power sources feature constant voltage/constant current operation with automatic crossover. Independent voltage and current adjustment of each output is provided utilizing separate 10 turn potentiometers. Metering is provided by means of two separate meters. The meters are switch selectable for either voltage or current monitoring of each source. 3½ digit LED panel meters are available as an option.

Panel mounted binding posts are provided for ease of connection. The output terminals are floating with respect to each other and the chassis. This permits positive or negative output polarity and series operation. In addition the Model TW347D features a switch selectable tracking mode. When the switch is set for tracking, there is an internal connection between both outputs and source B tracks source A within 10 millivolts.

The Models TW347D and TW6050D include a front panel adjustable crowbar that protects load circuits against overvoltage conditions. An indicator lamp is activated when either the current mode function is in operation or the overvoltage crowbar fires.

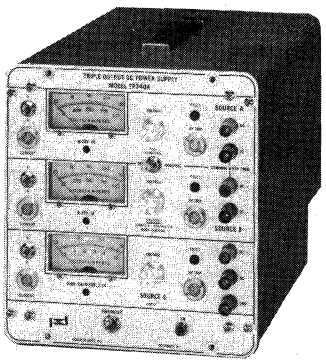
POWER DESIGNS

LABORATORY POWER SOURCES

TRIPLE OUTPUT LABORATORY POWER SOURCES

- **Voltage Regulated**
- **Adjustable Current Limiting**
- **Adjustable Overvoltage Crowbar**
- **1 MV Peak To Peak Ripple & Noise**
- **Automatic Voltage Tracking**



These triple output regulated DC power sources feature constant voltage operation with continuously adjustable over current protection. Stable, low noise, DC power is provided through the use of linear regulator techniques. Independent adjustment of each output is provided utilizing ten turn potentiometers for high resolution. Automatic voltage tracking of the A and B sources is accomplished by means of a panel mounted toggle switch. When the switch is set for tracking, source B tracks source A within 10 millivolts. This switch is equipped with a locking lever to prevent accidental actuation.

Individual current limit adjustments for each output and individually adjustable overvoltage crowbars are conveniently located on the front panel. Overvoltage protection for the A and B sources will trip simultaneously if either is triggered by an overvoltage condition. A fault indicator lamp on each output signals an overload, short circuit, or overvoltage condition.

Metering is provided by means of three separate dual range analog meters. The meters are switch selectable for voltage or current monitoring of each source.

MODEL	SOURCE	OUTPUT VOLTAGE	OUTPUT CURRENT	REGULATION	RIPPLE & NOISE
TP340A	A	0-32V	0-1A		
	B	0-32V	0-1A		
	C	0-15V 0-6V	0-2.5A 0-5A	.01%	1mv P-P

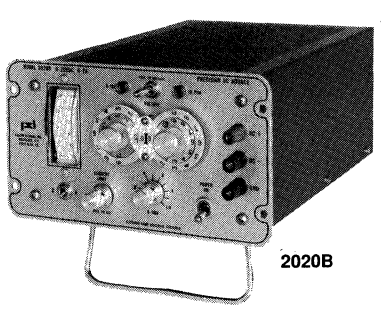
	B	0-25V 0-20V	0-1A 0-2.5A	.01%	1mv P-P
	C	0-15V 0-6V	0-2.5A 0-5A		

PRECISION CALIBRATED LOW VOLTAGE POWER SOURCES



2020B

• Two dual concentric switches (four decades) and a calibrated potentiometer provide digital readout to five significant figures • A toggle switch provides readout to six figures above 10 volts • Last-place potentiometer has 10 μV resolution • Source impedance is less than two milliohms at DC, less than 0.5 ohms at 1 MHz • Recovery times is less than 50 microseconds to return within a 20 millivolt band of the programmed voltage for an 80% load change • Front and rear access terminals.
• Better than 0.1% calibration accuracy • 10 PPM plus 100 μV stability for 8 hours • Temperature coefficient better than 10 PPM or 50 μV per °C • Self-restoring overload and short circuit protection with adjustable current limit control and flashing limit indicator • 100 μV maximum peak-to-peak ripple • Solid silver decade switch contacts • 100 hour minimum burn-in prior to calibration • Individual calibration data furnished with each unit • Provisions for remote sensing and remote resistance programming at 1000Ω/volt • Voltage or current metering.

Model	Range Volts	Current Amps	Regulation Line/Load	Max. Ripple Pk to Pk	Stability	TC Per °C	Size	Special Features

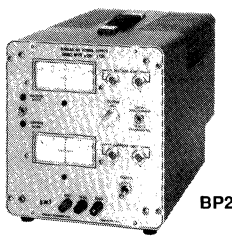
POWER DESIGNS

FOUR QUADRANT BI-POLAR PROGRAMMABLE POWER SOURCE

- **Constant Voltage**
- **Constant Current**
- **Adjustable Boundry Limits**
- **Low Ripple And Noise**
- **IEEE-488 Programmable**

These bi-polar power sources are regulated, four quadrant DC power supplies that can be adjusted or programmed from -100% to +100% of its range in both the voltage or current mode. The output passes smoothly and linearly through zero automatically without the need for polarity switching. The supply is either a source or sink for up to 100% of its current rating at any output voltage setting. Provisions are made for both local and remote programming of the output. In the local programming mode the output voltage and current are controlled by a front panel mounted 10 turn potentiometer. A remote programming feature allows the output to be controlled by either an external voltage or current source or by means of an external potentiometer. The power supply can also be programmed by an optional external IEEE-488 controller. Remote programming inputs are located on the rear of the unit. Linear regulator techniques are employed to ensure a low noise output free from RFI and switching spikes.

The power supply is bounded in all four quadrants by four individually adjustable limit controls located on the front panel.



BP20

This allows the voltage and current limits to be preset in both the positive and negative polarity. Two LED's are provided to indicate when the voltage limit or current limit set points have been reached.

Metering is provided by means of two separate zero center analog recessed panel meters. One indicates the output voltage and the other indicates output current. Meter accuracy is +/ - 2%.

Panel mounted binding posts are provided for DC output to allow for ease of connection. A rear terminal strip provides screw terminals for DC output, remote sensing and remote programming connections. The output terminals are floating with respect to the chassis to allow the output to be isolated from ground.

Input (All Models): 105- 125 / 210-250 VAC, 47-440 Hz

*With optional PD-488 controller.

MODEL	OUTPUT		REGULATION		RIPPLE & NOISE	
	VOLTAGE	CURRENT	VOLTAGE	CURRENT	VOLTAGE	CURRENT
BP-20	- 20V TO +20V	- 10A TO +10A	.01%	.01%	1MV RMS	.03% RMS

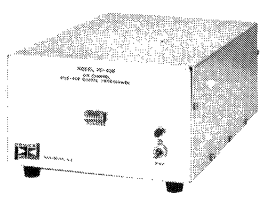
BP-100	- 100V TO +100V	- 2A TO +2A	.01%	.01%	1MV RMS	.03% RMS

IEEE-488 INTERACTIVE DIGITAL PROGRAMMER

MODEL PD-488

- **Interfaces With GPIB Buss Per IEEE-488/1978 Standard**
- **Six channels Of Control**
- **Program By Voltage Or Resistance**
- **Logic Controllled Outputs Can Control Relays, Alarms, Etc.**
- **Can Report Instantaneous Operating Conditions Of Each Channel**
- **Use With Any Power Designs Supply**

The Power Designs Model PD-488 interactive interface gives the user flexible control of up to six Power Designs power supplies with remote voltage or resistance programming capability. It is a "talker/listener" system that can be used to control a single power supply or a multiple power supply system. Its six channels allow any computer with an IEEE-488 port to control up to six independent functions. It also enables the power supply to respond with its instantaneous operating conditions. An optional resistance programming pack is available to control the output of resistance programmed power supplies. This controller complies with the IEEE-488/1978 standard data bus (GPIB). Standard ASCII character strings are used to communicate with the controller.



PROGRAMMABLE FUNCTIONS (LISTENING)

Each of the six voltage control channels can be used to program one function of a supply such as the output voltage, the current limit, or the overvoltage trip point setting. Channels can be grouped to allow the control of multiple functions on several supplies. For example, if one channel per supply is used, one function on six supplies may be controlled. If two channels per supply are used, then two functions on three supplies may be controlled. If three channels per supply are used, then three functions on two supplies may be controlled. A digital interface port with eight logic controlled outputs is provided which can be used to actuate relays, alarms, or other functions.

TALKING FUNCTIONS

If requested, the controller can measure and report the instantaneous output voltage or current levels back to the host computer. The host computer may then reformat this data and send it to any other IEEE-488 peripheral such as a plotter or printer. Eight TTL compatible inputs allow the state of external flags to be reported.

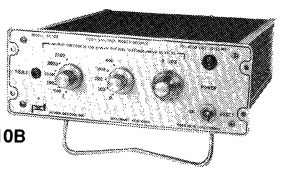
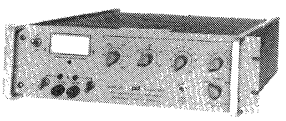
PRECISION CALIBRATED HIGH VOLTAGE POWER SOURCES

- **0.25% Calibration Accuracy**
- **Low Ripple & Noise**
- **High Stability/ Low TC**
- **Overlaod Protection**
- **1 Year Guarantee**



3K10B



1570

These calibrated laboratory high voltage DC power sources are ideally suited for applications requiring high stability, low noise and superior regulation. Output voltage control is achieved by means of a series of front panel mounted decade switches and a continuously adjustable calibrated vernier potentiometer control. Calibration accuracy is better than 0.25% of the dial settings above 250 volts and 1.0% below 250V.

Long term stability is better than .005% per hour; less than .02% per 24 hour period for all models except the 3K10B which is .01% per hour or .03% per 24 hour period.

Current limiting is provided which permits continuous operation into an overload or short circuit condition without damage to the power source. In addition the Models 3K10B, 2K100 and 3K75 feature overvoltage protection which acts to disable the high voltage output in the event of an internal or external malfunction.

Metering is provided by a dual scale analog meter which permits voltage or current monitoring on all models except the 3K10B.

Meter function is selected by a front panel mounted spring returned toggle switch. This switch is normally in the KV position to prevent damage to the meter in the event of an overcurrent or short circuit condition.

Two high voltage output connectors mounted on the rear of each unit are connected in parallel. A rear panel warning indicator lamp is illuminated when these connectors are energized with the exception of the Model 3K10B.

These power sources are designed for bench use, stacking or rack mounting. A tilting bail is provided on the Model 3K10B for ease of viewing when the unit is used on a bench. Rack panel adaptors are available for the 3K10B.

ELECTRICAL SPECIFICATIONS: Input (All Models): 105-125 VAC, 47-440 Hz
210-250 VAC, 47-440 Hz available on most models.

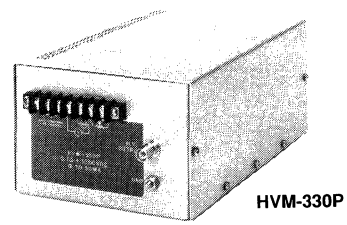
MODULAR HIGH VOLTAGE POWER SOURCES

- **IEEE-488 Programmable***
- **Low Ripple and Noise**
- **High Stability/Low TC**
- **Current Limiting**
- **Overvoltage Protection**
- **Positive or Negative Polarity Available on all Models**



HVM-330P

The UPMD series are modular high voltage power sources of high stability and low noise designed for critical applications where remote panel adjustment of the output is required. It is ideal for such typical applications as amplitude control of photomultiplier output, proportional detectors, focus control of cathode ray tubes, ion guns or electrostatic lenses.

The UPMD series achieves its compact size and light weight through the use of efficient high frequency inverter techniques.

Remote control of the output voltage is achieved by means of an external potentiometer operating at low potentials with respect to ground. Output voltage resolution is a function of this external control. An option is available for remote voltage control of the output at any desired input/output voltage ratio, making the UPMD series suitable for digital programming with an external digital/analog converter.

Propriety protection circuits, electronic current limiting and tracking overvoltage protection are incorporated to prevent damage to the supply or its load in the event of an overload, short circuit or overvoltage condition. The tracking overvoltage circuit operates to shut down the high voltage output electronically if a malfunction results in an output voltage or transient approximately 500 volts over the preset output level. An internal 1% multiplier permits connection of an external microammeter to monitor output voltage, if desired. The high voltage output is available at a "Safety High Voltage" BNC receptacle (SHV).

When ordering, add suffix "P" for positive output or suffix "N" for negative output polarity.

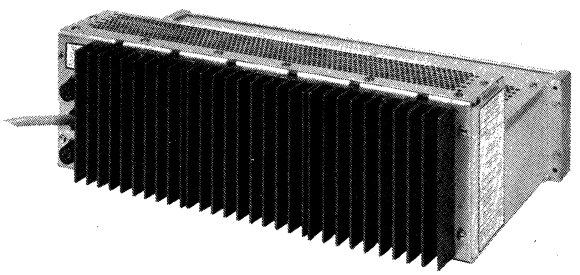
POWER SUPPLIES FOR NUCLEAR INSTRUMENTATION

AEC-320-9 ±6V/±12/±24V

The Power Designs Model AEC-320-9 conforms to or exceeds the requirements of a Type V-H Power Supply per TID-20893 (Rev. 4).

The equipment provides six regulated outputs: ±6 VDC at 10 amperes, current shared, ±12 VDC at 4 amperes, current shared (maximum 3 amperes from either source) and ±24 VDC at 2 amperes current shared (maximum 1.5 amperes from either source). 117 VAC at 0.5A is available when the supply is operated on 234 VAC, 50-65 Hz. The total power capacity is 150 VA with equally shared currents and 130 VA with unbalanced load currents.



Built-in overvoltage crowbars are provided on the ±6 volt outputs.

Modifications of the output voltage and current levels of the Model AEC-320-9 are available on special order. Call the factory for details.

AEC-315B 10-3000V/10 mA

The Model AEC-315B is a calibrated DC source designed for use with photomultipliers or solid state detectors requiring high stability, low noise and food regulation. It mounts in a standard 8 3/4" NIM Bin and occupies two module widths. It is supplied with an integral NEMA 3-wire line cord and does not use the Bin Power Supply.

Input: 102-129 VAC, 47-440 Hz, 65 watts.
Calibration Accuracy: 0.25% of the dial settings from 500-3000 volts.
Resolution: 50 millivolts (10-turn vernier potentiometer with 100 volt range).
Noise and Ripple: 3 millivolts peak-to-peak to 15 MHz.
Regulation: .001 or 3 millivolts, whichever is greater, for line or load variations.

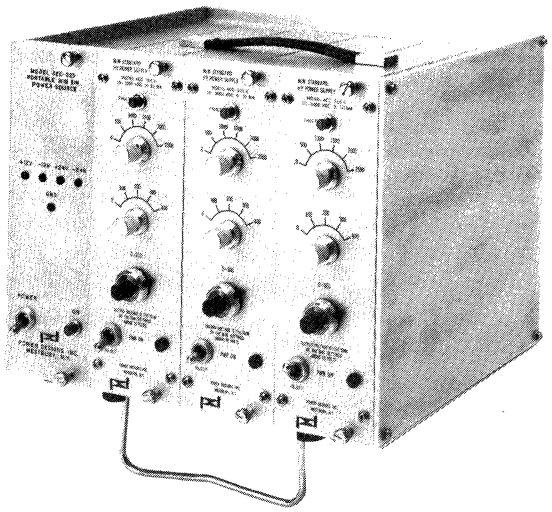
POWER DESIGNS

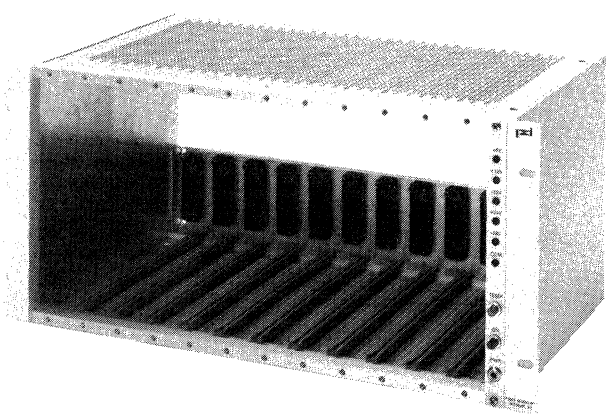
BINS FOR NUCLEAR INSTRUMENTATION

MODEL AEC-200 MINI-BIN



The Model AEC-200 is designed to accomodate up to 6 standard NIM modules in a convenient bench top configuration. It features a plug in power source that supplies ±12V @ 1A and ±24V @ 0.6A to the six rear mounted connectors wired in accordance with TID-20893. A top mounted handle is furnished for portability and a tilting bail is provided for ease of viewing when the unit is used on the bench.

MODEL AEC-100 NIM-BIN



The Model AEC-100 is a full sized Nuclear Instrumentation Bin in accordance with AEC TID-20893. It contains guide rails and connectors to accomodate up to 12 standard nuclear Instrument Modules. All of the rear connectors are wired in parallel for ±6V, ±12V, ±24V and 115VAC. A control panel with an on-off switch, power indicator lamp, temperature warning lamp and a voltage monitoring test point for each output is provided.

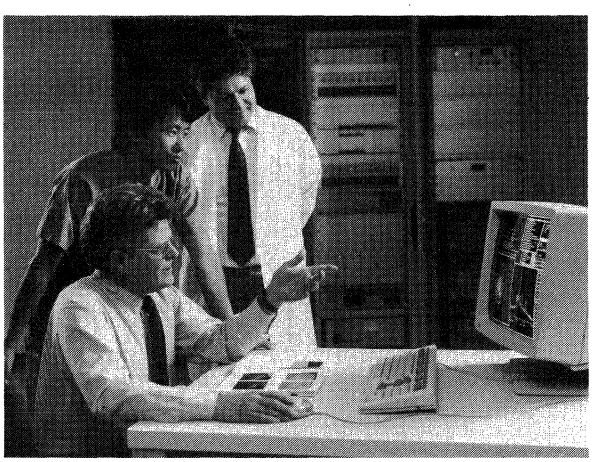
Don't be caught powerless! Power Designs specializes in the design and manufacture of power supplies custom made to your electrical and mechanical specifications. From single output linears to multiple output switchers, we can fulfill your particular needs.

An application engineer will review your requirements. We will work with you to determine your technical needs. A written proposal will be prepared to assure you that the power supply will conform to your specifications. Blanket orders with scheduled delivery releases can be arranged to suit your inventory and shipping requirements.

POWER SUPPLIES FOR MEDICAL INSTRUMENTATION AND IMAGING

POWER SUPPLIES FOR:

- **MRI Systems**
- **C-T Scanners**
- **Mobile X-Ray Systems**
- **Blood Analyzers**
- **Electrophoresis**
- **Life Support Systems**



A leader in power supply technology, Power Designs has been selected as a source of D.C. power supplies by major manufacturers of medical instrumentation. We provide custom designed and manufactured products to customer's exact electrical and mechanical specifications for diagnostic and patient connected applications. Conformance and listing to UL187 and UL544 can be obtained when required.

Some of the diverse applications for our products are power supplies for mobile X-Ray systems, C-T Scanners, Blood Analyzing Instruments and DNA Analyzers. We also manufacture programmable bi-polar power sources for MRI systems to drive both shim coils and gradient coils.

Call us about your power supply requirements. Our Engineering staff will work with you to develop a power source to fulfill your needs. You will find that our pricing is extremely competitive. Blanket orders with scheduled deliveries can be arranged.

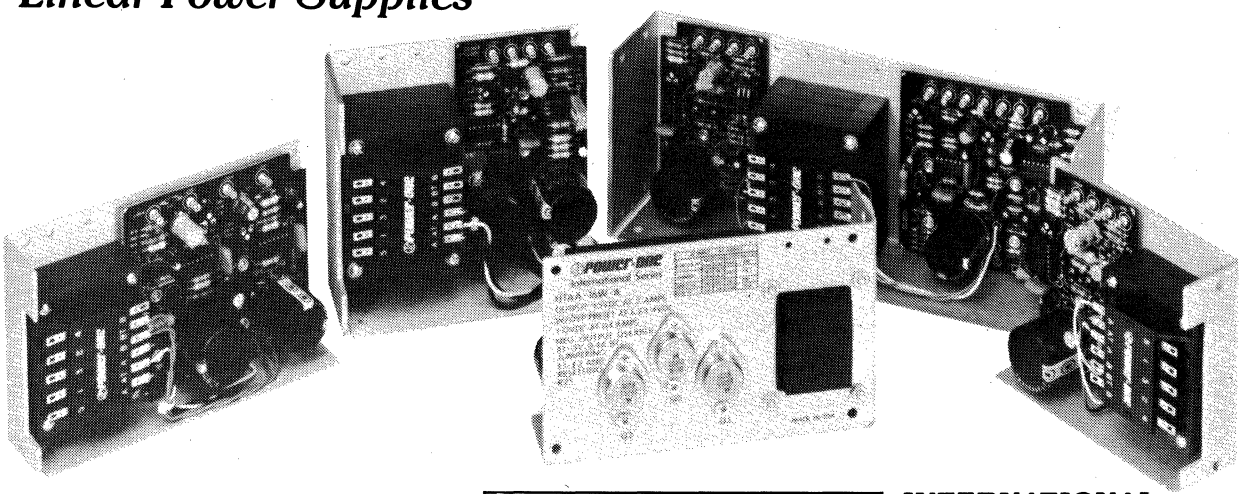
International Series

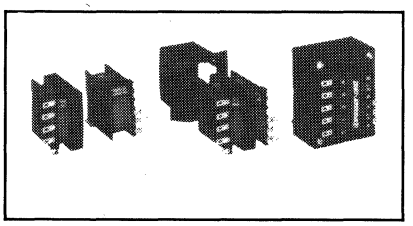
Linear Power Supplies

THE NEW WORLD STANDARD IN D.C. POWER SUPPLIES



FEATURES

- VDE TRANSFORMER CONSTRUCTION
- WORLDWIDE AC INPUT CAPABILITIES 100/120/220/230/240 VAC
- MEETS DOMESTIC AND FOREIGN SAFETY STANDARDS - UL, CSA, IEC, VDE, BPO, ECMA, CEE
- INDUSTRY STANDARD PACKAGES



INTERNATIONAL TRANSFORMER CONSTRUCTION

Power-One's patented International Series transformers feature separate, fully enclosed, primary and secondary coils. Meets safety requirements of VDE, UL, CSA, BPO, IEC, CEE, and ECMA.

DESCRIPTION

POWER-ONE's new International Series is the first and only high reliability D.C. power supply series designed for products sold throughout the world's major electronics markets.
The International Series can be used anywhere, for almost any application. It meets the most important safety requirements of UL, CSA, IEC, VDE, BPO, ECMA, and CEE. Also, each unit provides the AC input ranges needed for worldwide operation: 100, 120, 220, 230, and 240 volts, 47 to 63 Hz. This multi-range input capability reduces customer inventory and service requirements since only one standard off-the-shelf power supply is needed, regardless of the product's final destination. These are exclusive features of the International Series, and are not available on any competitive standard model.

In an effort to meet the world's toughest safety regulations, POWER-ONE achieved a technological breakthrough in power transformer design. Our new patented winding process features separate, fully enclosed primary and secondary windings. This unique construction complies with the most respected regulatory safety agency specifications, worldwide.
The end result is that product acceptance throughout the world is greatly simplified for domestic and foreign equipment manufacturers. The International Series power supplies comply with the major body of regulatory safety agencies responsible for product safety in virtually all of the major world markets. Its compatibility with world safety standards, combined with dramatically increased flexibility, results in far greater potential for international acceptance of your products.

MEETS SAFETY AGENCY REQUIREMENTS THROUGHOUT THE WORLD

Why compliance is so important!
For years electronic equipment manufacturers have found that safety requirements for most of the world's electronics markets are significantly different than those established in the USA by Underwriters Laboratories (UL). Also, there is little consistency in the requirements among the world's regulatory safety agencies. This has created almost impossible compliance problems for designers who are developing products for worldwide distribution.
Recognizing this dilemma, POWER-ONE initiated an extensive R&D program aimed at producing the first D.C. power supply line that truly meets the world's toughest safety requirements. The innovative new International Series – the solution to the difficult problem of gaining worldwide acceptance for your products.

SAFETY AGENCIES WORLDWIDE

The following regulatory agency specifications have gained industry-wide acceptance as the most important to comply with when designing products for the world's major electronics markets. The International Series meets or exceeds the leakage current, creepage distance, and dielectric withstand test requirements of these safety agency specifications:

UL 1012	CSA 22.2 No. 154	IEC 435 Class I	VDE 0730 Part 2P Class II	BPO Tech. Guide No. 26	CEE-10 Part 2P Class I
UL 478	IEC 380 Class I	IEC 435 Class II	VDE 0804 Class I	ECMA-57 Class I	CEE-10 Part 2P Class II
CSA 22.2 No. 143	IEC 380 Class II	VDE 0730 Part 2P Class I	VDE 0804 Class II	ECMA-57 Class II	

INTERNATIONAL SERIES DESIGN STANDARDS:

Leakage Current, Line to Ground: 0.05mA Max.

Safety Spacings, Live Parts to Dead Metal: 9.0 mm

Dielectric Withstand Voltage,
Input to Ground: 3750 VAC
Input to Outputs: 3750 VAC
Outputs to Ground: 300 VDC

Linear Power Supplies

MEETS INTERNATIONAL SAFETY REQUIREMENTS THROUGHOUT THE WORLD

SPECIFICATIONS

AC Input: 100/120/220/240 VAC +10% −13%. 47-63 Hz.Tolerance for 230 VAC operation is +15%, −10%. Derate output current 10% for 50 Hz operation.

DC Output: See Voltage/Current Rating Chart. Adjustment range ±5% minimum.

Line Regulation: ±.05% for a 10% line change.

Load Regulation: ±.05% for a 50% load change.

Output Ripple: 5V through 15V models: 5.0 mV PK-PK maximum; 24V and 28V models: 0.2% PK-PK maximum.

Transient Response: 50μ seconds for a 50% load change.

Short Circuit and Overload Protection: Automatic current limit/foldback.

Overvoltage Protection: Provided on 5V outputs where indicated. Set at 6.2V ±0.4V. Other outputs use optional overvoltage protectors OVP-12 and OVP-24.

Stability: ±0.3% for 24 hours after warm-up.

Temperature Rating: 0°C to 50°C full-rated, derated linearly to 40% at 70°C.

Temperature Coefficient: .01%/°C typical, .03%/°C maximum.

Efficiency: (typical)
5V outputs: 45%
12V and 15V outputs: 55%
24V and 28V outputs: 60%

Vibration: Per MIL-STD-810C, Method 514, Procedure X

Shock: Per MIL-STD-810C, Method 516, Procedure V

EMI/RFI: These linear power supplies have inherently low conducted and radiated noise levels. For most system applications they will meet the requirements of FCC Docket 20780 for Class A equipment and VDE 0871 for Class A equipment without additional noise filtering.

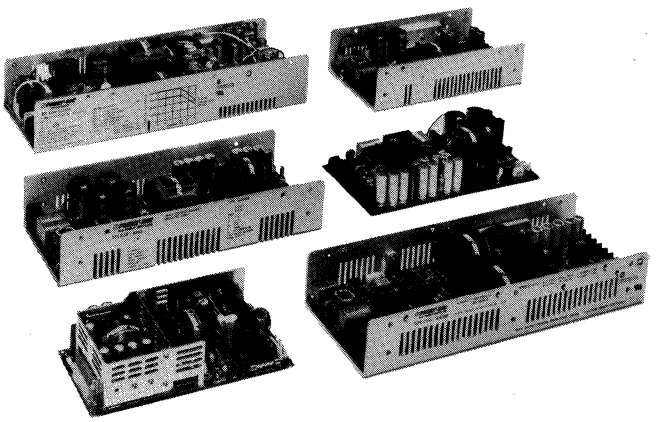
INTERNATIONAL SERIES SWITCHING POWER SUPPLIES

SINGLE AND MULTIPLE OUTPUT MODELS, WITH WORLDWIDE CAPABILITIES

FEATURES

- INDUSTRY'S BEST COST PER WATT RATIO
- HYBRID CONTROLLERS FOR INCREASED RELIABILITY
- 26 NEW MODELS . . . 125 TO 400 WATTS
- WORLDWIDE AC INPUT, 90-132/180-264 VAC, USER-SELECTABLE
- UP TO 75% EFFICIENCY
- HIGH POWER DENSITY
- MOV INPUT TRANSIENT PROTECTION
- UP TO 5 FULLY REGULATED OUTPUTS
- VDE CONSTRUCTION
- MEETS DOMESTIC AND INTERNATIONAL SAFETY:
  3750 VAC ISOLATION
  VDE SAFETY SPACINGS
- MEETS DOMESTIC AND INTERNATIONAL EMI:
  FCC DOCKET 20780 CLASS A
  VDE 0871/6.78 CLASS A
- FULL LOAD BURN-IN AND THERMAL CYCLING
- 2 YEAR WARRANTY
- MADE IN U.S.A.



DESCRIPTION

The International Series switch-mode power supplies incorporate the latest state-of-the-art switching technology while providing POWER-ONE's traditional high quality at low prices.

The International Series offers an initial selection of 26 new standard models, available in either fully regulated or quasi-regulated configurations. Also, any standard model can be modified to meet special electrical or mechanical requirements depending on the user's particular needs. These features allow optimization to the user's specific application, resulting in the most cost-effective approach possible.

These versatile new models offer the most popular voltage and current combinations required by today's applications. They are ideally suited for CAD/CAM and CAE systems, minicomputer workstations, computer peripherals, and general purpose use.

Plus, each offers the finest features of switching power supply technology including high efficiency, low heat dissipation, small size, and simple construction.

In addition, the International Series offers the benefit of being designed for products sold in the world's major electronics markets. They operate on virtually any mains voltage, from 90 to 264 VAC, 47 to 63 Hz. And, as with all POWER-ONE switchers, they meet the World's toughest safety agency requirements and represent POWER-ONE's true "World Market" design philosophy. This results in easier and faster acceptance for our customers' end products when marketed not only in the U.S., but internationally as well.

SPL40-1024	24-28V	1.6A/1.4A	±0.2%	±1%	$ 95.00
SPL53-1024	24-28V	3.3A/2.8A	±0.2%	±1%	$120.00
SPL130-1024	24-28V	5.5A/4.5A	±0.1%	±1%	$170.00
SPL250-1024	24-28V	10A/9A	±0.1%	±1%	$270.00

NOTES

A. Voltage level adjustable from 4.75V to OVP trip point.
B. Fully regulated output, voltage fixed (3 terminal regulator).
C. Quasi-regulated output.
D. Fully regulated output, voltage adjustable ±5% minimum.
E. The sum of the main +5V and AUX 1 load currents must not exceed 30A.
F. The sum of the main +5V and AUX 1 load currents must not exceed the main +5V current rating.
G. Maximum load is 10A or 120W.
H. The sum of the main +5V and AUX 1 load currents must not exceed 50A.

NOTES

A. Voltage level adjustable from 4.75V to OVP trip point.
B. Fully regulated output, voltage fixed (3 terminal regulator).
C. Quasi-regulated output.
D. Fully regulated output, voltage adjustable ±5% minimum.
E. The sum of the main +5V and AUX 1 load currents must not exceed 30A.
F. The sum of the main +5V and AUX 1 load currents must not exceed the main +5V current rating.
G. Maximum load is 10A or 120W.
H. The sum of the main +5V and AUX 1 load currents must not exceed 50A.

GENERAL INFORMATION

HOW TO ORDER

Contact your local POWER-ONE Distributor or Representative for immediate order placement or price and delivery information. Please refer to POWER-ONE's Distributor and Representative listing for the office nearest you.

For Factory direct orders or assistance, please contact us direct:

POWER-ONE D.C. POWER SUPPLIES
740 Calle Plano
Camarillo, California 93012-8583
(805) 987-8741 or (805) 987-3891
TWX: 910-336-1297
FAX: (805) 388-0476
Call Toll Free: (800) 678-9445

DELIVERY

POWER-ONE and its Distributors maintain large inventories of standard power supplies for immediate shipment. Most orders are shipped from stock within 24 hours.

DISCOUNTS

POWER-ONE offers liberal discounts to quantity buyers, with OEM contracts available. Consult POWER-ONE or your local POWER-ONE Representative for a prompt quotation.

QUOTATIONS

Inquiries are welcome concerning custom power supplies or modifications to our standard models. Furnish POWER-ONE or your local POWER-ONE Representative with complete specifications including quantity and delivery information.

APPLICATION ENGINEERING ASSISTANCE

POWER-ONE's applications engineers are always available to assist you in selecting the best approach to your specific requirements. For technical information on Standard Catalog items or applications assistance on your special custom requirements, just contact POWER-ONE or your local factory Representative.

SPECIAL APPLICATIONS

CUSTOM DESIGNS

POWER-ONE is an experienced manufacturer of custom designed power supplies for high-quantity applications requiring special electrical and mechanical configurations.

For applications where POWER-ONE's standard models or FLEX-Series models are not suitable we will supply a custom designed product to your exact specifications.

POWER-ONE's Application Engineers are always available to assist you in selecting the most cost-effective approach to your custom power supply requirements.

Contact POWER-ONE or your local factory Representative for details.

MODIFIED STANDARD PRODUCTS

Upon request, any of POWER-ONE's standard power supplies may be modified to meet special requirements. For example, these modifications may involve DC output voltages or current, AC input characteristics, chassis components, mounting facilities, markings, harnesses and connectors.

WARRANTY

POWER-ONE warrants each power supply of its manufacture that does not perform to published specifications, as a result of defective materials or workmanship, for a period of two (2) full years from the date of original shipment. This warranty is honored at our factory in Camarillo, California, provided the defective product is returned freight prepaid.

POWER-ONE assumes no liabilities for consequential damages of any kind through the use or misuse of its products by the purchaser or others. No other obligations are expressed or implied.

FEDERAL MANUFACTURER'S IDENTIFICATION (FSCM): No. 54407

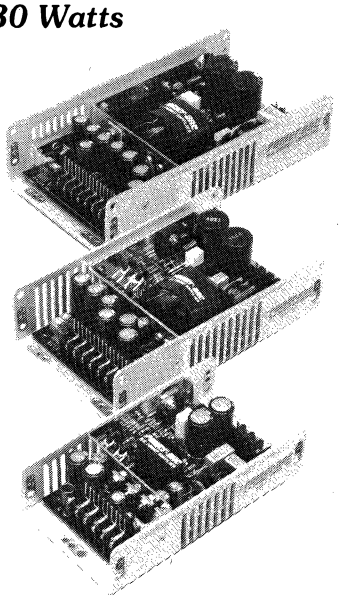
International Series - Map Series

Multiple Output Switch-Mode Models – 55 Watts to 130 Watts

FEATURES

- AUTOMATIC SELECTING AC INPUT: 90-132/175-264 VAC, 47-63 HZ
- ALL OUTPUTS FULLY REGULATED
- MEETS DOMESTIC AND INTERNATIONAL SAFETY: 3750 VAC ISOLATION • VDE SAFETY SPACINGS
- UNIVERSAL TERMINAL BLOCK CONNECTORS
- UNIVERSAL MOUNTING SYSTEM
- HIGH POWER DENSITY, UP TO 2.2 WATTS/CUBIC INCH
- MOSFET SWITCHING TECHNOLOGY
- RUGGED WRAP-AROUND CHASSIS
- 105°C RATED STORAGE CAPACITORS
- 75% TYPICAL EFFICIENCY
- PLATINUM BARRIER SCHOTTKY RECTIFIERS
- CONVECTION COOLED
- THERMAL SHUTDOWN WITH WARNING
- UL RECOGNIZED, CSA CERTIFIED
- MEETS DOMESTIC AND INTERNATIONAL EMI: FCC 47CFR, PART 15, LEVEL B • VDE 0871 LEVEL B
- INTERNAL INPUT LINE FILTER
- POWER-FAIL WARNING SIGNAL
- FULL LOAD BURN-IN AND THERMAL CYCLING
- 2 YEAR WARRANTY



DESCRIPTION

The versatile new MAP Series switch-mode DC power supplies represent the latest offering in POWER-ONE's industry-acclaimed International Series. A wide variety of exceptional performance features, including Automatic Selecting AC Input, Universal Terminal Block Connectors and Universal Mounting Facilities, provide outstanding application flexibility and make integration into the end product convenient and trouble-free. In addition, the advantages of convection cooling and 100% fully regulated DC outputs assure reliable, long-term performance in virtually any application.

Designed for a broad range of applications requiring precision regulated DC voltage sources, the MAP Series is ideally suited for computer peripherals, displays, telecommunication devices, as well as general purpose use. The industry's most popular voltage and current combinations are available in power levels from 55 watts to 130 watts. Each model includes a high-capacity main output to accommodate today's 5 volt logic, while fully regulated auxiliary outputs provide the high surge-current required by disk-drives and similar devices. Also, each model offers the finest features of switch-mode technology including high efficiency, low heat dissipation, small size, and simple construction.

Finally, each MAP Series model has received certification to the world's toughest safety agency requirements including VDE, IEC, UL and CSA. The conducted emissions limits of FCC 47CFR, Part 15, Level B; and VDE 0871 Level B are also met. The result is greater acceptance for products marketed not only domestically, but internationally as well.

C. Fully regulated output, voltage fixed.

ELECTRICAL SPECIFICATIONS

AC Input: Automatic selecting dual range: 90-132 VAC or 175-264 VAC. 47-63 HZ single phase. NOTE: AC input range selection is fully automatic. No manual switchover is required.

DC Outputs: See Voltage/Current Rating Charts.

Output Power: See Voltage/Current Rating Charts.

Peak Output Power: See Voltage/Current Rating Charts. Peak power capability is recommended for short term operation only. Contact POWER-ONE for technical assistance on specific applications.

Brown-Out Protection: Regulation is maintained down to 90/175 VAC, at full rated load, with no compromise in performance.

Hold-Up Time: 20 msec minimum at full rated load and nominal AC input voltage. Hold-up time increases to 40 msec at 50% load.

Power-Fail Warning Signal: TTL compatible signal goes low before the main +5V output drops 5%, at full rated load. Minimum warning time: MAP80: 5 msec MAP130: 2.5 msec Warning time increases at reduced load levels.

Efficiency: Measured at full rated load and nominal AC input voltage. 75% ±5% depending on how the load is distributed among the outputs.

Regulation Characteristics: See Voltage/Current Rating Charts for individual model ratings.

Measurement method: LINE: Measured over a 90-132 VAC or 175-264 VAC line change. LOAD: Measured over a 20% to 100% load change.

Initial Setting Tolerance: Measured at 50% of full rated load on all outputs.

Minimum Load: MAP130 series models only. A 3A minimum load is required on the main +5V output for full load capability on auxiliary outputs.

Remote Sensing: Provided on the main +5V output. MAP130 series models only.

Output Noise and Ripple: 0.3% RMS, 1% PK-PK maximum on main +5V output.

Transient Response: Main +5V output: 500 µsec typical for a 50-100% load change and recovery to within 1% of initial voltage set point. Maximum excursion: 4% from initial voltage set point.

Overload Protection: Fully protected against output overload and short circuit. Automatic recovery upon removal of overload condition. Delayed-foldback current limiting characteristics assure reliable turn-on into reactive and non-linear loads. Provided on MAP130 series models.

Overvoltage Protection: Provided on the main +5V output. Set at 6.2V ±0.6V.

Overtemperature Protection: Initiates shutdown in the event of an overtemperature condition. Automatic reset. Power-Fail Warning Signal is initiated prior to shutdown. Provided on MAP130 series models.

Power-Up Initialization Period: Typical 0.3 sec turn-on delay assures orderly ramp-up and stabilization of all output voltages during power-up.

Input Protection: AC input line fuse provided.

Internally located.

Inrush Current: Internally limited by thermistor.

Temperature Rating: OPERATING: 0°C to +50°C at full rated output power. Consult factory for operating information between +50°C to +70°C. STORAGE: -55°C to +85°C.

Temperature Coefficient: ±0.03%/°C typical, ±0.05%/°C maximum over entire operating temperature range of 0°C to +70°C.

Cooling: Convection cooling is adequate where non-restricted air flow is available. When operating in a confined area, forced air cooling is recommended.

Vibration: Per MIL-STD-810D, Method 514.3, Category 1, Procedure I.

Shock: Per MIL-STD-810D, Method 514.3, Procedure III.

SAFETY SPECIFICATIONS

The International Series meets the safety requirements of the world's most respected regulatory safety agencies. All models exceed the following safety standards:

Leakage Current: Line to Ground (max.): 500 µA

Safety Spacings: 8.0 mm minimum between primary and secondary circuitry. 4.0 mm minimum between primary and grounded circuitry.

Dielectric Withstand Voltage (min.): Input to Ground: 3750 VRMS; Input to Outputs: 3750 VRMS; Outputs to Ground: 700 VDC. Consult POWER-ONE for testing methods.

UL RECOGNIZED: UL File Number E55974

CSA CERTIFIED: CSA File Number LR38879

TUV Essen Certified: TUV certified to meet the requirements of VDE 0805, VDE 0806, IEC 380, IEC 950, and EN60950.

EMI SPECIFICATIONS

All International Series models are equipped with internal line filtering which allows compliance to the conducted emisson limits of FCC 47CFR, Part 15, Level B; and VDE 0871 Level B.

FREQUENCY RANGE	150KHZ-450KHZ	450KHZ-30MHZ
INTERNATIONAL SERIES DESIGN STANDARDS	<52dBµV	<46dBµV
AGENCY LIMITS—CLASS B

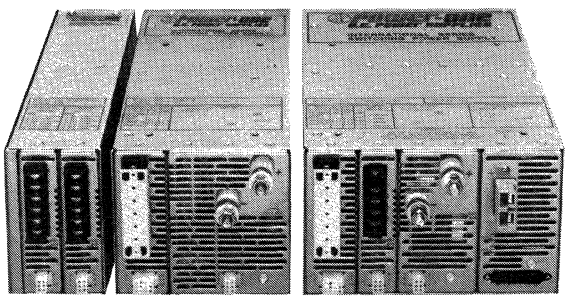
International High Power Series

500 to 1500 Watt Multiple Output Modular Power Systems

FEATURES

- FULLY MODULAR CONSTRUCTION
- UP TO 15 FULLY REGULATED OUTPUTS...2V THRU 48V
- WORLDWIDE AC INPUT: 90-132/180-264 VAC, 47-440 HZ, FIELD SELECTABLE
- 100% SWITCH-MODE OUTPUTS
- MOSFET SWITCHING TECHNOLOGY
- CURRENT-MODE CONTROL
- PARALLELABLE OUTPUTS WITH CURRENT SHARING
- UPS BATTERY BACKUP OPTION
- 48 VDC INPUT OPTION
- 300 VDC INPUT OPTION
- HIGH RELIABILITY HYBRID CONTROLLERS
- BALL BEARING DC FAN
- EXTENSIVE SYSTEM INTERFACE FEATURES
- TUV CERTIFIED TO: VDE 0806, IEC 435, IEC 380, IEC 950, EN60 950
- MEETS FCC AND VDE EMI LIMITS
- UL RECOGNIZED, CSA CERTIFIED
- 24 HOUR FULL LOAD BURN-IN AND THERMAL CYCLING
- 2 YEAR WARRANTY
- MADE IN U.S.A.



500 WATTS SPM2 **1000 WATTS SPM3** **1500 WATTS SPM5**

DESCRIPTION

POWER-ONE'S International High Power Series is a unique concept in system-oriented power supply technology using fully modular construction to achieve the highest degree of application flexibility available today. The series offers an extraordinary variety of standard performance features and options in a true off-the-shelf standard product line.

A NEW INDUSTRY STANDARD. Using the very latest MOSFET switching technology along with thick-film hybrid circuitry and a power density of up to 3.4 watts per cubic inch, the International High Power Series has clearly defined the standard for high power modular power systems. Offered by the industry leader in value and performance, the Series provides a cost-effective solution to today's as well as future power requirements.

SPECIFY UP TO 15 OUTPUTS...FROM STOCK. Fully modular design allows user to specify a proven multiple output power system from a wide selection of single, dual and triple output plug-in power modules. Virtually any combination of output voltage and current ratings, including UPS and DC input capabilities, can be delivered from stock, thereby avoiding the traditional time consuming and costly custom design process.

APPLICATION FLEXIBILITY. All outputs are completely independent and floating, and can be configured for either output polarity. The outputs use fully isolated MOSFET switching regulators to achieve high conversion efficiency with minimal size and weight. In addition, the design incorporates the latest current-mode control techniques to achieve precise current sharing when operating outputs in parallel for increased output current capability or redundancy.

ON-BOARD UPS CAPABILITY. Only POWER-ONE offers a completely self-contained on-board UPS module providing unlimited battery backup of up to 1000 watts of DC output power. Available off-the-shelf, these standard UPS modules mount entirely within the main power system enclosure. Also, a 48V DC input option is available for true high power DC-DC converter operation. Available for models SPM2 and SPM3.

TRUE FAULT-TOLERANT SYSTEM OPERATION. This important feature can easily be achieved by using POWER-ONE's standard on-board UPS module (G5) in conjunction with parallel connected output modules. This provides full battery backup/redundant-mode capabilities using standard off-the-shelf system modules.

STANDARD CONTROL FEATURES AND OPTIONS. A broad range of system interface features provide the capability to control and monitor the operation of the power supply by its host system. Standard features include output inhibit/enable, overtemperature warning, output good signal, input power fail warning, and output margining/remote voltage adjust. Upon request, an optional Logic Option Board can be configured to provide custom user specified control functions. For example, logic controlled margining, optically isolated control signals, selective output inhibit/enable, inverted logic signals and up/down output sequencing.

A TRUE WORLD MARKET POWER SYSTEM. The International High Power Series offers the benefit of being designed for products sold in the world's major electronics markets. The models operate on virtually any mains voltage from 90 to 264 VAC, 47 to 440 HZ. And, as with all POWER-ONE switchers, they meet the world's toughest safety agency and EMI requirements, and represent POWER-ONE's true "World Market" design philosophy. This results in easier and faster acceptance for the users' end products when marketed not only in the U.S., but internationally as well.

HOW TO ORDER

The International High Power Series is a unique concept in system-oriented power supply technology utilizing fully modular construction. This feature allows the user to easily specify a proven single or multiple output power system from a wide selection of standard plug-in output modules. Choose from the module listings below. The power system is delivered completely assembled, tested and burned-in, incorporating the users' specified output modules and options. Call POWER-ONE toll-free for complete ordering information.

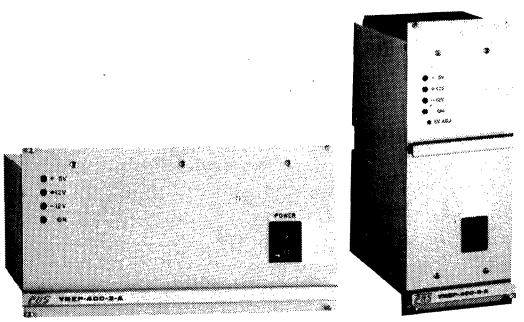
POWER PAC™ Power Supplies

VMEP SERIES VMEbus/Eurocard Modular AC-DC Switching Power Supplies

The Power Pac™ VMEP Series is a group of high-efficiency switching power supplies in 130 models, with capacities ranging from 120 to 800 watts, and a large selection of outputs. The supplies are designed specifically for VMEbus and incorporate VMEbus-compatible signals ACFAIL and SYSRESET.

Power switch and indicator light, and LED indicators for the three outputs are located on the front panel. Input, output, system logic, and sensing connections are made on the back through connectors, or studs for high-current connections.

The units are designed for total environmental compatibility—physical and electrical—with VMEbus systems.



FEATURES

- Dual input 115/230 VAC @ 47-63 Hz
- Wide choice of outputs
- ±0.2% or 10mV max line/load regulation
- EMI filtering
- System logic interface
- Parallel operation/power sharing optional
- SMT construction
- Modular configuration
- Fully isolated outputs
- 50KHz switching frequency
- Floating grounds for choice of output polarity

Notes on Sizes:
Single height (3U)—5.06″ (128.5mm)
Double height (6U)—10.3″ (261.8mm)
Depth of all units—6.73″ (171mm)
Single-height units are about twice the width of double-height units of similar capacity. Widths are given in the tables that follow, at the head of each group.

NOTES ON RATINGS

The output current ratings in the charts indicate the maximum steady-state current that can be drawn from the appropriate output at 50°C. The total wattage drawn from all outputs shall not exceed the unit output wattage rating.

The 120- and 200-Watt unit ratings are for convection cooling. With forced air cooling of 40cfm the total output power rating of these units can be increased by 30%.

Auxiliary outputs have a peak current rating of 115% of ratings shown (20 sec. duration).

***NOTE:** The VMEP200-6 Series is also available with 48VDC input. Please order DC-input series as VMEC200-6-X, where X designates the desired outputs, as in the table above.

SIGNIFICANCE OF MODEL NUMBERS

For convenience in using this brochure, we have devised a system of model numbers as follows:

VMEC	XXX	-	X	-	X
Designates type	Designates total power		Designates height in VMEBus height units (1u=1.75″[44.45mm])		(Suffix) designates outputs as given in table

** **NOTE:** 48 VDC output available on special order.

POWER PAC • 415 Howe Ave., Shelton, CT 06484 • Tel (203) 924-7030 • Fax (203) 924-7045

POWER PAC™ Power Supplies

VMEC SERIES Modular DC-DC Converters

Designed specifically for VMEbus applications, these switchmode converters draw their DC input from the main supply or other external source, providing additional regulated DC outputs.
DC Input: 10-18VDC or 20-36VDC
Regulation: ±0.2% line/load.

*Specify nominal input voltage: – 12 for 12VDC, – 24 for 24VDC, (48VDC opt.)

FEATURES
- 3U Eurocard format
- Wide choice of outputs
- EMI filtering
- Isolated outputs
- Floating grounds
- Remote sense
- Remote on/off
- Overvoltage protection
- Overload protection
- Line/load regulation < ±0.2%

KS SERIES Telecommunications AC-DC Power Sources
Regulated/unregulated, optional battery back-up

Power Pac™ KS Series power sources are designed for the key/PBX telephone system OEM and similar applications. Models have single outputs of either 24VDC or 48VDC. Input is 117VAC ±10%, 60 Hz, fuse protected. 230VAC ±10%, 50 Hz, is optional.

The units with the battery back-up circuitry ("B" and "D" models) charge stand-by batteries, not included, monitor line and output voltage, and automatically switch to batteries when needed. Normal operation is resumed when line voltage is restored.

FEATURES
- Reliable, conservative design
- Convection cooled
- 6-foot, 3-wire line cord
- Short circuit/overload protected
- 80–90% efficiency
- Low cost UPS protection

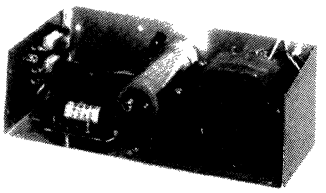
POWER PAC™ Power Supplies

EP SERIES Linear Open Frame Power Supplies



The EP Series of open-frame linear power supplies are conservatively-rated, convection-cooled units that provide low-noise, highly-regulated DC power required by test equipment, machine controls, and other sesitive applications. Available in single (EP), dual (EPD) and triple (EPT) output configurations, many of these models can be shipped from stock in small quantity.

FEATURES

- Rugged, conservative design
- High quality, high reliability
- Custom outputs/configurations welcomed
- Low noise, high regulation
- Overload protection: foldback current limiting on all outputs
- Overvoltage protection: standard on all outputs (can be deleted by request)
- Floating grounds for choice of output polarity
- Safety covers optional
- Five-year warranty
- UL recognized

SPECIFICATIONS

Input voltage: 105/152 or 210/250 VAC, 47/440 Hz.

Output voltage/current: See rating in table. Current ratings are for 57/440 Hz. Derate 10% at 50 Hz.

Output adj. range: ±5% or .5 VDC minimum.

Regulation: ±0.15% Line & Load combined.

Ripple: 1.5 mV RMS, 5 mV pk-pk max.

Stability: ±0.1% for 8 hours after warm-up.

Temperature operating: 0°C to 71°C continuous.

Temperature derating: Derate 2%/°C above 40°C.

Temperature coefficient: Better than 0.03%/°C.

Cooling: Convection cooled.

Overload protection: Built-in foldback type current limit circuit to protect against overload and short circuit condition, with automatic recovery. Set to operate at 120 to 135% of full load current at 40°C.

Overvoltage protection: Built-in SCR crowbar set at 120-130% of nominal output.

Remote sense: Standard on size 2C and larger.

Output polarity: Floating, either side may be grounded.

Shielding: Electrostatic shield between primary and secondary of transformer.

Transient response: 50µsec for a 50% load change to recover within ±10 mV band.

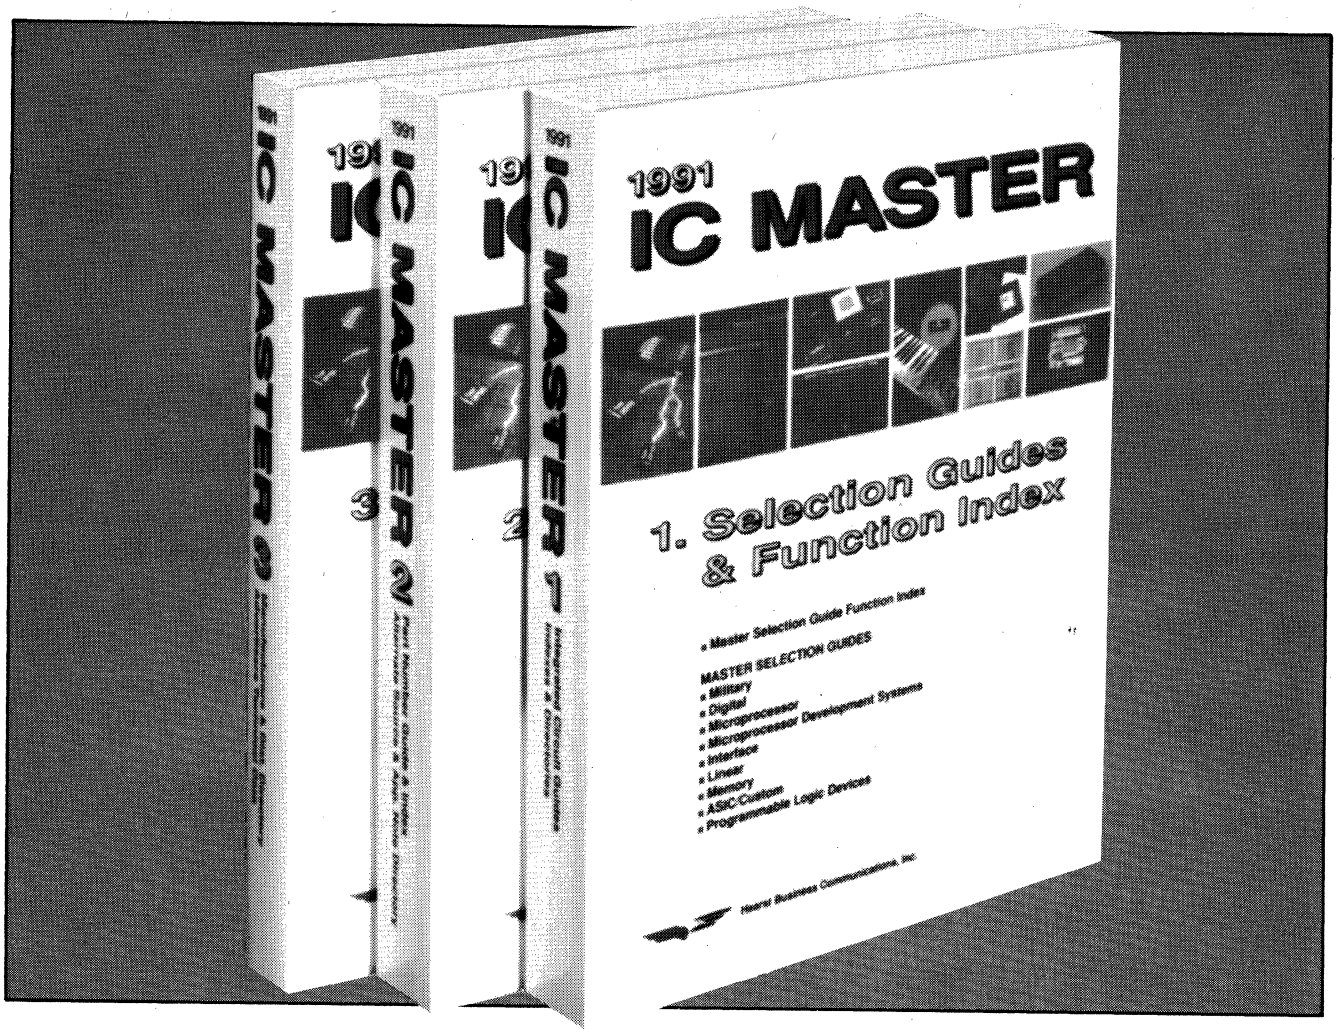
SUPER TIME SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your question has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516) 227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Communications, 645 Stewart Ave., Garden City, NY 11530. She'll mail you the IC Master subscription form right away.

And, if you tell her you saw it in the 1991/92 EEM, she'll take $10 off the subscription price!

PS-STANDARD/"BABY" AT SERIES

FEATURES

- High quality, designed for use by OEMs, not hobbyists unconcerned with agency approvals
- UL recognized, CSA certified, and TUV approved
- EMI/RFI within limits of VDE 0871/6.78 and FCC Part 15, subpart J
- Operates on 115 or 230 VAC
- OVP on +5 VDC output
- Full ONE YEAR WARRANTY
- 150-325 Watts
- Custom options available
- Tight regulation on all outputs available
- Automatic current limit
- Short circuit protection
- MTBF greater than 50,000 hours

SPECIFICATIONS

BATTERY BACK-UP OPTION

The "Standard" PS-AT Series is now available with a battery back-up module to give you uninterruptible power source capabilities. Operation in the back-up mode is a function of the ampere hours rating of the external (customer supplied) batteries. Add suffix BU to model number.

FEATURES

- No outage at switch over
- 85% efficiency
- Battery charging circuit available
- Low battery voltage signal
- Automatic switch-off for low batteries
- Automatic switch-over from batteries when AC returns

MODIFIED STANDARDS, AND CUSTOM DESIGNS AVAILABLE

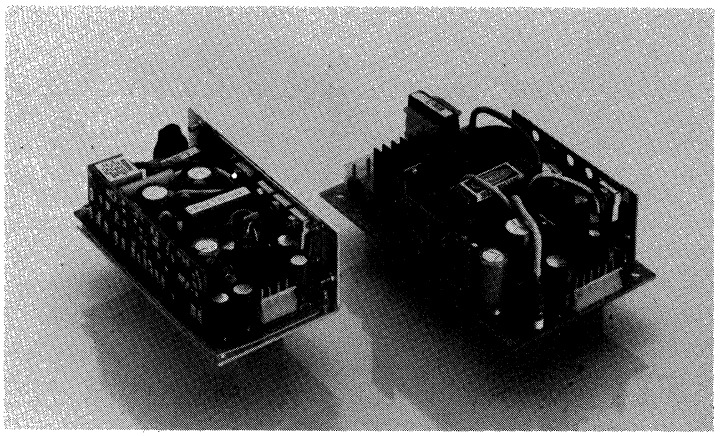
PVI UNIVERSAL AUTOMATIC AC INPUT SERIES

SINGLE AND MULTIPLE OUTPUTS



FEATURES

- Automatically Accommodates Universal AC Sources
- Designed and Tested to Worldwide EMI/RFI Regulations. Meets VDE and FCC Level "B" Emissions
- Compact Size
- Overload Protection
- Overvoltage Protection
- Many Options Available
- MTBF Greater than 100K Hours
- UL Recognized, CSA Certified, TUV Licensed
- High Peak Currents for Starting Loads

SPECIFICATIONS

PARAMETER	CONDITIONS	LIMITS
AC INPUT	No load to full load	90-260 VAC (115 or 230 VAC nominal) Auto input range without any external changes
AC INPUT FREQUENCY	No load to full load	47-63 Hz (consult factory for 440 Hz operation)
INPUT SURGE CURRENT	Peak (cold start)	15A (115 VAC) 30A (230 VAC)
DC OUTPUT		See Model Selection Chart
DC OUTPUT ADJUSTMENT	+5VDC output	+4.5V to OVP trip point
HOLD-UP TIME	Nominal input voltage and max output power	20 ms
LINE REGULATION	Within specified AC limits	±0.5% typical
LOAD REGULATION	20% to 100% load change	±1.0% main output ±3.0% for auxiliary output without post regulator ±1.0% for auxiliary output with post regulator

PARAMETER	CONDITIONS	LIMITS
RIPPLE AND NOISE	Max load	50mV Pk-Pk max 5V output 1% max any other output
TRANSIENT RESPONSE	50% load change	2% max deviation, returns to initial condition in 1 ms max
AMBIENT OPERATING TEMPERATURE	Continuous duty, full rating Derate linearly to 50% of full rating at +71°C	0° to 50°C 0% to 70% (fan cooled) 50° to 71°C
STORAGE TEMPERATURE	Non operating	−20°C to +80°C
OVERVOLTAGE PROTECTION	+5V output only	+6.2V ± 0.4V
SHORT CIRCUIT PROTECTION	Will withstand a continuous short without damage; will automatically return to regulation upon removal of short.	
OVERLOAD PROTECTION	Maximum rated current cannot be drawn from all outputs at the same time. The overload protection feature will reduce all output voltages to a safe dissipation level when the total output power exceeds 125% of maximum rated power.	
NO LOAD OPERATION	No damage to power supply will occur when operating at no load.

Standard or Custom Power Supplies: NOW THE CHOICE IS REALLY YOURS!

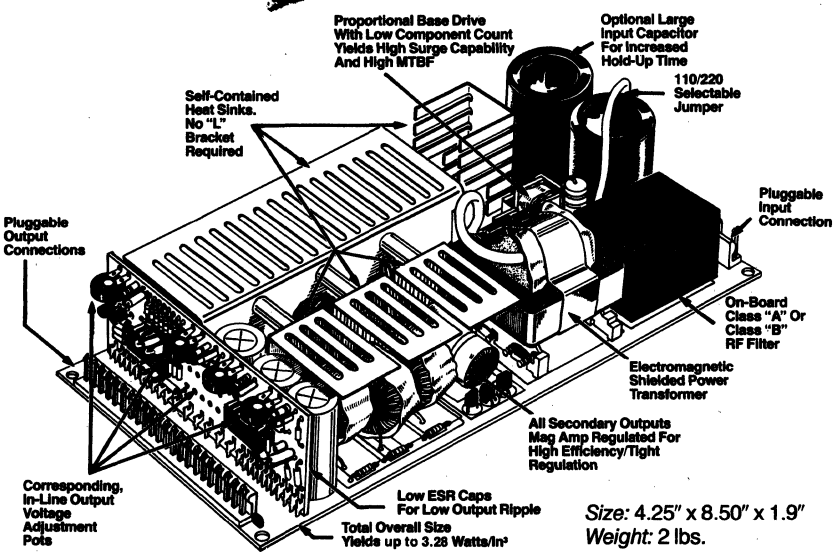
Power Systems Inc. now offers you a choice between completely custom-designed power supplies or our new, fully configured, multiple-output standard switching power supplies.

PSI/STD

PSI/STD is a line of standard power supplies that offers a broad range of choices for many OEM applications that previously required a custom-designed power supply.

The versatility of the PSI/STD module with its available options enables you to obtain a "custom" power supply without the lead time or development costs associated with custom products.

PSI 175 is a 175-watt, convection-cooled, quad output power supply. Standard features include 110/220 VAC, 47-440 Hz, full power rating at 50°C, fully regulated outputs . . . all in the smallest package available. L-brackets for special mounting, and input autoranging are available, plus many other options. Also available are 135-watt and 225-watt modules with the same package size, features and options as the 175-watt. Call for quotation.



Size: 4.25″ x 8.50″ x 1.9″
Weight: 2 lbs.

PSI 135, 175, 225 STANDARD FEATURES

- Outputs: 4 Max.
- Input: 110/220 VAC
- Frequency: 47-440 Hz
- Brownout Protection
- Inrush Current: 40A @ 220V Max.
- Leakage Current: .50MA Max.
- Efficiency: 75% Min.
- Internal Fuse
- Regulation: ±1%
- Ripple (VI): 50mV PK-PK
- Power Fail Signal
- Shortcircuit & Overload Protection
- Adjustable Outputs: ±5%
- Operating Temperature: 0-50°C
- MTBF: 50K Hours Min.
- FCC/VDE Class A EMI Filter
- UL, CSA, TUV Safety
- Hold-Up Time: 16mS
- Warranty: 2 Years
- Overvoltage Protection On All Outputs

OPTIONS

- Thermal Protection
- Hold-Up Time: 24mS/36mS
- Remote Sense
- L-Bracket: 8.5″ x 4.5″ x 2.25″
- L-Bracket: 10″ x 5″ x 2.25″
- Cover & L-Bracket: 8.5″ x 4.5″ x 2.5″
- FCC/VDE Class B EMI Filter
- Line Filter Deletion
- Lower Ripple Outputs
- Delete Outputs Up To 3
- Quasi-Regulation
- Output Terminal Block
- Input Terminal Block
- Input Voltage Autoranging
- Latch Off Fault Circuit
- Output Current Surge Capibility
- Remote Shutdown
- Fan Output
- Add On OR-ing Board For Redundant Operation

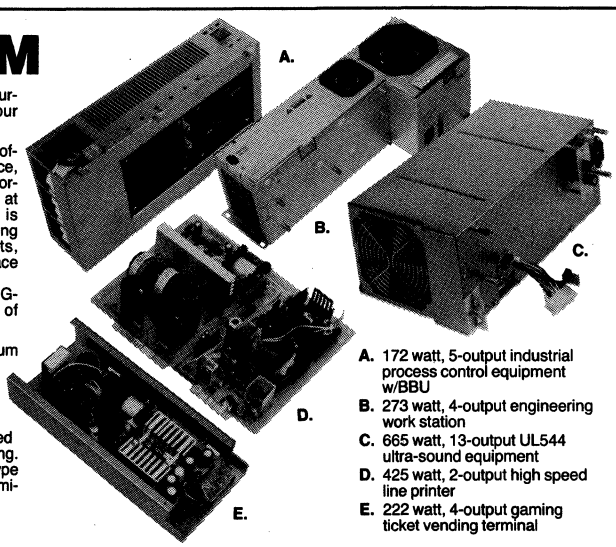
PSI/CUSTOM

PSI is still deeply committed to manufacturing custom power supplies that meet your specifications—and expectations.

CUSTOM DESIGNED POWER SUPPLIES offer optimum performance, systems interface, and cost-effectiveness. They provide the correct current ratings for each output voltage at proper temperatures. The final design is checked out under actual system operating conditions. You specify adjustment pots, desired locations for outputs, and interface features.
Form and fit are tailored for exacting CONFIGURATION CONTROL and efficient use of available space.

THERMAL DESIGN OPTIONS take maximum advantage of cooling methods in your cabinet or housing design including heat sinking in optimum convection areas, or utilizing forced air cooling to minimize cost.

INPUT/OUTPUT CONNECTIONS are placed for ease of assembly and minimum cabling. Choices include plated-edge PCB or pin-type connectors, flying-lead cables, solder terminals, or barrier-terminal blocks.



A. 172 watt, 5-output industrial process control equipment w/BBU
B. 273 watt, 4-output engineering work station
C. 665 watt, 13-output UL544 ultra-sound equipment
D. 425 watt, 2-output high speed line printer
E. 222 watt, 4-output gaming ticket vending terminal

SYSTEM-RELATED FEATURES include interface logic, Standard TTL logic signals, AC power failure, DC power failure, DC power good (one or all outputs), remote inhibit one or all outputs, and remote turn-on or off. Choice of digital or analog signals remotely program an output voltage.

PSI DESIGNS meet applicable UL, CSA and VDE safety standards as well as FCC and VDE EMI/RFI standards. Many supplies have been approved by TUV as being compliant with VDE and IEC safety standards.

MAXIMUM COST-EFFECTIVENESS is achieved by a custom designed power supply with a form, fit, and function that exactly matches the needs of the system. Power application engineers will be happy to assist in writing specifications, advising on configuration design, and reviewing cost trade-offs.

Now You Really Have A Choice. Whether you choose PSI/CUSTOM or PSI/STD, you know you will receive a consistently superior power supply from Power Systems, Inc.

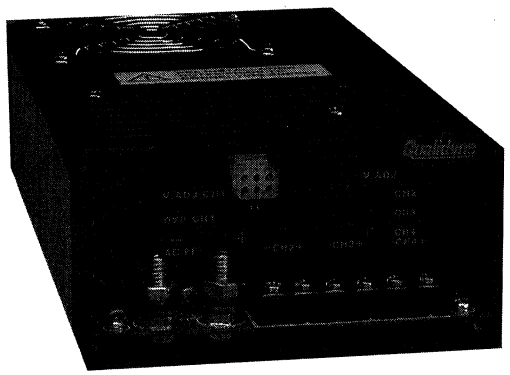
250 TO 600W SINGLE & MULTI-OUTPUT, LOW COST SWITCHMODE POWER SUPPLIES



SERIES 2
250 WATTS, 2″ × 4.5″ × 9″
400 WATTS, 2.5″ × 5″ × 10″
500 WATTS, 2.5″ × 5″ × 11.5″
600 WATTS, 2.5″ × 5″ × 14″

FEATURES

- 1 to 4 Outputs
- Isolated & Floating Outputs
- EMI Filter (FCC/VDE)
- DC Ball-Bearing Fan Cooled
- OVP on All Outputs
- Approved to UL, CSA, VDE, EN Specs
- Input Power Fail Signal
- Field-Selectable 115/230VAC
- Three-Year Warranty

AVAILABLE OPTIONS

- Auto AC Line Select
- Universal AC Input
- 0.99 Power Factor Correction
- Inhibit, Logic Low
- Margining (Main)
- Wide Range Adjustable Outputs

INPUT SPECIFICATIONS

AC Input Voltage Ranges	90-132/180-264VAC, strappable; automatic line select (option); 90-264VAC, universal input (option)
Input Frequency (AC Units)	47-63 Hz
In-Rush Current, Peak	30A
Hold-Up Time	20 msec, typical

OUTPUT SPECIFICATIONS

Output Polarity	All units are floating
Line Regulation	0.2%, max.
Load Regulation	0.8% for 0 to 100% load change with remote sense
Transient Response	3% for 25% load change; recovery to <1% in 300 μsec
Overshoot, Turn-On	1%, max.
PARD, All Channels	1% measured over 30 MHz bandwidth
Temperature Coefficient	0.02%/°C max.
Current Limit	120% of rated current
Overvoltage Protection	125% of nominal output voltage; latching
Reverse Voltage Protection	To 100% rated current, main; 50% rated current, auxiliaries
Remote Sense	Remote sense will compensate for up to 0.5V of total load cable drop

GENERAL SPECIFICATIONS

Efficiency, Typical	75%
Turn-On Delay (Soft Start)	1 sec after input voltage applied
Dielectric Withstand	2200VDC, input-to-output
Leakage Current, Line-to-Chassis	3.5 mA max. @ 264VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature Range	0-70°C
Derating, 50-70°C	Linearly to 50% at 70°C
Storage Temperature Range	-40 to +85°C
Cooling	Internal fan
Humidity	5-95% non-condensing
EMI/RFI, Conducted	VDE 0871 Level A, FCC 20780, Part 15-J Level A
Vibration & Shock, Operating	5-500 Hz; 0.03″ to 0.25G, 5G, half sine 15 msec, bottom
Vibration & Shock, Non-Operating	5-500 Hz; 0.15″ to 1.0G, 10G, half sine 15 msec, 3-axis

PHYSICAL SPECIFICATIONS

AC Input Connections	Terminal strip with (5 ea.) 6-32 screw terminals
DC Output Connections	¼×20 studs on main channel; barrier strip with (6 ea.) 6-32 screw terminals for auxiliary outputs

SAFETY

Safety Specifications	UL478 or 1950, CSA22.2 No. 220 or No. 950, EN60950

IMPORTANT NOTES

Please consult factory if requirements are not met by models listed here. Specifications are subject to change without notice.

Approvals may be pending on some models; check with factory for status.

300 TO 400W SINGLE & MULTI-OUTPUT, USER CONFIGURABLE SWITCHMODE POWER SUPPLIES

SERIES 4/OMEGA
2.5" × 5" × 8"-11"

FEATURES

- Up to 7 Outputs
- Isolated & Floating Outputs
- EMI Filter Meets VDE/FCC, Class B
- Meets UL, CSA, BS, IEC & EN Specs
- Wide Range User-Adjustable Outputs
- No Pre-Loading
- Low Leakage Current
- Field-Selectable 115/230VAC

AVAILABLE OPTIONS

- Input Power Fail Signal
- Global & Individual Inhibits
- Auto Current Sharing on All Outputs
- Output Good Signals
- 300VDC Back-up Input
- Side Mount I/O Connections
- In-Line I/O Connections

INPUT SPECIFICATIONS

AC Input Voltage Ranges	90-132/180-264VAC, externally selectable
Input Frequency (AC Units)	47-63 Hz
In-Rush Current	13A
Hold-Up Time	20 msec, min.

OUTPUT SPECIFICATIONS

Output Polarity	All units are floating
Line Regulation	0.1%, max.
Load Regulation	0.1% for 0 to 100% load change with remote sense
Transient Response	10% max. for 50% load change; recovery to <1% in 300 μsec
Minimum Load	No minimum load required
PARD, All Channels	1% measured over 50 MHz bandwidth
Temperature Coefficient	0.02%/°C max.
Current Limit	120% of rated current
Overvoltage Protection	125% of nominal output voltage; latching, individual adjustments
Reverse Voltage Protection	To 100% rated current, when fan is operating
Remote Sense	Remote sense will compensate for up to 0.5V of total load cable drop

GENERAL SPECIFICATIONS

Efficiency, Typical	75%
Turn-On Delay (Soft Start)	1 sec after input voltage applied
Dielectric Withstand	2200VDC, input-to-output
Leakage Current, Line-to-Chassis	.56 mA max. @ 264VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature Range	0-70°C
Derating, 50-70°C	Linearly to 50% at 70°C
Storage Temperature Range	-40 to +85°C
Cooling	Internal fan
Humidity	5-95% non-condensing
EMI/RFI, Conducted	VDE 0871 Level B, FCC 20780, Part 15-J Level B
Vibration & Shock, Operating	5-500 Hz; 0.03" to 0.25G, 5G half sine 15 msec, bottom
Vibration & Shock, Non-Operating	5-500 Hz; 0.15" to 1.0G, 10G half sine 15 msec, 3-axis

PHYSICAL SPECIFICATIONS

AC Input Connections	Terminal strip with (7 ea.) 6-32 screw terminals
DC Output Connections	M6 screw terminals on main channel; M4 screw terminals for auxiliary outputs; M3 screw terminals for sense connections

SAFETY

Safety Specifications	When correctly installed in a system the Series 4 will meet the requirements of UL478 or 1950, CSA22.2 No. 220 or No. 950, BS7002, BS6301, IEC950, EN60950

IMPORTANT NOTES

Please consult factory if requirements are not met by models listed here. Specifications are subject to change without notice.

Approvals may be pending on some models; check with factory for status.

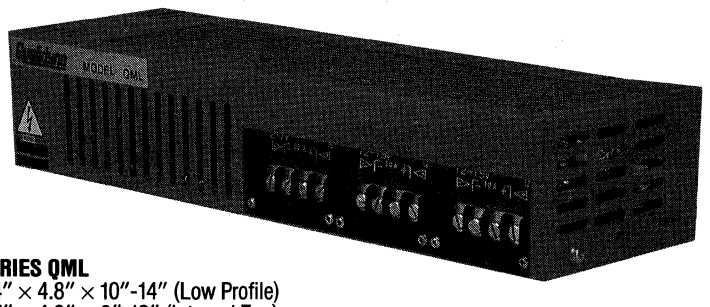
100 TO 300W MODULAR POWER SUPPLIES & DC-DC CONVERTERS



SERIES QML
2.4″ × 4.8″ × 10″-14″ (Low Profile)
6.7″ × 4.8″ × 9″-12″ (Integral Fan)

FEATURES

- AC & DC Inputs
- Up to 9 Outputs
- User Configurable
- Quickly Customized
- Low Profile Cases
- Isolated/Floating Outputs
- 2V to 100VDC Outputs
- No Preloading
- Tailored Module Combinations

AVAILABLE OPTIONS

- Power Good Signal
- Power Fail Signal
- Extended Hold-Up
- Class B RFI Filter
- Short Case with Integral Fan
- Overvoltage Protection
- Parallel Operation
- In-Rush Control
- Inhibit Control

INPUT SPECIFICATIONS

110/220VAC Input Units

Input Voltage	90-132VAC/187-264VAC
Input Frequency	47-63 Hz
Output Power	100 to 300 Watts*
In-Rush Current	18A, Peak
EMI/RFI	VDE 0871 Class A (Class B with NF option)
Efficiency	70-85% depending on configuration
Thermal Protection	Standard

48VDC Input Units

Input Voltage	38-64VDC, 48VDC nominal
Output Power	100 to 300 Watts*
In-Rush Current	20A with In-Rush Control Module
Efficiency	60-65%
Psophometric Noise Filter	Standard on 150 Watt units

General Specifications

Operating Temperature	0-70°C in free air (derating above 50°C, 2.5%/°C)
Storage Temperature	-30 to +85°C
Safety**	UL478, CSA22.2
Input Fuse	Standard
Operating Frequency	75 KHz
Start-Up Time	<0.5 sec

*Indicated power levels can be exceeded subject to ambient temperatures and forced air cooling; contact factory.
**Contact factory for other safety requirements and specifics regarding approvals.

CONTACT FACTORY FOR INFORMATION ON STANDARD MODELS CONSISTING OF THE MODULES LISTED BELOW, OR CONFIGURE YOUR OWN SUPPLY

Output Module Description

Module	Voltage	Current	Topology	Module Width (In.)
B	5-30V (30-100V)	1A (0.1A)	Linear	1.18
C	2-30V	3A	Linear	1.18
F	5-36V	4A	Switchmode	1.18

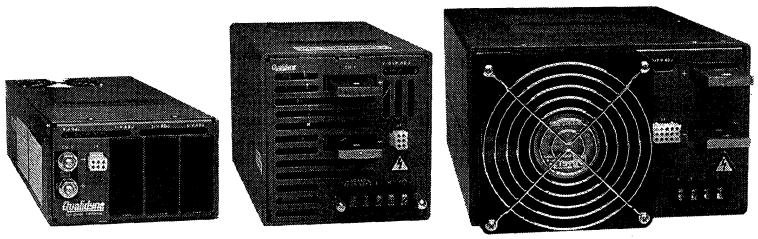
300 TO 3000W SINGLE OUTPUT SWITCHMODE POWER SUPPLIES & DC-DC CONVERTERS



SERIES 21, 23, 28, 31 & 36
(SEE FRONT PAGES OF THIS VOLUME FOR PRODUCT LINE PHOTOS)

FEATURES

- 2V to 56VDC Outputs
- International Safety Specs
- Wide Adjustment Ranges
- Inhibit
- Input Power Fail Signal
- Three-Year Warranty
- AC (1φ or 3φ) & DC Inputs
- EMI Filter (FCC/VDE)
- DC Ball-Bearing Fan Cooled
- Margining
- Compact Cases

AVAILABLE OPTIONS

- 0.99 Power Factor Correction
- Auto Current Sharing w/Supply Fail Signal (Ideal for N+1 Redundancy)
- Output Power Good Signal
- Output Current Monitor
- Universal Input: 90-264VAC

INPUT SPECIFICATIONS

AC Input Voltage Ranges	90-132/180-264VAC, externally selectable; 180-264VAC 1φ or 3φ; universal input 90-264VAC (option)
Input Frequency (AC Units)	47-63 Hz
DC Input Voltage Range	42-56VDC
In-Rush Current, Peak	80A (max.)
Hold-Up Time	20 msec, typical

OUTPUT SPECIFICATIONS

Output Polarity	Floating
Line Regulation	0.2%, max.
Load Regulation	0.8% for 0 to 100% load change with remote sense
Transient Response	3% for 25% load change; recovery to <1% in 300 μsec
Overshoot, Turn-On	1.0%, max.
Minimum Load	No minimum load required
PARD, All Channels	1% measured over 50 MHz bandwidth
Temperature Coefficient	0.02%/°C max.
Current Limit	120% of rated current
Overvoltage Protection	125% of nominal output voltage; latching
Reverse Voltage Protection	To 100% rated current
Remote Sense	Remote sense will compensate for up to 0.5V of total load cable drop

GENERAL SPECIFICATIONS

Efficiency, Typical	75%
Turn-On Delay (Soft Start)	1 sec after input voltage applied
Dielectric Withstand	2200VDC, input-to-output
Leakage Current, Line-to-Chassis	3.5 mA max. @ 264VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature Range	0-70°C
Derating, 50-70°C	Linearly to 50% at 70°C
Storage Temperature Range	-40 to +85°C
Cooling	Internal fan
Humidity	5-95% non-condensing
EMI/RFI, Conducted	VDE 0871 Level A, FCC 20780, Part 15-J Level A
Vibration & Shock, Operating	5-500 Hz; 0.03" to 0.25G, 5G half sine 15 msec, bottom
Vibration & Shock, Non-Operating	5-500 Hz; 0.15" to 1.0G, 10G half sine 15 msec, 3-axis

PHYSICAL SPECIFICATIONS

AC Input Connections	Terminal strip with 6-32 screw terminals
DC Output Connections	¼×20 studs; 5/16×18 studs, or bus bars

SAFETY

Safety Specifications	UL478 or 1950, CSA22.2 No. 220 or No. 950, EN60950

IMPORTANT NOTES

Please consult factory if requirements are not met by models listed here. Specifications are subject to change without notice.

Approvals may be pending on some models; check with factory for status.

HIGH VOLTAGE POWER SUPPLIES FOR ALL CRT APPLICATIONS

◆◆◆WHEN IMAGE COUNTS◆◆◆

STANDARD AND CUSTOM DESIGNS

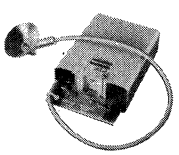
COMMERCIAL
For monochrome and color CRT computer displays, as well as graphics workstations, CAD/CAE systems, medical equipment, phototypesetting, film recorders and projection equipment, or other applications.

MILITARY
For applications ranging from submarine to space shuttle. Whether shipboard, battlefield or avionics, our technology has been tested and qualified to the extremities of military ranges.

RUGGEDIZED
For higher tech yet low cost applications, requiring semi-stringent environments. Especially suitable for commercial avionics, industrial programs, or foreign military not bound by full mil-spec requirements.

Founded in 1971, Rantec Division (formerly PTK) has the experience and technology, as well as the support of our parent company, Esco Electronics Corp., to provide the most sophisticated, highest quality high voltage power supplies in the industry. Our dedicated business team is committed to that extra effort to "make things happen" in support of your program needs. There is no better choice for standard or custom high voltage power supplies than Rantec. For further technical information, please contact us.

LCC Series Low Cost Commercial HVPS



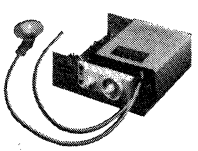
FEATURES:
- Extremely low cost
- Designed for high volume production
- UL recognized, CSA, TUV certifiable
- Overvoltage safety circuit (DHHS compliant)
- High quality, MTBF >100,000 hrs.
- 2kV to 20kV at up to 10 watts, multiple outputs
- Other options available

ELECTRICAL SPECS:
- **Anode**: Fixed output specified from 2kV to 20kV ±3% @ up to 10 watts maximum all outputs
- **Aux #1**: Specified −1kV to +1kV ±10% @ up to 1mA
- **Aux #2**: Specified −1kV to +1kV ±10% @ up to 1mA
- Input: +24V ±1.2Vdc (options available)
- Low ripple <5V p-p (C_L = 1500pf), Low RFI
- Tightly regulated .3% line, .1% load

MECHANICAL SPECS:
Size: 5.10" x 3.12" x 1.4" Weight: <.9 lbs.
Material: Aluminum Finish: None or Clear Irridite

ENVIRONMENTAL SPECS:
Operating Temp: 0 to +60°C case Storage Temp: −35°C to +85°C
Operating Altitude: 0 to 10,000 ft. Humidity: 0 to 95% non-condensing

CDC Series Color Display Commercial HVPS



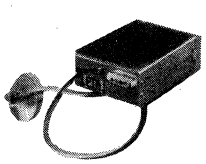
FEATURES:
- Extremely low cost
- UL & CSA recognized, TUV Certifiable
- Overvoltage safety circuit (DHHS compliant)
- High quality, MTBF >68,000 hrs.
- Low ripple, tightly regualted
- 18kV to 30kV @ 1.2mA, multiple outputs
- Other options available

ELECTRICAL SPECS:
- **Anode**: 25kV adjustable ±1kV @ 0-1.2mA
- **Focus**: 19-29% or 22-34% of anode @ ±15µA
- **G2**: 0-825V or 200-1kV @ ±5µA • **G1**: −200V ±10% @ 1mA
- **Amp B+ output**: +400V ±10% @ 3mA • **DF Input**: 500V max/40Hz to 250kHz
- Input: +26V ±3Vdc (options available)
- Remote On/Off—TTL compatible
- Optional Anode Monitor or Beam Current Sense

MECHANICAL SPECS:
Size: 6.0" x 5.0" x 1.75" Weight: <1.8 lbs.
Material: Aluminum Finish: Line Grain

ENVIRONMENTAL SPECS:
Operating Temp: 0 to +65°C case Storage Temp: −35°C to +90°C
Operating Altitude: 0 to 10,000 ft. Humidity: 0 to 95% non-condensing

ULC Series Commercial HVPS



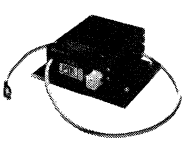
FEATURES:
- Low cost
- UL recognized, CSA, TUV Certifiable
- High quality, MTBF >100,000 hrs.
- Low ripple, tightly regualted
- Optional overvoltage protection and remote on/off
- 2kV to 20kV at up to 10 watts, multiple outputs
- Other options available

ELECTRICAL SPECS:
- **Anode**: Specified from 2kV to 20kV adjustable ±5% @ up to 10 watts maximum total all outputs
- **Aux #1**: Specified −1kV to +1kV ±10% @ up to 1mA
- **Aux #2**: Specified −1kV to +1kV ±10% @ up to 1mA
- Input: +26Vdc ±10% (options available)
- Low ripple • Tightly regulated • Low RFI

MECHANICAL SPECS:
Size: 4.13" x 3.16" x 1.37" Weight: <.9 lbs.
Material: Aluminum Finish: None or Black Anodized

ENVIRONMENTAL SPECS:
Operating Temp: 0 to +65°C case Storage Temp: −35°C to +85°C
Operating Altitude: 0 to 10,000 ft. Humidity: 0 to 95% non-condensing

DFC Series Dynamic Focus Commercial HVPS



FEATURES:
- Internal Dynamic Focus Amplifier
- 300V p-p modulation
- DC to 200kHz bandwidth
- Local and remote trim, or fully remote
- Remote on/off
- 2kV to 5.2kV @ up to 600µA
- Other options available

ELECTRICAL SPECS:
- **Focus Voltage**: Specified 2kV to 5.2kV @ up to 600µA
- Local Adjustment: ±15%
- Remote Adjustment: ±3% or ±18% (no local)
- Input: +24Vdc ±10% (options available)
- **Dynamic Focus Amplifier:** Input 0-10V, Output 10-300V
- Low ripple • Tightly regulated
- UL recognized

MECHANICAL SPECS:
Size: Power Supply 4.13" x 3.16" x 1.37" Weight: Approx. 1.2 lbs.
Base Plate 4.13" x 5.00" x 0.34"
Material: Aluminum Finish: Black Anodized

ENVIRONMENTAL SPECS:
Operating Temp: 0 to +65°C case Storage Temp: −35°C to +85°C
Operating Altitude: 0 to 10,000 ft. Humidity: 0 to 95% non-condensing

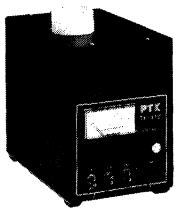
TF Series Testers for HVPS



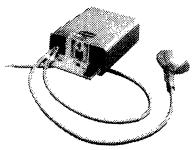
FEATURES:
- HVPS testers suitable for incoming inspection testing
- Continuously adjustable loads with pulse load capability
- 4½ or 5½ digit DVM readout
- Calibrated with NBS traceability, .5% accuracy
- Output for ripple and transient measurements
- 500V to 27.5kV at up to 3mA, option to 30kV
- Other options available

ELECTRICAL SPECS:

Model	Voltage Range	Load Current
TF-112	+5kV to +27.5kV	1.5mA
TF-113	+5kV to +27.5kV	3.0mA
TF-114	+500V to 7.5kV	3.0mA

MECHANICAL SPECS:
Size: 10" x 6" x 8" Weight: Approx. 7 lbs.
Material: Aluminum Finish: Black anodized

LFC Series Low Cost Commercial HVPS



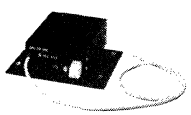
FEATURES:
- Extremely low cost
- Designed for high volume production
- UL recognized, CSA, TUV certifiable
- Overvoltage safety circuit (DHHS compliant)
- High quality, MTBF >100,000 hrs.
- 2kV to 20kV at up to 10 watts, multiple outputs
- Other options available

ELECTRICAL SPECS:
- **Anode**: Fixed output specified from 2kV to 20kV ±3% at up to 10 watts maximum total all outputs
- **Focus**: Specified up to 50% of anode ±10% at up to 50μA
- **Aux #1**: Specified −1kV to +1kV ±10% @ up to 1mA
- **Aux #2**: Specified −1kV to +1kV ±10% @ up to 1mA
- Input: +24V ±1.2Vdc • Low ripple • Tightly regulated • Low RFI

MECHANICAL SPECS:
Size: 5.10" x 3.12" x 1.4" Weight: < 1 lb.
Material: Aluminum Finish: None or Clear Irridite

ENVIRONMENTAL SPECS:
Operating Temp: 0 to +60°C case Storage Temp: −35°C to +85°C
Operating Altitude: 0 to 10,000 ft. Humidity: 0 to 95% non-condensing

DFI Series Dynamic Focus Ruggedized HVPS



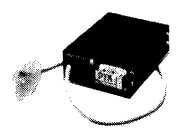
FEATURES:
- "Ruggedized" for avionics or industrial applications
- Internal dynamic focus amplifier
- 300V p-p modulation
- DC to 200kHz
- Local and remote trim, or fully remote; and on/off
- 2kV to 5.2kV at up to 600μA
- Other options available

ELECTRICAL SPECS:
- **Focus Voltage:** Specified 2kV to 5.2kV @ up to 600μA
- Local Adjustment: ±15% • Remote Adjustment: ±3% or ±18% (no local)
- Input: +24Vdc ±10% (options available)
- **Dynamic Focus Amplifier:** Input 0-10V, Output 10-300V
- Low ripple • Tightly regulated
- UL recognized

MECHANICAL SPECS:
Size: Power Supply 4.13" x 3.16" x 1.37" Weight: Approx. 1.2 lbs.
Baseplate 4.13" x 5.00" x 0.34"
Material: Aluminum Finish: Black anodized

ENVIRONMENTAL SPECS:
Operating Temp: −40°C to +85°C case Storage Temp: −40°C to +95°C
Operating Altitude: 0 to 30,000 ft. Humidity: 0 to 95% non-condensing

ULI Series Ruggedized HVPS



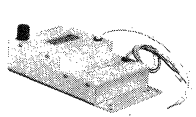
FEATURES:
- Low cost
- "Ruggedized" for avionics or industrial applications
- Light weight, only 1 lb.
- Low ripple, tightly regulated
- Optional overvoltage protection and remote on/off
- 2kV to 20kV at up to 10 watts, multiple outputs
- Other applications available

ELECTRICAL SPECS:
- **Anode**: Specified from 2kV to 20kV adjustable ±5% @ 10 watts maximum total all outputs
- **Aux #1**: Specified −1kV to +1kV ±10% @ up to 1mA
- **Aux #2**: Specified −1kV to +1kV ±10% @ up to 1mA
- Input: +26Vdc ±10% (options available)
- Low ripple • Tightly regulated • Low RFI

MECHANICAL SPECS:
Size: 4.13" x 3.16" x 1.37" Weight: < .9 lbs.
Material: Aluminum Finish: Black anodized

ENVIRONMENTAL SPECS:
Operating Temp: −40°C to +85°C case Storage Temp: −40°C to +95°C
Operating Altitude: 0 to 30,000 ft. Humidity: 0 to 95% non-condensing

SMI-18-01 Shadow Mask Ruggedized HVPS



FEATURES:
- Compact size, lightweight
- Sophisticated performance to power hi-res color displays
- "Ruggedized" for use in general aviation pilot displays
- Internal dynamic focus
- Low ripple, tightly regulated
- 18kV @ 600μA, multiple outputs
- Other options available

ELECTRICAL SPECS:
- **Anode**: 18kV adjustable ±500V @ 600μA
- **Focus**: Adjustable 25% to 31% of anode @ ±15μA
- **G2**: +400V ±10% @ up to 1mA • **G1**: −100V ±10% @ up to 1mA
- **Dynamic Focus:** −600V @ 5V input (TTL) • Input: +28.5V ±4.5V
- Low ripple • Tightly regulated
- Reverse voltage protection

MECHANICAL SPECS:
Size: Approx. 4.96" x3.15" x 1.23" Weight: Approx. 1 lb.
Material: Aluminum Finish: None

ENVIRONMENTAL SPECS:
Operating Temp: −25°C to +70°C case Storage Temp: −40°C to +90°C
Operating Altitude: 0 to 55,000 ft. Humidity: 0 to 95% non-condensing

SMI-14-01 Shadow Mask Ruggedized HVPS

FEATURES:
- Extremely compact size, lightweight
- Sophisticated performance to power hi-res color displays
- "Ruggedized" for use in general aviation pilot displays
- Four outputs, including adjustable anode, focus & G2
- Remote on/off
- 14kV @ 1.2mA, multiple outputs

ELECTRICAL SPECS:
- **Anode**: +14.0kV adjustable @ .45mA average, 1.2mA peak
- **Focus**: Adjustable +3.0kV to +4.2kV @ ±15μA
- **G2**: Adjustable +180V to +510V @ ±5μA
- **G1**: Adjustable −130V @ 0-800μA
- Input +15V ±1V @ 2A • Tightly regulated • Low ripple
- Remote on/off — TTL Compatible

MECHANICAL SPECS:
Size: Approx. 3.62" x 4.83" x 1.26" Weight: Approx. .75 lb.
Material: Aluminum Finish: Line Grain

ENVIRONMENTAL SPECS:
Operating Temp: −20°C to +75°C case Storage Temp: −55°C to +85°C
Operating Altitude: 0 to 55,000 ft. Humidity: 0 to 95% non-condensing

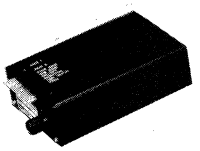
GPM Series General Purpose Military HVPS



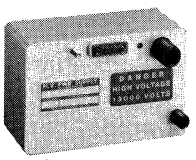
FEATURES:
- Full military qualified, JANTX components
- Compact size and lightweight
- Low ripple, tightly regulated
- MTBF 35,000 hours
- Remote on/off, HV Monitor
- 2kV to 18kV at up to 20 watts, multiple outputs
- Other options available

ELECTRICAL SPECS:
- **Anode**: Specified 2kV to 18kV ±5% @ up to 1mA
- **Aux #1**: Specified −1kV to +1kV ±10% @ up to 1mA
- **Aux #2**: Specified −1kV to +1kV ±10% @ up to 1mA
- HV monitor: .1% of output, ±3% accuracy
- Input: +28V ±2Vdc @ up to 1.4A
- Low ripple <15V p-p (C_L = ϕ)
- Tightly regulated, .03% line, .01% load
- Excellent transient response, low tempco

MECHANICAL SPECS:
Size: 4.88" x 3.13" x 1.50" — Weight: Approx. 1.5 lbs.
Material: Aluminum — Finish: Black Anodized

ENVIRONMENTAL SPECS:
Operating Temp: −55 to + 85°C case — Storage Temp: −65 to +100°C
Operating Altitude: 0 to 50,000 ft. — Humidity: 0 to 95% non-condensing

M213-10 Military HVPS



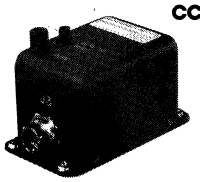
FEATURES:
- Full military qualified for avionics HUD
- Mature product, manufactured for over 10 years
- Compact size, lightweight
- Short circuit, overvoltage, overtemperature protection
- BIT indicator, Remote on/off
- 12.5kV @ 625µA, multiple outputs
- Other options available

ELECTRICAL SPECS:
- **Anode**: 12.5kV adjustable ±500V @ 625µA
- **Focus**: +500V ±30V @ 50µA • Input: +26.5V ±10% @ 500mA
- Tightly regulated • Low ripple • Remote on/off (TTL)
- Built-in-test (BIT) indicator
- Short circuit, overvoltage and overtemperature protection
- Optional reverse voltage protection (Model M213-11)

MECHANICAL SPECS:
Size: 3.81" x 2.44" x 1.73" — Weight: <1 lb.
Material: Aluminum — Finish: Clear Anodized

ENVIRONMENTAL SPECS:
Operating Temp: −54°C to +85°C case — Storage Temp: −65°C to +125°C
Operating Altitude: 0 to 70,000 ft. — Humidity: 0 to 95% non-condensing

CCM-07-01 Military HVPS



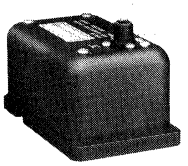
FEATURES:
- Full military qualified for Hi-res CRT displays
- Mature product, over 5,000 manufactured
- Compact size, lightweight
- Internal dynamic focus amplifier
- Tightly regulated, low ripple
- 7kV @ 50µA, multiple outputs

ELECTRICAL SPECS:
- **Anode**: 7kV ±1% @ 0 to 50µA
- **Focus**: Adjustable +1175V to +1450V @ 0-500µA
- **G2**: +300V ±3% @ 0-20µA • **G1**: −125V @ 0-5mA
- Input: ±15V ±2% @ .26A • **DF amplifier**: 0-46V p-p
- Tightly regulated • Low ripple
- Short circuit and arc protection

MECHANICAL SPECS:
Size: 4.38" x 3.81" x 2.68" — Weight: <1.5 lbs.
Material: Aluminum — Finish: Black Anodized

ENVIRONMENTAL SPECS:
Operating Temp: −32°C to +60°C — Storage Temp: −51°C to +71°C
Operating Altitude: 0 to 10,000 ft. — Humidity: 0 to 95% non-condensing

CCM-11-02 Military HVPS



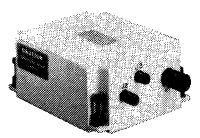
FEATURES:
- Full military qualified, JANTX components
- Humidity sealed for stand-alone testing
- Compact size, lightweight
- Remote on/off, short circuit, arc and reverse voltage protection
- Anode and Focus voltage monitors
- 11kV @ 110µA, multiple outputs
- Other options available

ELECTRICAL SPECS:
- **Anode**: 11kV ±5% @ 110µA • Anode Monitor: 1000:1
- **Focus**: +300V ±10% @ 50µA • Focus Monitor: 100:1
- Input: +28Vdc ±10% @ 375mA • Remote On/Off: 5.2Vdc = on
- Grid Sense: −40V to −50V = on • Full protection circuitry

MECHANICAL SPECS:
Size: 4.9" x 2.9" x 2.5" — Weight: <1.5 lbs.
Material: Aluminum — Finish: Black Anodized

ENVIRONMENTAL SPECS:
Operating Temp: −30°C to +75°C ambient — Storage Temp: −55°C to +100°C
Operating Altitude: 0 to 70,000 ft. — Humidity: 240 hours @ up to 100% condensing

CCM-20-17B/1 Military HVPS



FEATURES:
- Full military qualified for avionics displays
- Compact size, lightweight
- Adjustable anode, focus and G2
- Internal dynamic focus amplifier
- Output monitors, remote on/off, overheat indicator
- 20kV @ 1.5mA, multiple outputs

ELECTRICAL SPECS:
- **Anode**: 20kV adjustable ±2% @ 1.5mA
- **Focus**: 5kV adjustable ±1kV @ 750µA
- **G2**: +500V adjustable ±100V @ 50µA • **G1**: −100V @ 2 to 25mA
- **DF Amplifier**: 0 to 300V p-p
- Input: +30V ±5% @ 2.7A
- Tightly regulated • Low ripple
- TTL remote on/off • Overheat indicator

MECHANICAL SPECS:
Size: Approx. 4.32" x 3.49" x 1.81" — Weight: Approx. 1.25 lbs.
Material: Aluminum — Finish: Clear Anodize

ENVIRONMENTAL SPECS:
Operating Temp: −55°C to +71°C case — Storage Temp: −55°C to +71°C
Operating Altitude: 0 to 35,000 ft. — Humidity: 0 to 95% non-condensing

CMM-27-01 Military HVPS

FEATURES:
- Full military qualified for avionics color CRT displays
- Independently adjustable dual focus outputs
- Internal dynamic focus amplifier, 530V p-p
- Remote on/off, remote focus controls, BIT circuit (all outputs)
- Short circuit and overvoltage protection
- 27kV @ 700µA, multiple outputs
- Other options available

ELECTRICAL SPECS:
- **Anode**: 27kV ±1% @ 700µA
- **Focus #1**: Adjustable 4.5kV to 7kV @ ±15µA
- **Focus #2**: Adjustable 4.5kV to 7kV @ ±15µA
- **G2**: Adjustable +350V to +750V @ ±15µA • **G1**: −200V ±5% @ 1mA
- **DF Amplifier**: 530V p-p modulated upon Focus #2
- Input: +24V ±2.4V @ 3A • Remote Focus: ±500V

MECHANICAL SPECS:
Size: 9.1" x 7.9" x 1.5" — Weight: <5.5 lbs.
Material: Aluminum — Finish: Gold Chemical Conversion Coating

ENVIRONMENTAL SPECS:
Operating Temp: −54°C to +71°C case — Storage Temp: −57°C to +85°C
Operating Altitude: 0 to 50,000 ft. — Humidity: 240 hours up to 100% condensing

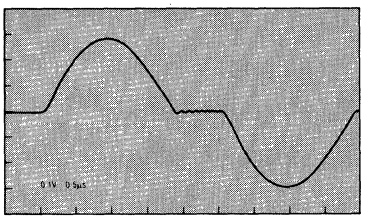
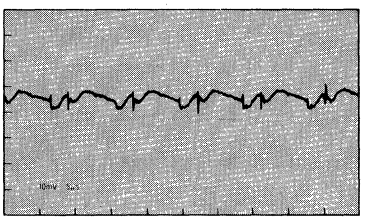
The Future is Now... True Series Resonant Technology Today

Technology and Determination: Resonant Power Technology is an industry leader in the design and manufacture of high technology switching power supplies. In 1985, the founders of RPT began their work towards developing the first commercially available, off-line, series resonant switching power supply. Series resonance provided a smaller, lighter, highly reliable and quieter (both in EMI and output noise & ripple) product that also was able to produce significant surge currents.

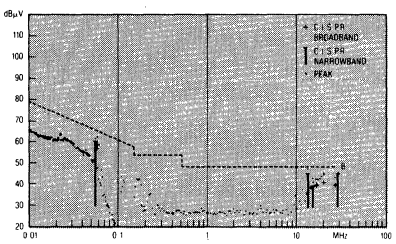


Resonant Circuit Sinusoidal Current Waveform



12 Volt Output Noise Waveform

Radio-Interference Voltages
frequency range: 0.01–30 MHz



RP-130
Series Performance Against
VDE Class B Limits

■ Series resonance offers a number of performance advantages. Switching sinusoidal currents at the zero cross-over point elminates the peak switching stress, typically in the multiple kilowatt region, experienced by pulse width modulated products. Very low switching stress combined with inherent peak current limiting and thermal limiting circuitry results in a power converter whose durability exceeds that indicated by calculated MTBF's in excess of 80,000 hours. RPT's products have been designed using premium quality components derated conservatively thereby enhancing the reliability of its series resonant topology.

■ The sinusoidal current waveform generated by the resonant circuit produces lower RFI/EMI and output noise than conventional square wave converters, due to the substantial reduction in the rate of current change i.e. di/dt. FCC and VDE Class B levels are achieved without use of external filtering on all RPT power supplies. Output ripple levels typcially achieved only by linear power supplies (20 mVolts peak to peak on all outputs) are also a by-product of the series resonant technology.

■ Higher switching frequencies allow the use of smaller passive components resulting in overall size reductions of 2 or 3:1 as compared with conventional switching power supplies. RPT's products typically offer power densities greater than 3.5 Watts/cubic inch.

■ Resonant Power's product line is based upon resonant modules of 130 and 230 Watts offered in single or multiple output versions. A unique characteristic of the resonant converter is its ability to share power equally when placed in a master/slave relationship. RPT has designed and manufactured custom power supplies offering in excess of 600 Watts and 7 outputs utilizing parallel converters. RPT encourages custom designs and offers a broad range of options including power fail detect, power good signal, remote shut down and individual output voltage margining circuits in order to satisfy its customers' individual requirements.

INPUT

Input Specifications

Input Voltage Range (Internally Selectable) . . . . . 95–132 VAC or 190–264 VAC
Input Frequency . . . . . 47–440 Hz
Input Protection . . . . . Internal Fuse
Inrush Current Limit: 80–130 watts (117 VAC/230 VAC) . . . . . 20A max/40A max
140–230 (117 VAC/230 VAC) . . . . . 20A max/40A max
Input EMI Filter: . . . . . FCC Class B std
VDE Class B opt
Universal Input . . . . . Optional
Power Factor Correction . . . . . Optional

OUTPUT

Output Specifications

Line/Load Regulation (Outputs 1&2) . . . . . 1% nominal
(Outputs 3&4) . . . . . 3% nominal
Ripple all outputs . . . . . 20mV peak-to-peak
Hold-Up Time . . . . . 30 mSec
Temperature Coefficient . . . . . 0.05%/degree C
Overload Protection . . . . . Fold back with automatic recovery
Thermal Protection . . . . . Fold back with automatic recovery
Overvoltage Protection . . . . . 6.2±0.6 Volts crowbar on the +5 Vdc Output
14.0±1.0 Volts crowbar on the +12 Vdc Output*
Power Good Signal . . . . . Signal given when: +5 Vdc 4.6–4.9 Vdc
−5 Vdc −4.3–4.7 Vdc
+12 Vdc 10.8–11.8 Vdc
−12 Vdc −10.4–11.2 Vdc
AC Power Fail Detect . . . . . To customer specification

Environmental Specifications

Operating Temperature Range: . . . . . 0°C to 70°C
Storage Temperature . . . . . −25°C to 75°C

General Specifications

Transient Response . . . . . 500 µsec to settle to within 1% of the final value after a 25% load step
Frequency . . . . . 250 kHz Resonant Frequency
Conversion Method . . . . Series Resonant circuit switching sinusoidal currents in zero current mode

Specifications subject to change without notice. **RP-230 Series only*

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

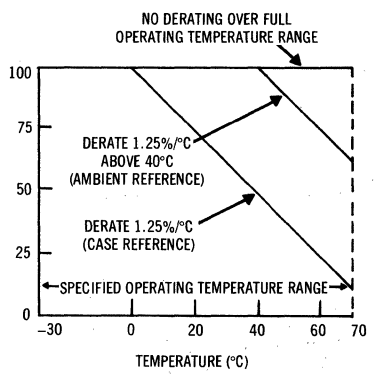

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

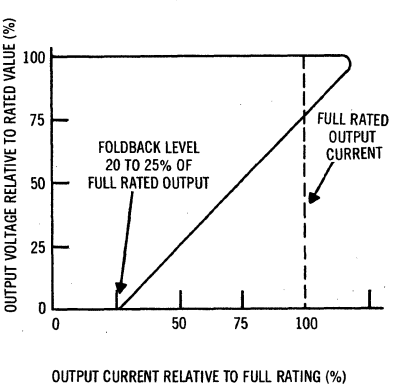

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

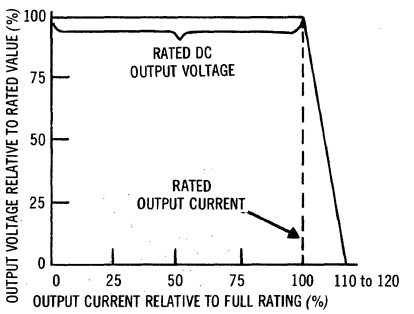

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

Relco CONTINUOUS DC POWER SUPPLIES

MAGNETICALLY REGULATED—GUARANTEED 10 YEARS

- Withstand 220% surges
- Inherently failsafe
- Immune to EMI/RFI
- CSA and UL approved
- Continuous use under full load
- Any failure mode drops output
- 13.8 VDC at up to 70°C ambient
- Impervious to sustained short circuits
- No derating between – 30°C and 70°C

MODEL	AMPS	REG. VS. LOAD @ LINE OF 117V	REG. VS. LINE @ 105V TO 130V LINE	RIPPLE & NOISE (MAX)

Low profile ■

MIL-STD-810C QUALIFIED

75-150
WATTS

FEATURES

- Meets MIL-STD's
- Low profile 1.7"
- Ruggedized design
- 115/230 VAC input without any strapping
- Fully protected
- Full power out at 80°C case temperature
- Brownout protection to below 95 or 190 VAC
- Parallelable (consult factory for procedure)
- Up to 1.6 W per cubic inch
- Soft start limits inrush to 13 amps max.

COMMON SPECIFICATIONS

Input
105 to 130/198 to 265 VAC (selectable on barrier block) 47-1000 Hz also 300 VDC ±10%. Brownout protection to 90/180 VAC.

Protection
All outputs are current limited, continuous overload and short circuit proof. Single outputs have self-recovering overvoltage protection. Thermal protection is provided by a thermal relay which opens the power input if the case temperature goes above 80°C. Multiple outputs have self-recovering OVP on the 5V output only.

Operating temperature
−40°C to +80°C case (no derating).

EMI filter
Will meet VDE 0871(A) and FCC spec for conducted emissions using an external filter. Corcom filter 3 SPIA is recommended. For MIL 461A, Captor A4581 is recommended.

Mounting
Mounting on bottom by means of 6, 10-32 tapped inserts.

Storage temperature
−55°C to +85°C

Cooling
Maximum mounting base temperature for full output is 80°C. For no (air or conductive cooling), maximum ambient temperature of 30°C for full power output.

Temperature stability
Better than .02%/°C.

Size
11.12" × 5.29" × 1.75". Single outputs. (28.3 cm × 13.5 cm × 4.3 cm).
10.55" x 5.29" × 1.75". Multiples.

Weight
5.5 lbs.

MTBF
115,000 hours as calculated by MIL-HDBK-217C. (Model 325).

Remote sensing
All models have remote sensing.

*Note: Total current of negative outputs cannot exceed 4 amps for −12V operation (3 amps for −15V)

**Note: Total current for negative outputs cannot exceed 2 amps for −12V operation (1.5 amps for −15V)

***MINIMUM 4A load on +5V is required for auxiliary outputs to regulate

SPECIFICATIONS

Input
24 VDC nominal (19-32 VDC)
48 VDC nominal (40-70 VDC)

Operating temperature
0°C to 50°C

Protection
All outputs current limited, continuous overload and short circuit proof. 5V, 12V, 15V, 5V and ±12/15V outputs have self-recovering overvoltage protection. Thermal protection is provided.

Remote sensing
Remote sensing only on +5V

Operating temperature
0°C to 50°C

Storage temperature
−55°C to +85°C

Isolation
1000 VDC input to case
1000 VDC input to output

Efficiency
72% typical at full load

Weight
5.5 lbs. (2.5 kilograms)

Size
2.7" × 5.25" × 11" max
(6.9 cm × 13.4 cm × 28 cm max)

Safety
Designed to meet UL 478 and UL 1012 and CSA 22.2. Model 1110 UL certification pending.

Temperature stability
Better than .02%/C°

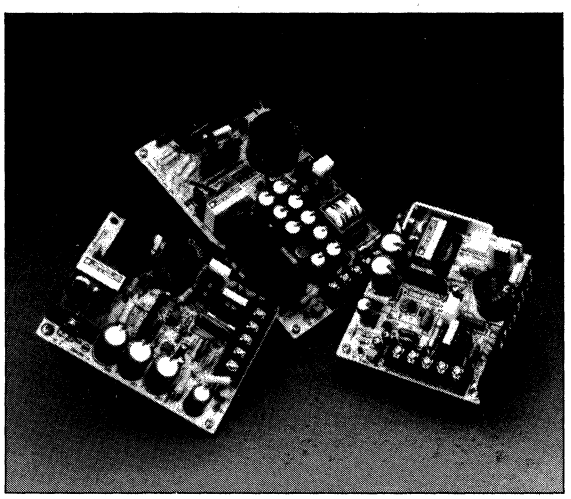
PERFORMANCE, RELIABILITY AND VALUE FOR YOUR POWER SUPPLY NEEDS

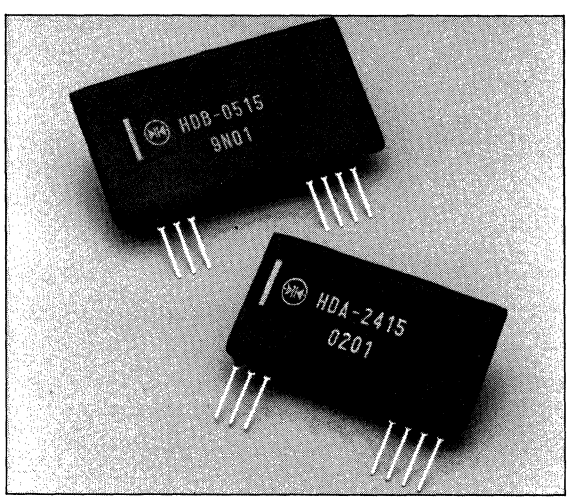
MULTIPLE OUTPUT
Switching Power Supplies



FEATURES
- MTBF up to 300,000+ hours
- UL, CSA, IEC Safety Approvals
- Over Voltage/Overload Protection
- On-Board EMI Filters Meet FCC and VDE Level B

DESCRIPTION
- Convection Cooled, Open Frame
- 2, 3, 4 or 5 Outputs
- Dual Input Voltage
- 19 Models, 15 to 160 Watts
- Full International Specs
- Popular Package Sizes

DC-DC CONVERTERS
Power Supplies



FEATURES
- High Reliability
- Compact, Light Weight
- Low Cost

DESCRIPTION
- 1 Watt thru 150 Watt Ratings
- 5, 12, 24 and 48 VDC Inputs
- SIP and Standard Board-Mounted Packaging
- Single, Dual and Triple Outputs
- Input/Output Isolation
- Input/Output Filters

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

SHOGYO TRANSFORMERS AND ADAPTERS

Your design deserves Shogyo quality and reliability.
You deserve...
Shogyo Service...comprehensive, responsive and fast
Shogyo Professionalism...the helpful experience you need
Shogyo Prices...always competitive, usually better
and...
Shogyo Selection...with complete custom design capabilities

Including a diverse offering of UL/CSA approved:

- *Power transformers:*
  standard core sizes from EI-28 to EI-86, Nylon 66, PBT or Phinolic bobbin materials, channel frame or PCB mounting, enclosures with or without endbells, and UL recognized AWM, terminal, or pin connections
- *Double protection power transformers:*
  conform with UL 1411 seven hours construction and abnormal test requirements, 3500V dielectric test voltage
- *Line matching transformers:*
  70.7 and 25 volt, maximum power levels from 2 to 16 watts, standard core sizes from EI-41 to EI-66, and a secondary impedance of 8 ohms
- *Telephone coupling transformers:*
  high quality low insertion loss, core sizes from EI-19 to EI-35, frequency response of 300–3500Hz ± 3dBa, and a secondary impedance of 500, 600, or 900 ohms
- *Lamp ballast transformers:*
  UL 935 listed simple reactance coil type
- *Wall-mount, plug-in adapters:*
  European or American, 120V, 50/60Hz inputs, outputs from 3VDC to 24VDC, 100mA to 1.7Amp, and 0.3 to 14.4 watts

And featuring:

- *PC pin, solder leg mount or lead wire connections*
- *A complete line of mating cords and terminating plug connectors*

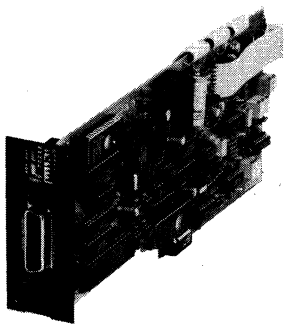
POWER SUPPLIES FOR OEM AND INSTRUMENTATION APPLICATIONS

Toll Free: 1-800-525-2024/FAX: 312-775-7432

IEEE 488 INTERFACE CARD—OPTION M9A



NEW!
AVAILABLE FOR XT, HPD or DCS SERIES

- **Querying of setting, faults, errors**
- **Extensive request capability w/delay**
- **Programmable OVP & OVP reset**
- **Rear-panel accessible polarity, isolation, fault signals & external shutdown inputs.**

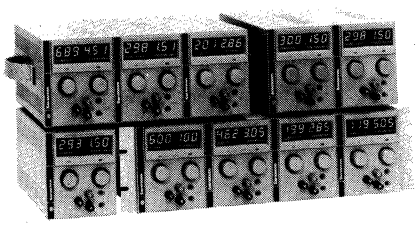
Option M9A allows any Sorensen XT, HPD or DCS Series power supply to operate with IEEE 488 GPIB (General Purpose Interface Bus) networks. Output voltage and current are controlled within 12-bit resolution. Front panel adjustable OVP is standard. Also, digital readback (actual) (12-bit resolution) of V&I is standard. Available customer or factory installed; see chart.

Specifying Note for XT and HPD Series. Where 8-bit resolution is acceptable for digital readback of Volts & Amps, contact Sorensen for Option M9.

LABORATORY/INDUSTRIAL POWER INSTRUMENTS

XT SERIES—Bench, Lab, Test and System 60-Watt Programmable Power Supplies

INTERNAL IEEE 488 INTERFACE AVAILABLE



XT Series 60 W programmable power supplies are designed for benchtop and portable applications requiring affordable, low noise and low ripple performance. Single output models may be configured into a standard package providing dual, triple, or quad outputs of the same voltage or a "custom configuration". Options include remote programming, OVP, remote ON/OFF, and isolated tracking. Customer-installed rack adapters are available for all packaging sizes. Output voltages are adjustable from 0-7 to 0-120 Vdc; current levels are from 0.5 to 6A. 0.01% line & load +2mV regulation; 1.0 mV rms ripple, 100 μs transient response ±50% change (typical), 10-turn pots, remote sensing. Options: M11 (10-turn current control pot). M5 (remote programming, remote On/Off, OVP, rear panel connectors, output/sense lines & remote control). M7 (incl. M5 + isolated tracking, audible mode). M9A IEEE 488 Interface Card). Input Voltage: 115 VAC ±10%, 10, 57-63 Hz. 3 year warranty.

Model	Voltage (Vdc)	Current (Adc @ 30°C)	Unit Price
XTS 7-6	0-7	6	$ 665.00
XTS15-4	0-15	4	665.00
XTS 20-3	0-20	3	665.00
XTS 30-2	0-30	2	665.00
XTS 60-1	0-60	1	665.00
XTS120-.5	0-120	0.5	665.00

XT Multiple Output Units
(Available with above mixed voltage and current outputs)

Model	Outputs	Case Size	Unit Price
XTD	Dual	See	$1,200.00
XTT	Triple	Table	1,770.00
XTQ	Quad	Below	2,220.00

NOTE: To order, use model number prefix (for number of outputs desired) followed by voltage-current outputs. For example: Four model XTS 20-3 in one package; order part number XTQ 20-3. Input power for each unit is 105/129 Vac - 1.2A. Multiple units are available with mixed voltage/current outputs (consult factory).

XT Options

Model	Description		Unit Price
M5	• Remote Programming • Remote On/Off • OVP • Rear Panel Connector		$190.00 per output
M7	• Includes M5 Options Plus: • Isolated Tracking • Audible Mode Indicator		$265.00 per output
M9A	IEEE 488 Interface Card Factory Installed—Specify M9A Customer Installed—Specify 1064062-1		$650.00 per output
M11	10-Turn Current Control Pot		70.00 per output
XTRA-1	1 unit	Rack Adapter Kit (contact factory)	$190.00
XTRA-2	2 units		
XTRA-3	3 units		
XTRA-4	4 units		
Special Orders	• Multiple Output Units with Mixed Voltage or Current Ranges are Available.		Details on Request

NOTE: To order, add option suffix to model number. Example: Order XTS 7-6 M7 for model XTS 7-6 with option M7.

Case Sizes—In. (mm)

Case	Height	Width	Length
Single	5.4 (137)	4.25 (107.9)	11.5 (292.1)
Dual		8.5 (215.9)	
Triple		12.75 (323.8)	
Quad		17 (431.8)

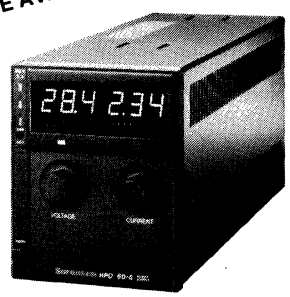
HPD Series—Bench, ATE & System 300-Watt Programmable Power Supplies

INTERNAL IEEE 488 INTERFACE AVAILABLE

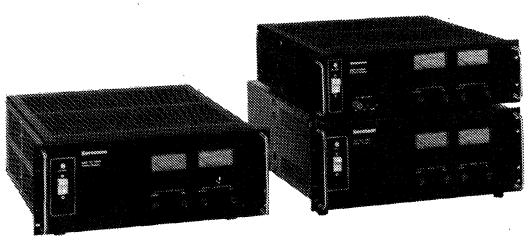


HPD Series (High Power Density) 300 W programmable power supplies are designed for system, benchtop, ATE and other instrument controlled applications. HPD Series offers 300 watts in a 1/4" rack package, zero-up output voltage & current, linear post regulator which achieves low output ripple and noise, and meets FCC class A requirements for reduced EMI. Single output models may be configured into a standard package providing dual, triple or quad outputs of the same voltage or a custom configuration. Options include IEEE 488 interface, OVP, remote programming, remote On/Off, rear panel terminals, isolated tracking, audible mode indication (consult factory) and 12-bit digital readback of Volts and Amps.

Output voltages are adjustable from 0-15 to 0-60 Vdc; current levels are from 5 to 20A. Ambient operating temperature is from 0-30°C. 0.01% + 2mV line & load regulation; 0.01% + 1mA line & load current regulation. Constant voltage ripple (PARD) is 5 mV rms/50 mV p-p; constant current ripple (PARD) is 5 mA rms/20 mA p-p. Transient response is < 500 μs. 10-turn voltage control pot, remote sensing. Input voltage: 115 Vac ±10%, 1 Ø, 57-63 Hz (47-400 Hz with 20% output current derating). 5 year warranty.

Model	Voltage (Vdc)	Current (Adc @ 30°C)	Unit Price
HPD 15-20	0-15	20	$1,350.00
HPD 30-10	0-30	10	1,350.00
HPD 60-5	0-60	5	1,350.00

DCR-B SERIES –High Power Single Phase Input Laboratory and Industrial Power Supplies (with built-in overvoltage protection on all models)



DCR-B Series high power laboratory and industrial power supplies have input SCR controlled regulator which provides unparalleled reliability along with regulation and transient response performance suitable for nearly all burn-in and test applications. 31 models in 9 voltage ranges offer from 0-7 to 0-600 Vdc with power levels from 400 to 2700W. OVP standard; LCD digital meters available. 0.05% line & load regulation (typical), 65-1200 mV rms ripple (model dependent), 50 ms transient response—50% change (typical). Sorensen has over 20 years of industry experience in designing this type of product. 5 year warranty.

DCR-B Accessories

Description	Unit Price
Chassis slide kits are available for all DCR-B models; contact factory for specifying assistance.	$125.00

NOTE: Unit may be controlled by IEEE-488 GPIB Bus via Sorensen's 488-DAP products.

DCR-B Input Voltage Modifications

Description	Model	Unit Price
115 (105-125) Vac Standard on All Models Except	Standard	N/C
• Case Sizes IV and V	Not Available	
208 (190-230) Vac Available for All Models	M1	$125.00
• Case Sizes IV and V	Standard	N/C
220 (200-240) Vac Available for All Models	M2	125.00
230 (210-250) Vac Available for All Models	M3	125.00

NOTE: To order, add option, modification suffix to model number. Example: Order DCR 10-40B M2 M50 to get this model with factory installed Digital Panel Meters and 220 volt input.

Model[1]	Voltage (Vdc)	Current (Adc @ 40°C)	Case Size[2]	Unit Price

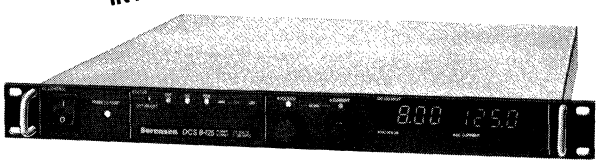
DCS Series—1 kW Programmable Switchmode Power Supplies

INTERNAL IEEE 488 INTERFACE AVAILABLE



The DCS Series represents the latest advancement of switchmode technology in programmable DC sources . . . a light weight, low cost, compact solution to many DC requirements. This new design provides excellent performance for a wide variety of applications and complies with FCC Part 15, subpart J, Class A, which clearly defines the limitations of conducted and radiated noise. Choose from 9 models: 0-8 to 0-600 Vdc. Standard features include remote programming, 10-turn V&I pots, indicator lamps (V, I, OVP, remote shutdown & remote/local), On/Off switch (with resettable circuit breaker), 3.5 digit voltmeter on sense line, and 3.5 digit ammeter (green LED type). Option: IEEE 488 plug-in programming PC card. Line & load regulation: 0.1%; Ripple: 10-100 mV rms. Dual selectable input: 100-132/200-264 Vac, 47-63 Hz, 1 phase. 5 year warranty.

Model	Voltage (Vdc)	Current (Adc @ 40°C)	Case Size	Unit Price
DCS 8-125	0-8	125	I	$1,150.00
DCS 20-50	0-20	50	I	1,150.00

DCR-T SERIES—High Power Three Phase Input Laboratory and Industrial Power Supplies

New DCR-T Series high power lab/industrial power supplies are specifically designed to meet today's requirement for sophisticated control and product styling of the high power burn-in market. 5 kW & 10 kW DCR-T Series represent state-of-the-art SCR controlled regulation as well as state-of-the-art features and packaging. 18 models: 0-4 Vdc to 0-600 Vdc and 4 to 800 Adc. Unique DCR-T includes full remote control, full remote monitoring, along with front panel adjustable or remote OVP programming. Features include: OVP shutdown, phase loss and thermal shutdown standard. All features available under remote On/Off or remote read back.

Features available on rear panel connectors: ac control, shutdown, voltage set, current set, OVP set, local/remote, remote V & I meter drive, OVP indication, thermal/phase indication, and remote sense. 0.1% line & load regulation (typical), 30-150 mV rms ripple (model dependent), 40 ms transient response - 50% change (typical), EMI protection on ac line. 5 year warranty.

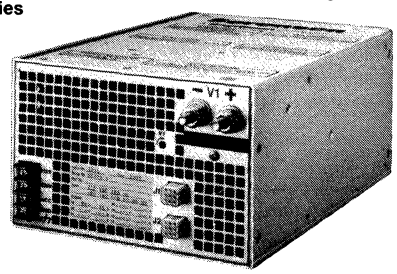
S SERIES—500W to 2kW, 1 to 5 Outputs Switching Power Supplies

File E85422

NEW



High power and reliability with high packaging density are achieved through power MOSFET design. Additional advantages are high switching speeds, lower noise, ease of filtering, fast load response (even at low input voltages), absolute current sharing and 2-stage current limiting. Thousands of models are available with 500W, 750W, 1000W, 1250W, 1500W and 2000W power levels . . . and choice of 1 to 5 outputs (2V, 5V, 12V, 15V, 18V, 24V, 28V, 36V & 48V). Remote sensing can be specified and OVP is standard on outputs V1, V2, V3 & V4. Current sharing, reverse polarity protection, power fail warning & thermal shutdown are also standard features. UL, CSA & VDE recognized.

Dual (90-130/180-260 Vac) power inputs. Options include: dc power input (selected models), 3 phase (208/230 Vac input—1500W models), reverse air flow, DC OK, FCC Class A air filter, transzorb, and current sharing on V1 and V2 outputs. Regulation: Line—0.2%, Load—0.4%. Ripple & Noise (PARD): differential mode, 1% max. or 50 mV, whichever is greater. 5 year warranty.

S Series Options

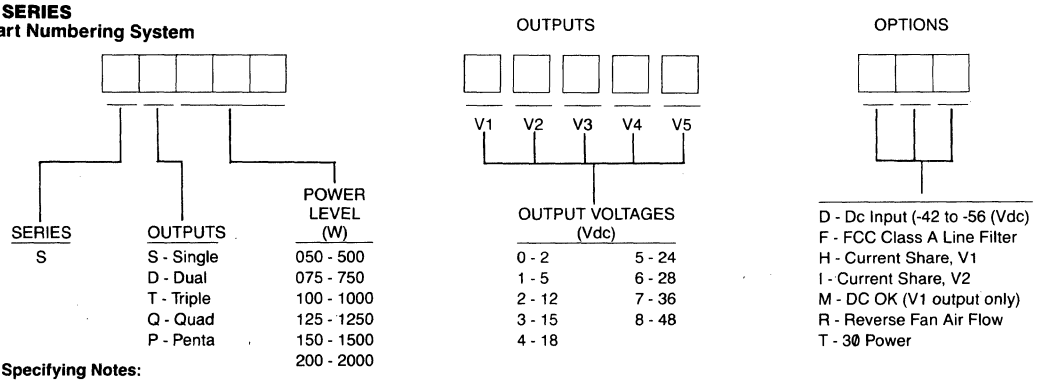
Description	Option Code
–42 to –56 Vdc input (500W, 750W, 1000W)	D
FCC Class A Line Filter	F
Current Share, V1 output	H
Current Share, V2 output	I
DC OK	M
Reverse Air Flow	R
3 phase ac input	T

Case Sizes—In. (mm)

Case	Width	Height	Length
I	8 (203.2)	5 (127)	12 (304.8)
II*	8 (203.2)	5 (127)	12 (304.8)
III	8 (203.2)	5 (127)	14 (355.6)

*Case II has dimensional variables inside overall envelope as compared to case I.

S SERIES Part Numbering System



Specifying Notes:

1. Current sharing standard on single output model.
2. Line filter (FCC 20780, Level A and VDE 0871, Level A) not available with 30 input (Option T). V5 output not available if line filter is specified.
3. DC-OK; optional form "C" relay is activated when output drops 5% below nominal.
4. DC input (Option D) available on 500W, 750W & 1000W models only.

ORDERING SINGLE & DUAL OUTPUT POWER SUPPLIES

EXAMPLES

1. Required: 750W single output supply, 36V @ 21A rating, with forward air flow & overvoltage protection.

Part No.

S	S	0	7	5	7

OVP is standard on output V1.

2. Required: Single output 1500W, 2V @ 340A, reverse air flow & overvoltage protection.

Part No.

S	S	1	5	0	0	R

OVP is standard on output V1.

SINGLE OUTPUT					
	500W	750W	1000W	1500W	2000W
V1	2V, 120A 5V, 100A 12V, 42A 15V, 34A 18V, 28A 24V, 21A 28V, 18A 36V, 14A 48V, 11A	2V, 175A 5V, 150A 12V, 63A 15V, 50A 18V, 42A 24V, 31A 28V, 27A 36V, 21A 48V, 16A	2V, 230A 5V, 200A 12V, 83A 15V, 67A 18V, 56A 24V, 42A 28V, 36A 36V, 28A 48V, 21A	2V, 340A 5V, 300A 12V, 125A 15V, 100A 18V, 83A 24V, 63A 28V, 54A 36V, 42A 48V, 31A	2V, 400A 5V, 400A 12V, 167A 15V, 134A 18V, 111A 24V, 84A 28V, 72A 36V, 56A 48V, 42A
Unit Price		CALL FOR QUOTE			

1. Required: Dual output supply with forward air flow and OVP on both outputs.
Output V1: 400W, 5V, 80A max.
Output V2: 500W, 24V, 21A max.

Part No.

S	D	1	0	0	1	5

Specifying Note: 1000W model must be ordered to accommodate total power requirements. OVP is standard on outputs V1 and V2.

2. Required: Dual output power supply with reverse air flow and OVP on output V2.
Output V1: 500W, 5V, 90A
Output V2: 120W, 15V, 8A

Part No.

S	D	0	7	5	1	3	R

Specifying Note: To assure total wattage rating is not exceeded, a 750W supply must be specified with output V1 (5V, 110A max.) and V2 (15V, 8A max.). OVP is standard on outputs V1 and V2.

DUAL OUTPUTS*

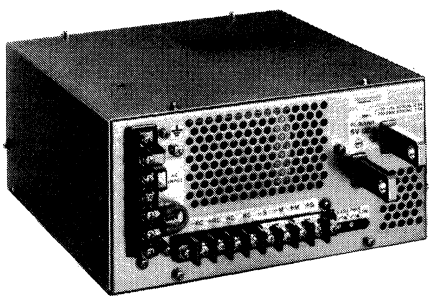
KE600 SERIES—600W Switching Power Supplies.

Previously SNG Series

File E85422



The advanced packaging of the KE600 Series 600W power supply is due to the state of the art 150 kHz switching technology, which allows high component density and light weight. This unit is designed with the end user in mind, providing maximum flexibility in the areas of remote On/Off, N+1 redundancy, selectable ac input, remote output monitoring, selectable remote sensing or PALS (Programmable Automatic Load Sensing) for fixed local line applications. PALS eliminates the need for external sense lines. Covers are supplied standard. Dual selectable ac inputs are: 85-132 Vac or 170-264 Vac, 1 phase, 47-440 Hz. Ripple/Noise: 0.1/0.008% max (model dependent). Line & Load Regulation: ±0.01% max. Meets UL, CSA, VDE (TUV) safety standards and conforms to FCC Class A on EMI. 2 year warranty.

Model	Voltage (Vdc) Adjustment Range		Current (Adc @50°C)	Unit Price
	Min.	Max.		
KE600-2	1.6	2.2	120	$650.00

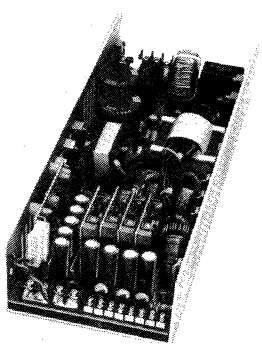
KSA400 SERIES—5 Output Switching Power Supply



Parallel-MOSFET forward converter technology gives a heavy duty, adjustable 5-output supply. KSA400 is built for up to 400W output and meets UL, CSA and TUV requirements, as well as EMI protection to FCC and VDE 0871, level 1. Outputs are: V1—5V+5%, 40 Adc (convection) or 50 A (forced air); V2, V3 & V4—5-15V, 0-6 Adc; V5—12-24V, 0-6 Adc. Overvoltage and remote sense are standard on V1; overcurrent protection is standard on all outputs. Power fail and remote inhibit are also standard. Dual selectable (95-132/190-264) power inputs (47-63 Hz, 1 phase). Optional cover with fan is available. Ripple & noise is greater of 1% or 100 mV pk-pk (V1 output—50 mV pk-pk). 2 year warranty.

MODULAR POWER SUPPLIES (continued)

KRE SERIES—Adjustable, Single-Output Switching Power Supplies

File E85422

150 kHz switching speed permits low cost supplies with small, compact packaging and high wattage/in.³. Output voltages are: 5V, 12V, 15V, 24V (±10%) at 50W, 100W and 150W power levels. Standard features include: OVP and overcurrent protection, inrush current limiting, remote sensing, covers, and dual input power (85-132 Vac or 110-176 Vdc). Series KRE meets UL (file E85422) and CSA safety standards and conforms to FCC Class B and VCCI-2 for EMI protection. Line regulation: ±0.5%; load regulation: ±1% max. Ripple/Ripple & Noise (p-p max.): 5V—60 mV/100 mV, 12V—120 mV/150 mV, 15V—180 mV/180 mV, 24V—240 mV/240 mV. 2 year warranty.

KVL SERIES—Compact, 3 Output Switching Power Supplies

NEW

KVL Series offers both low cost and small package size. Three outputs (+5V, ±12V & ±15V) are available in combinations at 15W, 25W, or 40W (nom.) power levels. Standard features are: overload and overvoltage protection, inrush current protection, cover mounting bracket, and ac (120V) or dc (110-170V) input. Cover is optional. Conforms to safety requirements of UL478 (UL file E85422); CSA C22.2, No. 1402; and noise standards of FCC-B. Output Effect (source, load & time): 5% max. Ripple: +5V (100 mV max.), ±12V & ±15V (150 mV max.). Noise: +5V (100 mV max.), ±12V & ±15V (150 mV max.). 2 year warranty

SR6 SERIES

SR6 Series 6kW HV Power Supplies

Features:

- Compact design and light weight
- Low cost per watt
- Low stored energy
- Low EMI and RFI
- Overvoltage, Overcurrent, Arc, and Short Circuit Protection
- Constant Voltage/Constant Current Operation with Automatic Crossover
- Arc Detect, Arc Quench and Arc Count
- Extensive Local and Remote Operation
- 85% efficiency
- System Status Indicators

The SR6 series incorporates series resonant converter technology with a unique patented control circuit to provide unmatched performance. Special circuitry enables this supply to operate without damage or interruption in rugged environments that frequently pose threats to conventional high voltage power supplies. In addition, the SR6 series protects your load from excessive peak currents by instantaneously limiting the output current when an arcover condition is sensed.

Remote Interface:

- Remote Voltage Control (0 to 10V)
- Remote Current Control (0 to 10V)
- Voltage Test Point (0 to 10V)
- Current Test Point (0 to 10V)
- Remote Power On/Off
- External Interlock
- Inhibit Control of High Voltage Output
- External HV On/Off Control and Indicators

The SR6 series provides extensive remote control capabilities with many standard features not usually found in other supplies. This combination provides the SR6 with flexibility for integration into your applications. Optional circuitry is available to meet your requirements. See Options section.

Specifications:

- Input: 208VAC ±10%, 50 or 60Hz, Three phase
- Output controls: Voltage and current are continuously adjustable over entire range via 10-turn potentiometers with a lockable counting dials.
- Voltage regulation:
  Load: 0.005% of full voltage for full load change.
  Line: ±0.005% of full voltage over specified input range.
- Current Regulation:
  Load: 0.05% of full current ±100uA for any voltage change.
  Line: ±0.05% of full current over specified input range.
- Ripple: 0.1% P-P.
- Temperature Coefficient: 100ppm/°C. Higher Stability (50ppm/°C) available on special order.
- Stability: 0.01%/hr. after ½ hour warm up, 0.02% per 8 hrs. (typical).
- Metering: Digital voltage and current meters, 1% accuracy.
- Output cable: 10 ft. shielded high voltage cable, removable at rear panel.
- Physical: 10 ½" H x 19" W x 19" D rack mount for units 1 to 70kV. 10 ½" H x 19" W x 24" D for units 80 to 120kV.

Options:

- AOL Adjustable Overload Trip
- FG Floating Ground
- LR Low Ripple (0.05% P-P)
- CPC Constant Power Control
- APT Adjustable Power Trip
- 220 220V AC Single Phase Input
- RMI Remote Mode Indicators
- ROA Remote Overvoltage Adjust
- SL Mounting Slides
- Filament Power Supply
- 12kW & 18 kW Parallel Operation

If you don't see the features or options that your application requires, please contact us with your needs so we may discuss customizing one of our products to match your application.

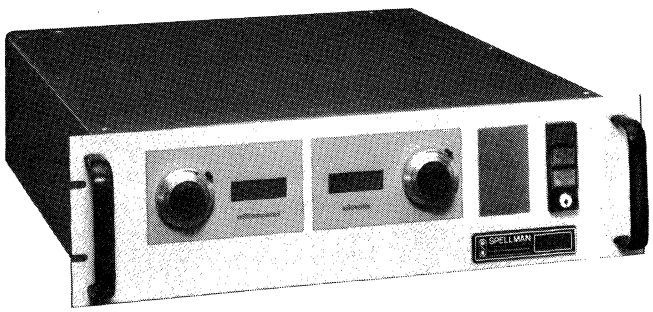
SA4 SERIES

SA4 Series 4kW HV Power Supplies



Features:

- **Compact design and light weight**
- Low cost per watt
- Low stored energy
- Low EMI and RFI
- Overvoltage, Overcurrent, Arc, and Short Circuit Protection
- Constant Voltage/Constant Current Operation with Automatic Crossover
- Arc Detect, Arc Quench and Arc Count
- Extensive Local and Remote Operation
- 85% efficiency
- System Status Indicators

The SA4 series incorporates series resonant converter technology with a unique patented control circuit to provide unmatched performance. Special circuitry enables this supply to operate without damage or interruption in rugged environments that frequently pose threats to conventional high voltage power supplies. In addition, the SA4 series protects your load from excessive peak currents by instantaneously limiting the output current when an arcover condition is sensed.

Remote Interface:

- Remote Voltage Control (0 to 10V)
- Remote Current Control (0 to 10V)
- Voltage Test Point (0 to 10V), 0.5% accuracy
- Current Test Point (0 to 10V), 0.5% accuracy
- Remote Power On/Off
- External Interlock
- Inhibit Control of High Voltage Output
- External HV On/Off Control and Indicators

The SA4 series provides extensive remote control capabilities with many standard features not usually found in other supplies. This combination provides the SA4 with flexibility for integration into your applications. Optional circuitry is available to meet your requirements. See Options section.

Specifications:

- Input: 208VAC ±10%, 50 or 60Hz, three phase
- Output controls: Voltage and current are continuously adjustable over entire range via 10-turn potentiometers with lockable counting dials.
- Voltage regulation:
  Load: 0.005% of full voltage for full load change.
  Line: ±0.005% of full voltage over specified input range.
- Current Regulation:
  Load: 0.05% of full current ±100uA for any voltage change.
  Line: ±0.05% of full current over specified input range.
- Ripple: 0.1% rms. Lower ripple available.
- Temperature Coefficient: 100ppm/°C. Higher Stability (50ppm/°C) available on special order.
- Stability: 0.01%/hr. after ½ hour warm up, 0.02% per 8 hrs. (typical).
- Metering: Digital voltage and current meters, 1% accuracy.
- Output cable: 10 ft. shielded high voltage cable, removable at rear panel.
- Physical: 5¼" H x 19" W x 22" D rack mount.

Options:

- AOL Adjustable Overload Trip
- FG Floating Ground
- LR Low Ripple (0.05% rms)
- CPC Constant Power Control
- APT Adjustable Power Trip
- 220 220V AC Single Phase Input
- RMI Remote Mode Indicators
- ROA Remote Overvoltage Adjust
- SL Mounting Slides
- Filament Power Supply
- Parallel Operation
- Arc Status, Arc Quench, Arc Count

If you don't see the features or options that your application requires, please contact us with your needs so we may discuss customizing one of our products to match your application.

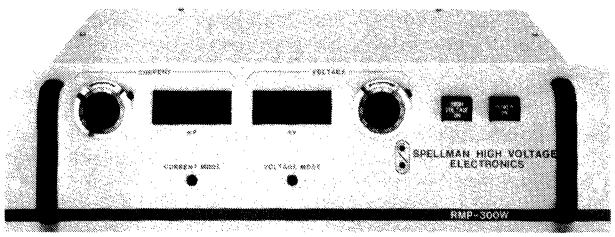
RMP SERIES

RMP Series 300W-1kW HV Power Supplies



* Picture might not depict some models

Features:

- Low cost per watt
- Low stored energy
- Low EMI and RFI
- Overvoltage, Overcurrent, Arc, and Short Circuit Protection
- Constant Voltage/Constant Current Operation with Automatic Crossover
- Remote Operation
- Efficiency greater than 90%
- Slow Start
- Modular Design

The "Bullet Proof" design of the RMP series allow outstanding operation under arcing and extreme transient conditions without interruption or damage. In addition to providing protection, the patented control circuitry enables the supply to have a dynamic response time of less than 5 milliseconds, extremely low ripple and excellent regulation. The same series resonant topology and patented control circuitry that is found in our higher power models is utilized to give you superior performance and reliability in this series.

Options:

- OL Overload Trip
- CE CMOS Enable
- APM Analog Panel Meters
- 220 220V AC Single Phase Input
- 100 100V AC Single Phase Input
- NSS No Slow Start
- SL Mounting Slides
- SS(x) Non-standard Slow Start (x = time in seconds)
- FPR Front Panel Reversibility (1-30kV only) *
- LL Extra Length Output Cable *
- F(x) Focus Output (x = voltage in kV) *
- High Peak Power
- Bi-polar Operation
- Custom Designs

If you don't see the features or options that your application requires, please contact us with your needs so we may discuss customizing one of our products to match your application.

* Certain options will increase the length of the chassis.

Specifications:

- Input: 115VAC ±10%, 50 or 60Hz, Single phase
- Output controls: Voltage and current are continuously adjustable over entire range via 10-turn potentiometers with lockable counting dials.
- Load regulation: 0.005% of full voltage for NL to FL change.
- Line regulation: ±0.005% of full voltage over specified input range.
- Ripple: 0.05% Peak to Peak for 300 watt units. 0.1% Peak to Peak for 500 & 1000 watt units.
- Temperature Coefficient: 100ppm/°C Higher Stability (50ppm/°C) available on special order.
- Stability: 0.02%/hr. after ½ hour warm up, 0.05% per 8 hrs. (typical).
- Metering: Digital voltage and current meters, 1% accuracy.
- Output cable: 10 ft. shielded high voltage cable, removable at rear panel.

Dimensions	300 & 500 Watts		1000 Watts	
	1-60kV	80-125kV	1-60kV	80-125kV
Height	5¼"	5¼"	10½"	10½"
Width	19"	19"	19"	19"
Length	17"	24"	17"	24"

Remote Interface:

- Remote Voltage Control (0 to 10V)
- Remote Current Control (0 to 10V)
- Voltage Test Point (0 to 10V)
- Current Test Point (0 to 10V)
- TTL Enable (0V = HV OFF, > 4.5 V = HV ON)
- Floating Ground (50v Max.)
- External Interlock
- Reference Voltage (10.24V DC)

RHP & DXR SERIES

RHP Series 3kW HV Power Supplies

Features:

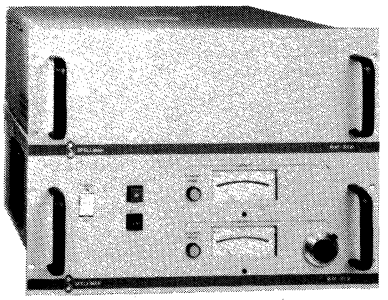
- Low Stored Energy
- Low EMI and RFI
- Overvoltage, Overcurrent, Arc and Short Circuit Protected
- Over 85% efficiency
- Remote Test Points and Remote Programming
- Inhibit Control of HV Output Via TTL Signal
- External Interlock Safety Circuitry

Options:

- DPM Digital Panel Meters
- CR Current Regulation
- CFC Coarse/Fine Controls
- FG Floating Ground
- 220 220V AC Single-phase Input
- RHVE Remote High Voltage Enable
- EAR External Alarm Relay

Specifications:

- Input: 208V AC ±10% Three phase, 50-60 Hz



- Line Regulation: ±0.01% for ±10% input change
- Load Regulation: 0.02% for a NL to FL change
- Ripple: 0.02% RMS
- Stability: 0.02%/hr. after ½ hr warm-up, 0.05%/8hrs
- Metering: Analog voltage and current meters, 2% accuracy
- Physical : 14" H x 19" W x 19" D rack mount for units 1-80kV. 15 ¾" H x 19" W x 19" D for 100 & 120 kV units.

Maximum Rating kV	mA	Model Number

180	16	RHP180*3

* Specify "P" for positive, "N" for negative or "PN" for reversible polarity.

The unique high frequency resonant inverter circuitry of the RHP series provides these supplies with outstanding performance. This technology improves output control and eliminates switching losses and undesirable electromagnetic radiation normally associated with switching and phase control regulators. Combining this performance with quality design and workmanship make the RHP series HV power supplies the best choice for your high voltage application.

DXR3000 Series 3kW X-Ray Generators

Features

- Greater than 85% efficiency
- High Stability
- Automatic Slew of High Voltage & Emission Current to Presets Values
- Automatic Matching of Filament Current to various X-Ray Tubes
- Continuous Adjustment of High Voltage & Emission Current
- Low Stored Energy
- Overvoltage, Arc and Short Circuit Protected
- Fault Diagnostics and Display
- External Safety Circuitry

Options:

- Outputs to 75kV
- Constant Output Power Capability
- 208V AC Three-phase Input, 50-60Hz
- Remote Interface for All Analog and Digital Functions
- Fast Emission Current Response (stable to 0.1% within 50mS)
- Output Power Limit
- Output Power Regulation

Specifications:

- Input: 220V AC ±10% Single phase, 50-60Hz
- Output Voltage: 0-60kV
- Output Voltage Regulation: ±0.01% for ±10% input change
- Output Voltage Ripple: 0.1% RMS
- Output Voltage Stability: 0.01% per hour after 1/2 hour warm-up
- Emission Current: 0-50mA
- Emission Current Stability: 0.02% per hour
- Emission Current Regulation: 0.1% for a 50% voltage change
- Filament Compliance Voltage: 0-20Vdc
- Filament Current: 0-6Adc
- Metering: Analog voltage and current meters 2% accuracy
- Physical: Three chassis, each 7" H x 19" W x 20" D
- Weight: 180 lbs total

The DXR3000 offers a unique combination of low cost, high performance and compact size for x-ray diffraction systems and similar x-ray applications. Based upon the RHP series, the DXR3000 offers the same outstanding performance as its predecessor. The DXR3000 is field proven for custom applications, OEM designs and as retrofit for old x-ray generators.

RHSR, RHR & UHR SERIES

RHSR Series Medium Power HV Power Supplies

Features:

- Exceptionally Good Regulation
- Very Low Ripple
- Remote Programming and Test Points
- Overload and Short Circuit Protected
- Low RFI
- Low Stored Energy

Specifications:

- Input: 105-125V AC, 50-60Hz
- Output: Voltage continuously adjustable over entire range from zero to maximum rated voltage by means of a 10-turn potentiometer
- Load Regulation: 0.001% for FL Change.
- Line Regulation: ±0.001% for a ±10% input change.
- Ripple: 0.001% RMS
- Stability: 0.005%/hr; 0.01%/8hrs
- Metering: Analog voltage and current meters, 2% accuracy.
- Physical: All units are 19" W x 16" D. See Chart for height.

Max. Rating kV	mA	W	Model Number	Height (in inches)
5	10	50	RHSR5PN50	5 1/4"

50	1	50	RHSR50*50	8 3/4"
60	1	60	RHSR60*60	8 3/4"

* Specify "P" for positive, "N" for negative or "PN" for reversible polarity

RHR Series Medium Power HV Power Supplies

Features:

- Good Regulation
- Low Ripple
- Overload and Short Circuit Protected
- Low RFI
- Low Stored Energy
- Three Year Warranty

Options are available to adapt the unit to each specific requirement. Options include remote voltage programming, remote voltage and current monitoring, current regulation and external interlock. Contact factory for further details.

Specifications:

- Input: 105-125V AC, 50-60Hz
- Output: Voltage continuously adjustable over entire range from zero to maximum rated voltage by means of a 10-turn potentiometer.
- Load Regulation: 0.01% for FL change.
- Line Regulation: ±0.01% for a ±10% input change.
- Ripple: 0.02% RMS + 2V RMS, Models over 100kV are 0.1% RMS
- Stability: 0.02%+ 2V/hr; 0.05%+ 5V/8hrs
- Metering: Analog voltage and current meters, 2% accuracy.

All units up to 100kV are designed for 19" rack mounting. Units over 100kV consist of a driver chassis, high voltage stack and a rack mountable remote control panel with 15' of cable. See chart for dimensions.

If you don't see the model that your application require we invite you to contact us with your special requirements so we may discuss customizing our products to meet your needs.

UHR Series Medium Power HV Power Supplies

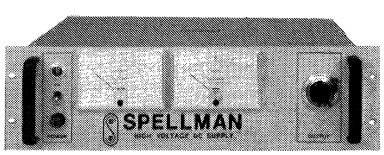
Features:

- Good Regulation
- 0.1% RMS Ripple
- Overload and Short Circuit Protected
- Low RFI
- Low Stored Energy

Options are available to adapt the unit to each specific requirement. Options include remote voltage programming, remote voltage and current monitoring, current regulation and external interlock. Contact factory for further details on options and custom designed models.

Specifications:

- Input: 105-125V AC, 50-60Hz
- Output: Voltage continuously adjustable over entire range from zero to maximum rated voltage by means of a one-turn potentiometer.
- Load Regulation: 0.05% for FL Change.



- Line Regulation: ±0.05% for a ±10% input change.
- Ripple: 0.1% RMS
- Stability: 0.05%/hr; 0.1%/8hrs
- Metering: Analog voltage and current meters, 2% accuracy.

All units up to 100kV are designed for 19" rack mounting. Units over 100kV consist of a driver chassis, high voltage stack and a rack mountable remote control panel with 15' of cable. See chart for dimensions.

PTV & SMS SERIES

PTV Series 200W Modular HV Power Supplies

Features:

- Output voltages from 1kV to 60kV @ 200 watts continuous, 600 watts peak
- Auxiliary high voltage outputs
- Voltage programming from zero to rated output
- Inhibit control of output via TTL signal
- Test points for output voltage and current
- Designed to meet UL®, CSA and IEC 950 specifications
- Overvoltage protection
- Current Limit and Short Circuit protection
- Low stored energy

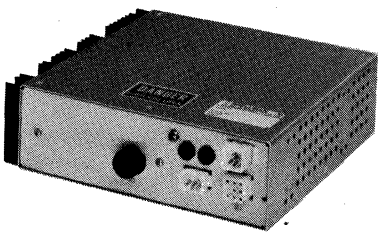
The PTV series utilizes a new quazi-resonant inverter design that provides over 85% efficiency, a very fast dynamic response and very high peak current capability. The PTV's fast response and high peak power capabilities make this power supply ideal for applications such as:

- Projection Television
- X-Ray
- Microwave
- Electron Beam
- Capacitor charging

Specifications:

- Input: 100/115/230V AC ±10% 50/60Hz
- Output: models from 1kV to 60kV. Each model is available in positive or negative polarity outputs.
- Load Regulation:
  Static: 0.01% of output voltage for NL to FL change.
  Dynamic: 50V/mA
- Line Regulation:
  ±0.01% for a ±10% input voltage change.
- Ripple:
  1-30kV: 0.05% p-p of output voltage.
  40-60kV: 0.1% p-p of output voltage.
- Physical: typically 10" x 10¾" x 3 3/16" Alternate mechanical packages available
- Input Connector: 9 pin AMP Metri-Mate
- Output Cable: 18" ±1" of UL® approved high voltage wire.
- Voltage Stability: 0.02% per 8 hours
- Voltage Temperature Coefficient: 0.01% per °C

All models can be customized to your application's requirements. Please contact the Sales Department with your needs.



Maximum Rating kV	Maximum Rating mA	Model Number

40	5	PTV40*200
50	4	PTV50*200
60	3.4	PTV60*200

* Specify "P" for positive polarity or "N" for negative polarity

SMS Series 60W Modular HV Power Supplies

Features:

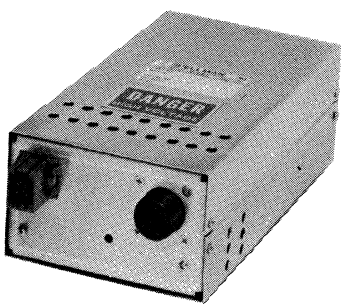
- Output voltages from 1kV to 60kV @ 60 watts
- Voltage programming from zero to rated output
- Current programming from zero to rated output
- Inhibit control of output via TTL signal
- Test points for output current and voltage
- Mode indicators for current and voltage control
- Overvoltage protection
- Overvoltage latch reset
- Designed to meet UL® requirements
- Low stored energy
- Compact package

The SMS series is based on a resonant flyback circuit that provides over 80% efficiency and high pulse current capability. This supply is ideal for applications requiring high peak current from a power supply that operates from a low voltage DC input. With the addition of optional circuitry, the SMS series has capability of delivering constant power down to 25% of the rated output voltage. Please consult the Sales Department for information on this and other options.

Specifications:

- Input: +28V DC ±10%
- Output: 10 models from 1kV to 60kV. Each model is available in positive or negative polarity outputs.
- Load Regulation:
  Static: 0.01% of output voltage for NL to FL change.
  Dynamic: 10V/100µA maximum NL to FL.
- Line Regulation:
  ±0.01% for a ±10% input voltage change.
- Ripple:
  1-30kV: 0.05% p-p of output voltage.
  40-60kV: 0.1% p-p of output voltage.
- Physical: 5" x 9" x 3"
- Input Connector: 9 pin AMP Metri-Mate
- Output Cable: 18" ±1" of UL® approved high voltage wire.
- Voltage Stability: 0.02% per 8 hours
- Voltage Temperature Coefficient: 0.01% per °C

The flexibility of the SMS series' design makes it ideal for customizing to fit OEM and special requirements.



Maximum Rating kV	Maximum Rating mA	Model number
1	60	SMS1*60
3	20	SMS3*60
5	12	SMS5*60
10	6	SMS10*60

MM & MP SERIES

MP Series 10W High Stability HV Power Supplies

Designed as high performance DC to DC converters with output voltages up to 15kV, the MP Series power supplies combine linear and switched mode techniques minimizing internal dissipation and generated RFI. This gives improved output voltage stability and increased reliability. The high frequency oscillator may be synchronized to other MP modules or to an external source.

Applications:

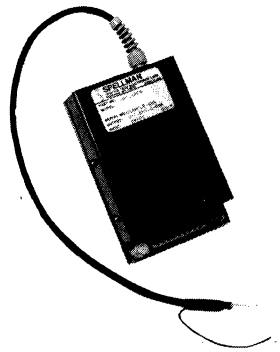
- Photo multiplier tubes
- Scintillators
- Electron guns
- Ion guns
- Nuclear instruments

Features:

- High stability - 0.001% line and load regulation
- Low output ripple - 0.001% p-p
- Remote Voltage Programming
- Output current and voltage monitor
- Arc and short circuit protected
- Internal oscillator may be synchronized externally
- Other options available

Specifications:

- Input Voltage: +24Vdc ±2V. Other input voltages available as option.
- Input Current: Less than 1A at full output.
- Output Voltage: Continuously adjustable over entire output range. Positive or negative output polarity.
- Line Regulation: 0.001% for input change of 1V.
- Load Regulation: 0.001% for 100μA to full load change (at maximum voltage).
- Temperature Coefficient: Better than .0025%/°C.
- Stability: 0.007%/hr at constant operating conditions after 1 hour warm up.
- Output Control:
  1) Internal 10-turn potentiometer
  2) External Potentiometer
  3) Remote Voltage Programming, 0 to 10V, accuracy 0.1% full scale
- Output Voltage Monitor: 0 to +10V represents zero to full output ±1%.
- Output Current Monitor: 0 to +10V represents zero to full output ±2%.
- Operating Temperature: 0°C to +50°C
- Storage Temperature: -35°C to +85°C
- Input: 10 pin connector (mating connector supplied)
- Output: 20" shielded cable with flying leads



- Size:
  5.83"L x 3.86"W x 1.65"H for units up to 3kV.
  7.44"L x 3.86"W x 1.65"H for units over 3kV.

Output Voltage	Max. Current	Ripple (full load)	Model
0 to 1kV	10mA	10mV p-p	MP1*
0 to 1.5kV	6mA	10mV p-p	MP1.5*
0 to 2kV	5mA	10mV p-p	MP2*
0 to 2.5kV	4mA	10mV p-p	MP2.5*
0 to 3kV	3mA	10mV p-p	MP3*
0 to 5kV	2mA	20mV p-p	MP5*
0 to 10kV	1mA	100mV p-p	MP10*
0 to 15kV	0.6mA	150mV p-p	MP15*

* Specify "P" for positive polarity or "N" for negative polarity

MM Series 1.5W PCB Mount HV Power Supplies

The MM Series high voltage power supplies are low cost, general purpose DC to DC converters, with output voltages up to 15kV, designed for direct PCB mounting. High reliability is designed into a compact and lightweight modular block intended for customer designed products at power levels up to 1.5 Watts.

The MM Series can be used with an external resistor feedback loop to provide regulated outputs. Application Notes are available from Spellman that show a range of voltage regulated circuits using the MM high voltage power supply.

Applications:

- Photomultiplier Tubes
- Solid State Detectors
- Flow Sensors
- Analytical Instruments
- Spectral Source Lamps
- Ink Jet Printers
- Gas Chromatography

Features:

- Outputs up to 15kV at 1.5 Watts
- Low cost
- Compact size
- Arc and short circuit protected
- Positive or Negative Outputs
- Output Voltage Proportional to Input Voltage

Specifications:

- Input Voltage: 9Vdc, 12Vdc, or 24Vdc. Other input voltages available upon special order.
- Output Voltages: Any preset maximum voltage between 500V and 15kV is available. Multiple outputs can also be supplied. Output voltage is proportional to the input voltage over the range 10% to 100%.
- Output Power: 1.5 Watts continuous; 3 Watts peak.
- Output Ripple: Less than 0.1% rms
- Load Regulation: 10% maximum
- Module Efficiency: 55% to 70%
- Isolated Outputs available
- Alternate Input Voltages available (6VDC to 28VDC)
- Modules are fully encapsulated in an ABS Box and may be wave soldered.
- Size:
  Up to 3kV: 1.57"L x 1.57"W x 0.79"H
  Over 3kV to 5kV: 1.97"L x 1.97"W x 1.18"H
  Over 5kV to 10kV: 2.95"L x 1.97"W x 1.38"H
  Over 10kV to 15kV: 3.74"L x 2.80"W x1.38"H

EPM, LCM & UM SERIES

EPM Series 30W Modular HV Power Supplies

Features:

- Output voltages from 1kV to 30kV @ 30 watts
- Voltage programming from zero to rated output
- Current programming from zero to rated output
- Inhibit control of output via TTL signal
- Test points for output current and voltage
- Overvoltage protection
- Designed to meet UL® requirements
- Compact package
- Low stored energy

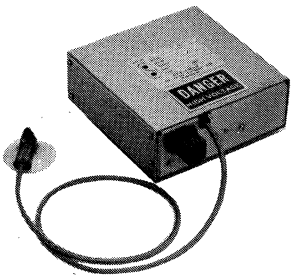
The EPM series utilizes proprietary circuitry enabling these high voltage power supplies to yield full output current from near zero to maximum output voltage. Current regulation is standard on all models and is particularly valuable in applications that require a current source into the load such as:

- Electrophoresis
- Electron Beam
- Ion Sources
- Photomultipliers
- Laboratory Applications

Specifications:

- Input: +24V DC ±10%
- Output: 8 models from 1kV to 30kV. Each model is available in positive or negative polarity outputs.
- Load Regulation:
  Static: 0.01% of output voltage for NL to FL change.
  Dynamic: 10V / 100µA NL to FL.
- Line Regulation:
  ±0.01% for a ±10% input voltage change.
- Ripple: 0.1% p-p of output voltage.
- Physical: 5.7" x 5.7" x 2"
- Input Connector: 9 pin AMP Metri-Mate
- Output Cable: 18" ±1" of UL® approved high voltage wire.
- Voltage Stability 0.01% per 8 hours
- Voltage Temperature Coefficient: 0.01% per °C
- Voltage Test Point: 10V ± 2% = Max. rated output
- Current Test Point: 10V ± 2% = Max. rated output

Spellman engineers designed the EPM to be very flexible so that it can be easily customized to fit your OEM and special requirements. Please contact Spellman's Sales Department to discuss your application's requirements.



Maximum Rating kV	Maximum Rating mA	Model Number
1	30	EPM1*30
3	10	EPM3*30
5	6	EPM5*30
10	3	EPM10*30
15	2	EPM15*30
20	1.5	EPM20*30
25	1.2	EPM25*30
30	1	EPM30*30

* Specify "P" for positive polarity or "N" for negative polarity

LCM Series CRT HV Power Supplies

Feature:

- Eight standard model from 2kV to 30kV
- Tight dynamic and static regulation
- Proven reliability
- Focus and Grid outputs up to ±1100 volts
- Short circuit and overload protected
- UL® recognized

The LCM series provides a low cost regulated high voltage source for applications such as powering CRT's. This design employs an ultrasonic resonant sinewave oscillator that reduces stored energy and minimizes RFI. All high voltage components are vacuum encapsulated in a high quality silicone elastomer ensuring corona-free operation.

Specifications:

- Input: +24V DC ±10% @ 800mA maximum at full load.
- Output voltage: See chart
- Load Regulation: 0.5% maximum
- Line Regulation: ±0.1% for a ±10% input change
- Ripple: see chart
- Operating Temperature: 0°C to 50°C case
- Output Cable: 15" ±1" of 40kV UL approved high voltage wire with anode cap.
- Case Dimensions: 4 5/32" L x 1 3/8" H x 3 5/32" W for 2-22kV models. 6" L x 2 1/8" H x 3 3/4" W for 30kV models.

Model	Maximum Rating voltage	Maximum Rating current	Ripple (V p-p)
LCM3.5	2 to 3.5kV	5mA @ 2kV 2.8mA @ 3.5kV	4
LCM5	3.5 to 5kV	2.8mA @ 3.5kV 2mA @ 5kV	4

LCM18	14 to 18kV	0.7mA @ 14kV 0.55mA @ 18kV	8
LCM22	18 to 22kV	0.55mA @ 18kV 0.45mA @ 22kV	8
LCM30	22 to 30kV	0.45mA @ 22kV 0.33mA @ 30kV	16

UM Series Unregulated Modular HV Power Supplies

Features:

- Low Cost
- Low Ripple
- Fully Enclosed Shielded Metal Case
- Encapsulated for Full Environmental Protection

The UM series provides compact, economical, unregulated high voltage for CRT's, PMT's, image intensifiers and scintillation counters. Maximum output voltages are from 1kV to 30kV and are proportional to input voltages.

Specifications:

- Input: +24V DC ±10% for maximum rated output
- Line regulation: Output voltage is approximately proportional to input voltage.
- Load Regulation: Less than 20%, no load to full load at maximum rating.
- Ripple: 0.1% RMS
- Output: Adjustable from zero to maximum rated voltage by adjustment of input
- Dimensions: Consult factory

Max. Rating Voltage	Max. Rating Current	Model Number

HVD Series Resistive Dividers

Features:

- High Input Impedance
- 25 ppm Temperature Coefficient
- High Accuracy
- Corona-Free Operation

Spellman's Resistive Voltage Dividers provide laboratory or production facilities with a convenient method of measuring up to 100kVdc or 200kVdc with accuracy better than 0.5%. The Dividers are designed for use with standard high impedance digital and differential voltmeters.

	HVD 100	HVD 200
Input Voltage	0-100kVdc	0-200kVdc
Input Impedance	1000M ohms	2000M ohms
Output Impedance	1 M; 100k ohms	10k ohms
Output Taps	100 V, 10V	2V

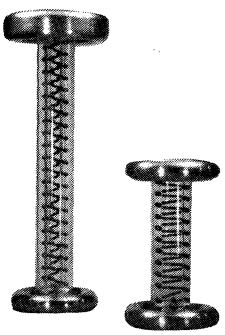
(1) For accuracy of 0.1% specify HVD100-1
(2) For accuracy of 0.25% specify HVD200-1



Custom Designs

Homologation:

To homologate is to communicate, to concur, to act in harmony, from the Greek *"homologos."* At Spellman, we always blend our thinking with yours. We analyze your system, your needs and your plans. We nurture the technology and the hardware at the beginning - and throughout the product life.

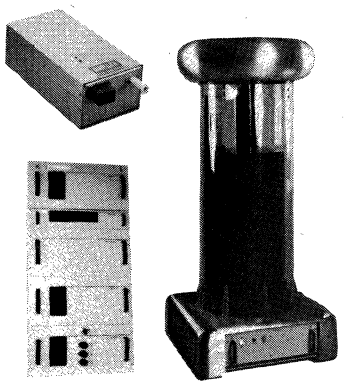
Through such homologation we now create each year more than 40 new power supply sub-systems. These sub-systems accelerate introduction, extend life and improve market share of a wide variety of OEM products. Custom power supplies have been homologized into OEM applications such as, Capillary Zone Electrophoresis, Projection Television and Analytical X-ray.

X-Ray Power Supplies

High peak power up to 100kW and continuous power up to 30kW is available using propriety circuitry to improve performance and reliability. Typical applications include CT scanners, radiological equipment, x-ray lithography and industrial x-ray systems. Spellman's HV generators include a floating filament supply, emission control and built in diagnostics.

Capacitor Chargers

Spellman's rack mounted models are available for current operation to permit capacitor charging at a linear rate. Special models can be ordered for high power when the capacitance and repetition rate is high.



SQM SERIES

SWITCHING SYSTEMS INTERNATIONAL

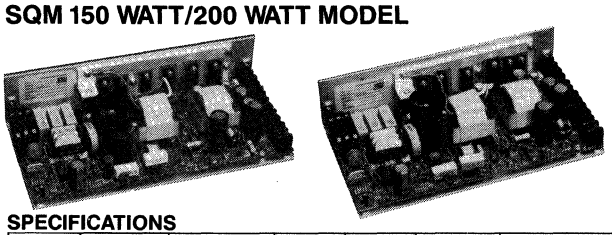
FEATURES FOR ALL MODELS

- International input capability (90-132/180-264 VAC, 47-440 Hz)
- Primary circuit protection against overvoltage
- Built-in line filtering meets the requirements of FCC Level B and VDE 0871 Level A
- 3750 VAC Safety Isolation, (4mm spacing primary to GND, 8mm spacing primary to secondary)
- Shielded power transformers
- Built-in overload and overvoltage protection
- Overtemperature shut-down
- Remote sense capability
- Vacuum impregnated magnetics
- Fixed frequency pulse-width modulation
- 24 hour high temperature burn-in AC cycled
- Designed to Meet VDE 0806, IEC 380, IEC 435, BS6301, IEC 950, UL1950, UL478, CSA22.2, FCC DOCKET 20780 LEVEL B, VDE0871 LEVEL A

Options include:

- "TTL-Hi" or "TTL-lo" power fail detect circuitry (customer specified)
- Power Valid Signal
- EMI/RFI Covers
- Universal Input "AUTO RANGER" (90-264 VAC Input)
- Remote Inhibit

SQM 150 WATT/200 WATT MODEL



SPECIFICATIONS

MODEL NO.	MAIN OUTPUT (V1) Vnom Imax	AUX #1 (V2) Vnom Imax	AUX #2 (V3) Vnom Imax	AUX #3 (V4) Vnom Imax	MAX OUTPUT POWER	OUTLINE DIMENSIONS

Input: 90-132 VAC/180-264VAC, 47-440Hz
Inrush: 15A @ 115V for ½ cycle
30A @ 230V for ½ cycle } Cold Start
Output: See output voltage table
Line Regulation: 0.2%, all outputs
Load Regulation: 1%, main output. 5%, aux no. 1. 1%, aux nos. 2 and 3
Adjustment Range: ±5%, aux nos. 2 and 3 and main output
Centering: ±3% aux no. 1
Cross Regulation: 3% aux no. 1 (change main output from 50% to 100% of max rated load)
Ripple and Noise: 50mV P-P max, main output (10MHz bandwidth)
1% of nominal, aux no. 1 (10MHz bandwidth)
100mV P-P max, aux no.'s 2 and 3 (10MHz bandwidth)
Efficiency: 75% typical
Operating Temperature: 0-50°C at full rated load. Derate to 50% of full rated load at 70°C. Unit requires 25CFM of forced air cooling at full rated load. Unit is equipped with overtemperature shutdown.
Temperature Coefficient: 0.02% per °C
Overvoltage Protection: OVP on main output is set between 6-6.5V. This protection is reset by recycling input power.
Overload Protection: All outputs are protected against overload and short circuit conditions. Recovery is automatic when load is reduced.
Holdover Storage: 16mSEC minimum at full rated load, nominal input voltage
Transient Response: Recovery to within 1% of nominal output voltage within 500μSEC for a 25% load step
Overshoot: No voltage spikes on turn-on, turn-off, or power fail
Remote Sense: Remote sense on the main output compensates for up to 0.5V in the load cable
Power Fail (Optional): A TTL signal (high or low, customer specified) appears within 5mSEC to warn of input voltage drop below minimum operating level
Power Valid (Optional): A TTL high signal appears when main output is within TTL operating range.
Outline Dimensions: 150W: 9.5″ × 5.0″ × 2.5″, 200W: 10.5″ × 5.0″ × 2.5″

OPERATIONAL SPECIFICATIONS

Load Requirements: Main output requires 10% minimum load **OR** aux no. 1 requires 10% minimum load to enable aux no.'s 2 and 3 to operate within specification.
DC Returns: Main output and aux no. 1 share common return.
Aux output no.'s 2 and 3 are fully independent and floating.
Output Power: Total continuous power 150 watts max/200 watts max.
Peak output power 200 watts max/250 watts max.
Safety Isolation: Primary to secondary, 3750VAC (8mm spacing)
Unit meets or exceeds the following specifications for safety: VDE 0806, IEC380, IEC435, UL 478, CSA22.2, ULI950, BS6301, IEC950
EMI/RFI: Input filtering: unit meets requirements of FCC 20780 Class B and VDE0871 Class A

Input: 90-132 VAC/180-264VAC, 47-440Hz
Inrush: 15A @ 115V for ½ cycle
30A @ 230V for ½ cycle } Cold Start
Output: See output voltage table
Line Regulation: 0.2%, all outputs
Load Regulation: 1%, main output. 5%, aux no. 1. 1%, aux nos. 2 and 3
Adjustment Range: ±5%, aux nos. 2 and 3 and main output
Centering: ±3% aux no. 1
Cross Regulation: 3% aux no. 1 (change main output from 50% to 100% of max rated load)
Ripple and Noise: 50mV P-P max, main output (10MHz bandwidth)
1% of nominal, aux no. 1 (10MHz bandwidth)
100mV P-P max, aux no.'s 2 and 3 (10MHz bandwidth)
Efficiency: 75% typical
Operating Temperature: 0-50°C at full rated load. Derate to 50% of full rated load at 70°C. Unit requires 25CFM of forced air cooling at full rated load. Unit is equipped with overtemperature shutdown.
Temperature Coefficient: 0.02% per °C
Overvoltage Protection: OVP on main output is set between 6-6.5V. This protection is reset by recycling input power.
Overload Protection: All outputs are protected against overload and short circuit conditions. Recovery is automatic when load is reduced.
Holdover Storage: 16mSEC minimum at full rated load, nominal input voltage
Transient Response: Recovery to within 1% of nominal output voltage within 500μSEC for a 25% load step
Overshoot: No voltage spikes on turn-on, turn-off, or power fail
Remote Sense: Remote sense on the main output compensates for up to 0.5V in the load cable
Power Fail (Optional): A TTL signal (high or low, customer specified) appears within 5mSEC to warn of input voltage drop below minimum operating level
Power Valid (Optional): A TTL high signal appears when main output is within TTL operating range.
Outline Dimensions: 250W: 12.0″ × 5.0″ × 2.5″, 350W: 13.5″ × 5.0″ × 2.5″

OPERATIONAL SPECIFICATIONS

Load Requirements: Main output requires 10% minimum load **OR** aux no. 1 requires 10% minimum load to enable aux no.'s 2 and 3 to operate within specification.
DC Returns: Main output and aux no. 1 share common return.
Aux output no.'s 2 and 3 are fully independent and floating.
Output Power: Total continuous power 250 watts max/350 watts max.
Peak output power 300 watts max/400 watts max.
Safety Isolation: Primary to secondary, 3750VAC (8mm spacing)
Unit meets or exceeds the following specifications for safety: VDE 0806, IEC380, IEC435, UL 478, CSA22.2, ULI950, BS6301, IEC950
EMI/RFI: Input filtering: unit meets requirements of FCC 20780 Class B and VDE0871 Class A

SQV SERIES/

SWITCHING SYSTEMS INTERNATIONAL

FEATURES FOR ALL MODELS

- International input capability (90-132/180-264 VAC, 47-440 Hz)
- Built-in line filtering meets the requirements of FCC Level B and VDE 0871 Level A
- 3750 VAC Safety Isolation (4mm spacing primary to GND, 8mm spacing primary to secondary)
- Shielded power transformers
- Built-in overload protection on all outputs
- Built-in overvoltage protection on main output
- Remote sense capability on main output
- Vacuum impregnated magnetics
- Fixed frequency pulse-width modulation
- 24 hour high temperature burn-in, AC cycled
- Designed to Meet VDE 0806, IEC 380, IEC 435, BS6301, IEC 950, UL1950, UL478, CSA22.2, FCC DOCKET 20780 LEVEL B, VDE0871 LEVEL A

Options include:

- "TTL-Hi" or "TTL-lo" power fail detect circuitry (customer specified)
- EMI/RFI covers (not available on 400 Watt models)
- Extended hold-up capability<None>
- Universal Input "AUTO RANGER" (90-264 VAC Input)
- Remote Inhibit

The strength of Tamura's AC and DC power conversion families lies in providing consistently dependable products. All Tamura power and magnetic devices are designed and manufactured to deliver lower AQL levels, guaranteeing you the lowest incoming rejection rates you've ever experienced. For example, last year we shipped over **100 million transformers**– most to customers using a **ship–to–stock** acceptance program.

At Tamura, we're already life testing (not just designing) tomorrow's products– today. Over 100 design engineers at our technology center are dedicated to this task, assuring you of having the most up–to–date technology in your products. Today we are already designing the robotics to build these quality products, in high volume and at low cost. Over 150 product support engineers at 16 Tamura factories see to it.

Satisfy your AC and DC requirements for today and tomorrow. Contact Tamura for your specific requirements.

Tamura quality circles the electron world.

TAMURA LAN TYPE DC/DC CONVERTERS

The -9VDC output of Tamura's DC/DC converters makes them highly suitable for products designed for LAN applications. Two input ranges of +4.5VDC to +5.5VDC and +9.5VDC to +16.0VDC offer the designer a wide selection range.

FEATURES
- -9VDC Output.
- Two Input Ranges.
- 80 to 160ma Output.
- Load Reg: ±4% @ 25°C.
- Line Reg: ±2.5% max. at 110ma load.
- Shielded Case: Nickel plated copper.
- Temperature Coefficient: ±0.03%/°C.
- Ripple: 150mV p-p at FL.
- PC Board: UL94V-0 epoxy.

TAMURA DC TO HIGH VOLTAGE AC INVERTERS

Tamura's CX-100 series inverter is ideally suited for computer display back light applications where small size and low cost are desired. These features are achieved through the use of a flat transformer and automated assembly processing. The inverter may be specified as a complete unit (CX series) or the transformer may be specified independently (SAT series).

FEATURES
- Low Cost.
- Small Size.
- Operating Temp: -20°C to +60°C.
- Storage Temp: -30°C to +85°C.
- Input Voltage: 5.00VDC ±10%.

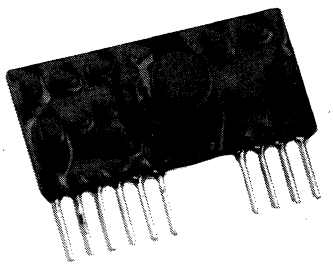
TAMURA SINGLE-IN-LINE DC to DC CONVERTERS

Polarity Reversing ■ Voltage Boosting ■ Voltage Decreasing ■ Direct Battery Input

Tamura DC/DC converters provide board level DC power conversion eliminating costly regulator circuitry, additional off-board power supplies and avoid time consuming safety agency certification. Single output SIP models complement the main power supply by providing polarity reversing, voltage boosting, voltage decreasing and direct battery input.



FEATURES

- Input Volt: ±20%; 5VDC, ±10%; 24VDC, ±30%.
- Output Volt: ±1%; Econo/Battery, ±5%.
- Line Reg: 0.8%; Econo, 1.2%; BAN/BAP.
- 5VDC, 2%; 12/15VDC, 1%.
- Load Reg: 1.5%, 30 -100% FL.
- Efficiency: 60% to 72% typ.
- Temp. Coef: ≤0.03%/°C; 5VDCout Econo, 0.05%/°C; 12VDCout Econo/Battery, 0.1%/°C.
- Operating Freq: 50-300kHz, FL to NL.
- Ripple/Noise: 60mV typ, ≤100mV p-p.
- Operating Temp: -10°C to +70°C, FL.
- Storage Temp: -30°C to +85°C.
- Humidity: 95% RH.
- Case Mat'l: UL94 -V0 epoxy.
- Insul. Resistance: ≥50MΩ at 500VDC.

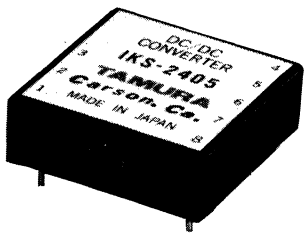
TAMURA ISOLATION TYPE DC/DC CONVERTERS

Tamura's isolation models in a Dual-In-Line package (DIP) have single and dual outputs from 300 to 3,000mW with built-in noise filter inductors and overload protection. For telcom requirements there are 48VDC quad output devices.



FEATURES

- Input Volt: 5VDC, ±10%; others ±20%.
- 48VDC range, 42 to 60V.
- Output Volt: ±1%, Telcom, ±2%.
- Line Reg: 0.5%; -0505, 0.8%; Telcom, 1%.
- Load Reg: 3.0%; 5VDC out, 6%; Telcom, 8%.
- Efficiency: 60% to 72% typ.
- Temp. Coef: <0.03/°C.
- Overload Protection: 130-200% FL.
- Operating Freq: 50 -300kHz, FL to NL.
- Ripple/Noise: 60mV typ, 100mV p-p max.
- Operating Temp: -10°C to +70°C.
- Storage Temp: -30°C to +85°C.
- Humidity: 95% RH.
- Case Mat'l: UL94V-0 epoxy; 0.3mm alum., 3.0W.

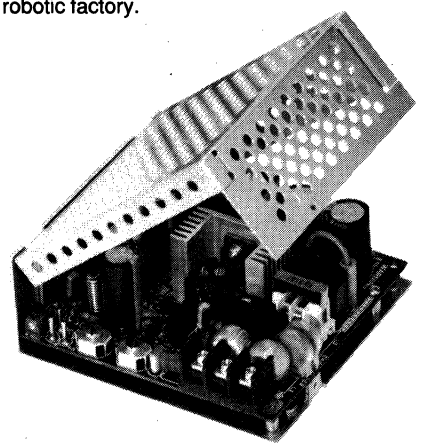
TAMURA SINGLE OUTPUT SWITCHING POWER SUPPLIES

file no. E102103 file no. LR64183 file nos. 2619, 2620, 2614, 2638, 2639

Tamura switching power supplies offer sound mechanical construction, excellent thermal management and fault tolerant electronic design resulting in high end-user reliability. Tooled for millions of units, they reflect true vertical manufacturing integration and are produced in a fully robotic factory.



FEATURES

- UL/CSA/VDE File Nos.
- 90-132/180-264VAC.
- EMI Input Filter.
- AC Power Fail Signal.
- 100,000 -150,000 hrs MTBF.
- To 85% Efficiency.
- Turn-On Delay: <100msec.
- Input Surge: <30A, cold start.
- Voltage Adj: 10% of nominal.
- Line/Load Regulation: 0.5%.
- Noise/Ripple: ≤75mV p-p.
- Hold-Up Time: ≥20msec.
- Transient Response: ≤1msec (50-100% load chg).
- Remote/Local Sensing.
- Overload/No-Load Protection.
- OVP: All outputs.
- Stability: 0.1% for 8 hrs.
- Elevated Temp Burn-In/Stress Test.
- Convection Cooled.
- 50°C Rated.
- Storage Temp: -20°C to +85°C.
- Oper. Humdity: 0-95% RH.
- Temp. Coef: ±0.02%/°C max.
- Warranty: Two years.
- Removable Cover/Pem Nut Mtg.

TAMURA LITE-SWITCHER™ SERIES

50W, 1" High, 85-264VAC, 1-3 Outputs

file nos. E133370, E132244 | file no. LR44447 | file no. 3817

Tamura's Lite-Switcher is smaller than a VHS cassette and weighs only 17 oz., yet delivers a full 50 watts of reliable DC power. You can easily design size and weight out of your products. A wide range universal AC input enables operation anywhere in the world. Certification to the new requirements of IEC, UL and CSA that takes effect in 1992 has been completed. Built-in EMI circuitry insures that FCC and VDE class B emission levels aren't exceeded.

FEATURES

- Input: World Wide 85-264VAC.
- Low Profile: 1" x 3.74" x 7.09".
- EMI Input Filter.
- UL 1950.
- CSA 22.2 No. 223.
- VDE (IEC 950).
- Hybrid Integrated Control Ckt (HIC).
- Operating Frequency: 150-200kHz.
- Input Current: 1.3/0.9A @ 120/220VAC.
- Surge: 24A/40A @ 120/220VAC.
- Line Regulation: <1%.
- Load Regulation: <2%, NL to FL.
- Ripple & Noise: 100mV; 48V, 200mV; 24V, FVM (V2, V3) 150mV.
- Voltage Adj: ±5%, FVS; +5% FVM (V1).
- Output Overshoot: None.
- Transient Response: <1msec to 2% of nom. VDC (50-100% load chg).
- Hold Up Time: 20msec typ (100VAC).
- OVP: All FVS; FVM (V1) only.
- Overload Protect: FVS, 120%; FVM, 200%.
- Temp. Coef: ±0.005%/°C; others, ±0.03%/°C.
- Stability: 0.1%; others 0.2%.
- Efficiency: 70% typ (120VAC).
- Convenction Cooled.
- Rated Temp: FVS, +60°C; FVM, +50°C.
- Operating Humidity: 30-90% RH.
- Leakage Current: 1.0ma rms.
- Insulation Resistance: ≥100MΩ at 500VDC.
- Vibration: 10-55Hz, 2G (all axis, 1 hr).
- Shock: 20msec, 20G (all axis, 3x ea).
- Weight: FVS, 17 oz; FVM, 24 oz.
- Elevated Temp. Burn-In/Stress Test.
- Warranty: 2 years

* Speciifications refer to all FVS single output and main FVM output (V1) except as noted.

TAMURA LINEAR POWER SUPPLIES...THE POWER-ONE ALTERNATIVE

file no. E102103 file no. LR69809 file nos: 3206 3208 3210 3212 3214 3216 3218 3257 3259 3261

Tamura has set reliability standards through component upgrade design. Critical specs such as temperature, voltage and current have been derated so that, for example, 105°C instead of 85°C electrolytic caps are used. The result is the highest available MTBF as calculated by MIL-HDBK-217D at full load, 120VAC and 25°C.

FEATURES

- MTBF to 460,000 Hrs.
- UL Recognized.
- CSA Certified.
- 100/120/220/230/240VAC.
- Remote Sensing.
- 2 Year Warranty.
- 5V OVP Built-in.
- Optional OVP Module.
- Short Circuit Protection.
- Overload Protection.
- Burn-in.
- Voltage Adjust: ± 5%.
- Line/Load Reg: ± 0.05% typ.
- Noise/Ripple: ≤5.0 mV p-p.
- Transient Response: <50 µsec (50% load chg).
- Stability: ± 0.3%.
- 50°C Rated.
- Temp coef: ± 0.3%/° C max.
- Vibration: MIL-STD-810C.
- Shock: MIL-STD-810C.

TAMURA VDE WALL PLUG-INS, 220VAC, 50Hz.

DC Unregulated & DC Regulated

file nos. 7969-330,331

Tamura wall plug-ins enable smaller, cooler running designs - with no safety agency restrictions. End-products will be lighter, more portable, easier to build and less costly. Over 30 million units shipped last year - no returns. 600 OEM models with UL, CSA, VDE, MITI, CEE and SAA listings are available. See more DC regulated models from 15 to 60 watts in this section, AC/AC models in Transformers and battery chargers in Batteries.

FEATURES

- VDE Licensed (Europe). Input: 220VAC ±10%, 50Hz.
- EMI: Meets VDE 0871, Class B.
- Short Circuit Protection.
- Thermal Protection.
- 100% Testing.
- Temp Range: 0 to +40°C.
- Case Temp Rise: 35°C max.
- Oper Humidity: 10-90% RH.
- Mat'l: ABS resin/UL 94-V0.
- Color: Black.
- No Audible Noise.

REGULATED MODELS:

- Load Reg: Spec'd for ±20%
- chg from 80% FL.
- Line Reg: At FL, 10% Iline chg.
- Ripple: 10mv rms typ.

TAMURA WALL PLUG-INS, 120VAC, 60Hz.

DC Unregulated & DC Regulated

file no. E82180

file no. LR38236

FEATURES

- Input: 120VAC ±10%, 60Hz.
- EMI: Meets FCC Part 15.
- Short Circuit Protection.
- Thermal Protection.
- Transformer: 3 Flange Bobbin.
- 100% Testing.
- US 3 - Blade Ground Plug Avail
- Temp Range: 0 to +40°C.
- Case Temp Rise: ≤35°C.
- Oper Humidity: 10-90% RH.
- Mat'l: ABS resin/UL 94-V0.
- Color: Black.
- No Audible Noise.

REGULATED MODELS:

- Load Reg: Spec'd for ±20% chg from 80% FL.
- Line Reg: At FL, 10% line chg.
- Ripple: 10mv rms typ.

TAMURA 15 to 60 WATT SWITCH-MODE REGULATED DC POWER SOURCES

Wall Plug-In and Table Top Models.

file nos. E132244 E82180 | file nos. LR65893 LR44447 | file no. 7969-3336 | file nos. 91-33935 91-36510 91-36511

For applications requiring more power from an external power source, Tamura offers 15, 20, 30, 40 and 60 watt output ratings in compact, light weight, wall plug-in and table top cases for world wide use. See other DC regulated and unregulated models in this section, AC/AC models in Transformers and battery chargers in Batteries.

FEATURES

- World Wide AC Input.
- UL 1310 Listed: 15/20/30W.
- UL 1950 Recognized: 40/60W.
- No Minimum Load.
- Input Surge: ≤50A; ≤20A, 20/30W.
- Efficiency: 65%-70% typ.
- Ripple/Noise (p-p): 100mV, 20/30W; 5V-6V, 40/60W; 150mV, 9V-17.5V 40/60W; 200mV, 15W.
- Hold-Up: ≥10msec; ≥5msec, 15W.
- Overload Protection: ≥110% FL.
- Operating Temp: 0°C to +40°C.
- Storage Temp: -10°C to +70°C.
- Operating Humidity: 10-90% RH.
- Storage Humidity: 5-95% RH.
- Withstand Voltage: 1.5kVrms; VDE model, 3kVrms.
- Insulation Resistance: ≥50MΩ @ 500VDC.
- EMI: FCC part 15J Class B; VDE 0871 Class B.
- AC Input Connector: IEC type #320 receptacle (40/60W)

DC to DC CONVERTERS

TDK DC to DC converters are on board type for simplifying main power supplies of electronic devices. Their purpose is to "provide the required voltage at the required location".

Features

- TDK high performance magnetic materials and original circuitry.
- Small, lightweight.
- Highly efficient, high density.
- High reliability.
- Printed circuit board.

Applications

Computers and peripherals, industrial robots, electronic machinery, automotive electronics, and other electronic applications.

62 CROSS REFERENCE CARDS

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

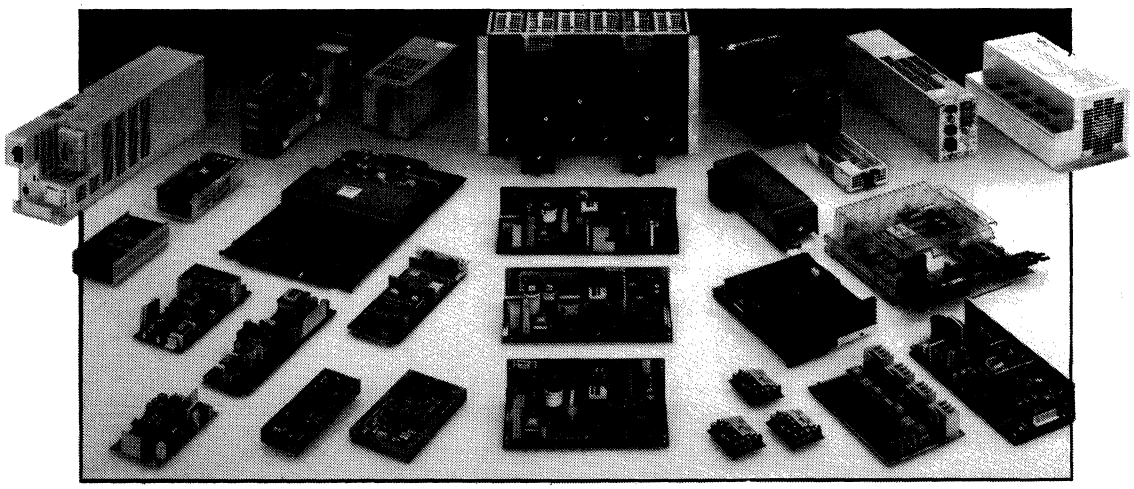
SWITCH MODE POWER SUPPLIES & DC - DC CONVERTERS



TECTROL has over twenty years of switching power supply and DC-DC converter experience. With hundreds of proven designs in service,Tectrol offers a wide variety of products to satisfy the most exacting customer needs.

* **STANDARD PRODUCTS**
* **CUSTOM DESIGNS**
* **MILITARY PRODUCTS**

MARKET SERVED

We are a qualified power supply vendor to many major multinational corporations.

* **TELECOMMUNICATIONS**
* **COMPUTER & PERIPHERALS**
* **PROCESS CONTROL**
* **MEDICAL**
* **AEROSPACE & MILITARY**

PRODUCT

Switching Power Supplies and DC-DC Converters covering a power range from 1 to 2000 Watts are available in various topologies, configurations and packages. All Tectrol products are designed to meet International Safety requirements such as UL, CSA, VDE, BSI, and conform to FCC and/or VDE Class A and B emission standards.

* **1 TO 2000 WATTS**
* **UNIVERSAL (90-264V) INPUT**
* **MODULAR & SEMI - MODULAR DESIGNS**
* **REDUNDANT (N+1) SYSTEMS**
* **1 MHZ RESONANT CONVERTERS**

ENGINEERING AND MANUFACTURING

Tectrol is recognized as one of the most technically advanced manufacturers of Switching Power Supplies and DC-DC converters world-wide. Automation enables Tectrol to provide consistent product quality, high volume production and competitive prices for the benefit of our customers.

* **AUTO-INSERTION EQUIPMENT**
* **SURFACE-MOUNT FACILITIES**
* **PASS THROUGH PRODUCTION LINE**
* **AUTOMATED TESTING**

HIGH RELIABILITY POWER SUPPLY (N+1) PARALLEL REDUNDANT APPLICATIONS with CURRENT SHARING AND HOT-PLUG CAPABILITY

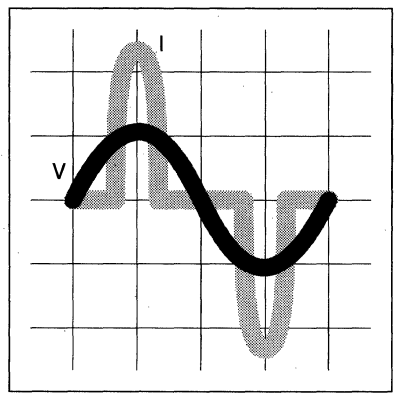
POWER FACTOR CORRECTED SWITCHING POWER SUPPLIES

Tectrol designs and manufactures Power Factor Corrected Power Supplies for medium to high power applications.



Some Advantages are:

a) **Maximum power is made available for end system use for any given branch circuit current rating.**

b) **Compliance with pending regulatory requirements (eg. IEC-555) for line current harmonic content limits.**

c) **Elimination of Neutral conductor current overload in 3-phase systems due to the additive nature of the harmonic current content generated by switching power supplies with no power factor correction.**

d) **Elimination of the unnecessary stress on the power distribution system caused by the "Wattless" component of the line current in an uncorrected power supply.**

On a 15 ampere setrvice, UL limits current draw to 80% of the branch circuit rating, i.e. 12A.

Output power is defined as Vin (rms) x Iin (rms) x Power Factor x Efficiency.

The typical Power Factor x Efficiency (PFE) product for an uncorrected supply is about (0.65 x 0.75) = 0.48. This results in a maximum output power available for system use of about 670W from a 115VAC/15A line.

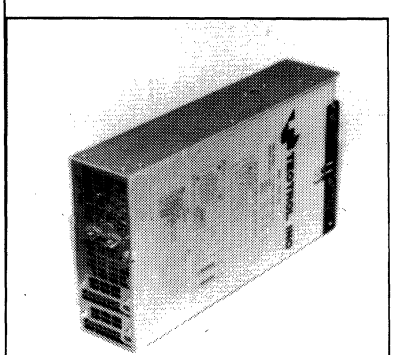
If the power factor is improved to 0.99 the available power is increased to 1024W, an increase of 53%.

Power Factor Corrected Unit - 1000W model

Input Ratings
Voltage: 85 - 265VAC / 47 - 63Hz
Current: Less than 12A rms
Power Factor: 0.99 typical.
Hold Up Time: 20msec minimum at 90VAC
Efficiency: 75% minimum
Surge withstand capability: To IEEE-587, Category A/B

Output Ratings
Single output models: 1000W; 5VDC / 200A to 48VDC / 21A
Multiple output models: Output 1: up to 750W, votages from 2.2VDC - 48VDC
Outputs 2 - 5: 150W or 250W per output, 2.2VDC - 48VDC

All outputs have low ripple and noise characteristics (<1%), and are fully regulated and adjustable.



Features
- Built in PFC circuity
- UL, CSA, & TUV approved
- FCC 20780 A & VDE 0871, level A
- Forced current sharing on main & single output modules
- Master remote ON / OFF
- Master remote latching shut down
- Advance thermal warning output
- AC power fail output
- Overload / Short circuit protected, all outputs
- Over voltage protected, all outputs
- Built in Forced-Air fan cooling

Tectrol is a leader in standard or custom packaged Power Factor Corrected multiple output power supplies for single unit stand alone applications or for parallel-redundant system applications with hot-plug-in capability.

Standard units are offered for 1000 - 1500W, in an 8" x 5" x 11 to 13" package.

Contact Tectrol for your PFC Power Supply solutions.

GOSSEN

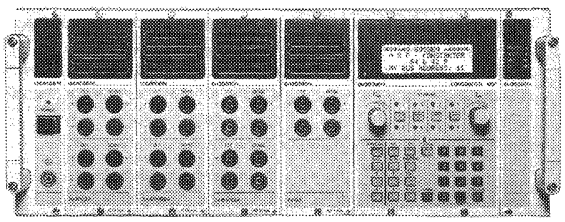
Precision Programmable DC Lab Power Supplies

TEXMATE

Also Texmate ad in Meters:Digital, EEM Vol. D

Lab Power Supplies

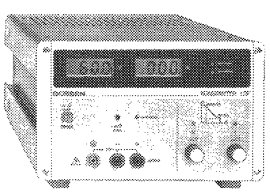
Built to exacting IEC and DIN standards, Gossen bus programmable DC lab power supplies are representative of the finest quality instrumentation from Europe's leading manufacturer. Most Gossen products are now stocked and available in the USA from Texmate. See other excellent Gossen products in the Texmate Short Form Catalog in EEM Vol D.



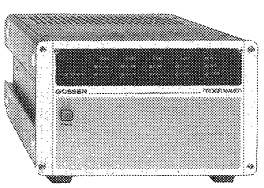
MSP Konstanter
Especially suited for demanding medical applications

MSP-Konstanter from $3500 to $15,000.00

Four selectable DC output modules with up to 8 isolated outputs • Front panel manual and bus programmability • Up to 8 isolated outputs (4 single or dual supplies) • Constant voltage or constant current operation • Integral metering all outputs : voltage, current, power • Features low ripple, isolated outputs, remote sensing, 0-40°C operation, 2-speed cooling fan, series or parallel operation • Interface IEC-625, IEEE-488, RS-232C • Dimensions: 18"W x 7"H x 15.4" deep • Modules include: Single output 0-7VDC; dual 0-7amp; dual 0-8VDC; dual 0-3amp; dual 0-16VDC; 0-1.5amp; dual 0-40VDC, 0-0.6amp • 120/220VAC power input.



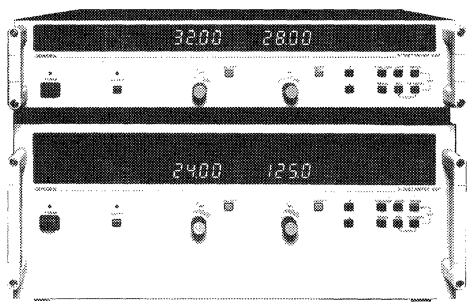
LSP-Konstanter
0-60V 0-15A 250W max.



IEEE 488 Programmer
to control 8 supplies

LSP-Konstanter from $2265.00
Programmer from $2135.00

Features wide output range • High efficiency primary switching regulation • Integral volts/amps/power meters (4-digit LED) • Output ungrounded/isolated • Remote sensing • Fast setting by capacitive discharge • Remote control via analog (0-5V) inputs • (Up to 8 outputs provided by programmer which interfaces with IEC 625/IEEE 488) • Dimensions: 19"W x 3.5"H x 20" deep • Both the LSP-Konstanter & the Programmer can be 19" Rack Mounted • 120/220AC Power input.



SSP-Konstanter 0-40V DC Output

62N2151	0 to 25A	500w max	$2765
62N2150	0 to 50A	1000w max	$3575
64N2151	0 to 100A	2000w max	$5665
64N2150	0 to 150A	3000w max	$7575

Single output system power supplies • Manual and bus programmability • Integral volts/amps/power meters (4-digit LED) • Optional IEC-625, IEEE-488, RS-232C interfaces • Efficient primary switching regulation • Output ungrounded/isolated • Remote sensing • On/off fast response setability • Non-volatile memory of 99 settings • Master slave configurable • Dimensions: 19"W x 3.5"/7"H x 20" deep, 19" rack mountable • Model 62N power input: 208/240 VAC; Model 64N power input: 3Ø 208/240 VAC

Other Gossen Power Supply Products

Please call for information.

Konstanter Hi Current & Hi Voltage Systems

Voltage	6.5V-350V	3kV-12.5kV	3.5kV-6.5kV
Power	35W-250kW	7kW-250kW	14W-4.2kW

DC to DC Converters 24V to 12V, 80 & 195W
For commercial vehicle applications. Most prestigious German vehicle manufacturers use Gossen DC to DC converters.

Solid State Lighting Ballasts
For metal-halide lamps 125 through 575W approved for OSROM Series HTI and HMI.

OEM Power Supplies
For more than 30 years, Gossen has been a leader in high quality economical power supply designs that meet the most stringent European standards. Please contact us for a trouble free solution to your international power supply problems.

TODD

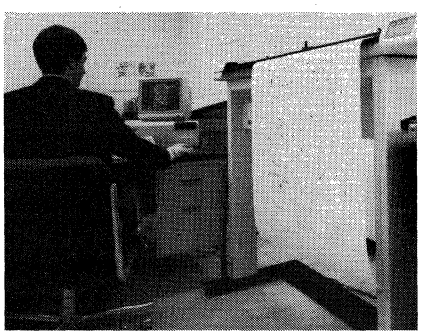
The Todd Team

Regardless of job function, each and every Todd employee contributes directly to the goal of complete customer satisfaction in sharing a personal responsibility for the quality and performance of every power supply manufactured. Individual concern and the pursuit of excellence are the factors that enable Todd to provide superior power products at extremely reasonable cost.

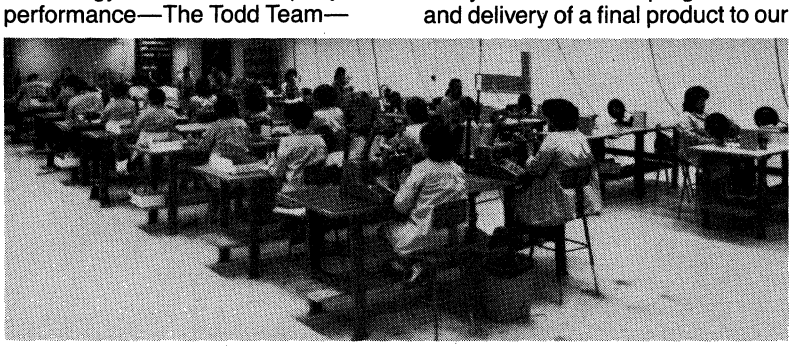
Meeting The Quality Challenge

When we began business in 1968, our goal was to become a leading supplier of quality power supplies to the OEM marketplace. Over the years as the concept of quality has changed, we have continually strived to meet the increasing quality challenge in an ever demanding environment. Our approach to quality today is all encompassing and includes people, products, technology, and overall company performance—The Todd Team—dedicated to meeting or exceeding the expectations of our customers.

At every level of the company, from design, development, production, and marketing to sales, we are oriented to total customer support, and operate under the principle of Total Quality Control (TQC). This approach has resulted in becoming working partners with our customers, establishing just-in-time manufacturing procedures for rapid customer response, qualification in many "dock to stock" programs, and delivery of a final product to our customer that meets his quality and marketing requirements.



In-house CAD enhances our ability to design new products and modify existing products, with greater efficiency and accuracy.



Total in-house control of magnetic design assures fast turnaround and improved reliability.

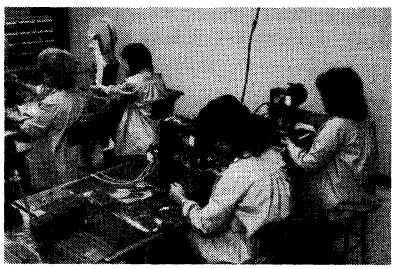
Today, Todd Products is recognized as one of the fastest growing technology leaders in high efficiency switching power supplies. We think our approach to quality, combined with our belief that building relationships is as important as building products, is the reason why.

A Market and Customer Driven Focus

Working in partnership with our customers provides us with a full understanding of their individual

TODD PRODUCTS CORP., 50 EMJAY BLVD., BRENTWOOD, NEW YORK 11717 • (516) 231-3366 • 1-800-223-TODD • FAX (516) 231-3473

MEETING THE QUALITY CHALLENGE

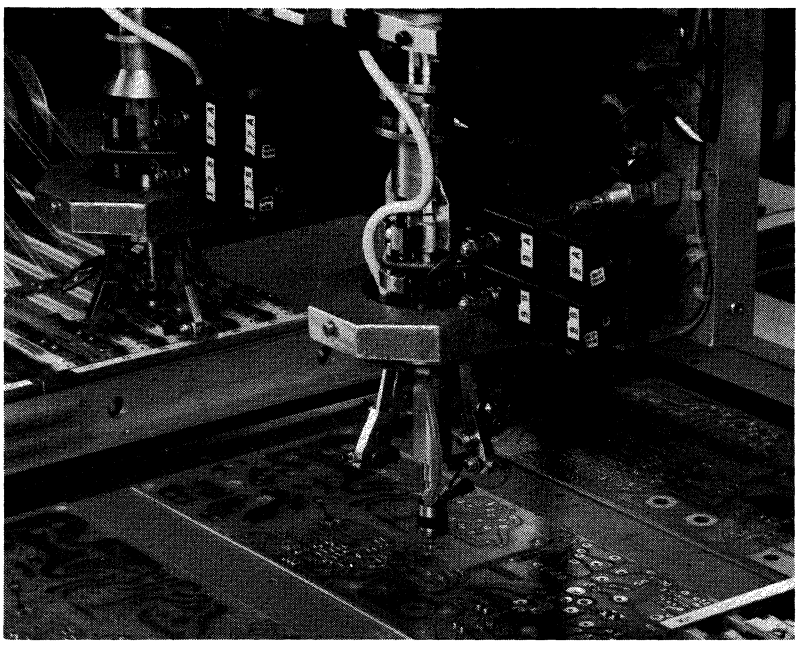


markets, business and products which enables us to develop appropriate products, technology, and company capabilities to meet their needs. Our ability to consistently provide innovative, quality solutions to our customers, gives them a significant competitive advantage in their markets.

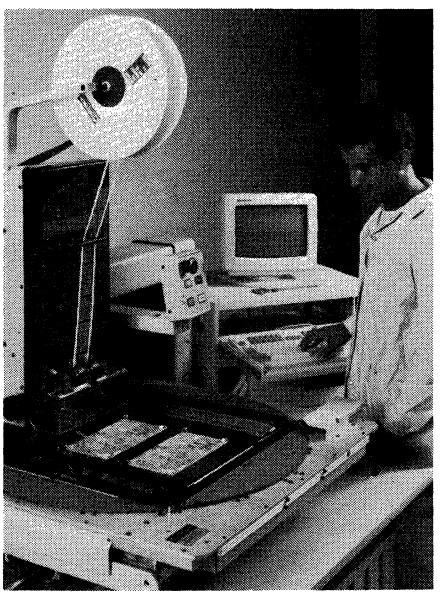
On these pages, we will take you through a guided tour of our 52,000 square foot facility in Brentwood, New York, for a look at the Todd Team approach to producing the wide range of products featured in our catalog that meet a diverse range of OEM applications.

Quality Solutions at Affordable Prices

To ensure that we maintain quality products while remaining competi-



Robotic assembly of surface mounted chip components assures reliable performance and low cost.



Automatic axial leaded component insertion equipment for reduced cost and improved consistency.

Dedicated U.S. assembly lines provide the flexibility to respond quickly to customer needs.

TODD PRODUCTS CORP., 50 EMJAY BLVD., BRENTWOOD, NEW YORK 11717 • (516) 231-3366 • 1-800-223-TODD • FAX (516) 231-3473

TODD

tively priced, we have taken several actions to lower production costs:

- Automated assembly and test operations, for consistent results and low production costs.
- Reduced inventory by the use of standard designs with common material usage.
- Computerized the MRP system and tailored it to the unique requirements of our factory, customers, and vendors.
- Reduced the production cycle time with the concurrent reduction of work-in-process inventory.
- Incorporated Statistical Process Control for the prevention of manufacturing defects at their source.

The largest cost reducer of all is the effectiveness of our product manufacturing quality system.

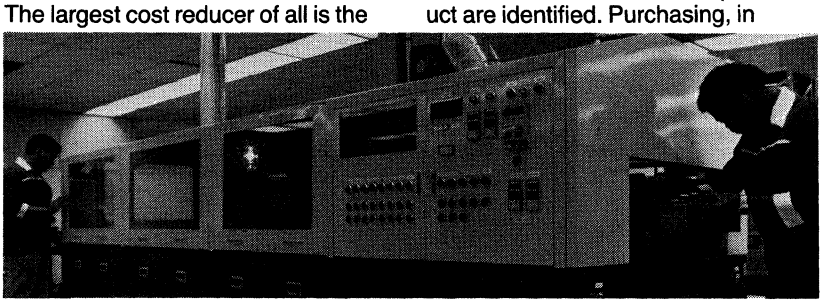
QC Starts at the Design Stage

While still in the design stage, special reliability tests and pilot runs are made to analyze the design, and assure that the product will meet its performance and intended life objectives under the defined conditions of use. These tests establish specifications to the shop operations and inspection people.

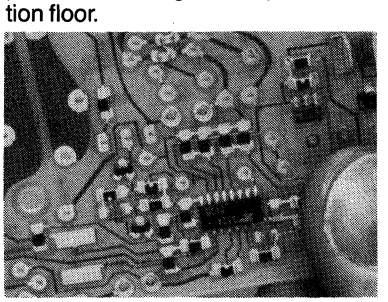
Prior history and special studies of processes are used to eliminate possible quality problems before manufacture. Critical quality characteristics of the component parts used in the fabrication of the product are identified. Purchasing, in conjunction with engineering and quality, establishes vendors who have demonstrated their ability to provide consistent quality material.

Incoming Material Control

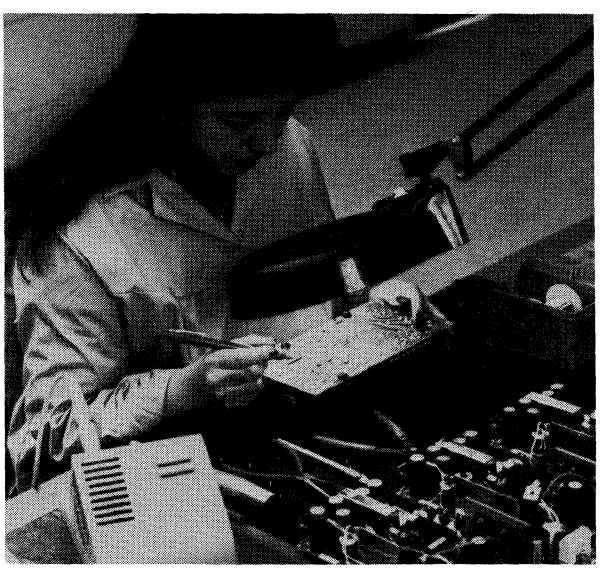
The new design control procedures establish critical parameters for incoming material. Careful checks are made on initial incoming lots of parts to determine conformance to requirements. Where parts are unsatisfactory, immediate contact is made with the vendor to obtain corrective action. The contact is continued until the parts are of satisfactory quality or the vendor in question has been replaced. Only material of acceptable quality is processed through to the production floor.



Advanced computerized dual wave solder system assures precise solder flow and positive connections.



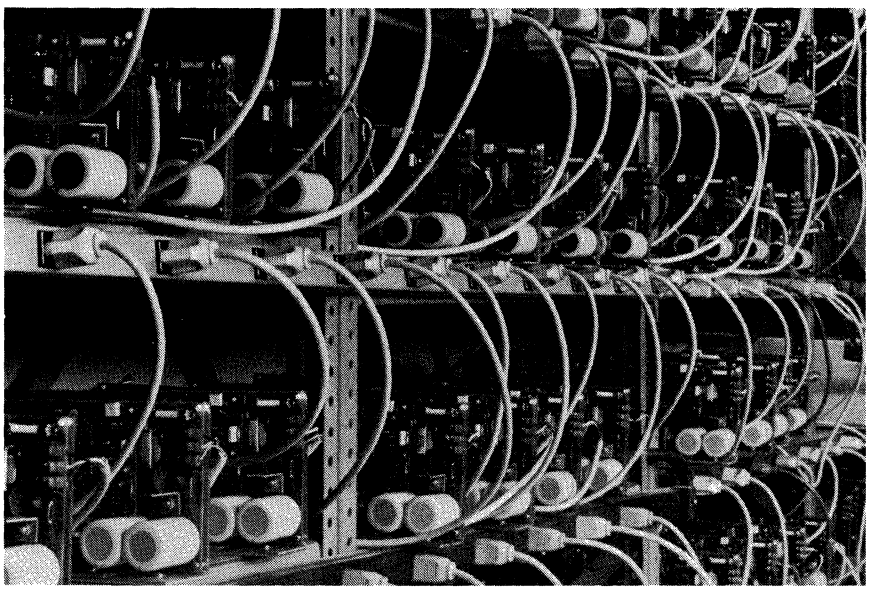
Surface mounted chip components are positioned where they function best.



Every member of the Todd Team is responsible for quality at each step of the manufacturing process.

In-line, in-process testing assures that potential problems are discovered early in the production cycle and corrective action is taken immediately.

TODD PRODUCTS CORP., 50 EMJAY BLVD., BRENTWOOD, NEW YORK 11717 • (516) 231-3366 • 1-800-223-TODD • FAX (516) 231-3473

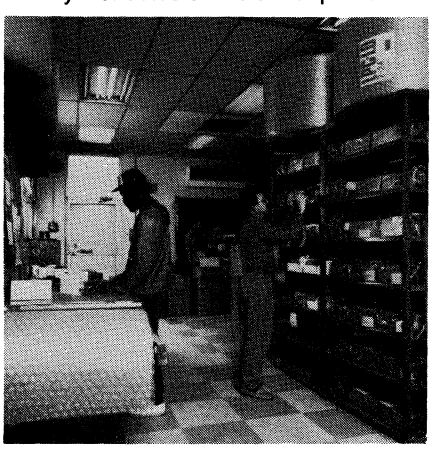


Step stress burn-in for 20 hours average assures long MTBF.

Every power supply is computer tested for critical performance verification. A print-out of the power supply performance is shipped with every product.

Production Control

Our preventative maintenance program assures that machines, tools, fixtures and measuring instruments used in the manufacturing processes will not present a quality problem. As the product is started in production each operator is carefully instructed on his or her part of the job. Suitable information and, as required, measuring equipment is available to each operator to verify the correctness of their activity.



Whether your requirements are for a standard, modified, or custom power supply, you can be assured that the product shipped to you will achieve the ultimate quality objective—your seal of approval.

Roving inspectors and process auditors give additional assurance that nonconforming or defective material will be located at its source. Control charts alert the shop supervisors of the location and magnitude of any quality problems. The completed product is tested for customer specifications as well as requisite safety agency requirements. Packaging and shipping are controlled to insure delivery of a quality product.

Special Process Studies

In the majority of cases the control charts, roving inspectors, process auditors, in-line testing procedures and final testing will signal the presence of a quality problem that typically can be cleared up by the shop supervisor early in the production cycle. However, occasionally a quality problem will arise that requires the talents of the entire organization. In these instances, we all work together to analyze the problem and take corrective action to prevent defective material from being delivered to our customers.

Continued Improvement Studies

An ongoing program is maintained to locate non-value-adding manufacturing operations and to plan their elimination. In addition we continually look for methods of improving product and company quality characteristics.

The Results—Low Cost Reliability

Our customers tell us: "Our market is very competitive. We must price competitively. We can't afford product failures. We need power supplies that are reliable and cost effective."

And that's the bottom line the Todd Team delivers. Our power supplies achieve MTBF in excess of 100,000 hours—with competitive product costs and selling prices.

Whether your interest is standard catalog power supplies, modified standards, or custom designs, our goal is to the achieve the ultimate quality objective....customer satisfaction.

How to Use This Power Supply Locator.

Todd Products Corp. has a wide range of switching power supplies. Available models range from 150 to 1000 watts; single and multiple output; AC or DC input. This Locator makes selection of the best power supply for your application simple. Here's how it works:

1. Determine your Input Voltage requirements: AC or DC.
2. Decide on your output needs: Single, Triple, or Quad output.
3. Calculate the maximum power the power supply must deliver.
4. Locate the appropriate section meeting these criteria.
5. Review the output current ratings of the products available within your needs.
6. Find detailed specifications for the model selected on the page shown in the locator.

Custom Designs

Custom Designs ..... Page 28
If you cannot locate a standard product meeting your needs, please review the information on pages 28 and 29, and contact the factory.

Prices

Prices shown are list prices for small quantities. Companies needing production quantities can receive quantity pricing by contacting a Todd Products Area Business Manager, at the factory.

To Order

Terms and Conditions ..... Page 30
Orders can be placed through your local representative or directly through the factory by calling 1-800-223-TODD, or 516-231-3366.

Technical Support

You can talk to an Engineer regarding applications, technical problems, etc., simply by calling our Toll Free Hot Line 1-800-223-TODD.

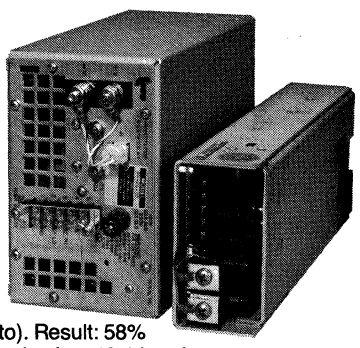
TODD

MARKET DRIVEN– CUSTOMER FOCUSED

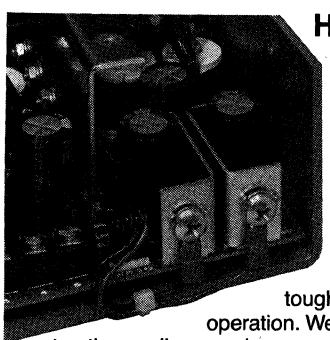
Establishing working partnerships with each of our customers gives us critical insight into their needs and expectations. By listening, understanding and responding to these needs, we are able to offer an array of unique features and new design alternatives that provide our customers with innovative solutions to difficult system problems. Here are a few examples of our market-driven, customer focused solutions.

Small Size

Pack 50% More Power Into Your Next System



Our customers are able to pack more features into their systems. For example, typical 5″x8″x11″ 750 watt "shoebox" switchers are being replaced by our 2.6″x5″x13.5″ MAX 750 series (see comparison photo). Result: 58% savings in space. 30% cost reduction, 12% less heat.



Heavy Duty Construction

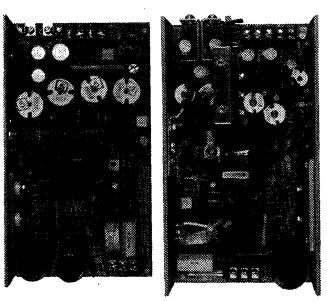
Clean, Simple, Rugged and Reliable

Reliability in operation is important, but for true reliability, you need rugged construction.

TODD switchers are ruggedized to anticipate tough handling in shipping or in operation. We use heavy sheet metal construction, well secured components, and heavy duty output terminations. In addition, our extensive use of surface mount devices and single PC board design contributes to the overall ruggedness of these power supplies.

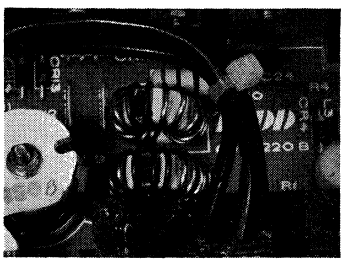
Power Upgradable

150 Watts to 350 Watts in the Same Package



Your market is a fickle one. You design a system using 150 or 200 watts of power only to find that the market wants add-ons–boosting power needs to 250 or 350 watts.

TODD engineers design for upgrade. The MDT-160 or the MDT-220 and the MAX-350 fit in the same space and use the same mounting holes. The same concept is used for the MTX-300, MAX-400, and MAX-500–allowing upgrades from 300 to 500 watts in the same space.



High Efficiency

Simple Cooling, Optimum Thermal Management

Heat...the killer of electronic equipment. Avoiding it seems simple: Improve efficiency, reduce heat.

But this takes innovative design. TODD engineers developed VERI-DRIVE PLUS inverter topology, and MAGNA-FLUX switching mag amp post regulation to achieve 80% efficient high power switchers. This is particularly important when handling high current auxiliary outputs which require tight regulation.

World Class Products

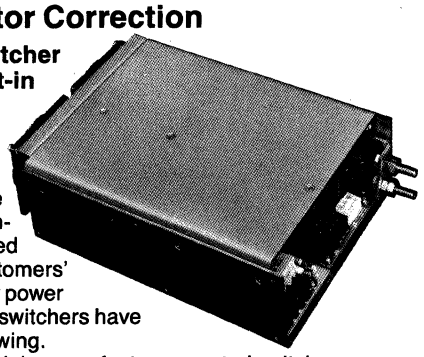
International Support for Your World Markets

Understanding the needs of our customers to market worldwide has resulted in standardizing our power supplies to meet international requirements. Final product destination is not a problem for our customers when they select and specify a TODD switcher.

All TODD power supplies have AC inputs that meet all international line requirements and built-in line filters to meet international RFI requirements. They are also certified to meet the most severe international safety standards, like UL, CSA, IEC, and VDE, class 1 SELV.

Power Factor Correction

1000 Watt Switcher Features Built-in Power Factor Corrector



As electronic systems become increasingly complex and marketed globally, our customers' requirements for power factor corrected switchers have been on the upswing.

Because we think power factor corrected switchers should not be an afterthought, we designed our new SUPERMAX 1000 open frame switching power supply series from the ground up, starting with a power factor corrected base.

With active power factor correction to 0.99, the SUPERMAX 1000 is the first 1000 watt power supply to incorporate pf correction in the basic design and is also the smallest pf corrected switcher available today.

Understanding and addressing the needs of our customers to help them respond to today's rapidly changing markets is the heart of our market driven, customer focused philosophy. We will continue to seek unique features and innovative products that meet our customers' needs.

1000 WATTS
3.38″ x 8″ x 12″
SUPER MAX

Introducing SUPERMAX... A New Concept in Power Supply Technology

1000 watts...Open frame technology...Designed-in power factor correction...Meets IEC 555-2... It's the new SUPERMAX series of switching power supplies and a whole new concept in power supply technology. With SUPERMAX, Todd Products has brought its advanced open frame switching power supply technololgy to the high power shoe box world. Now users of 1000 watt shoe box switchers have a superior alternative—the SUPERMAX 1000 with power factor correction to 0.99 designed-in, and the same flexible, high reliability, low cost designs that have made Todd's MAX series product line the industry standard in open frame switchers.

Designed-in Power Factor Correction

The SUPERMAX 1000 is the first 1000 watt power supply that incorporates power factor correction in the basic design. Unlike traditional shoe box switchers where power factor correction is an add-on, the SUPERMAX series was designed around a power factor correction base. The series incorporates a proprietary Todd design that optimizes both power factor and efficiency to achieve active power factor correction to 0.99 with efficiencies of over 75%, making it one of the best in the industry.

Operated from Standard AC Power Receptacles

As electronic systems have become more complex, the demand for power supplies with higher outputs, increased efficiencies, and lower power consumption has increased. A power factor of 0.99 and an efficiency of over 75% allows the SUPERMAX to be used in systems that must operate from standard AC power receptacles and draw less than 12 amps at 120 VAC. The SUPERMAX also meets the requirements of IEC 555-2 for harmonic line distortion, a specification that will be imposed on all systems sold in Europe by 1992.

The Smallest Power Factor Corrected 1000W Switcher

Housed in a low profile package, measuring 3.38″ × 8″ × 12″ versus traditional shoe box switchers that measure 5″ × 8″ × 12-15″, the SUPERMAX 1000 is the smallest power factor corrected 1000 watt unit available today. The package allows great flexibility in system mechancial design. Industry standard mounting allows three units to be mounted where two shoe box units were before.

High Reliability, Quick System Assembly, Low Cost

The SUPERMAX series was designed with several unique features and capabilities that ensure high reliability, lower cost, and improved system assembly. For example, customers have the option of self-cooling with internal ball-bearing fans, or a no-fan configuration for systems with supplied air cooling. Connectors are provided for AC input, outputs 2, 3 and 4, and status and control lines to facilitate high speed production assembly. This feature eliminates the barrier strip assembly process needed to install ring terminals during production and test.

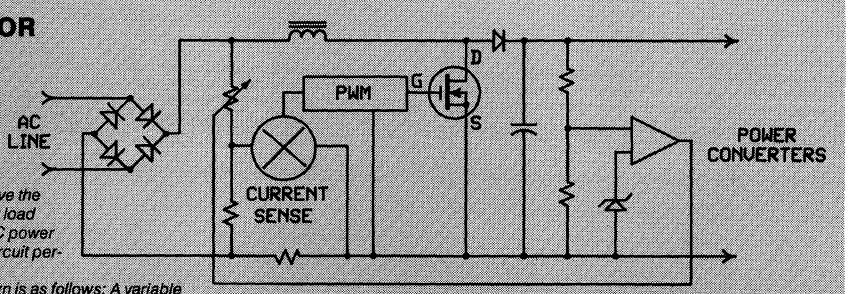
The SUPERMAX features the proven and field tested reliability features that have made the MAX product lines an industry standard. These include MAGNA-FLUX mag amp control for 1% regulation on all outputs; true remote inhibit for system On/Off functions; VDE and FCC Class A RFI filtering; and International safety agency approvals (including IEC 950). All this at prices competitive with standard shoe box switchers without power factor correction.

Todd's SUPERMAX 1000 series is destined to be a super star.

SIMPLIFIED POWER FACTOR CORRECTOR CIRCUIT

Power factor is the ratio of power in watts to the product of volts and amperes flowing into a load. To minimize the amount of current required to supply power to the load, power factor should approach one. Unity power factor requires that the voltage and current be in phase as well as have the identical wave shape. The true unity power factor load looks purely resistive to the driving source, the AC power line. The Todd front end power factor corrector circuit performs this function.

The operation of the simplified schematic shown is as follows: A variable attenuator, controlled by a voltage regulating circuit, provides an attenuated replica of the line voltage to the AC line current sensing circuit. The current sensing circuit controls the charge and discharge of an energy storage choke to force the line current to track the line reference voltage. The circuit operates at a constant high frequency and forces continuous conduction of the choke when significant power is being drawn by the power supply load.



The output of the power factor corrector circuit is a regulated high voltage DC that feeds the output power converters of the power supply. Regulation is provided by sensing the voltage and controlling the attentuation of the variable attenuator which adjusts the reference to the current circuit. Regulation is maintained while keeping the power factor of the power supply at close to unity.

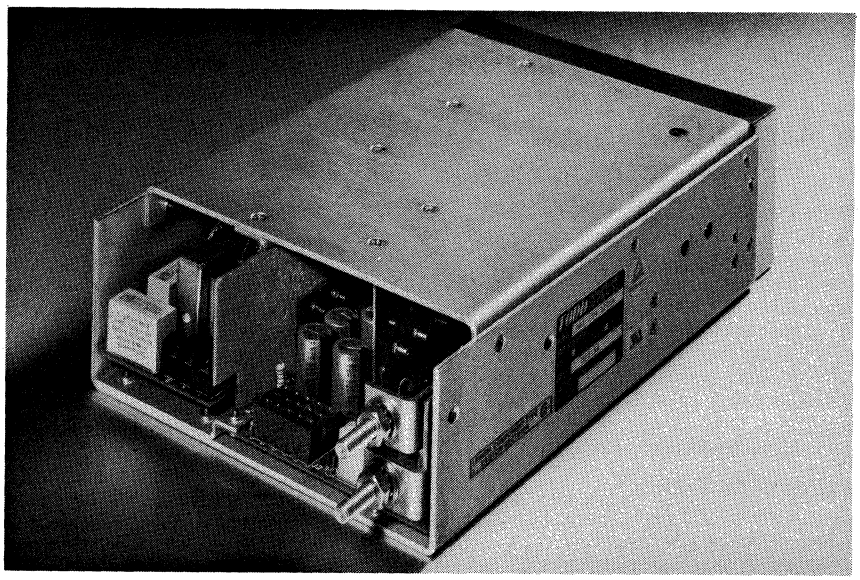
TODD

MULTI-OUTPUT 1000 WATT SWITCHING POWER SUPPLIES



The SUPERMAX 1000

Featuring:

- Active Power Factor Correction to 0.99
- Draws under 12 Amps at 120 VAC and 1000 watts load
- Designed for low AC line distortion per IEC 555-2
- Low profile package, 3.38″H x 8″W x 12″L
- Connectors provided for quick system assembly
- High reliability, low cost, open frame technology
- Uses system air in "no-fan" configuration
- True remote inhibit for system on/off
- All auxiliary outputs mag amp regulated with Todd MAGNA-FLUX
- Built-in RFI Class A filters meet VDE0871 and FCC, Class A

The new SUPERMAX 1000 series is a breakthrough in open frame switching power supply technology. For the first time, users of 1000 watt shoe box switchers (5″ x 8″ x 11-15″) have a superior alternative—a low profile (3.38″ x 8″ x 12″) open frame switcher, that features the flexibility, high reliability, and low cost designs that have made Todd's MAX series of products the industry's open framed standard.

Featuring active power factor correction to 0.99, *the SUPERMAX 1000 is the smallest power factor corrected 1000 watt unit available today, and the first 1000 watt power supply incorporating pf correction in the basic design.* Designed for low AC line distortion per IEC 555-2, the units draw under 12 Amps at 120 VAC and 1000 watt load, and under 6 Amps at 230 VAC. Other features are the optional use of system air for cooling, remote inhibit, mag amp regulated auxiliary outputs, and built-in RFI filtering.

All this at prices no higher than those usually seen on standard shoe box switchers without power factor correction. Check out the specs of the SUPERMAX today.

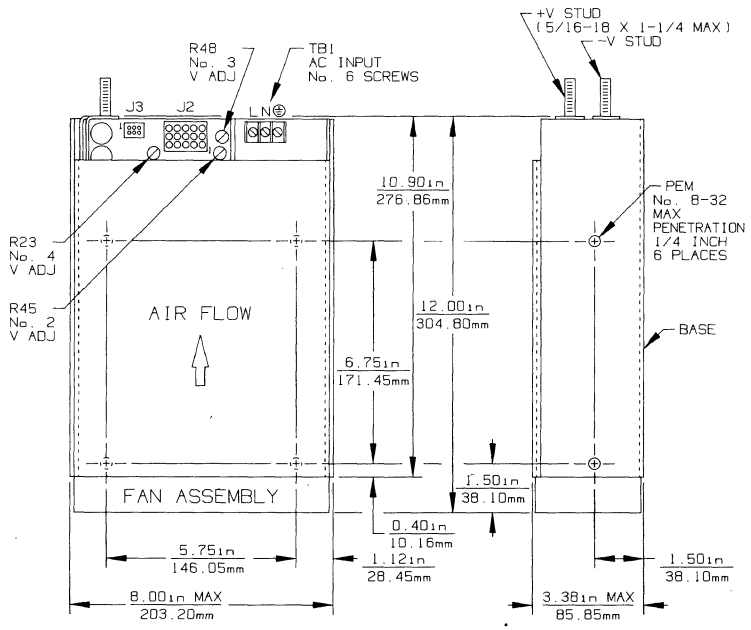
1000 WATTS 3.38" x 8" x 12" SUPERMAX



SPECIFICATIONS: ALL MODELS.

AC Input: 90-264 Vac continuous range, 47 to 63 Hz. Internally fused for 20 A.
Power Factor: 0.99 typical at full load.
Input Current: 12A max @ 120 Vac under full load conditions.
Adjustability: All outputs user adjustable.
Line & Load Reg: ±1% over AC input range and 0 to 100% load change. Main +5V output requires minimum load of 10%.
Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.
Remote Sense Output #1: Compensates for 250 mV total line drop. Open sense lead protection.
Temperature Coefficient: 0.02% per degree C.
Stability: 0.1% over 8 hours after 30 minutes warm-up.
Transient Response (+5V): Output voltage returns to within 1% in less than 500 µsec for a 50% load change. Peak transient does not exceed 5%.
Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.
Overvoltage Protection (All outputs): Protects load against power supply induced overvoltage. Trip point is set at maximum 136% of nominal voltage.
Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.
Soft Start: Inrush AC current is less than 90 A at 115 Vac, 180 A at 230 Vac.
Brownout Protection: Holds regulation to 85 Vac.
Thermal Protection: Shuts down power supply if overheated. Automatic recovery.
Holdup Time: 20 ms minimum after removal of power, full load.
Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.
Efficiency: 75% typical.
Safety Agencies: Contact factory for status of UL1950 recognition, CSA22.2 #234 certification, and licensing by TUV to IEC950, VDE 0805, and Class 1, SELV.
Conducted RFI: Meets FCC Part 15, Subpart J, and VDE 0871, Class A. Contact factory for information on VDE 0871 Class B compliance.
Output Isolation: Isolated from ground 50 V.
Reverse Voltage: Protected against reverse voltage up to supply current rating.
DC Power Good: Provides a TTL "0" when output #1 is below 4.6 Vdc.
Power Fail: Provide TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power, VMEbus compatible, provides 48ma sink current capability.
Cooling: Self-cooled with internal ball-bearing fans. Can be operated without fans with sufficient customer-supplied air flow.
Reliability: Over 100,000 hours, when calculated in accordance with MIL-HDBK-217E, and in Option "X" configuration.
Remote Inhibit: True inhibit shuts unit off with TTL "0" signal, or contact closure.

OPTIONS:

Option "X", System Cooling: Customer supplied air of 100 CFM through end of unit provides sufficient cooling for full power operation. Fans are not included with unit.

Consult factory for other available options.

The appropriate 9-inch Powerhouse in your telecom product gives you the outputs you need for ISDN, LAN, and T1 applications, and standard voice and data networks. High current auxiliary outputs provide regulation characteristics for proper operation of line drivers, network interfaces and RS232 type outputs. Or, use a 9-inch Powerhouse in your computer-based product for needed output regulation, power for 50 Amps of Logic and four hard disk drives requirements.

And, you can increase power by 40% as you add peripherals– without redesigning for a larger power supply by upgrading from the MDT 160/220 series.

Check the specifications of these low-profile, 9-inch Powerhouse switchers that give you more design freedom.

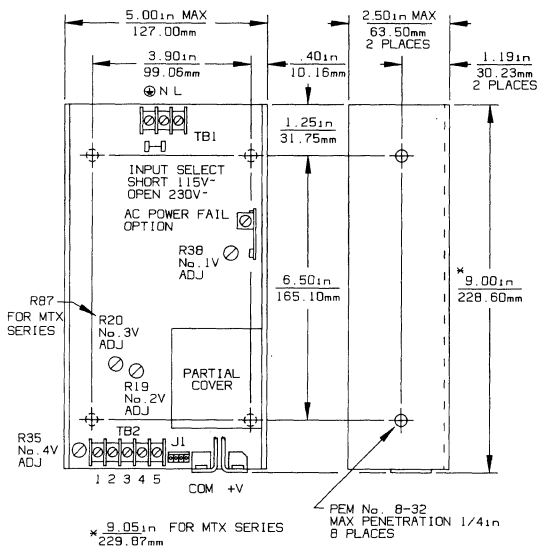
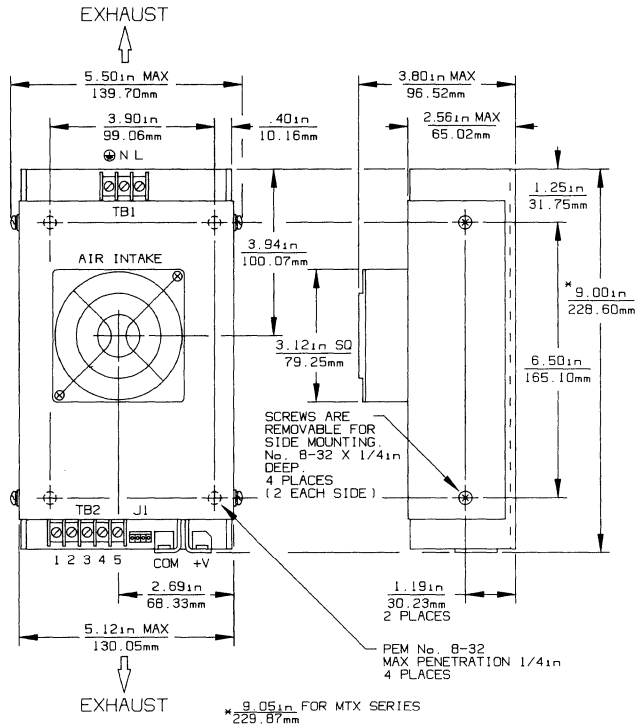
250-350 WATTS 9" x 5" x 2.5"
MAX MTC MSC MTX





SPECIFICATIONS:

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. See Option "A" for automatic line selection. Internally fused for 10 A.
Adjustability: All outputs user adjustable ±5% minimum.
Line & Load Reg: ±1% over AC input range and 0 to 100% load change. Output #1 requires minimum load of 10%.
Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.
Remote Sense (Output #1): Compensates for 250 mV total line drop. Open sense lead protection.
Temperature Coefficient: 0.02% per degree C.
Stability: 0.1% over 8 hours after 30 minutes warm-up.
Transient Response (Output #1): Output voltage returns to within 1% in less than 500 μsec for a 50% load change. Peak transient does not exceed 5%.
Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.
Overvoltage Protection (Output #1): Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 136% of nominal.
Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.
Soft Start: Inrush AC current limiting circuitry holds peak current to less than 10 A at 115 Vac, 18 A at 230 Vac. For MTX, 10A at 115 Vac, 20A at 230 Vac.
Brownout Protection: Holds regulation to 85 Vac or 170 Vac.
Thermal Protection: Shuts down power supply if overheated. Automatic recovery.
Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.
Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.
Efficiency: 80% typical.
Safety Agencies: Approved to UL478, UL 1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805 / VDE 0806 class 1 SELV and EN 60 950.
Conducted RFI: Meets FCC Part 15, Subpart J, and VDE 0871, Class A. Contact factory for information on VDE 0871 Class B compliance.
Output Isolation: Isolated from ground 50 V.
Reverse Voltage: Protected against reverse voltage up to supply current rating.
Cooling: 30 CFM required to achieve full ratings.
Reliability: Over 100,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.
Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero.

OPTIONS:

Option "A", AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.
Option "C", Cover: Limits contact with power supply interior. Add "C" suffix to model number.
Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings, at 50° C ambient temperature.
Option "G", DC Power Good: Provides a TTL "0" when output #1 is below 4.6 Vdc. Not available if Option "P" is selected.
Option "P", Power Fail: Provides TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48ma sink current capability. Not available if option "G" is selected.
Consult factory for other available options.

VMEbus and Multibus compatibility is only one feature of this series. You'll find switchers to power up to 80 Amps of Logic and four hard disk drives–with up to 16 Amps peak current to meet peripheral startup needs.

You'll find the outputs you need for ISDN, LAN, T1 applications and for standard voice and data networks. High current auxiliary outputs provide regulation characteristics for proper operation of line drivers, network interfaces, and RS232 type outputs. And, you can upgrade power output by 25% without redesigning for a larger power supply.

Check the specifications of these bus driving switching power supplies to find the right one for your products.

Option "C", Cover: Limits contact with power supply interior. Add "C" suffix to model number.
Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings, at 50°C ambient temperature. 2.5" dim. increases to 3.8".
Option "G", DC Power Good: Provides a TTL "0" when output #1 is below 4.6 Vdc. Not available if Option "P" is selected.
Option "P", Power Fail: Provides TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48ma sink current capability. Not available if option "G" is selected.
Consult factory for other available options.

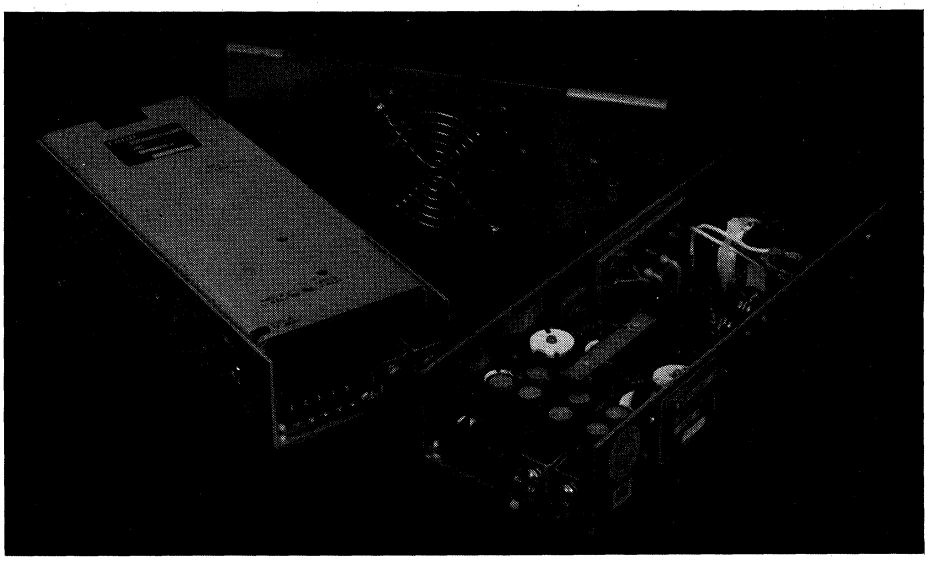
TODD

MULTI-OUTPUT 700 – 750 WATT SWITCHING POWER SUPPLIES



The Shoe Box Alternative

Featuring:

- Cost/Watt Savings of 30%
- 58% Smaller than Equivalent Shoe Box
- 4 watts/in^3
- Meets International Safety Agency Requirements
- All Outputs Fully Regulated
- High Peak Current for Motor Starting
- High Efficiency MAGNA-FLUX Post Regulators
- Reliability Approaching 100,000 hours MTBF
- AC Automatic Line Selection Option

Specify in the appropriate MAX-700 or MAX-750 and get new design freedom for your high-end computer products. Use a system air cooled MAX-700, an optional self-cooled MAX-700 or standard self-cooled MAX-750. You can reduce your product size by replacing a 5″ x 8″ x 11″ shoe box with a 58% smaller MAX-750. Build in power supply redundancy by replacing one shoe box switcher with two MAX-700's in the same space.

Check the specifications and dimensions of these alternatives to shoe box power supplies.

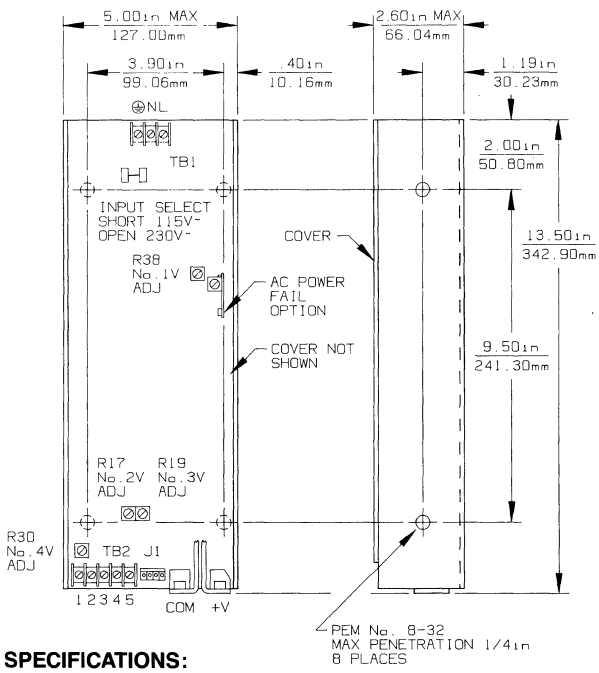
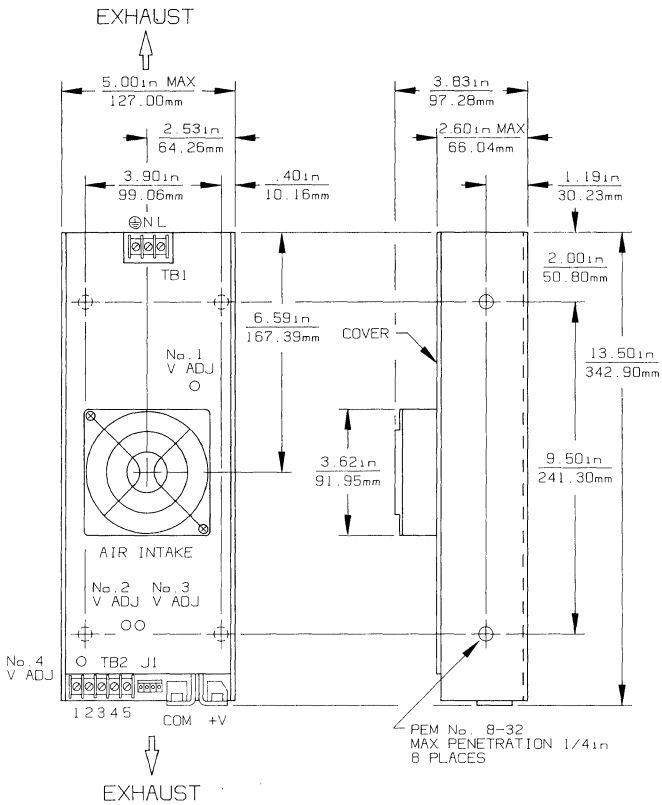
700-750 WATTS 13.5" x 5" x 2.6" MAX MSC





SPECIFICATIONS:

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. See Option "A" for automatic line selection. Internally fused for 15 A.
Adjustability: All outputs user adjustable ±5% minimum, except where noted.
Line & Load Reg: ±1% over AC input range and 0 to 100% load change. Main +5V output requires minimum load of 10%.
Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.
Remote Sense (+5V): Compensates for 250 mV total line drop. Open sense lead protection.
Temperature Coefficient: 0.02% per degree C.
Stability: 0.1% over 8 hours after 30 minutes warm-up.
Transient Response (+5V): Output voltage returns to within 1% in less than 500 μsec for a 50% load change. Peak transient does not exceed 5%.
Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.
Overvoltage Protection (+5V): Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 6.8V.
Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.
Soft Start: Inrush AC current is less than 90 A at 115 Vac, 30 A at 230 Vac.
Brownout Protection: Holds regulation to 85 Vac or 170 Vac.
Thermal Protection: Shuts down power supply if overheated. Automatic recovery.
Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.
Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.
Efficiency: 80% typical.
Safety Agencies: Approved to UL478, UL 1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805 / VDE 0806 class 1 SELV and EN 60 950.
Conducted RFI: Meets FCC Part 15, Subpart J, and VDE 0871, Class A. Contact factory for information on VDE 0871 Class B compliance.
Output Isolation: Isolated from ground 50 V.
Reverse Voltage: Protected against reverse voltage up to supply current rating.
Cooling: MAX-700 models require 60 CFM of air to achieve full ratings except when specifying option "F", Fan Assembly. 750 watt models have built-in ball-bearing fan.
Reliability: Over 80,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.
Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero.

OPTIONS:

Option "A", AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.
Option "F", Fan Assembly: Integral ball-bearing fan provides proper cooling to achieve full ratings, at 50° C ambient temperature. 750 watt models have built-in ball-bearing fan.
Option "G", DC Power Good: Provides a TTL "0" when output #1 is below 4.6 Vdc. Not available if Option "P" is selected.
Option "P", Power Fail: Provides TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48ma sink current capability. Not available if option "G" is selected.

Consult factory for other available options.

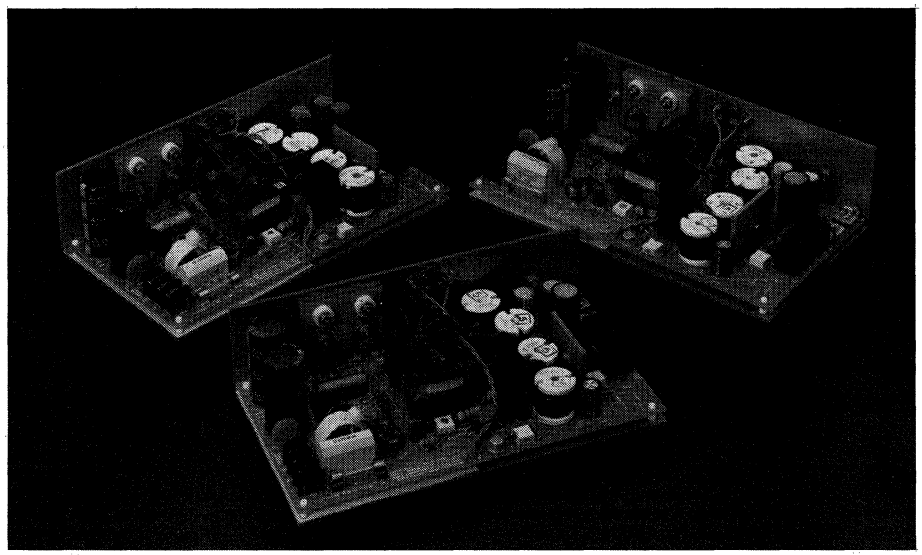
TODD

MULTI-OUTPUT 160 – 220 WATT SWITCHING POWER SUPPLIES



The Price Leaders

Featuring:

- 9″ x 5″ x 2.5″ Package
- TODD's Lowest-Cost Power Supplies
- Over 100,000 hours MTBF
- High Power Densities
- Meets International Safety Agency Requirements
- High Peak Currents for Motor Starting
- AC Automatic Line Selection Option

The leaders of TODD's lower priced switching power supplies, these units are ideal for new OEM Products which are designed for future expansions. Outputs start at 160 Watts and power needs can go to 350 Watts by using the MAX-350 series without changing the footprint.

You'll get up to 30 Amps for logic and memory and peak currents up to 16 Amps for motor starting in a package measuring only 9″ x 5″ x 2.5″. Other features like 100,000 hours MTBF reliability, high power densities, AC autoline select option, and meeting international safety requirements, give design flexibility, low price, and world-wide marketability.

Check the specifications of these "Price Leaders" for your next OEM computer-based or Telecom product design.

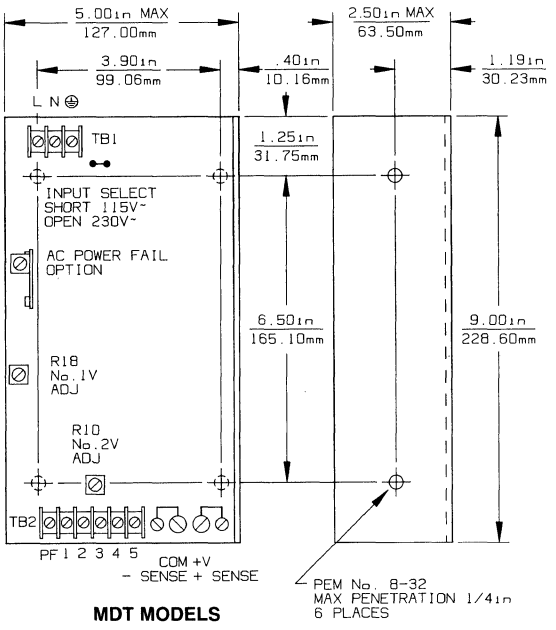
MTC MODELS



MDT MODELS

SPECIFICATIONS: ALL MODELS.

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. Internally fused for 7 A.
Adjustability: Main output and output #3 user adjustable ±5% minimum. Output #4 (Output #3 on MTC series) is not adjustable, and has ±5% initial accuracy.
Line & Load Reg: ±1% over AC input range and 0 to 100% load change. On MDT series only, Output #2 holds ±5% total regulation band, including the combined effects of line regulation, load regulation for a load change of ±40% from 60% initial load, and cross regulation due to a load change of ±25% on the +5V line from 60% initial load. Maximum combined currents on Output #1 and #2 cannot exceed Output #1 rating, except for MDT-223-1212R. Main +5V output requires a minimum load of 20%, for all models.
Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.
Remote Sense (+5V): Compensates for 250 mV total line drop. Open sense lead protection.
Temperature Coefficient: 0.02% per degree C.
Stability: 0.1% over 8 hours after 30 minutes warm-up.
Transient Response (+5V): Output voltage returns to within 1% in less than 500 μsec for a 50% load change. Peak transient does not exceed 5%.
Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.
Overvoltage Protection (+5V): Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 6.8V.
Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.
Soft Start: Inrush AC current is less than 16 A at 115 Vac, 32 A at 230 Vac.
Brownout Protection: Holds regulation to 85 Vac or 170 Vac.
Thermal Protection: Shuts down power supply if overheated. Automatic recovery.
Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.
Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.
Efficiency: 75% typical.
Safety Agencies: Approved to UL478, UL 1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805 / VDE 0806 class 1 SELV and EN 60 950.
Conducted RFI: Meets FCC Part 15, Subpart J, and VDE 0871, Class A. Contact factory for information on VDE 0871 Class B compliance.
Output Isolation: Isolated from ground 50 V.
Reverse Voltage: Protected against reverse voltage up to supply current rating.
Cooling: 30 CFM required to achieve full ratings at 220 watts. 160 watt models are convection cooled.
Reliability: Over 100,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.

OPTIONS:

Option "A", AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.
Option "P", Power Fail: Provides TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48ma sink current capability.
Consult factory for other available options.

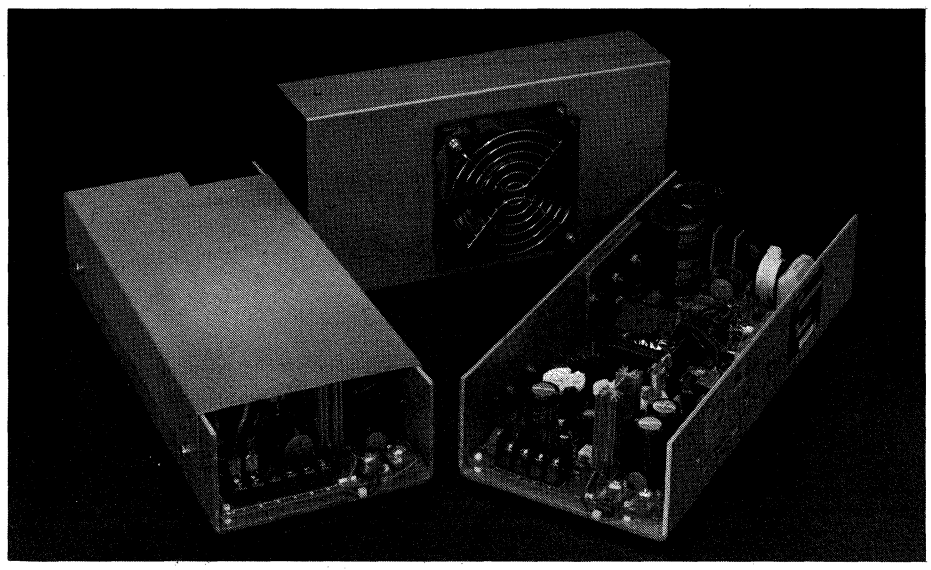
MULTI-OUTPUT 400 WATT SWITCHING POWER SUPPLIES



The Mature Performer

Featuring:

- 11.5″ x 5″ x 2.5″ Package
- High Power Densities
- Proven in Thousands of Applications
- More than 100,000 hours MTBF
- Total Regulation Band of less than ±1%
- Meets International Safety Agency Requirements

These units are specifically designed for optimum cost/performance characteristics in OEM computer-based equipment ranging from engineering workstations to AI computers. Fully regulated outputs power up to 70 Amps of Logic and provide +12 volts, 16 Amps peak for up to four hard disk drives.

Check the specifications of these Mature Performers when you need the assurance of power supplies proven in thousands of applications.

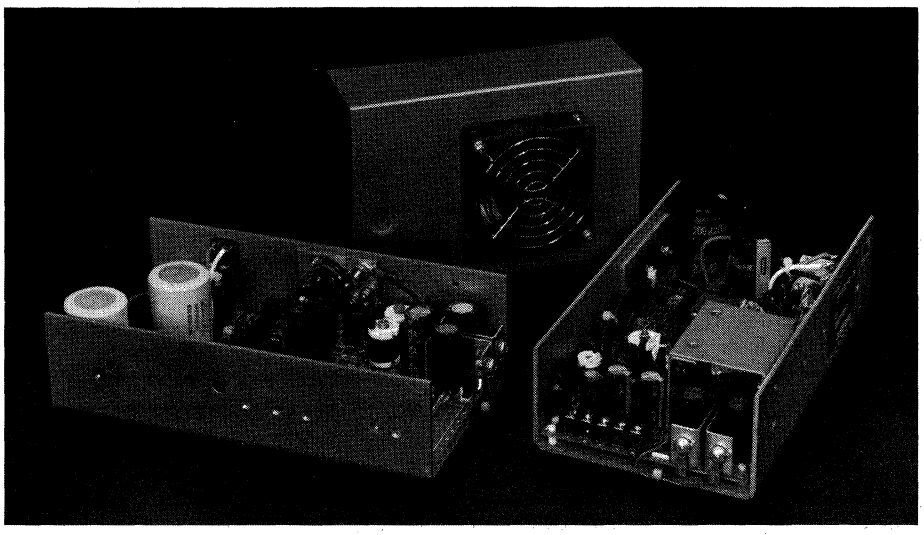
DC/DC CONVERTERS 250 WATT SINGLE OUTPUT 350 WATT MULTI-OUTPUT



The DC/DC Powerhouse

Featuring:

- 9″ x 5″ x 2.5″ Package
- 3 watts/in³ Power Density
- Over 100,000 hours MTBF
- Fully Regulated, High Efficiency Mag Amp Outputs
- Expandable to Include Isolation Diodes and Modified Current Sharing
- High Efficiency MAGNA-FLUX Post Regulators
- System Air or Self-Cooling Option

In single and multiple-outputs, these highly efficient, low profile converters were designed for critical applications in telecommunications equipment, computers, industrial control machinery and medical electronic equipment, where power failure cannot be tolerated.

With fully regulated high efficiency mag-amp outputs, and up to 12 Amps peak, the converters can power up to four disk drives. Units can be expanded to include isolation diodes and modified current sharing for redundancy. Optional DC power fail is available, as are optional fan/cover assemblies.

Check the specifications of these DC/DC Powerhouses when you're designing your next "Can't Fail" product.

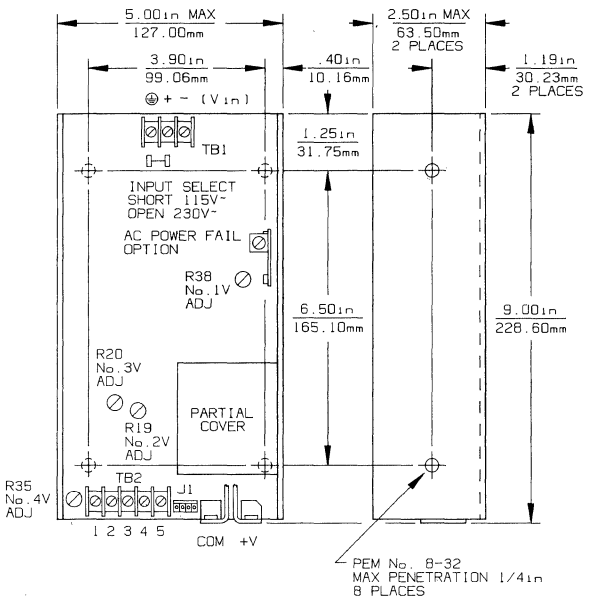
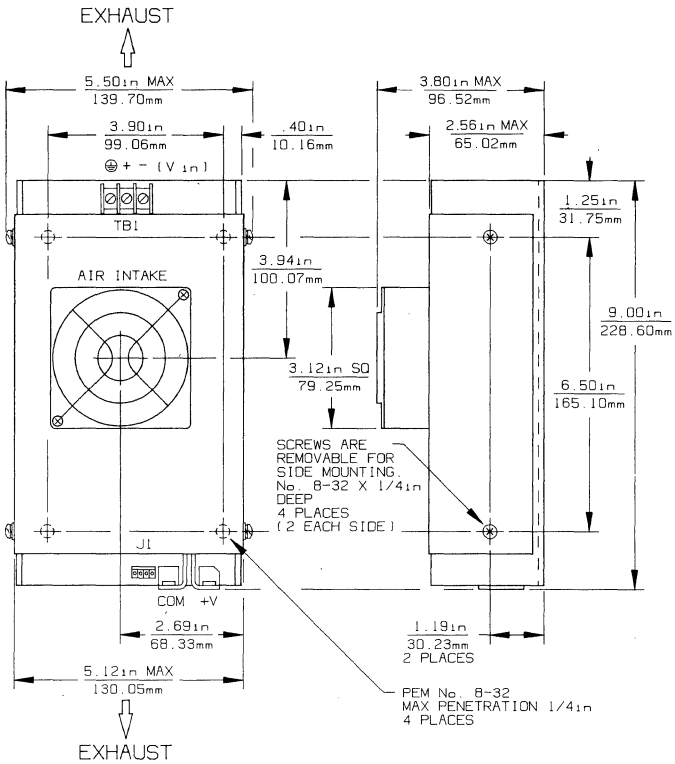
250-350 WATTS
9" x 5" x 2.5"
DC DCT DCX





SPECIFICATIONS: ALL MODELS.

DC Input: 48 Vdc, nominal. 40.8 Vdc to 60 Vdc Range (See Note 1).
Adjustability: All outputs user adjustable ±5% minimum, except where noted.
Line & Load Reg: ±1% over DC input range and 0 to 100% load change. Multiple output units require a minimum load of 10% on the +5 V output when drawing full load on the auxiliary outputs.
Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.
Remote Sense: Compensates for 250 mV total line drop. Multioutput units provide remote sense on main (+5V) output only. Open sense lead protection is standard.
Temperature Coefficient: 0.02% per degree C.
Stability: 0.1% over 8 hours after 30 minutes warm-up.
Transient Response: Output voltage returns to within 1% in less than 500 μsec for a 50% load change. Peak transient does not exceed 5%.
Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.
Overvoltage Protection: Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 6.8V on +5V output of multi-output models. Single output models are set to limit overvoltage to 136% of nominal.
Peak Output Current: Dual current ratings define continuous and peak currents. The peak current shown can be delivered for a maximum period of 30 seconds.
Thermal Protection: Shuts down power supply if overheated. Automatic recovery.
Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.
Efficiency: 75% typical.
Output Isolation: Isolated from ground 50 V. Single output models rated at 48 V nominal have 100V isolation.
Reverse Voltage: Protected against reverse voltage up to supply current rating.
Cooling: 30 CFM required to achieve full ratings.
Reliability: Over 100,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.
Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero.

OPTIONS:

Option "C", Cover: Limits contact with power supply interior. Add "C" suffix to model number.
Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings, at 50° C ambient temperature.
Option "G", DC Power Good: Provides a TTL "0" when output #1 is below 4.6 Vdc.
Note 1: Consult factory for other available options, and input voltage range.

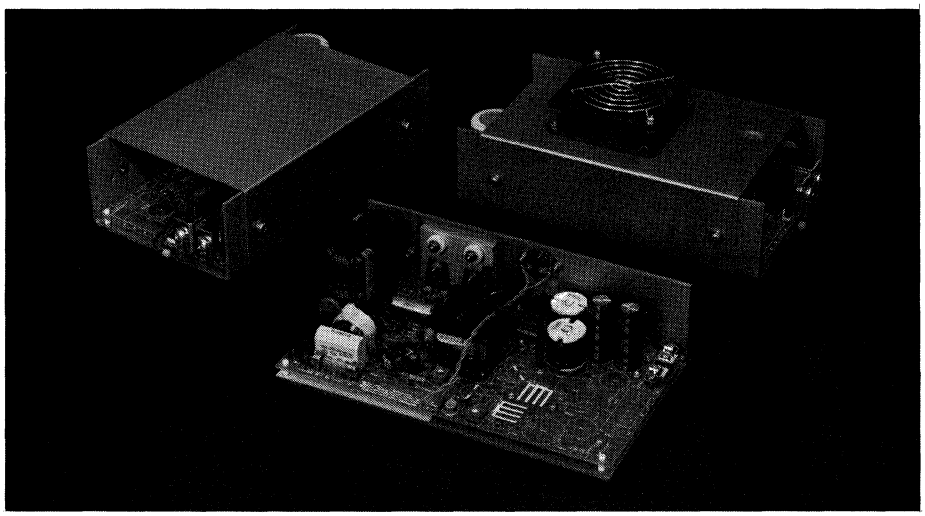
TODD

SINGLE OUTPUT, MULTI-PURPOSE 150 – 250 WATT SWITCHING POWER SUPPLIES



The Single Choice

Featuring:

- 9″ x 5″ x 2.5″ Package
- Output Voltages from 5V to 48V
- Meets International Safety Agency Requirements
- More than 100,000 hours MTBF
- Remote Sense, Thermal Protection, and OVP
- Units Cannot be Damaged by No-load or Low Line Conditions
- System Air or Self-Cooled Option
- AC Automatic Line Selection Option

Switchers in this series are the single choice for power supplies that must withstand the harsh environments that typify industrial control applications. Yet, they include the sophistication and advance design features that are needed to power computer and telecommunications systems.

Designed around TODD's proprietary VERI-DRIVE PLUS current fed inverter topology and unique monocoque construction, these switching power supplies are up to 31% smaller than competitive products and have efficiencies of up to 85%.

All of these SC Series Models are the single choice for worldwide marketability.

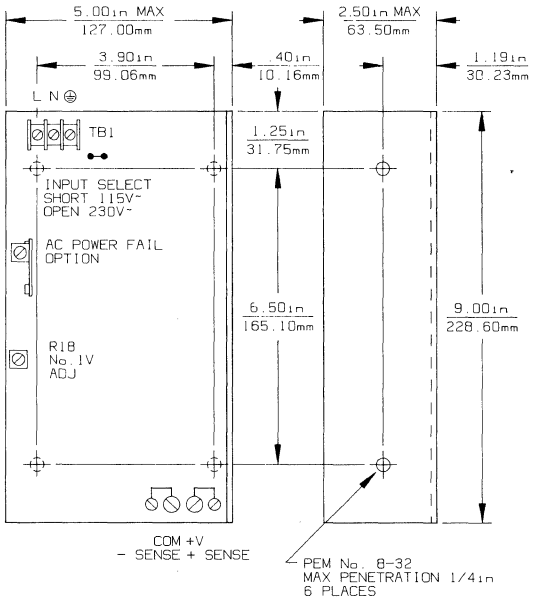
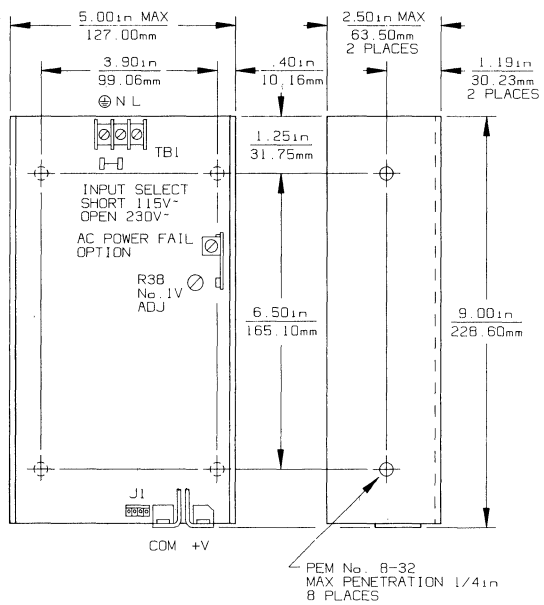
150-250 WATTS 9" x 5" x 2.5" SC





SPECIFICATIONS: ALL MODELS.

AC Input: 90-132 Vac/180-264 Vac, 47 to 63 Hz. User selectable. See Option "A" for automatic line selection. 150 watt units fused for 7 A, 250 watt units fused for 10 A.
Adjustability: ±10% minimum.
Line & Load Reg: ±1% over AC input range and 0 to 100% load change.
Ripple & Noise: Less than 0.2% rms, 1% p-p or 100 mV, whichever is greater.
Remote Sense: Compensates for 250 mV total line drop. Open sense lead protection.
Temperature Coefficient: 0.02% per degree C.
Stability: 0.1% over 8 hours after 30 minutes warm-up.
Transient Response: Output voltage returns to within 1% in less than 500 μsec for a 50% load change. Peak transient does not exceed 5%.
Overload Protection: All outputs are protected against overload and short circuit. Automatic recovery upon removal of fault.
Overvoltage Protection: Protects load against power supply induced overvoltage. Trip point is factory set so that output voltage cannot exceed 136% of nominal.
Soft Start: Inrush AC current is less than 16 A at 115 Vac, 32 A at 230 Vac on 150 watt models, and 10 A at 115 Vac, 18 A at 230 Vac on 250 watt models.
Brownout Protection: Holds regulation to 85 Vac or 170 Vac.
Thermal Protection: Shuts down power supply if overheated. Automatic recovery.
Holdup Time: 16 ms minimum after removal of power, at nominal line, full load.
Temperature Range: 0 to 50°C full ratings. Derate to half power at 70°C.
Efficiency: 80% typical.
Safety Agencies: Approved to UL478, UL 1950, CSA22.2 bulletins 1402c and #234, IEC950, VDE 0805 / VDE 0806 class 1 SELV and EN 60 950.
Conducted RFI: Meets FCC Part 15, Subpart J, and VDE 0871, Class A. Contact factory for information on VDE 0871 Class B compliance.
Output Isolation: Isolated from ground 50 V, except 100V for 48 Vdc models.
Reverse Voltage: Protected against reverse voltage up to supply current rating.
Cooling: 30 CFM required to achieve full rating.
Reliability: Over 100,000 hours MTBF, when calculated in accordance with MIL-HDBK-217.
Remote Inhibit: Contact closure to the negative sense line, drops output power to nominal zero. Not available in 150 or 180 watt units.

OPTIONS (ALL MODELS):

Option "A", AC Auto-Range: Automatically selects proper AC line voltage range to enable power operation at either 115 or 230 Vac, without user intervention.
Option "P", Power Fail: Provides TTL "0", 5 ms before output voltage goes out of regulation band, upon loss of AC power. VMEbus compatible, provides 48ma sink current capability. Not available if option "G" is selected.

OPTIONS (250 WATT MODELS ONLY):

Option "C", Cover: Limits contact with power supply interior. Add "C" suffix to model number.
Option "F", Fan/Cover Assembly: Cover with integral ball-bearing fan provides proper cooling to achieve full ratings, at 50°C ambient temperature.
Option "G", DC Power Good: Provides a TTL "0" when output #1 is below 4.6 Vdc. Not available if Option "P" is selected.
Consult factory for other available options.

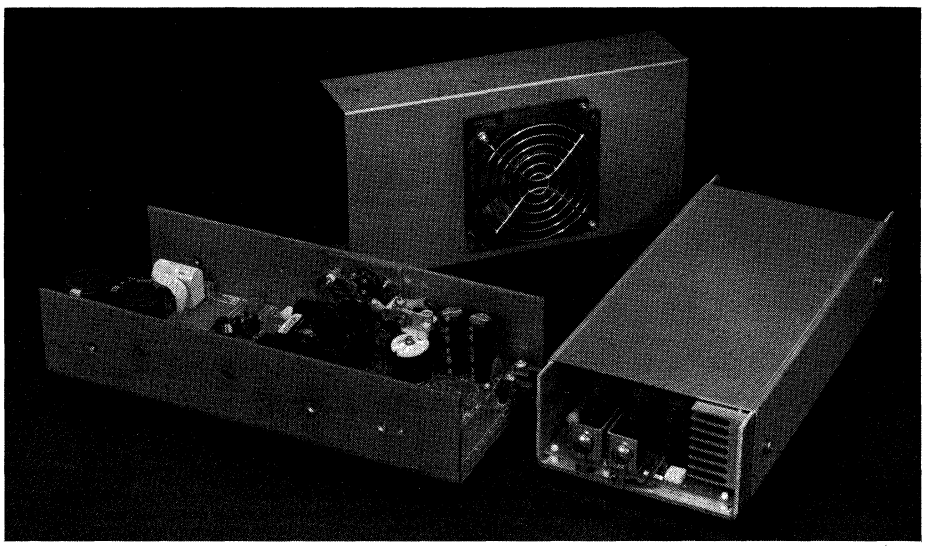
TODD

SINGLE OUTPUT, MULTI-PURPOSE 350 – 500 WATT SWITCHING POWER SUPPLIES



The Single Choice

Featuring:

- 11.5″ x 5″ x 2.5″ Package
- Output Voltages from 5V to 48V
- Power Density to 3 watts/in³
- Meets International Safety Agency Requirements
- More than 100,000 hours MTBF
- Remote Sense, Thermal Protection, and OVP
- Units Cannot be Damaged by No-load or Low Line Conditions
- AC Automatic Line Selection Option

Consider this series for your single choice of switching power supplies used in the design of high end OEM products ranging from process controls to sophisticated telecommunications systems.

Incorporating TODD design features such as surface mount components and single PCB construction for high reliability, these switchers are rugged enough to withstand the harsh environments that typify industrial control applications and also incorporate the sophistication and advance design features needed to power computer and telecommunications systems.

Check out the specifications of this series, your single choice for single output switchers.

TODD

OPTIMUM POWER SOLUTIONS

Quality starts with understanding customers' needs so that we can provide the optimum solution to meet their requirements. By developing close partnerships with our customers, we've been able to provide power solutions for hundreds of applications. With Todd as your power supply engineering partner, you'll have access to the best combination of a broad line of standard products, a low-cost modified or repackaged product, or a fully customized product designed specifically for your application.

MODIFIED STANDARDS

Our standard catalog product line is a comprehensive mix of over 100 units configured for applications in power ranges from 160 watts to 1000 watts. Since all of our standard products within a given series utilize a platform type of design, we are often able to easily modify a standard product to meet a customer's unique application. Each mother board is configurable to many different voltages and will support components and magnetics for a wide range of power. We can also modify performance features, mechanical and electrical characteristics, and options as the customer requires.

FROM BLOOD ANALYZERS TO ATMs

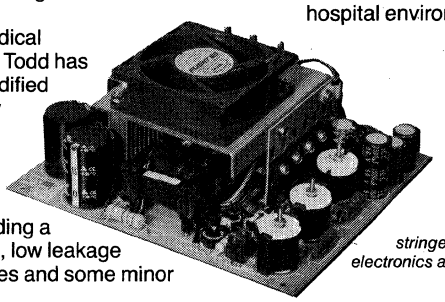
From our standard line to our highly customized designs, we've produced power supplies for hundreds of specialized applications. For example:

- Blood Analyzers
- Blood Processors
- Patient Attached Monitors
- VXIbus Computers
- Work Stations
- Graphics Processors
- Ruggedized Computer Systems
- Automobile Diagnostics
- Automatic Teller Machines
- Lottery Terminals
- High Definition TV Transmitters
- PBX Systems
- Paging Systems

MEDICAL ELECTRONICS

Very demanding requirements are imposed on power supplies used in medical electronics equipment, with reliability being paramount. The requirements of UL544 and IEC601 for patient attachment, for example, impose stringent AC line leakage limits.

Working closely with medical equipment manufacturers, Todd has provided cost-effective modified standards as well as highly customized designs that meet their requirements. For example, Todd engineers were able to modify a standard supply by including a special transformer design, low leakage RFI filters, AC input changes and some minor repackaging with no transformer isolation required. The results were a reliable, field proven unit, meeting the medical leakage requirements, and incorporating the special line transient suppression to survive line voltage transients sometimes found in hospital environments.

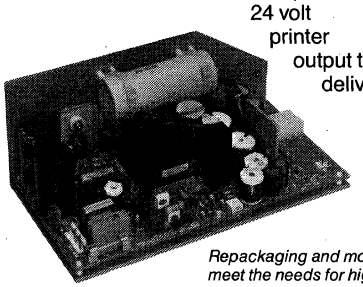


Designed from the ground up, this power supply meets the needs of a stringent medical electronics application.

HIGH PEAK CURRENT PRINTERS

Impact printers used in applications ranging from lottery terminals to ATM machines, place unusual load requirements on the power supply. For example, a system using a 4 output power supply, with an average power demand of 200 watts would require the 24 volt printer output to deliver peak currents of 55 amps, or over 1300 watts. How the power supply handles these peak currents impacts greatly on cost, reliability, and system performance.

Todd engineers were able to identify the critical factors required by the customer for his marketplace, and offer a modified standard to meet his needs. Modifications included incorporating high peak power capability to the inverter, adding an averaging filter, and special control functions to indicate proper DC output. Input and output connectors were added for faster system assembly, and the chassis was custom shaped for easy mounting.



Repackaging and modifications to a standard supply meet the needs for high peak current printers.

TODD PRODUCTS CORP, 50 EMJAY BLVD., BRENTWOOD, NEW YORK 11717 • (516) 231-3366 • 1-800-223-TODD • FAX (516) 231-3473

OPTIMUM POWER SOLUTIONS

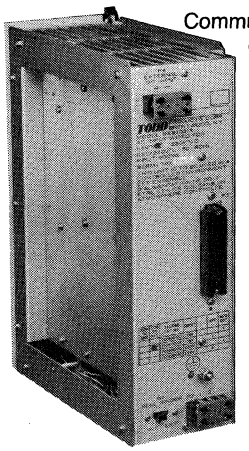
REPACKAGED STANDARDS

Many times we can offer our customers a repackaged standard to meet specific system requirements. For example, we can repackage a standard product to include a special electrical feature, or a "bell or whistle" by revising the pc board artwork. Or we can repackage a standard product for a special mechanical requirement, such as connectivity. We can convert a standard power supply into a very low profile unit to fit into a pre-existing envelope or mounting arrangement. A "repackaged" standard is often the best solution to a customer's special need.

FULL CUSTOM POWER SUPPLIES

Sometimes a customer's requirements are so unique that the power supply must be designed from the ground up. With Todd as your power supply partner, you'll have access to one of the best and most experienced engineering teams in the power supply industry. Since our inception we have been specialists in producing fully captive designs with customized form, fit, and functions. Working closely with our customers' engineering and program management people, our goal is to ensure that each power supply will be the optimum design.

COMMUNICATIONS EQUIPMENT



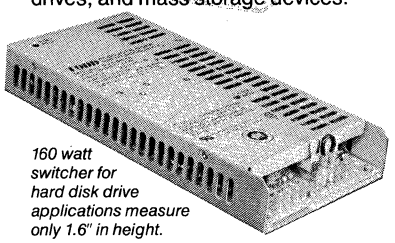
Communications equipment manufacturers of PBX, central office equipment and other critical applications, require a high degree of reliability from their power sources.

A unique plug-in switching power supply provided the optimum solution for a leading telecom manufacturer. For this PBX application, Todd engineers designed a 395 watt, plug-in chassis, switching power supply. The unit connects into the backplane to provide DC power to the PBX cards. It features free convection cooling, DC battery back-up and meets the customer's critical reliability requirements.

Custom-design plug-in switcher for PBX systems.

PERIPHERALS

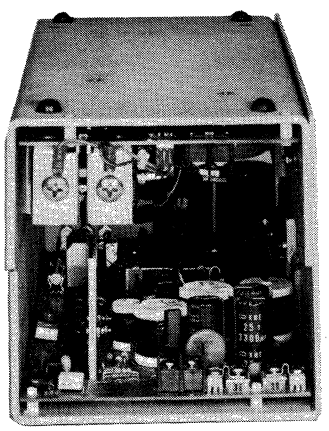
The Todd standard product line includes an extensive series of power supplies that meet a broad range of computer applications. When a recent customer requirement for a low profile switcher could not be met with a standard product, Todd engineers designed a 160 watt switcher, measuring only 1.6" in height, that met all of the customer's requirements for use in SCSI drives, removeable hard drives, and mass storage devices.



160 watt switcher for hard disk drive applications measure only 1.6" in height.

FAULT TOLERANT SYSTEMS

One of the key requirements of this market is N + 1 redundancy and power sharing. While there are a number of workable methods to achieve redundancy, a concern is cost-effectiveness. Analyzing the requirements for cost-effective reliability, Todd engineers were able to incorporate an innovative "zero-wire" power sharing system and built-in diode isolation into a standard product. The end result was an N + 1 redundant system that was more effective and reliable than other proposed systems.



Modified standard product features N + 1 redundancy.

CALL THE SWITCHER SPECIALISTS

The solution to your specific power supply problems begins by dialing our 800 number. This is an easy way to contact one of our switcher specialists. Many times, we can solve a problem with a standard product, or a modified or repackaged standard. Or we'll work with you on a custom design. Working with Todd as your power supply partner, you'll be assured of the optimum power supply solution.

- **SWITCHERS**
- **LINEARS**
- **DC/DC CONVERTERS**

THE COMPANY

Total Power is a leading supplier of switching and linear power supplies and DC-DC converters with manufacturing facilities in the USA, Europe and Taiwan. Our present product line consists of open frame and cased power supplies from 1 to 600 watts and DC-DC converters from 1 to 100 watts.

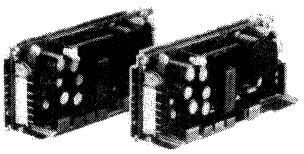
Many products are UL/CSA/TUV or VDE approved and meet medical I/O leakage current (less than 10 ua) requirements. We manufacture a very wide range of industry standard products and specialize in custom-design power supplies which are based on proven standard designs. Typical turn around time is from 4 to 8 weeks for prototypes.

WORLDWIDE MARKETING AND SALES

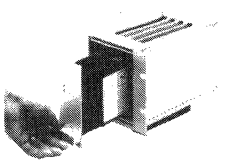
Total Power International, Inc. markets products in the USA and Canada and is associated with Klaasing Electronics B.V. of the Netherlands. This organization markets the same product line throughout Europe. An immediate advantage to our exporting customers in both the USA and Europe is that standard products are available off-the-shelf in many locations around the world.

UNIVERSAL INPUT SWITCHING POWER SUPPLIES

FEATURES:
- Universal Input 90-264 VAC
- Compact Size
- Single, Dual, Triple Outputs
- 10-60 Watts
- 30 Models Available
- UL, CSA, TUV (VDE) Approved



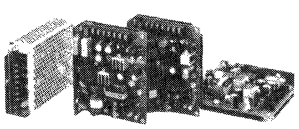
EUROCARD/VME SWITCHING POWER SUPPLIES



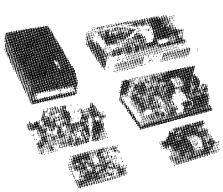
FEATURES:
- Designed for VME-Bus System Rack
- High Efficiency 100KHz MosFet Design
- Standard Eurocard Box Construction
- Over 50 Models Available
- 45 to 200 Watts
- Meets VDE 0806 Safety Requirements
- Meets VDE 0871 Curve B EMI Limits

LOW PROFILE SWITCHING POWER SUPPLIES

FEATURES:
- High Efficiency up to 85%
- Single, Dual and Triple Outputs
- Over 50 Models Available
- 8 to 150 Watts
- UL/CSA Approved



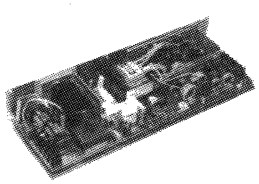
INTERNATIONAL SWITCHING POWER SUPPLIES



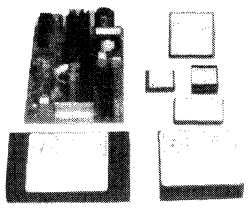
FEATURES:
- Meets International EM/RFI Standards
- UL, CSA, TUV (VDE) Recognition
- Up to 4 Output Combinations
- Over 100 Standard Models Available
- PCB, L-Bracket, Box Constructions

HIGH POWER SWITCHING POWER SUPPLIES

FEATURES:
- 165 to 600 Watts
- Up to 5 Output Combinations
- UL, CSA, TUV (VDE) Recognition
- Short Circuit and Overload Recognition
- Remote Sense, Logic Inhibit, Power Fail Signal
- Auto Select Input Available



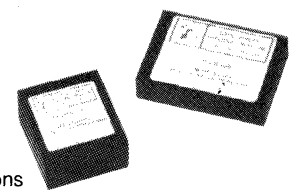
DC-DC CONVERTERS



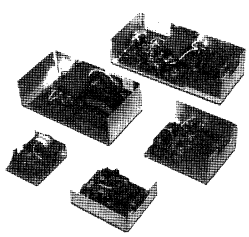
FEATURES:
- Industry Standard Packages
- Up to 50 Watts
- 7:1 Input Ranges Available
- Encapsulated and Open Frame Models
- Over 200 Models Available
- Six-Sided Shielding
- PI Input Filter
- Single, Dual and Triple Output Models

ENCAPSULATED AC/DC POWER SUPPLIES

FEATURES:
- Industry Standard Packages
- Switching and Linear Designs
- Up to 25 Watts
- Excellent Regulation
- Single, Dual and Triple Outputs
- Over 50 Models Available
- PC and Chassis Mountable Versions



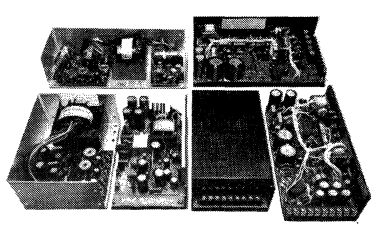
LINEAR OPEN FRAME DC POWER SUPPLIES



FEATURES:
- Industry Standard Packages
- OVP Optional on 12V, 15V, 24V and 28V
- Foldback Current Limiting
- Over 40 Models Available
- 6 to 90 Watts
- UL Recognition & European Safety Design

CUSTOM DESIGN

TPI has successfully built custom design for point of sale terminals, modems, digital communications, thermal printer, mobile satellite communication, and other.

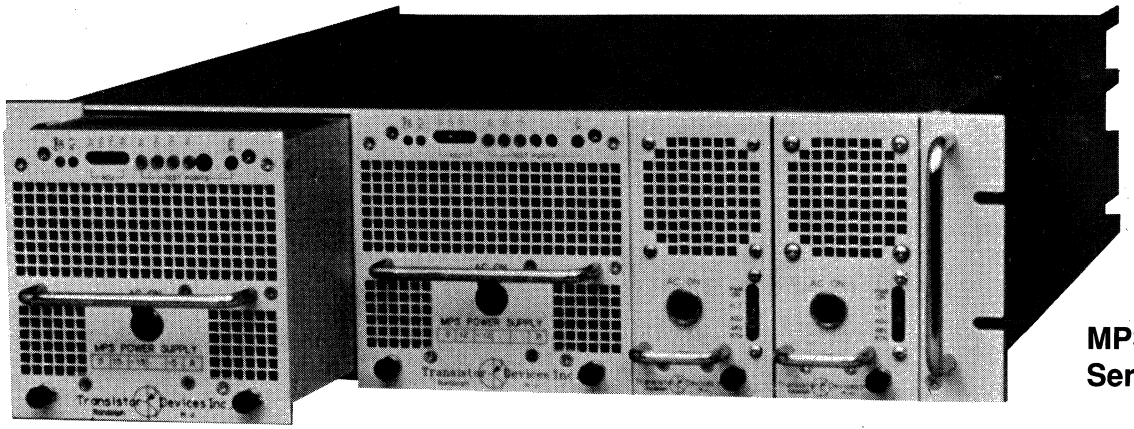


When a custom specification is received from a customer it is studied and evaluated for its feasibility. The design concept is chosen and project meetings are conducted. The initial design is begun and presented to the design review board. After the design topology has been approved and finalized, raw material and parts are ordered. Prototype samples are assembled and tested to customer specifications. During prototype development periodic quality evaluations are made. Once the prototype has been reviewed by the customer, comment on improvement and changes are made to prepare for production.

Prior to release for shipment to a customer units are processed thru the Quality Assurance Department. The Quality Assurance Department acts on behalf of the customer by testing to specifications, shock and environmental requirements.

LET US BE YOUR PARTNERS IN POWER • CALL US WITH YOUR CUSTOM REQUIREMENTS

Power Factor Corrected Modular Power Supplies



MPS Series

- WORLD CLASS - Line Current Harmonic Reduction Per IEC 555.2, / FAA 2100E, and DOD-STD-1399/300
- WORLD POWER - Input 88-264V, 47-63 Hz or 40-60V DC
- N+1 PARALLEL REDUNDANCY - With battery backup
- HOT BUS PLUG-IN - For Zero Down Time
- ONE TO FIVE OUTPUTS - For each module as selected by the customer

500W Modules are 1/6 Rack Wide by 4 7/8" High

1000W Modules are 1/3 Rack Wide by 4 7/8" High

3000W Modules are 1/3 Rack Wide by 6 5/8" High

INPUT SPECIFICATIONS

INPUT VOLTAGE: 88-264V AC or 40-60V DC

INPUT FREQUENCY: 47-63 Hz - Single phase

INPUT PROTECTION: Front panel circuit breaker on each module

EFFICIENCY: 72-80% including cooling and redundant diodes

POWER FACTOR: .98 Typical

LINE CURRENT HARMONICS: <5% THD @ full load

PEAK INRUSH CURRENT: 5 times full load operating current

CONDUCTED EMI: FCC-15, Subpart J, Class A and VDE 0871, Class A

SAFETY STANDARDS: UL1950, IEC950, CSA 22.2 #950

OUTPUT SPECIFICATIONS

LINE REGULATION: ±.1% + 10mV

LOAD REGULATION: ±.1% + 10mV

RIPPLE AND NOISE: Less than 50mV P-P or .5% +25mV, whichever is greater.

OVERVOLTAGE AND OVERCURRENT PROTECTION: Factory adjustable

HOLDUP TIME: 20 msec at any input line voltage.

PARALLEL LOAD SHARING - MAIN OUTPUT: Single wire interconnect.

PARALLEL LOAD SHARING - OTHER OUTPUTS: Droop of regulation characteristics 200mV or 1% of the output voltage, which ever is greater.

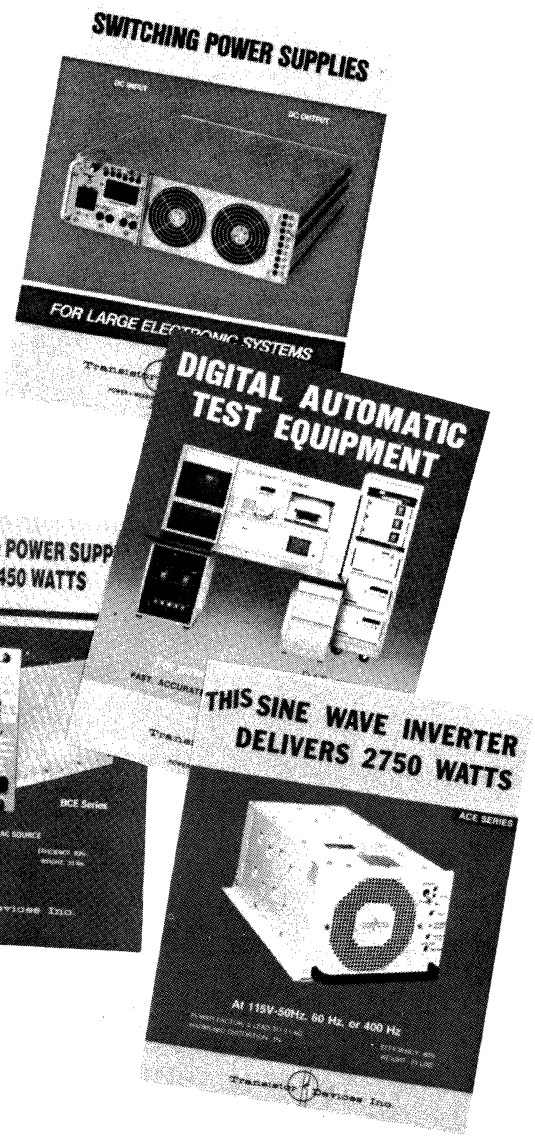
Phone: (201) 267-1900 FAX: (201) 267-2047

274 S. Salem St., Randolph, N.J. 07869-1698
Phone: (201) 361-6622 FAX: (201) 361-7665

STANDARD PRODUCT LINES

- Power Factor Corrected Power Supplies
- Static Inverters and Frequency Changers
- Dynamic Loads
- Uninterruptible Systems
- Digitally Programmed Power Supplies, Loads, and Automatic Test Equipment



SPECIAL TECHNOLOGY

- N+1 PARALLEL REDUNDANCY with battery backup for UNITERRUPTABLE POWER SYSTEMS
- LINE CURRENT HARMONIC REDUCTION per IEC 555.2, FAA 2100E and DOD-STD-1399/300
- STATIC INVERTERS which will operate from zero power factor lead to zero power factor lag.
- FET DYNALOADS for fast transient response and wide dynamics range from 0 to 400 volts.
- Standard and custom software is offered to support digital programming of power supplies, loads and automatic test equipment.

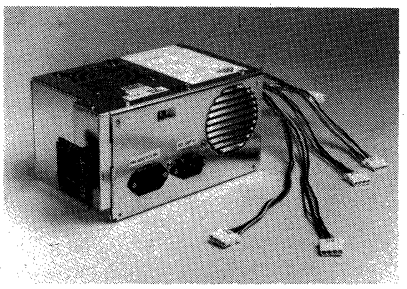
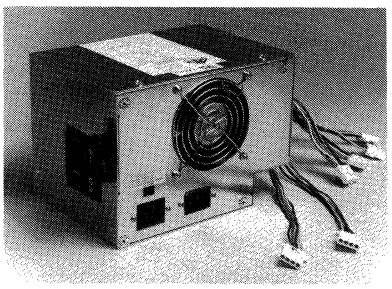
BM SERIES

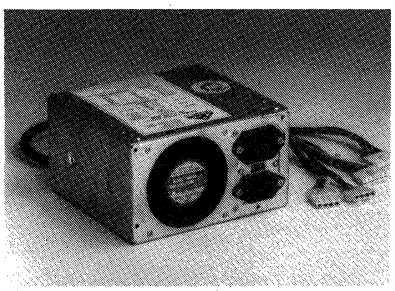
SWITCHING POWER SUPPLY



A L8.35 × W5.59 × H4.67



B L8.35 × W5.90 × H5.90



C L5.93 × W5.51 × H3.40

FEATURES:
- SHORT CIRCUIT PROTECTION
- OVER VOLTAGE PROTECTION
- OVER CURRENT PROTECTION
- BUILT-IN EMI FILTER TO MEET FCC PART 15 SUBPART J, CLASS B, OR VDE CLASS B
- MEETS UL/CSA/VDE SAFETY REQUIREMENTS
- 100% BURN-IN TEST

APPLICATIONS
- CLONE COMPUTERS
- INDUSTRIAL CONTROL COMPUTERS
- INSTRUMENTATION
- GENERAL PURPOSE

In addition to the above features, this power supply incorporates a "Power Good" signal output. This signal output indicates proper operation of the power supply.

OUTPUT POWER

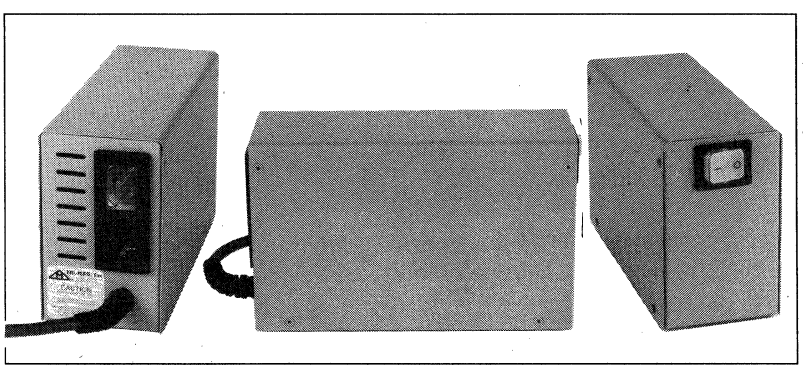
TRI-MAG, Inc.

TABLETOP

POWER SUPPLIES



FEATURES:
- INRUSH CURRENT, OVER CURRENT, OVER VOLTAGE PROTECTED
- HIGH EFFICIENCY
- 100% COMPUTER CONTROLLED ON-OFF BURN-IN TEST
- 20MS HOLD-UP TIME
- 115V/230V SELECTABLE
- IEC FUSED CONNECTOR
- BUILT-IN EMI FILTER TO MEET FCC CLASS B
- LIGHTED ON-OFF SWITCH
- SHIELDED OUTPUT CABLE
- DESIGNED TO MEET UL AND CSA

APPLICATIONS:
- MILITARY APPLICATIONS
- COMMUNICATIONS SYSTEMS
- INSTRUMENTATION
- PROCESS CONTROL EQUIPMENT
- HARD DISK SYSTEMS
- EXTERNAL FLOPPY SYSTEMS
- TAPE BACK-UP SYSTEMS
- TERMINALS
- MODEMS
- SMALL COMPUTER SYSTEMS

DESCRIPTION:
TRI-MAG, Switching Power Supplies includes the MF330-XTT, UV330-XTT Series (30 Watts) and the MF339-XTT, UV340-XTT Series (40 Watts) These Series have a unique flyback circuit design. This technology efficiently delivers the maximum output of continuous power and lower minimum load requirements. This topology also assures very high reliability and performance. All models feature soft start circuitry to limit inrush current and eliminate turn-on overshoot. These series have single or multiple outputs to meet your power requirements. Connections to your system are made with either a DIN or MOLEX Connector.

MF SERIES

OPEN FRAME SWITCHING POWER SUPPLIES

FEATURES

- *High Surge Output*
- *115/230V Selectable*
- *Main Output Adjustable*
- *Compact & Low Cost*
- *Overload Protection*
- *Overvoltage Protection*
- *Short Circuit Protection*
- *100% Hi-Pot Tested*
- *100% Cycling Burn-In*
- *High Efficiency*
- *Built-In Line Filter, FCC Level A*

APPLICATIONS

- *Portable Computer Systems*
- *Instrumentation*
- *CRT Terminal*
- *Color Monitor*
- *Plotter*
- *Printer*
- *Robotics*
- *General Purpose*

DC/DC CONVERTERS

FEATURES

- *Compact Design*
- *PC Board Mounted*
- *Operating Temp: 0°C To +70°C*
- *Option For Output Shutdown*
- *Option For Output Voltage Adjustment*

APPLICATIONS

- *Pos Terminals*
- *Plasma Gas Discharge Display*
- *Disk Drive Systems*
- *Electroluminescent Display*
- *Computer Equipment*
- *Vacuum Fluorescent Display*
- *Industrial And Process Control*
- *Telecommunications Equipment*

These converters operate over a wide range of input voltages while maintaining excellent output regulation. The power supplies are capable of withstanding simultaneous and continuous short circuits across their outputs.

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

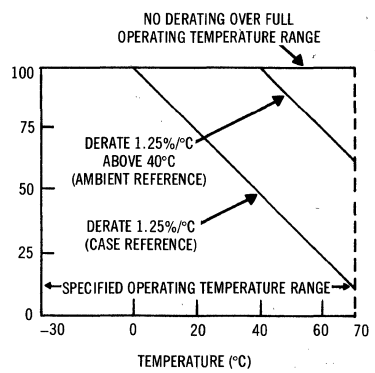

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

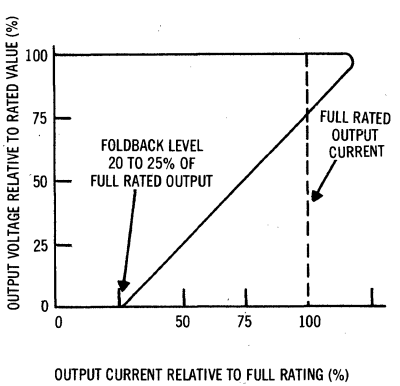

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

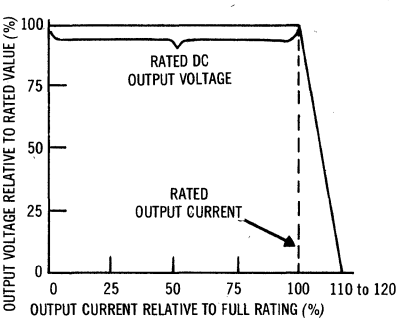

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

High voltage is easier with

Off the shelf:

- **Power densities up to 5 Watts/in³**
- **Ultra-reliability**
- **Competitive pricing**
- **Efficiencies of 75 to 90%**

FLEXIBLE ACCESSORIES:

Ripple stripper modules provide Ultra-low output voltage noise for sensitive applications along with a precision test point.

DAC control modules directly interface computers to all Ultravolt power supplies providing up to 12 bit resolution.

SPECIALIZED CONFIGURATIONS:

We manufacture floating LVPS with **25 Kv isolation** that power filaments or digital circuits up to 10 Watts.

Ultra-low inputs configurations designed for **battery operated** applications.

CUSTOM PRODUCTS:

Our stock of components along with standardized HVPS designs allows us to satisfy most of your custom requirements in **30 days.** Configurations with voltage outputs as high as 30 Kv, power outputs up to 100 Watts.

All units burned in before shipment.

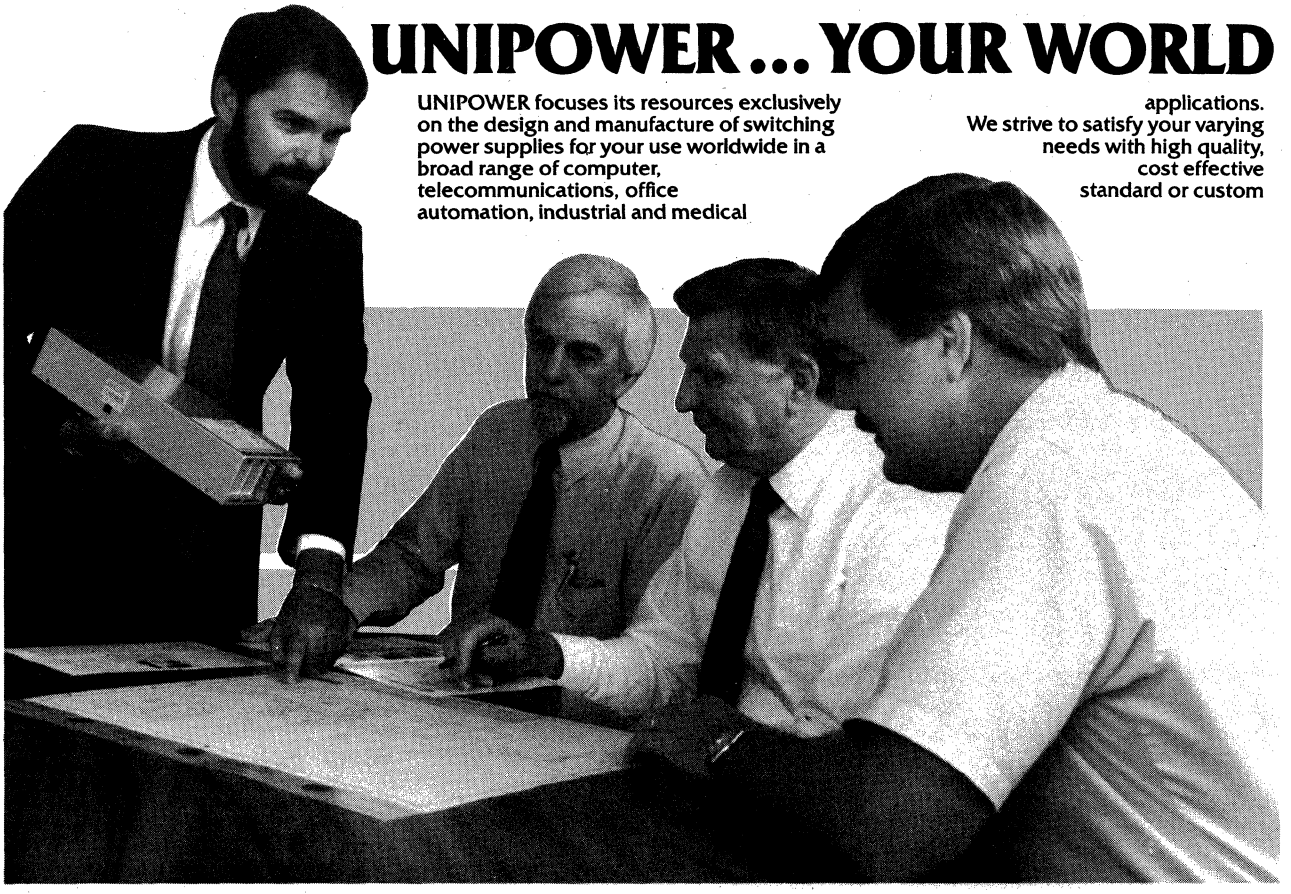
UNIPOWER... YOUR WORLD

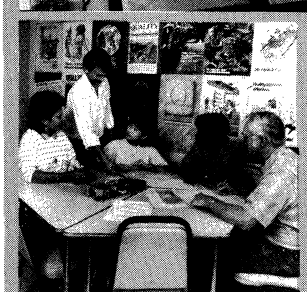
UNIPOWER focuses its resources exclusively on the design and manufacture of switching power supplies for your use worldwide in a broad range of computer, telecommunications, office automation, industrial and medical applications. We strive to satisfy your varying needs with high quality, cost effective standard or custom



WORLD CLASS MANUFACTURING

SPC TECHNIQUES

Key parameters are controlled throughout our manufacturing process with the use of Statistical Process Control (SPC) techniques including control charts and Pareto analysis.

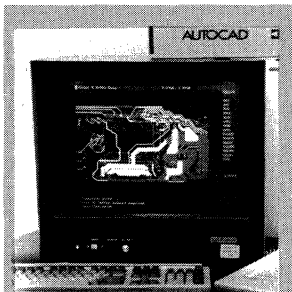


JIT PROGRAM

Our Just-In-Time (JIT) manufacturing program precisely controls material allocation and production line logistics. You benefit from reduced cycle time and reliable delivery.

EMPLOYEE INVOLVEMENT

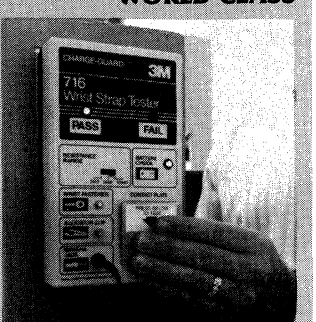
Our Employee Involvement (EI) program ensures the enthusiastic participation of our people in identifying opportunities to constantly improve our processes.



COMPUTER AIDED DESIGN

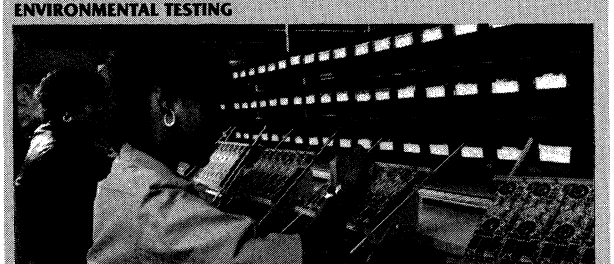
ENVIRONMENTAL TESTING

WORLD CLASS



ESD CONTROL

UNIPOWER employs state-of-the-art tools and equipment throughout our design and manufacturing processes. From computer aided design



PROGRESSIVE ASSEMBLY

CLASS POWER SUPPLIER

products specifically tailored to your unique requirements.

The entire UNIPOWER team is dedicated to meeting your expectations for continuous improvement in quality, cost and service.

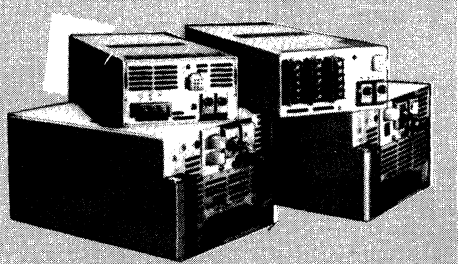
And, you have our total commitment to World Class Manufacturing with a level of excellence competitive with any company in our industry, worldwide.

WORLD CLASS FACILITIES

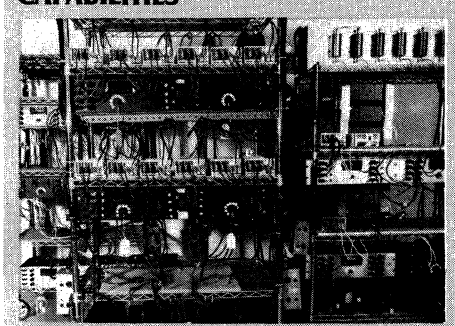
UNIPOWER'S engineering, manufacturing and administrative operations are headquartered in a modern 30,000 square foot facility.

WORLD CLASS QUALITY

World Class companies are dedicated to continuous improvement in the quality of their products and services. Here at UNIPOWER we call it "Unsurpassed Never-ending Improvement" (UNI). We have built it into our name as a statement of our commitment to quality and what it takes to compete in today's global market.



CAPABILITIES



24 HOUR BURN-IN

HP 3000 COMPUTER

and surface mount production to automated testing, you get the benefits of our World Class investments in talent and facilities.

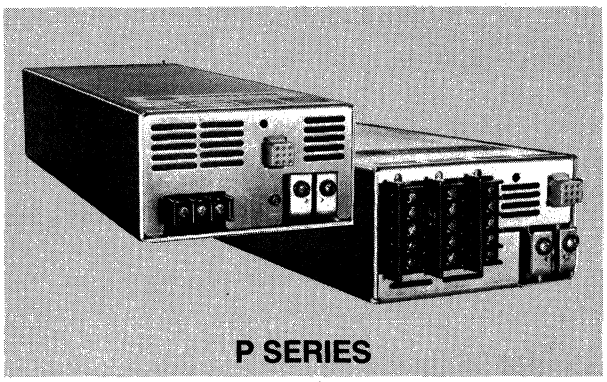
LOW PROFILE SWITCHERS
250 TO 800 WATTS
1 THRU 7 OUTPUTS



KEY FEATURES
- Low Profile Cases (From 2.75")
- Power Density To 3.6W/Cubic Inch
- Switch Selectable 115/230VAC
- 100Khz MOSFET Switching
- Efficiency To 85%
- MTBF To 110,000 Hours
- Surface Mount Technology
- Hi-Rel Hybrid Control Circuits
- 12V Main On Multi For Disc Drives
- Current Share On All Outputs
- No Load Oper (Single, Aux. On Multi)
- Modular Auxiliary Outputs
- MAG AMP Regulation

UNIFEATURES
- Outputs From 2VDC To 48VDC
- Full Output Power To 50°C
- Fully Isolated Outputs
- Special Output Configurations
- Current Sharing Parallel Operation
- Redundant N + 1 Capability
- Rear Mounted DC Ball Bearing Fan
- Soft Start
- Electronic Inrush Current Limiting
- Tight Regulation, Low Noise
- Overload And Overvoltage Protection
- Thermal Warning And Protection
- EMI Input Filter
- Remote Sense, Inhibit, Margin
- Power Good Signal
- 24 Hour Power-Cycle Burn-In At 50°C
- Full Test Data With Each Unit
- Safety Agency Approvals
- Manufactured In U.S.A.
- Two Year Warranty

AVAILABLE OPTIONS
- Worldwide Autorange 115/230VAC
- DC Input (42V To 56V)
- Battery Backup Connector
- DC "OK" Signal
- No Load Operation (Main On Multi)
- Current Share/Monitor (Main Output)
- Current Share (Auxiliary Outputs)
- Reverse Air Flow

SPECIFICATIONS
Typical at Nominal Line, Full Load and 25°C Unless Otherwise Noted.

OUTPUT SPECIFICATIONS

Output Voltage Adjustment Range, All Outputs	±5%
Line Regulation[1]	0.2% or 10 mV, max.
Load Regulation[2], NL-50% FL, 50%FL-FL.	0.2% or 10 mV, max.
Cross Regulation[2], Multi-Output	0.2% or 10 mV, max.
Ripple and Noise[3]	
Main Output	1.0% or 50 mV, max.
Auxiliary Outputs	1.5% or 75 mV, max.
Hold-Up Time	20 msec., min.
Dynamic Response[4]	500 usec., max.
Temperature Coefficient	0.02%/°C, max.
Overvoltage Protection, All outputs	Power Shutdown
Remote Sense[5]	All Outputs except 2A auxiliaries

INPUT SPECIFICATIONS
AC OPERATION

Voltage Range, user selectable (switch)	90 to 132 VAC 180 to 264 VAC
Input Frequency	47 to 63 Hz
Electronic Inrush Current Limiting	40A Peak
Input EMI Filter, Conducted	FCC & VDE Class A
Input Protection	Internal Fuse

DC OPERATION

Input Voltage	42 to 56 VDC
Input Protection	Internal Fuse

GENERAL SPECIFICATIONS

Efficiency	70 to 85%
Switching Frequency	100 kHz
MTBF[6]	Up to 110,000 hrs.
Input To Output Isolation	3000 VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature	0°C to 65°C
Derating 50°C to 65°C	2.4%/°C
Storage Temperature Range	−40°C to +85°C
Cooling	Internal DC Ball Bearing Fan
Vibration	Per MIL-STD 810D, Method 514-3, Cat-I, Proc I
Shock	Per MIL-STD 810D, Method 516-3, Proc II, IV, VI

PHYSICAL SPECIFICATIONS

Case Material	Aluminum
Dimensions	See Case Drawings
Weight:	
250W Single	5.5 lbs.
400W, 500W, 600W Singles	6.0 lbs.
500W Multi	8.0 lbs.
650W Multi	8.5 lbs.
800W Multi	9.0 lbs.

NOTES:
1. Whichever figure is greater. Measured over AC input range.
2. Whichever figure is greater. Remote sense must be connected.
3. Whichever figure is greater. 20 MHz bandwidth.
4. 4% maximum deviation with recovery to within 1% for 25% step change at 75% rated load.
5. 0.25V maximum load cable voltage drop on all outputs.
6. Full load @ 25°C per MIL HDBK 217E.

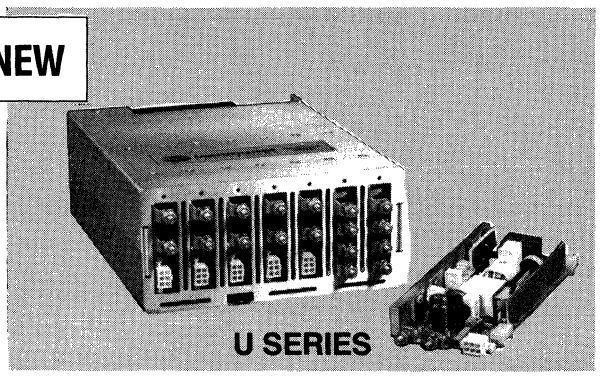
UNIMOD SWITCHERS
400 TO 800 WATTS
UP TO 14 OUTPUTS

NEW



KEY FEATURES
- Fully Modular UNIMOD Construction
- Custom Configuration Of Std Modules
- Two Week Prototype Delivery
- Total Output Selection Flexibility
- Dual And Single Output Modules
- Worldwide Auto Range (115/230VAC)
- Wide Output Adjust Range
- Single Outputs Can Be Paralleled
- Independent Switching Regulators
- Global Inhibit, Remote On-Off
- No Load Operation
- 100Khz MOSFET Switching
- Efficiency To 85%
- MTBF To 100,000 Hours
- Surface Mount Technology
- Ideal For VME/VXI Applications

UNIFEATURES
- Outputs From 2VDC To 48VDC
- Full Output Power To 50°C
- Fully Isolated Outputs
- Special Output Configurations
- Current Sharing Parallel Operation
- Redundant N + 1 Capability
- Rear Mounted DC Ball Bearing Fan
- Soft Start
- Electronic Inrush Current Limiting
- Tight Regulation, Low Noise
- Overload And Overvoltage Protection
- Thermal Warning And Protection
- EMI Input Filter
- Remote Sense, Inhibit, Margin
- Power Good Signal
- 24 Hour Power-Cycle Burn-In At 50°C
- Full Test Data With Each Unit
- Safety Agency Approvals
- Manufactured In U.S.A.
- Two Year Warranty

AVAILABLE OPTIONS
- DC "OK" Signal
- Current Share On Single Modules
- Reverse Air Flow

SPECIFICATIONS
Typical at Nominal Line, Full Load and 25°C Unless Otherwise Noted.

OUTPUT SPECIFICATIONS

Output Voltage Adjustment Range	See Table Next Page
Line Regulation[1]	0.2% or 10 mV, max.
Load Regulation[2]	0.2% or 10 mV, max.
Cross Regulation[2]	0.2% or 10 mV, max.
Ripple and Noise[3]	1% or 50 mV, max.
Hold-Up Time	20 msec., min.
Dynamic Response[4]	500 usec., max.
Temperature Coefficient	0.02%/°C, max.
Overvoltage Protection, All Outputs	Power Shutdown
Remote Sense[5]	All single output modules

INPUT SPECIFICATIONS

Voltage Range, (Auto Range)	90 to 132 VAC 180 to 264 VAC
Input Frequency	47 to 63 Hz
Inrush Current	80A Peak
Input EMI Filter, Conducted	FCC & VDE Class A
Input Protection	Internal Fuse

GENERAL SPECIFICATIONS

Efficiency	70 to 85%
Switching Freuqency	100 kHz
MTBF[6]	Up to 100,000 hrs.
Input To Output Isolation	3000 VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature	0°C to 65°C
Derating 50°C to 65°C	3.3%/°C
Storage Temperature Range	– 40°C to + 85°C
Cooling	Internal DC Ball Bearing Fan
Vibration	Per MIL-STD 810D, Method 514-3, Cat-I, Proc I
Shock	Per MIL-STD 810D, Method 516-3, Proc II, IV, VI

PHYSICAL SPECIFICATIONS

Case Material	Aluminum
Dimensions	3.8″H × 8″W × 11″L
Weight	8.0-10.0 lbs.

NOTES:
1. Whichever figure is greater. Measured over AC input range.
2. Whichever figure is greater. Remote sense must be connected.
3. Whichever figure is greater. 20 MHz bandwidth.
4. 4% maximum deviation with recovery to within 1% for 25% step change at 75% rated load.
5. 0.25V maximum load cable voltage drop on all outputs.
6. Full load @ 25°C per MIL HDBK 217E.

HOW TO ORDER

The UNIMOD configurable multi output power supply allows the user to specify up to seven of the sixteen available output modules in virtually any combination within the 800 watt total output power[1] capability of the supply. Determining the model designation of the desired configurations is as simple as listing the output modules selected.

Slot: (1) (2) (3) (4) (5) (6) (7)

UM – ___ ___ ___ ___ ___ ___ ___ – _____

Series **Outputs** **Options**

Example: Six output supply as follows:

1 ea 2V40A (Module designation B)
2 ea 5V40A (Module designation G)
2 ea 12V10A (Module designation H)
1 ea 24V5A (Module designation M)
Options: DC OK (D), Current share (H)

Model Designation = UM-XBGGHHM-DH

The letter X indicates an emply slot which will be filled by a removeable panel.

The modules will normally be positioned, left to right, in the sequence indicated by the model designation.

NOTES:
1. The maximum total load for all modules must not exceed 800 watts.
2. The maximum load power and current must not exceed the rated values for each module.

AVAILABLE OUTPUT MODULES[2]

VOLTAGE/ CURRENT	WATTS	ADJUST RANGE	DESIG-NATION
2V20A	40	±10%	A
2V40A	80	±10%	B
3.3V20A	66	±10%	C
5V10A	50	4.5-6.5V	E
5V20A	100	4.5-6.5V	F
5V40A	200	4.5-6.5V	G
12V10A	120	10.8-16.5V	H
12V20A	240	10.8-16.5V	J
15V8A	120	10.8-16.5V	K
15V16A	240	10.8-16.5V	L
24V5A	120	20-30V	M
24V10A	240	20-30V	N
48V5A	240	±10%	Q
5/12V5A	85	±10%	R
12/12V5A	120	±10%	S
15/15V4A	120	±10%	T
UNUSED SLOT(S)			X

OPTIONS

D	DC "OK" Signal
H	Current Share (Single modules)
R	Reverse Air Flow (Consult factory)

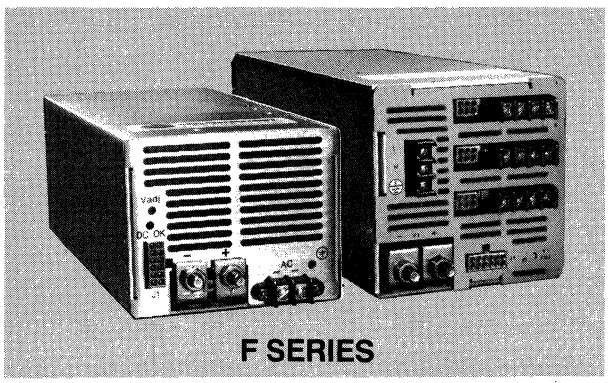
POWER FACTOR SWITCHERS
650 TO 1000 WATTS
1 THRU 7 OUTPUTS



KEY FEATURES
- .98 Power Factor (UNIFACTOR)
- Patented Circuit (U.S. Pat 4,831,508)
- Low Harmonic Current Distortion
- Designed To Meet IEC 555-2
- Worldwide Auto Range (115/230VAC)
- 4″ & 5″ × 5″ × 12″ Cases
- Power Density To 3.3W/Cubic Inch
- 100Khz MOSFET Switching
- Efficiency To 85%
- MTBF To 100,000 Hours
- Surface Mount Technology
- Current Share On All Outputs
- No Load Operation
- LED Output Power Indicator
- Wide Range Auxiliary Outputs
- Independent Switching Regulators
- 3.3, 5, 12 Or 24 VDC Main Output On Multi[7]

UNIFEATURES
- Outputs From 2VDC To 48VDC
- Full Output Power To 50°C
- Fully Isolated Outputs
- Special Output Configurations
- Current Sharing Parallel Operation
- Redundant N + 1 Capability
- Rear Mounted DC Ball Bearing Fan
- Soft Start
- Electronic Inrush Current Limiting
- Tight Regulation, Low Noise
- Overload And Overvoltage Protection
- Thermal Warning And Protection
- EMI Input Filter
- Remote Sense, Inhibit, Margin
- Power Good Signal
- 24 Hour Power-Cycle Burn-In At 50°C
- Full Test Data With Each Unit
- Safety Agency Approvals
- Manufactured In U.S.A.
- Two Year Warranty

AVAILABLE OPTIONS
- DC "OK" Signal With Inverse
- Current Share/Monitor (Main Output)
- Current Share (Auxiliary Outputs)
- Reverse Air Flow

SPECIFICATIONS
Typical at Nominal Line, Full Load and 25°C Unless Otherwise Noted.

OUTPUT SPECIFICATIONS
Output Voltage Adjustment Range
- Main Output . . . . . ± 10%
- Auxiliary Outputs. . . . . See Aux. Table Next Page

Line Regulation[1] . . . . . 0.2% or 10 mV, max.
Load Regulation[2]. . . . . 0.2% or 10 mV, max.
Cross Regulation[2], Multi-Output . . . . . 0.2% or 10 mV, max.
Ripple and Noise[3]
- Main Output . . . . . 1% or 50 mV, max.
- Auxiliary Outputs . . . . . 1% or 50 mV, max.

Hold-Up Time . . . . . 20 msec., min.
Dynamic Response[4] . . . . . 500 usec., max.
Temperature Coefficient . . . . . 0.02%/°C, max.
Overvoltage Protection, All Outputs . . . . . Power Shutdown
Remote Sense[5]. . . . . All Outputs

INPUT SPECIFICATIONS
Voltage Range, (Auto Range). . . . . 90 to 132 VAC
180 to 264 VAC
Input Frequency. . . . . 47 to 63 Hz
Inrush Current. . . . . 80A Peak
Input EMI Filter, Conducted . . . . . FCC & VDE Class A
Input Protection. . . . . Internal Fuse
Power Factor. 98

GENERAL SPECIFICATIONS
Efficiency . . . . . .70 to 85%
Switching Frequency. . . . . 100 kHz
MTBF[6]. . . . . Up to 100,000 hrs.
Input To Output Isolation . . . . . .3000 VAC

ENVIRONMENTAL SPECIFICATIONS
Operating Temperature. . . . . 0°C to 65°C
Derating 50°C to 65°C. . . . . .3.3%/°C
Storage Temperature Range . . . . . – 40°C to + 85°C
Cooling . . . . . Internal DC Ball Bearing Fan
Vibration . . . . . Per MIL-STD 810D, Method 514-3, Cat-I, Proc I
Shock . . . . . Per MIL-STD 810D, Method 516-3, Proc II, IV, VI

PHYSICAL SPECIFICATIONS
Case Material. . . . . Aluminum
Dimensions. . . . . See Case Drawings
Weight:
- Single Output . . . . . 13.0 lbs.
- Multi Output . . . . . 15.0 lbs.

NOTES:
1. Whichever figure is greater. Measured over AC input range.
2. Whichever figure is greater. Remote sense must be connected.
3. Whichever figure is greater. 20 MHz bandwidth.
4. 4% maximum deviation with recovery to within 1% for 25% step change at 75% rated load.
5. 0.25V maximum load cable voltage drop on all outputs.
6. Full load @ 25°C per MIL HDBK 217E.
7. 5VDC standard, consult factory for 3.3, 12, or 24VDC

UL 1950 CSA 22.2, No. 220 TUV IEC 950/VDE 0806

All specifications subject to change without notice.

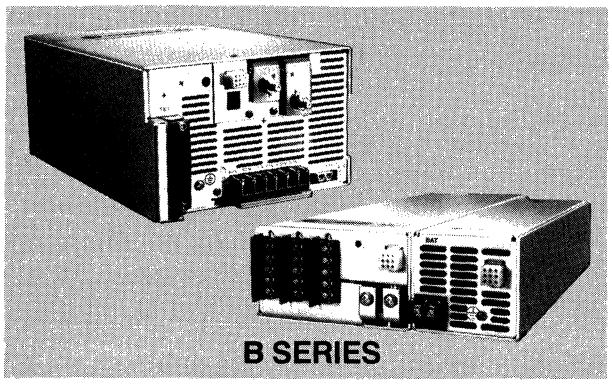
BATTERY BACKUP SWITCHERS
250 TO 750 WATTS
1 THRU 7 OUTPUTS



BENEFITS OVER CONVENTIONAL UPS
- Lower Total System Cost
- No Added External Package
- Less Space, Lower Weight
- Simpler, No Inverter Needed
- Higher System Efficiency
- Smaller Battery For Same Output

GENERAL FEATURES
- Provides UPS Capability
- AC And DC Battery Input
- Auto AC To Battery Switchover
- Integral Battery Charger
- Battery Charger Monitoring
- Charge Control Circuitry
- Charge Supervision Circuitry
- Deep Discharge Battery Protection
- Precise Control Of Float Voltage
- Protective Circuits For PS & Battery
- Ideal For Fault Tolerant Systems
- 19″ Rack Packaging Available
- Batteries Included In Rack Package

OTHER FEATURES/OPTIONS (250W To 500W)
- Remotable Backup Module
- Same As Low Profile P Series

OTHER FEATURES/OPTIONS (750W)
- Integral Backup Circuitry
- Same As Industry Standard J Series

(UL, CSA, TUV approvals pending)

SPECIFICATIONS
Typical at Nominal Line, Full Load and 25°C Unless Otherwise Noted.

AC OPERATION

Voltage Range, user selectable	90 to 132 VAC 180 to 264 VAC
Input Frequency	47 to 63 Hz
Inrush Current: 250–500W	40A Peak
750W	75A Peak
Input EMI Filter, Conducted	FCC & VDE Class A
Input Protection	Internal Fuse

DC OPERATION

Type of DC Source	24 Cell Sealed Lead Acid Battery
Input Voltage Range	40.5 to 56 VDC
Turn-on Voltage—DC Operation, 250–500W	46–50 VDC
750W	51–54 VDC
Low DC (Battery) Shutdown	DC Input Shuts Down at 37.5 to 40 VDC
Input Protection	External Fuse or Circuit Breaker (consult factory)
Reverse Voltage Protection	Internal Shunt Diode External Fuse/Circuit Breaker

GENERAL SPECIFICATIONS

Efficiency	70 to 85%
Switching Frequency, 250–500W	100KHz
750W	20KHz
MTBF[6]	Up to 85,000 hrs.
Input To Output Isolation	3000 VAC

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature	0°C to 65°C
Derating 50°C to 65°C	2.5%/°C
Storage Temperature Range	−40°C to +85°C
Cooling	Ball Bearing Internal DC Fan
Vibration	Per MIL-STD 810D, Method 514-3, Cat-I, Proc I
Shock	Per MIL-STD 810D, Method 516-3, Proc II, IV, VI

PHYSICAL SPECIFICATIONS

Case Material	Aluminum
Dimensions	See Case Drawings
Weight: 250W to 500W Power Supply	6 to 8 lbs.
Backup Module	3.5 lbs.
750W	18 lbs.

NOTES:
1. Whichever figure is greater. Measured over AC input range.
2. Whichever figure is greater. Remote sense must be connected.
3. Whichever figure is greater. 20 MHz bandwidth.
4. Maximum deviation with recovery to within 1% for 25% FL at 75% of rated load (4% for 250–500W, 2% for 750W).
5. 0.25V maximum load cable voltage drop on all outputs.
6. Full load @ 25°C per MIL HDBK 217E.

All specifications subject to change without notice.

UNIPOWER CORPORATION
THE WORLD CLASS POWER SUPPLIER

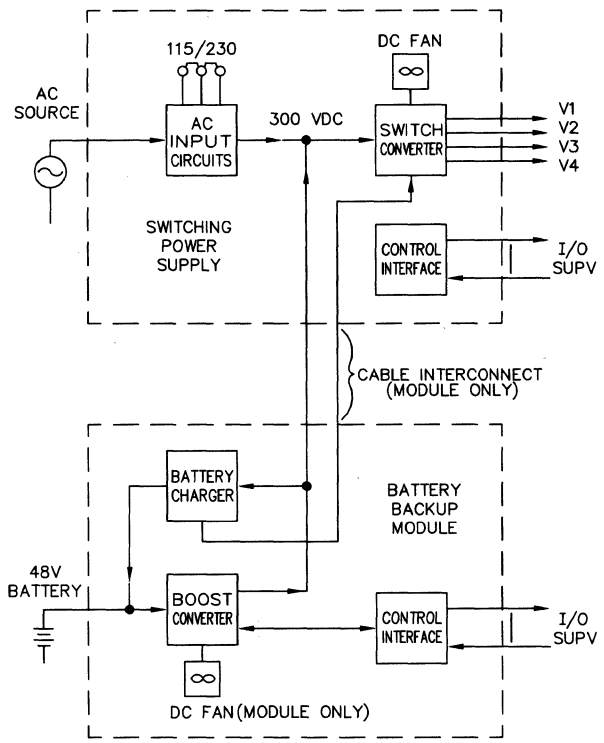
POMPANO BEACH, FL 33069
TEL: (305) 974-2442
FAX: (305) 971-1837

PRINCIPLES OF OPERATION

The B Series accept 115/230 VAC and 48V DC input from an externally connected sealed lead-acid battery. Power to the output is normally provided by power flow from the AC input through a conventional off-line switching circuit. The battery is charged by an internal charging circuit. When AC failure is sensed, energy is drawn from the battery through a switching up-converter to keep the main converter operational to supply its rated output. The unit has control and monitor features to assure proper transfer of power between the AC source and the battery without disturbing the load.

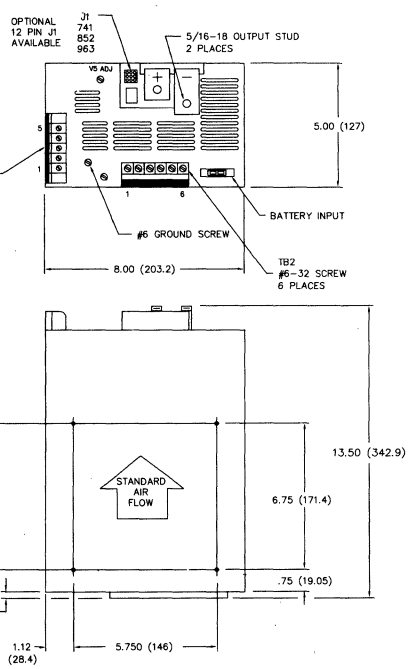


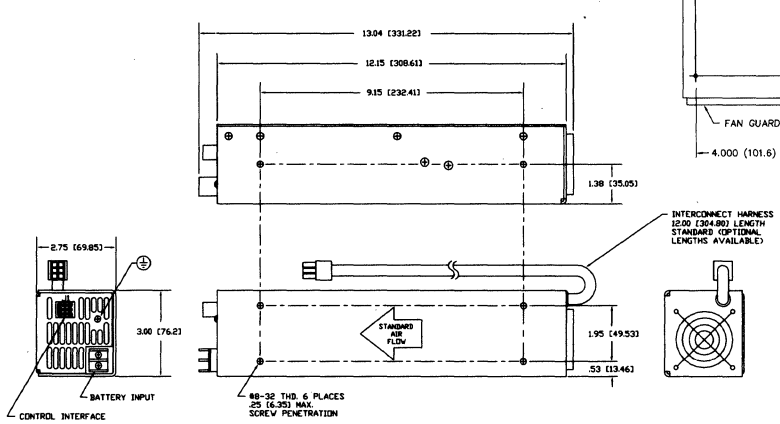
SINGLE OUTPUT RATING TABLE (250–500 Watts) (1)		
	Output Voltage	Max. Output (2) Current
Output V1	2–48V	100A

MULTIPLE OUTPUT RATING TABLE (250–500 Watts) (1)		
	Output Voltage	Max. Output (2) Current
Main V1	5V	40–75A
Aux. V2–V4	2–24V	2–10A
Aux. V5–V7	5–15V	2A

750W OUTPUT RATING TABLE (3)		
	Output Voltage	Max. Output (2) Current
Main V1	5V (1)	120A
Aux. V2	2–28V	20A
Aux. V3	2–28V	5A
Aux. V4	2–48V	1A

NOTES:
(1) Available in most P Series configurations.
(2) Each output channel is rated to provide maximum current as listed. Current rating of each channel will depend on output voltage.
(3) The total output power shall not exceed 750 watts.





(See P Series case drawings for 250-500W power supply)

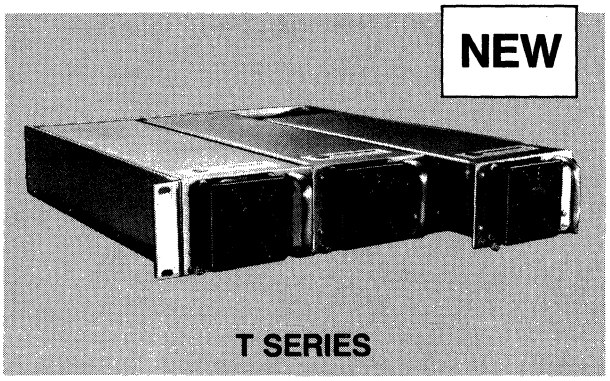
FAULT TOLERANT SYSTEMS
UP TO 3000 WATTS
1 THRU 12 OUTPUTS



KEY FEATURES
- P Series Units In A Pluggable Case
- 250 To 600 Watts Per Unit
- 1 To 4 Outputs Per Unit
- Outputs From 2VDC To 48VDC
- N + 1 Redundancy
- Current Share On All Outputs
- Integral Isolation Diodes
- Hot Plug Replacement
- High Reliability Connectors
- Backplane System Interface or Individual Unit Connection
- Interlocking On-Off Switch
- 1, 2, 3, 4, or 6 Units Per System
- Standard 19″ Rack Mountable
- Standard 3.5″ and 7″ Panel Height
- LED Power Good and DC OK Indicators
- Each Unit Independently Cooled
- User Serviceable DC Ball Bearing Fan

UNIFEATURES
- Same As Low Profile Series

AVAILABLE OPTIONS
- Worldwide Autorange 115/230VAC
- Individual Unit System Connectors
- No Load Operation (Main On Multi)
- Rack Mounting Brackets
- DC Input (42V To 56V)
- Reverse Air Flow

OPTIONS	
A	Worldwide Autorange 115/230VAC
C	Individual Unit System Connectors
E	No Load Operation (Main On Multi)
M	Rack Mounting Brackets
Q	DC Input (42V To 56V)
R	Reverse Air Flow

SPECIFICATIONS
All output, input, general and environmental specifications are the same as the P Series.

PHYSICAL SPECIFICATIONS
Case Material
Power Supply . . . . . .Aluminum
System Chassis . . . . . .Aluminum & Steel
Dimensions. . . . . .See Case Drawings

STANDARD MODEL NUMBERS
Power Supplies: Any P Series 250 to 600 watt model. Substitute "T" for "P" in model number (i.e., a PF2330 in a hot plug case is a TF2330).

Chassis Systems: T-X X
- X: # of slots (1,2,3,4,6)
- X: # of rows (1, 2)

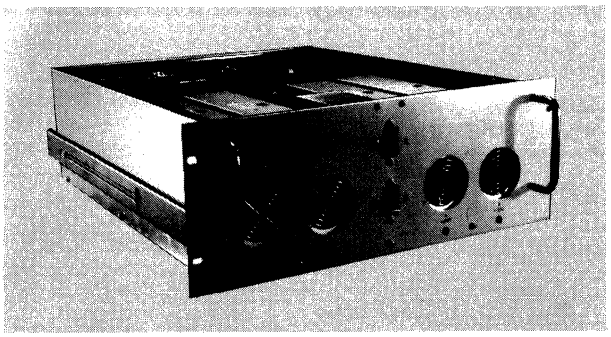
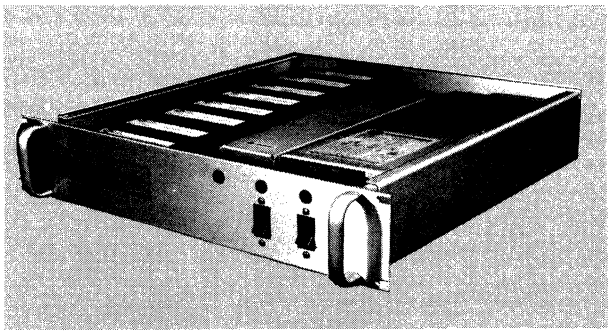
"CUSTOMIZED" SOLUTIONS

UNIPOWER engineers "customized" power solutions based on our standard products to satisfy a broad range of unique customer requirements.



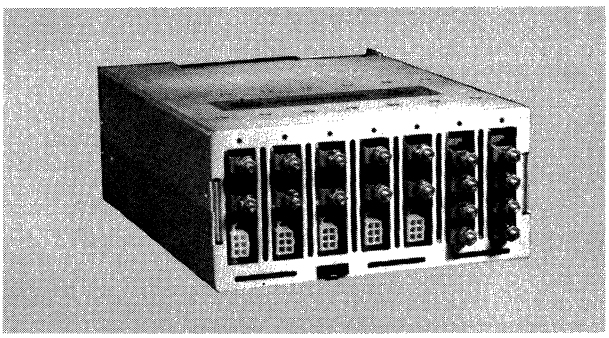
RACK MOUNT POWER SYSTEM

This 19" rack mount power system was engineered for a remote communications station. Four standard P Series units are connected in a redundant configuration. Circuit breakers, alarm circuits, indicator lights and rear mounted terminal strips complete the package.



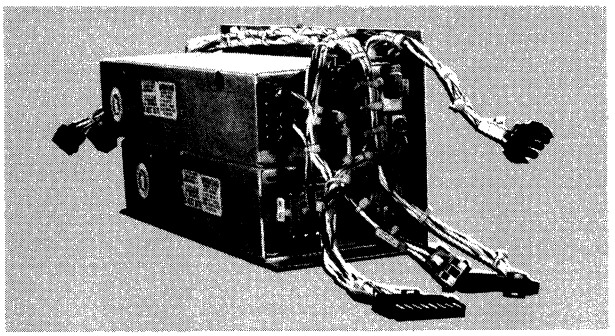
TOTAL UPS CAPABILITY

The B Series Battery Backup Switchers are available in standard 19" rack packaging. These configurations include sealed lead acid batteries, circuit breakers for AC input and battery input as well as indicator lights to signal battery ready and battery operation.



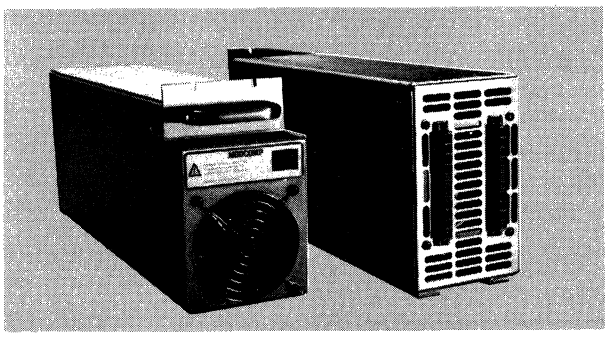
MULTI OUTPUT VME/VXI

This multi output configurable power supply can accommodate up to seven single or dual modules providing up to 14 outputs. With a maximum power of 800 watts it is ideally suited for standard bus applications including VME and VXI.



COMPLETE POWER SYSTEM

The customer for this special multi output power system needed a complete package including mounting bracket and cables with connectors. This customized solution "plugs" into the equipment and is securely mounted with built in "L" hooks and two fasteners.



HOT PLUG N + 1 PACKAGE

This hot N + 1 package was engineered for a high reliability industrial computer application. The clean simple mechanical design of the P Series facilitated repackaging to the unique dimensional requirements of the customers system.

Call Your Local UNIPOWER Sales Rep or Contact Us Directly...

FOR THE SOLUTIONS YOU SEEK

- 250 To 2000 Watts
- Up To Eight Outputs
- Worldwide Safety Approvals
- Parallel Operation
- Low Profile Cases
- Power Factor Correction
- Wide Input Range
- Battery Backup
- N + 1 Redundancy
- 19" Rack Packaging

FOR THE APPLICATIONS YOU HAVE

- Computer Systems
- Computer Peripherals
- Telecommunications
- Office Automation
- Test And Measurement
- Industrial Control
- Medical Instrumentation
- Aerospace (Non Mil-Spec)

FOR THE EXCELLENCE YOU DESERVE

- Timely Response To Inquiries
- Standard And Custom Solutions
- Competitive Price And Delivery
- Two Year Warranty
- Worldwide Sales And Service
- Dedication To Continuous Improvement In Your Quality, Cost And Service
- Manufactured In The U.S.A.

UNISTREAK DELIVERY

UNIPOWER understands the value of time and your need to get product to market quickly. Our UNISTREAK delivery program guarantees you shipment within ten days on up to 3 pieces of any standard catalog product at a modest handling charge. We ship within 10 days or you don't pay the handling charge. So, if you need it now, ask for UNISTREAK delivery.

Oil-Free Capacitor Charging Power Supplies

Universal Voltronics Corporation, a public subsidiary of Thermedics Inc. and ThermoElectron Corp., has been a leader in the High Voltage industry for over 30 years. Our products include: • High Voltage Switching Supplies to 30KW • High Voltage Linear Power Supplies to 400KV and 500KW • Precisely regulated high voltage power supplies to 500KV • High voltage line type and hard tube modulators • Solid state pulse generators to 100KV • Microwave component test sets • High voltage dividers • Isolation Transformers, standard line from 10kV to 250kV • High Voltage DC Power Packs, 2kV to 40kV • Multi-megajoule, megamp capacitor bank systems • Crowbar protection circits.

Universal Voltronics Corporation's new High Frequency Transformer Rectifier eliminates the need for oil/insulating fluid. The result is:*

- *compact, lightweight packaging*
- *30%-40% reduction in peak power drawn from source*
- *average power which is equal to peak power*
- *the highest safety—reduced risk of fire or accident*
- *highest efficiency.*

APPLICATIONS INCLUDE:

- Medical/Industrial Lasers
- X-ray Lithography
- E-Beam/Plasma Etching
- EMP/Flash X-Ray Simulators
- Industrial Welding/Heat Treating
- Magnetic Metal Forming

Available in 2.5kJ, 5kJ, and 10kJ Systems. Consult Factory

TYPICAL SPECIFICATIONS (BRI-5kJ):

Standard Max. Output Voltages	Average Current @ 100% Voltage	@ >75% Voltage
1 kV	10 A	13.3 A
2.5 kV	4 A	5.3 A
5 kV	2 A	2.7 A
10 kV	1 A	1.3 A
25 kV	400 mA	533 mA
35 kV	285 mA	380 mA
50 kV	200 mA	267 mA

At voltages between 75% and 100% of maximum, derate current such that kV x mA = 10,000. Other voltages and currents available, special order.

Charge Rate: 5 kJ/S PK
5 kJ/S AVG

Charge Voltage Regulation: ± .5% to 2kHz 100 ppm/°C TC
± .1% available as an option

Efficiency: >87% at full load

Input Voltages: 190–260V 50/60 Hz 3 phase 20A max. standard
190-260V 50-400 Hz 3 phase 20A max. standard
400 Hz available special order

Power Factor: >85%

Inrush Current: <20A

Protection: Overvoltage (internally adjustable) also protects against open circuit.
Prefire detection
Auto inhibit with adjustable recharge delay
Latched load detection
Overcurrent
Excess Rep rate
Over temperature
Internal & external interlocks

Cooling: Internal fans – 10 to +40°C ambient 0–7500 ft. altitude

Size: Standard 19″ rack mount 5¼″ panel height 17″ depth

Weight: Approximately 35 lbs.

Regulation Scheme: Quasi constant power:
Current decreases from max. at beginning of charge to lower values as voltage increases during charge. This greatly smooths variations in line current at lower rep rate.

*PATENT PENDING

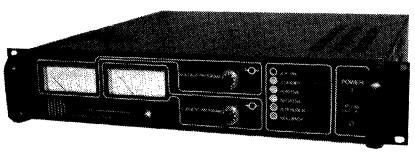
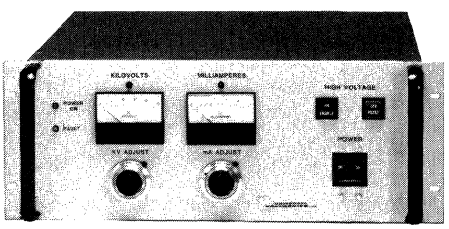
FEATURES:

- Compact and lightweight 500W in a 3½" rack mountable panel
- Low stored energy
- Low EMI
- Precision regulation
- Arc and short curcuit protection
- Low ripple
- High stability
- 110V or 220V input standard

APPLICATIONS:

- Medical/Industrial Lasers
- Ion Implantation
- Electrostatic Paint/Powder Depostion
- X-Ray Lithography
- E-Beam/Plasma Etching
- EMP/Flash X-Ray Stimulators
- Industrial Curing/Welding/Heat Testing
- Isotope Separation





Features, Laboratory Models:

Front Panel Controls:
On-Off circuit breaker and Power-On light
HV-On pushbutton and light
HV-Off pushbutton and light
Voltage and Current controlled by locking 10 turn potentiometer, 0.1% resolution
Meters are single range 2% FS analog

Packaging:
laboratory models are designed for standard 19 in. rack mounting. OEM and Airborne models are designed to the system requirements

Options:
Reversible output, DIgital meters, Custom voltage and current ranges, Remote controls—Consult Factory

Typical Specifications

Input: 115V 1ϕ or 208V 3ϕ (1000W and above)

Output: Adjustable, 0 to full rating. Rated current may be drawn at any voltage setting

Voltage Regulation: ±0.01% for line voltage of 105–125 volts. ±0.01% no load to full load

Current Regulation: Line, ±0.01% for line voltage between 100–125 volts Load, less than 100 µa over compliance range of 10% to 100%

Ripple: 0.01% of rated V at full load

Stability: .02%/hour, 0.05%/8 hours TYP after warm up

Polarity: Fixed, positive or negative Specify at time of order

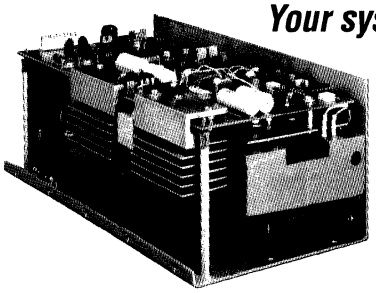
High Voltage Power Supplies Optimized for OEM Applications from Universal Voltronics Corporation

Your system is only as good as your power supply.



Ensure the highest level of reliability and quality in your system with high voltage power supplies from Universal Voltronics Corporation. UVC has delivered thousands of high voltage power supplies for laser and other applications which require precision regulation. Our high frequency systems are compact, easy to use, designed to operate without ballast resistors in either the CW or pulse modes in gas discharge applications and provide full power at 3/4 Voltages.

100 WATT

DC-DC CONVERTERS

SINGLE, DUAL, TRIPLE, AND QUAD OUTPUT FOR TELECOMMUNICATIONS, INSTRUMENTATION AND INDUSTRIAL APPLICATIONS.

Reliability

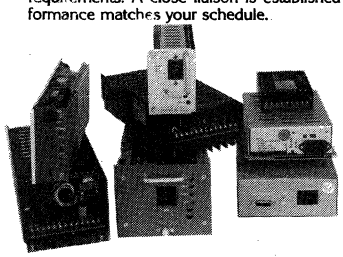
Reliability is designed into any power supply delivered by Voltex. Long, trouble free operation is assured by paying attention to all details.

Dependability

From prototype through production we endeavor to meet your requirements. A close liaison is established to make sure that our performance matches your schedule.

Capability

The entire power system is designed by Voltex. Magnetics, sheet metal, etc. are designed and fabricated in our plant. This assures you of consistent, high quality power systems. Instrumentation, such as power failed detect systems, sequencing systems, in fact all systems associated with power systems can be designed. Power related control systems, such as motor speed controls, have also been designed.



Custom Designed Power Supplies for OEM applications

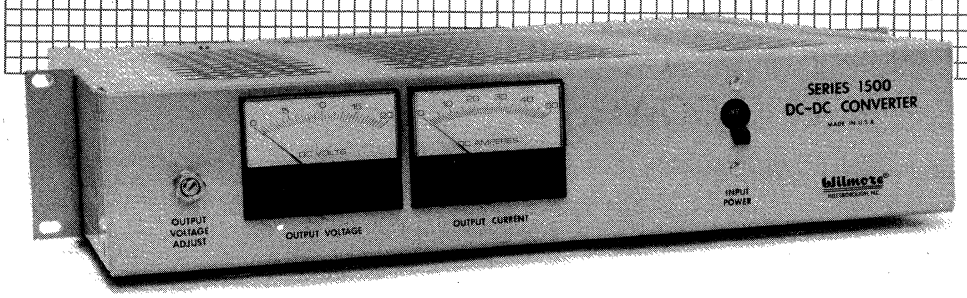
Wilmore DC-To-DC Power Converters



- **80% To 90% Efficient**
- **200, 400 Or 800 Watts**
- **Height 3.45″ (2 Rack Spaces)**
- **Input/Output Isolation**

The Series 1500 converters provide an isolated, regulated, adjustable dc output from station batteries or other widely fluctuating dc sources to reliably power telecommunications equipment, supervisory control systems, and other sensitive electronic equipment. Conservatively rated and very efficient, these converters will operate at any load within their rating over a wide ambient temperature range with simple convection cooling. Their minimal no-load input power (about 5 watts) and correspondingly high light-load efficiencies make them uniquely suited for applications in which extended periods of "standby" service are encountered.

Front-Panel Controls And Indicators

A combination circuit breaker and ON/OFF switch is provided for the input power. A voltmeter and ammeter display the dc output. A screwdriver-slotted potentiometer shaft with locking nut is provided to adjust the output voltage level.

Size And Weight

All converters measure 3.45″ high by 17.0″ wide. The 200-watt and 400-watt units are 13.2″ deep, and the 800-watt units measure 13.4″ deep. All units weigh less than 18 pounds.

Optional Features

Standard options for Series 1500 converters include paralleling diodes for multiple-unit redundancy applications and auxiliary Form C contacts for remote indication of improper converter output. In addition, many other input/output voltage combinations not listed in the adjacent table are available. Contact our sales department for details.

Other Rack Mounted DC-To-DC Converters

In addition to the Series 1500, Wilmore manufactures many other standard and custom, single and multiple-output rack-mounted DC-to-DC converters. Each series is isolated, regulated and highly efficient. Each is designed and manufactured in accordance with Wilmore's emphasis on conservative electrical ratings and long product life. Contact our sales department for more information.

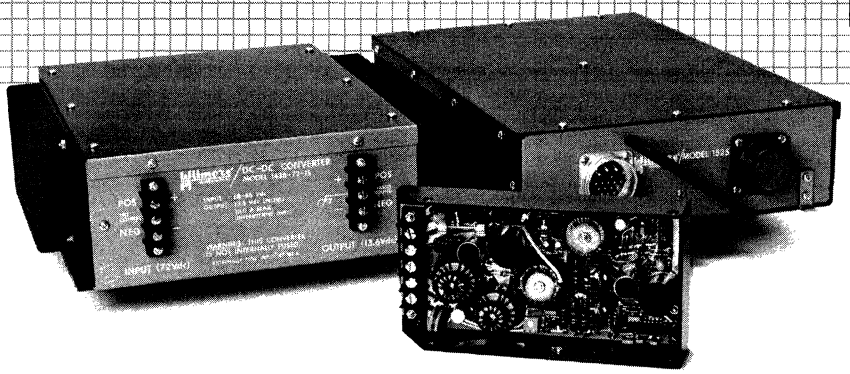
Wilmore

Railroad/Transit DC-To-DC Converters



- **24, 36, 72 And 110-VDC Inputs**
- **Input Transient Protection**
- **-30°C To 60°C Temperature Range**
- **Electrically And Mechanically Rugged**

Wilmore's RT (Railroad/Transit) Series dc-to-dc converters are especially designed to power radio transceivers, fuel management systems, ATCS equipment, and other sensitive electronic loads aboard locomotives and electric rail vehicles. Model 1525 converters can be mounted on AAR-type communications equipment racks for standard locomotive radio/converter installations. Model 1438 and Model 1554 converters have baseplate flanges for convenient mounting. Conservative electrical, mechanical, and thermal design and special construction techniques provide install-and-forget reliability in the harsh environment found on rail vehicles.

Transient Withstand Capability

High-voltage, high-energy transients on locomotive power busses will damage inadequately-protected electronic equipment. RT Series converters protect sensitive loads while operating through input transients up to 3000 volts in amplitude and 90 watt-seconds in energy content. Each converter is individually tested to meet this withstand capability. A 20-mfd capacitor is charged to 3000 Vdc (90 watt-seconds of stored energy) then abruptly connected across the input terminals. This test is repeated between the input terminals and chassis ground. RT Series converters do not rely on gas discharge tubes, varistors, power zeners, or other limited-life transient suppression devices to achieve this capability.

Mechanical Considerations

Equipment installed on locomotives and other rail vehicles is subject to potentially-destructive mechanical shock and vibration levels. RT Series converters are designed and manufactured for continuous use in railroad environments. Printed circuit boards are glass-epoxy with double-sided solder pads and plated-through holes to promote solder joint integrity. Larger electronic components are selected on the basis of mechanical ruggedness as well as circuit function. Special attention is given to internal weight distribution, avoidance of large masses on printed circuit boards, and appropriate use of locking fasteners and component-staking compounds.

Custom-Designed RT Series Converters

As the use of sensitive electronic equipment on rail vehicles continues to grow and diversify, user's needs for reliable power conversion are becoming highly individualized. The majority of Wilmore's work for the rail transportation industry is the design and manufacture of custom power products. Our field-proven circuitry can be readily scaled to provide different input/output voltage combinations, output power levels, and package sizes for use on diesel-electric locomotives and electrically-powered rail transit vehicles. Our engineering charges for custom units are modest, and our turnaround times are short. If you have some special requirements regarding any performance criteria, our New Products Group would like to hear from you. When the program gets to the production phase, Wilmore's two production facilities in North Carolina will deliver to meet your program goals. We are a competitive, quality-oriented, domestic manufacturer with the ability and experience to meet difficult design criteria and demanding production schedules.

NEW

The first products in our new *miniaturized* Series 1620 RT converters are being introduced in 1991:

- **50%-75% Smaller**
- **Full Transient Protection**
- **Lightweight and Rugged**

Mobile Communications DC-To-DC Converters

- **Reliable 12-Volt Power From Any Vehicle**
- **High Efficiency**
- **-30°C To 60°C Operating Range**
- **Ruggedized For Mobile Applications**

These dc-to-dc converters are designed to power standard mobile communications equipment from vehicular electrical systems with output voltages other than 12-Vdc negative ground. Typical applications include powering equipment on 24-V, 36-V and 48-V lift trucks, positive ground trucks, and 24-V heavy duty construction vehicles.

Heavy Duty 24-V To 12-V Converters - Series 1416

With output current ratings of 15, 25 and 35 amperes, the three models of this series provide a regulated 13.5 Vdc from 24-volt, negative ground vehicular battery systems. Designed to meet military shock and vibration specifications, the Series 1416 converters are lightweight, highly efficient, and extremely rugged.

Unregulated, Economy Converters - Series 1360

These rugged unregulated converters include 12-Vdc, polarity-reversing converters (Models 1360 and 1380), 24-volt to 12-volt converters (Models 1365 and 1395), and 12-volt to 24-volt converters (Models 1424 and 1442). All are light weight and quiet with conversion efficiencies exceeding 85%.

Converters - Series 1340 Regulated/Isolated

The Series 1340 can be used with 12-V, 24-V, 36-V and 48-V vehicular battery systems to provide voltage regulation, electrical isolation, and voltage conversion for 12-V and 24-V mobile communications equipment.

Wide Input Converter - Model 1475

The Model 1475 is designed to power mobile communications equipment in lift trucks. This converter features an extremely wide voltage range of 20 to 56 volts, electrical isolation and output voltage regulation. These features allow the user to specify one model for an entire fleet of lift trucks despite the presence of more than one battery voltage.

[1] Models 1380, 1360, 1395, 1365, 1442, and 1424 provide voltages directly proportional to input voltage. All other models provide regulated output voltages.

[2] Maximum current ratings assume an intermittent demand on a 20% duty cycle except for the Series 1340 converters. The rating given for the Series 1340 is a continuous duty rating.

[3] These are typical minimum efficiencies for one-half to full load.

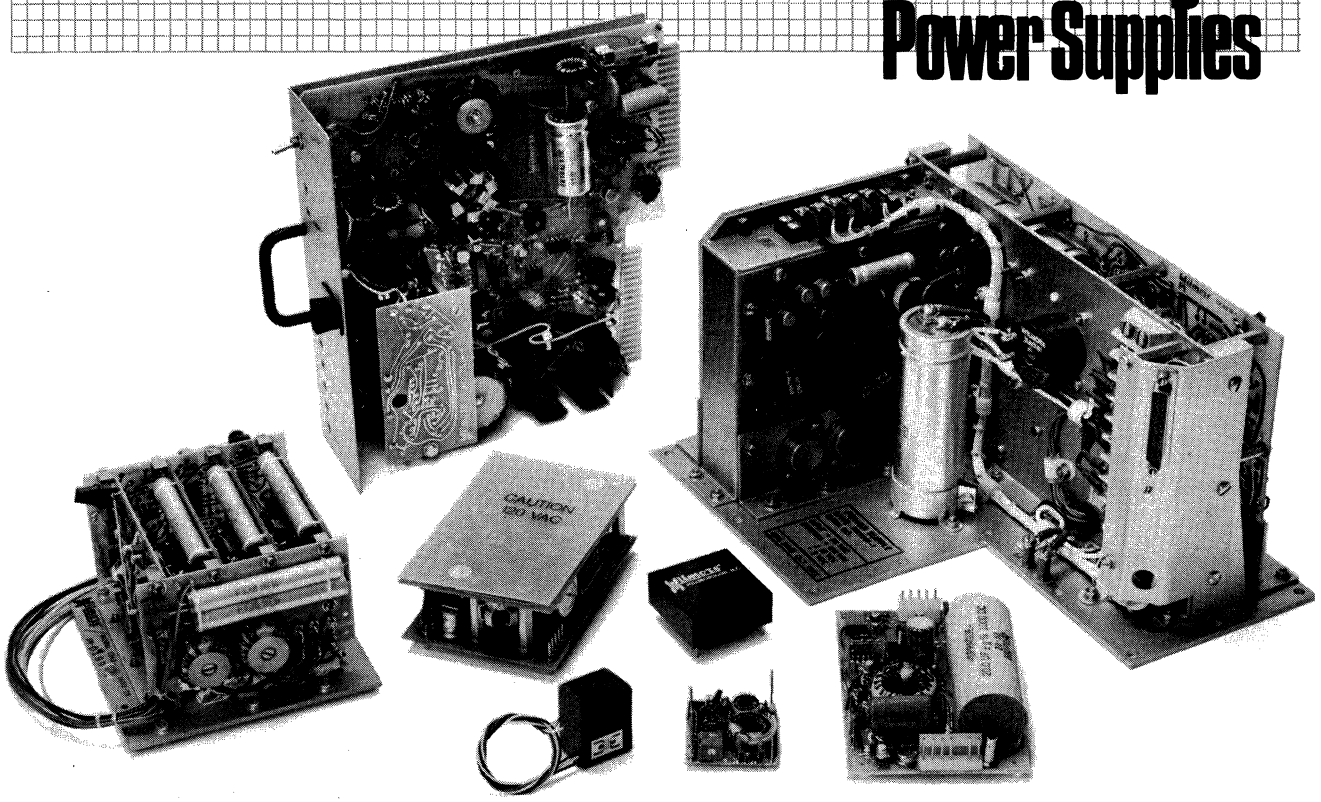
Wilmore

Custom-Designed Power Supplies



The majority of our work is the design and manufacture of custom switching power supplies and dc-to-dc converters.

More than twenty years ago our transistor-switching power supplies began flying on spacecraft. Today we ship thousands of custom-designed industrial power supplies each month to a wide base of original equipment manufacturers. We are familiar with environments as demanding as diesel locomotives and as favorable as air-conditioned equipment bays. Our products operate daily from telecom and utility station batteries, vehicular electrical systems, low-voltage industrial ac circuits, and commercial ac power. We probably have had experience with applications similar to yours.

We combine the ability to deliver prototypes quickly and the production resources to manufacture competitively.

Systems engineers and power supply designers face the difficult task of electrically, mechanically, and thermally integrating a power supply into the system. The task can be further complicated by time constraints. Wilmore excels at this phase of program support, delivering carefully-conceived prototypes often in just a few weeks. Our responsiveness continues through to the production phase. Wilmore's two assembly plants in North Carolina were built from the ground up to produce power supplies in volume. We are a competitive domestic manufacturer with the flexibility to meet difficult production schedules.

Our New Products Group would like to hear from you.

Your inquiry will be answered promptly by the people who will be responsible for the design and prototyping of your power supply. If you need a quotation on your completed specification, or if you just want to discuss your application please give our New Products Group a call. We would appreciate the opportunity to help solve your power conversion problems.

DC-DC CONVERTERS

FEATURES

- Surface-Mount (SMT) and SIP Configurations
- Largest Selection in 2 to 5Vdc Input Range
- 1,000,000 Hr MTBF
- Industry's Smallest
- Isolated and Non-Isolated Models
- 9 Standard SMT Models
- 37 Standard SIP Models

APPLICATIONS

- Laptop Displays
- LAN Cards
- Automotive
- Cellular Phones
- Security/Alarms
- Pagers
- RS232C Ports
- Modems
- Medical Instruments
- Portable Phones
- Hand-held Instruments
- Multimeters

FEATURES

Extended Performance Series (XE)

- 20W to 240W (at 5Vdc)
- Adjustable output voltage ranges from 5Vdc to 25Vdc
- 0 to 55°C without derating
- Electrostatically Shielded Xfmr
- Foldback Current Limiting
- Short Circuit and Reverse Voltage Protection
- 115/230VAC input

OEM Series (XP)

- 20W to 90W (at 5Vdc)
- Adjustable output voltage ranges from 5Vdc to 24Vdc (up to 250Vdc on XP30)
- 0 to 40°C without derating
- Foldback Current Limiting
- Short Circuit and Reverse Voltage Protection

Unregulated Series (XU)

- 15W to 1000W
- Excellent Source of Bulk dc Power for Distributed Power Systems
- Best Cost-per Watt Value

SPECIFICATIONS

XE & XP Series

Input: 115/230 (XE), 115 (XP) VAC±10%, 47-440Hz. (Derate output current 15% at 400Hz.)

Output: Floating, adjustable with multi-turn cermet pots over range per table.

Line Regulation: ±0.05% for 10% line change. (0.2% for 20% change.)

Load Regulation: ±0.05% for 50% load change. (0.2% for 100%.)

Transient Response: <50µs for 50% load change.

Noise and Ripple: 0.1% peak-to-peak.

Operating Temperature: 0-55°C (XE), 0-40°C (XP, XE20). Derate 2%/°C to 71°C.

Temperature Coefficient: ±0.01%/°C, max.

Stability: ±0.1% max for 24 hrs, after warmup.

XU Series

Input: 115/230VAC,50/60Hz.

Output: Floating fixed output at full load rating per model selection chart.

Load Regulation: 15%, 0-50% of rating, typical. 9%, 50-100% rating , typical.

Ripple: 3% rms, max at full load.

Operating Temperature: 0-50°C. (Derate 2%/°C to 71°C.)

Overcurrent Protection: Fuse.

SWITCHMODE POWER SUPPLIES

FEATURES

- NEW Auto-Ranging Models
- Up to 3.0 Watts/in³
- Four Regulated, Adjustable Outputs
- On-board EMI Filtering
- Low PARD (1% max)
- Overload, Overvoltage, Reverse Voltage & Thermal Protection
- Two-year Warranty

SPECIFICATIONS

AC Input: 90-132/180-264VAC, 47-63Hz, Auto-ranging (AR Models); Jumper selected (SX Models).
Input Protection: Fuse.
Inrush Current: 32A, max.
Input Transient Protection: Meets IEEE 587, Category A.
Efficiency: 75% typical.
Hold-up Time: 20ms.
AC Power Fail Signal: TTL low 5ms before loss of regulation.
MTBF: 100,000 Hrs, minimum.
EMI Filtering: VDE 0871/6.78 and FCC Level A (SX Models), FCC Level B (AR Models).
Adjustability: ±5%, all outputs.
Line & Load Regulation: 1%, max on all outputs.
Cross Regulation: Negligible.
Remote Sense: Compensates for 0.5 volt cable drop on main output.
Remote ON/OFF: TTL low signal, standard on all models rated >300W.
PARD: 1%, max, all outputs.
Output Overshoot: None on turn-on or turn-off.
Overload Protection: Input and output protection, standard.
Reverse Voltage Protection: Full current rating, all outputs.
Transient Response: 2% max for 25% load change; recovery to within 1% in <500µs.
Stability: ±0.1% for 24 Hrs.
Temperature Coefficient: 0.02%/°C.
Operating Temperature: 0-50°C, full rating. Derate to 50% at 70°C.
Storage Temperature: -55°C to +85°C.
Safety: Meets UL 478; UL 1012; CSA 22.2 No. 220, Electrical Bulletin 1402C; VDE 0804; VDE 0806; IEC380; IEC435.

Note: Current shown in parentheses is peak rating.

Dimensions:
SX Models: 11.50" x 5.00" x 3.50"
AR Models: 13.50" x 5.00" x 3.50"

Notes

[1] Higher rating achieved when fan cooling (30 CFM airflow) is employed; the lower rating is with convection cooling.

[2] Auto-Ranging models are shown in table; for jumper-selected input, replace "AR" in the model number with "SX". For example:

Model AR300-82000 is auto-ranging version; Model SX300-82000 has jumper-selected input.

[3] Unit equipped with built-in fan.

[4] Fan cooling (30 CFM airflow) required.

Other voltage/current combinations are available in OEM quantities.

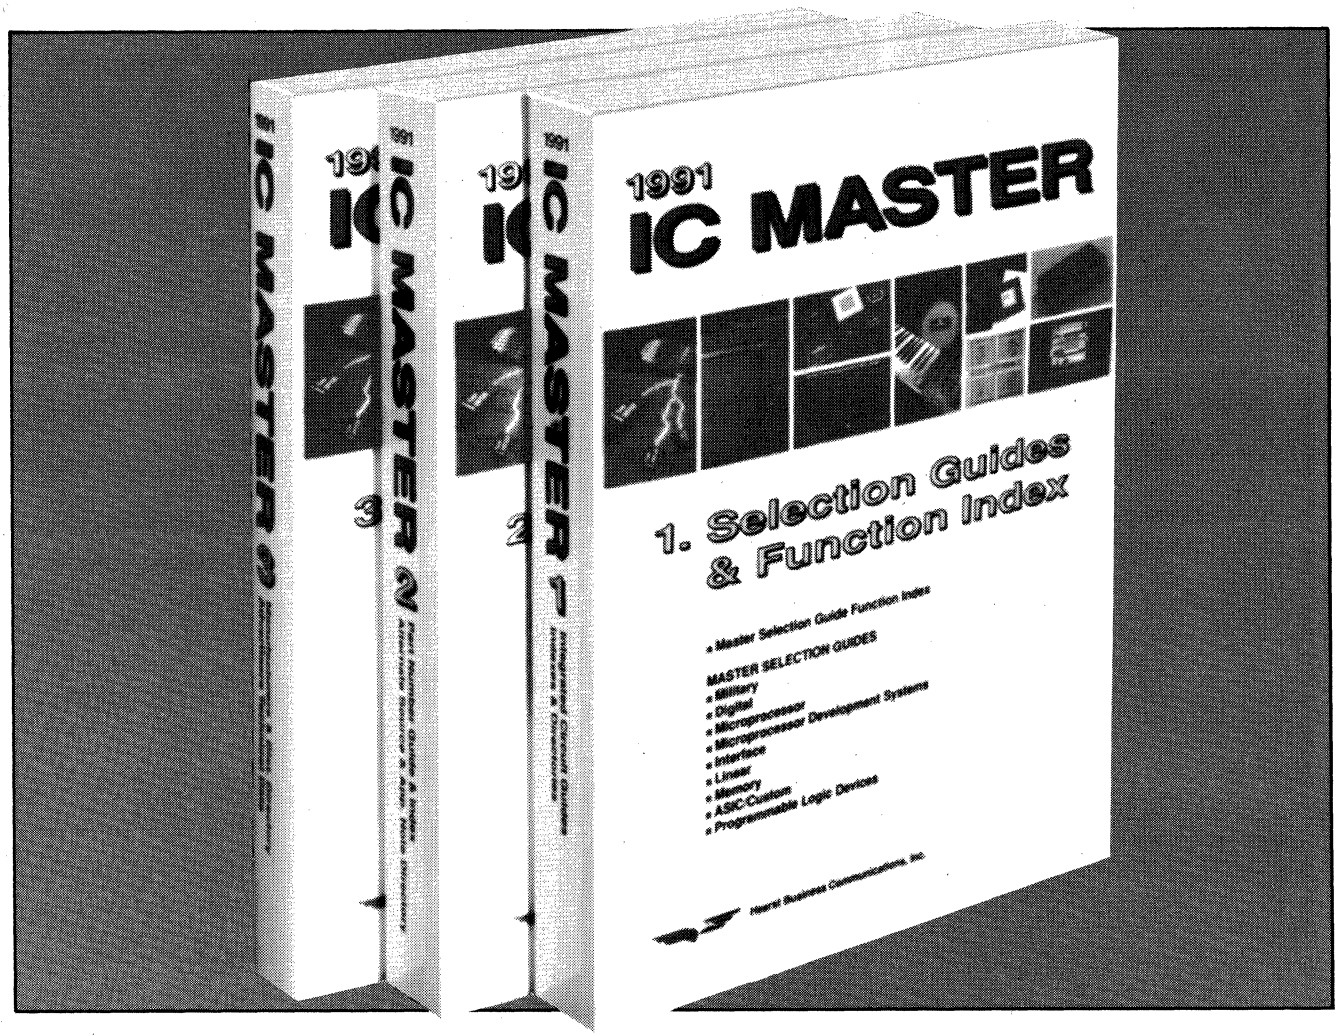
SUPER TIME SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

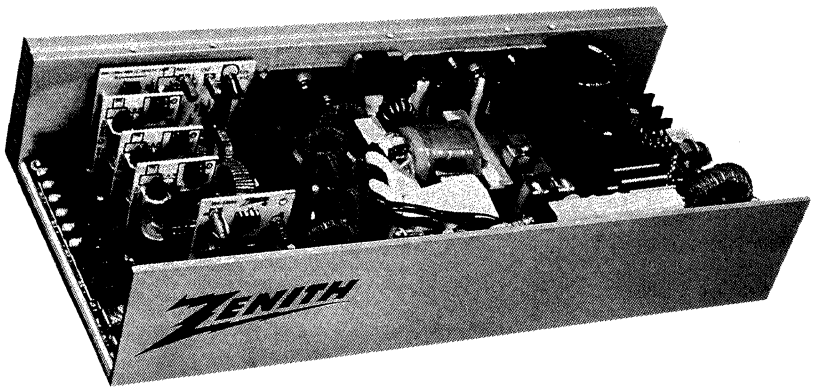
If your question has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516) 227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Communications, 645 Stewart Ave., Garden City, NY 11530. She'll mail you the IC Master subscription form right away.

And, if you tell her you saw it in the 1991/92 EEM, she'll take $10 off the subscription price!

IC MASTER

1 Zenith Switch Mode Power Supply.



Over 1,000,000 User-Adjustable Voltage Settings!*

Zenith presents its line of fully-featured switch mode power supplies with user-adjustable voltage settings ... allowing one standard power supply to be used in a variety of applications.

Just Released.
ZPS-45
– our 45 Watt Power Supply!

- Quad outputs are fully regulated and isolated.
- UL/CSA/IEC/VDE approved for safety and EMI.
- 2 Year Warranty.
- 100,000 - 150,000 MTBF.

UNINTERRUPTIBLE POWER SUPPLIES SINGLE PHASE 50Hz/60Hz 330VA-10KVA RACKMOUNT AND FREE STANDING SYSTEMS

NEW

- **Innovative Bi-Mode UPS**
- **Eliminates Half of Power Parts**
- **High MTBF**
- **Cost Effective Power Protection**
- **Free Standing & Rack Style**
- **Available on GSA Contract**

The Bi Mode family of UPS products introduced by Abacus Controls offers the reliability and simplicity of a standby UPS while fully protecting the critical load against all forms of power problems.

The Bi Mode UPS uses the same isolation transformer and power components for inverting when the utility is not present and for rectifier-battery charging when the utility is present.

Unlike other on-line products there is no switch, either electromechanical or static device between the dual mode bridge circuit and the load. This permits synchronized transfers from the utility to the bridge instantaneously in either direction.

The advantages of this technology include cost, reliability, size, weight & audible noise.

FREQUENCY CONVERTERS 50-60-400 Hz

Input Voltage: 115V AC, ±10%, single-phase for units 2000VA and below. 208V AC, ±10%, three-phase for units above 2000VA. 220V AC, ±10%, 50Hz is a no charge option. Other inputs available on a custom basis.

Input Frequency: 47 to 65Hz. 380 to 420Hz input is a no charge option.

Output Voltage: Adjustable 100 to 130 volts. Voltage adjust is internal for fixed frequency models, on the front panel for adjustable frequency models. (Other ranges available, consult factory.)

Voltage Regulation: Less than ±2% for combined no load to full load change and rated input voltage change.

Load Power Factor: 0.7 lead to 0.7 lag. Continuous zero lead to zero lag at full rated output without damage.

Output Waveshape: Sinewave less than 4% THD, 3% max any single frequency.

Protective Circuits: All models are equipped with automatic overload protection, including short circuit. Automatic reset upon overload removal. Circuit breaker on the input and fuse on the output. Automatic shutdown for input overvoltage, undervoltage.

Meters: Output voltmeter ammeter, and frequency meter offered as options.

Output Frequency: Rated output frequency for each model is shown on chart. For adjustable frequency models, adjustment is on the front panel. Internal frequency adjust is a no charge option.

Frequency Stability: Oscillator included in the unit base price. Fixed frequency oscillators are crystal controlled with a stability of ±0.05%. Adjustable oscillators are RC controlled and have a stability of ±0.25%.

Efficiency: Between 70 to 80 percent (typical 75%). At least 70% from 40% of full load to full load.

Peak Output Current: 150% of full rated current is available for three-cycles. Unit is set to current limit at 120% after three cycles.

STATIC INVERTERS
DC TO 50-60-400 Hz

- **85% Efficiency**
- **Low Cost**
- **Light Weight**
- **Proven Reliability**

Input Voltage: 100 to 140V DC. Other input voltage ranges, 28V DC, 48V DC, 60V DC and 200V DC Sunverter.

Output Voltage: Set for 117V. Internal adjustment from 110V to 120V. 220V AC for 50Hz models.

Voltage Regulation: Less than 2% for single phase units, less than 5% for three phase units, for combined load and input voltage changes.

Output Waveshape: Sinewave less than 4% THD, 3% max any single frequency. (Less than 1% on custom basis.)

Protective Circuits: All models are equipped with automatic overload protection, including short circuit. Automatic reset upon overload removal. Circuit breaker on the input and fuse on the output. Automatic shutdown for input overvoltage, undervoltage.

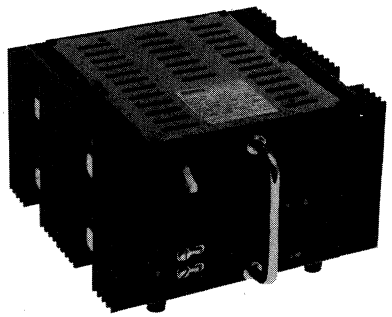
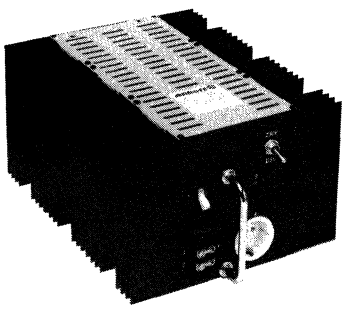
Sine Wave Inverters

MODELS KN-PN LN-TN



Standard Models: KN, PN, LN, TN Cases K2, F2, J2



11 to 54 VDC Input 30 to 320 VA Output

- A wide range of standard models.
- 50 Hz or 60 Hz output.
- Surge current capabilities up to 3 times rated output power.
- Exceptional reliability. Typical MTBF: 90,586 hours for model LN8.
- High efficiency provided by sine wave. Conserves power.
- Saves motors by reducing overheating.
- Low distortion. 2% typical.
- Salt spray package.
- Compact. Lightweight.
- Switchable 115 VAC 60 Hz/230 VAC 50 Hz.
- Wide temperature range: −20°C to +55°C ambient operation.
- Special models available.
- 2-year warranty.

Abbott's sine wave inverters convert dc battery power to regulated clean ac. They are used to provide uninterrupted power to operate computers, motors, lamps, digital processors, TV broadcast equipment and telecommunication electronics.

Our inverters have become the industry standard by providing dependable performance in such rugged applications as marine radar, railway signal and communications, security electronics, and mobile test equipment.

Sine Wave Inverters

MODELS KN-PN LN-TN

SPECIFICATIONS

INPUT VOLTAGE RANGE:
KN, KS: 11 to 15 VDC
PN, PS: 22 to 30 VDC
LN, LS: 29 to 38 VDC
TN. TS: 42 to 54 VDC

OUTPUT VOLTAGE: 115 or 220 VAC ±2% at full load and nominal input voltage.

OUTPUT FREQUENCY: 50 Hz or 60 Hz.

LINE REGULATION: 3% for specified input voltage range with load constant.

LOAD REGULATION: 3% for load change of half load to full load with line constant; 6% for change of no load to full load.

WAVE FORM: Sine wave with 2% typical, 5% maximum distortion.

POWER FACTOR: Fully rated output VA, from unity to 0.7 power factor lagging or leading.

EFFICIENCY: At full load with nominal input voltage
40% minimum on KN, KS
50% minimum on PN, PS
58% minimum on LN, LS
60% minimum on TN, TS

OPERATING TEMPERATURE RANGE: (KN, PN, LN and TN): −4°F to +131°F (−20°C to +55°C) ambient air temperature. Humidity 0 to 90% (non condensing) at 25°C.

OPERATING TEMPERATURE RANGE: (KS, PS, LS and TS): −4°F to +131°F (−20°C to +55°C) ambient air temperature. G2 case is submersible (10 feet, 2 minutes).

INPUT TRANSIENT PROTECTION: 45 VDC for 0.1 second transient deviation and recovery (for change of 50%) of rated (load).

ALTITUDE: 10,000 feet above sea level (KN, PN, LN, TN) 50,000 feet above sea level (KS, PS, LS, TS).

PROTECTIVE FEATURES

OVERLOAD PROTECTION: Magnetic type circuit breaker. Reverse polarity protection.

HIGH RELIABILITY

Model LN8T-115-60: MTBF 90,586 hours at 25°C ambient, ground benign environment per MIL-HDBK-217. Model TN8T-115-60: MTBF 74,733 hours at 50° ambient.

2-YEAR WARRANTY/ALL MODELS.

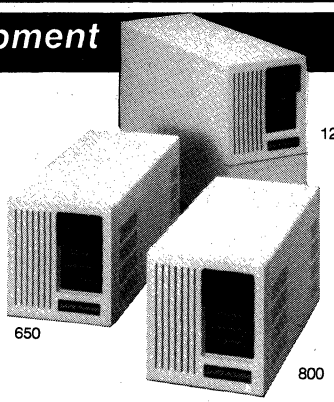
SAFE POWER™ Protection Equipment

SAFE POWER™ Off-Line UPSs



- *Supports IBM, XT, AT, PS/2, Compaq and all compatibles*
- *Network compatible, LANS, WANS, file servers*
- *Fast transfer time*
- *Simple on/off switch operation*
- *Surge/spike protection and EMI/RFI noise protection*
- *Pulsing signal alerts user of power failure on the 650, 800, 1200; burst tone sounds within 1 minute of depletion*
- *Multiple output receptacles to protect more than one piece of equipment*

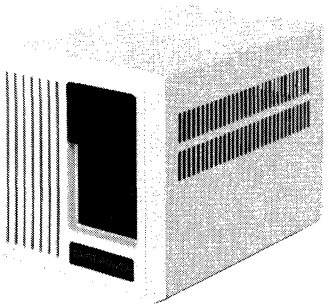
True-Power® Powerline Conditioner

For Precise Voltage Regulation with Excellent Transient Suppression



Standard Features

- *Reliable, regulated output voltage when input voltage varies, even to brownout levels*
- *Noise rejection effectively suppresses transients, spikes and surges*
- *Sinusoidal output features less than 3% total harmonic distortion*
- *Rapid response to line and load change*

Save with Modular, Custom Power Protection from SAFE POWER™

Why pay for more protection than you need?

Design your own custom protection system by combining the PLC-1400 with a SAFE POWER Off-Line UPS of your choice.

Cost Saving Solution:

1. **Apply utility power to the PLC**
2. **Use the PLC output to drive the UPS**
3. **Power your computer/file server and monitor from the UPS output**
4. **Power peripheral equipment (laser printers, modems etc.) directly from the PLC**

SAFE WATCH UPS Monitoring and Data Protection Software

SAFE WATCH saves your files, exits your programs, shuts down the UPS to save battery power, and once power is restored, can even re-start your programs automatically.

SAFE WATCH is the only software that truly monitors the UPS battery and will interface with and serial or parallel port on your computer. SAFE WATCH is network and stand-alone compatible.

See how simply it can be installed, and how it remains "invisible" until you really need it. Contact Acme Electric Corporation, 5416 Amelia Earhart Drive, Salt Lake City, Utah 84116 or call 801-539-0227 or 800-325-5848; Fax 801-539-0237.

SAFE POWER™ Uninterruptible Switch-mode Power Supplies (USPSs)

- *Fits inside XT, AT and tower designs*
- *3 to 10 minutes of on-line DC power backup*
- *Built in EMI filter*
- *Includes 100 watts of AC backup for AT and tower design (80 watts XTs).*

ACDCo Power WHERE you need it!

Inverters - Uninterruptible Power Systems - Battery Chargers - Frequency Changers - Power Supplies

ACDCo Power Equipment is designed to meet high reliability and performance standards providing maximum life with minimum maintenance to protect all system circuits that require dependable, high quality power.

PRODUCT

Inverters, Power — DC to AC Output: Fixed-base, portable, mobile and marine.

Uninterruptible AC Power Systems: 36 VA to 5 KVA.

Frequency Converters — AC to AC: 50/60 Hz, 60/50 Hz, 50/400 Hz and 60/400 Hz.

TYPICAL SPECIFICATIONS

Input: ±15% from nominal.

Output: Sine wave, 120 Volts RMS, 60 Hz.

Voltage Regulation: 2% over full input and load range.

Frequency Regulation: 1% over full input and load range.

Power Factor: .9 Lead to .8 Lag.

Efficiency: Over 80% at nominal input.

Distortion: Less than 5%.

Overload: Within specifications for ONE MINUTE at 140% load.

Overload Protection: No damage from short to open circuit, reversal of input, or input voltage to 140% nominal.

DESIGN FEATURES

Ruggedized construction, no moving parts, completely solid state, easy servicing — sides fold down, plug-in transistors and I/C's on Printed Circuit Boards, all P/C boards plug-in removable.

Three Phase Models Available up to 15KVA

ACDCo. inverters are used in one of the roughest of Marine Environments on the U.S. Coast Guard's Rescue Life Boats to power their Navigation and Communication equipment.

ACDCo. has versions of power equipment available to meet military specifications.

ACDCo. static inverters are used by major Public Utility companies throughout the United States.

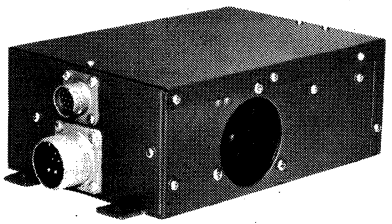
Avionic Instruments, Inc.



Lightweight 50, 60, 400 Hz Static Inverters/Frequency Converters for Aerospace, Military, Commercial

- *50 VA–12 KVA*
- *Less than 10 lbs/KVA*
- *Parallelable*
- *Single phase or three phase*
- *50-60-400 Hz configurations*
- *Custom design capability*
- *High efficiency 80% typical*
- *300 microsecond dynamic load response*
- *No spikes—no surges*
- *Sinewave distortion 0.75% typical*
- *Meets military standards for severe hostile environments*

AVIONIC INSTRUMENTS INC. (AI²) Power Conversion products features an advanced power processing technique that virtually eliminates the limitations inherent in traditional power conversion designs.

These advanced designs include a 40KHz DC to DC converter/regulator and a two-state (bridge) inverter regulator. The sinusoidal output voltage is achieved from the bridge section through use of a spectrum controlled modulation system utilizing advanced field effect transistor switching circuitry. Heavy baseband magnetic components are eliminated resulting in an extremely lightweight, efficient, and highly reliable inverter design.

Each section of these advanced designs utilizes a patented, current controlled, closed loop system which is inherently stable, providing excellent steady state and dynamic response characteristics evidenced by no output voltage excursions outside the regulation band—under any conditions of load application and removal—including non-linear loads such as half wave rectifiers. Protection circuitry includes overtemperature protection, built-in overvoltage and out of frequency shutdown features, as well as 200 percent of rated current under short circuit conditions.

Avionic's modular design allows interconnection of units for increased power output and for multi-phase systems. Reliable custom designed units for non standard frequencies and voltages are made easy by the basic Avionic's two-stage conversion design.

General Performance Specifications

(Consult factory for exact data on specific models)

Input Voltage
Static Inverters:
28VDC ± 10V.
Frequency Converters:
115/200 VAC ± 10%, 400 Hz.

Output Power
50VA to 12kVA.

Output Voltage
115VAC RMS ± 1%, single phase units.
26VAC nominal
115/200VAC wye RMS ± 1%, three phase units.
200 microsecond response time.

Output Frequency
50/60/400Hz ± 1.0% for all conditions of line, load, and temperature.

Waveshape
Sinewave 0.75% THD, typical.
Less than 0.1VDC component per MIL STD 704C.

Efficiency
80% typical at full rated output.

Overload
110% rated output for 2 hours.
150% load current for 5 minutes, nominal conditions per TSO-C73.

Short Circuit Current
200% for five minutes.

Power Factor
0.7 lead to 0.7 lag.
Not damaged by any power factor.

Environmental
RTCA DO-160A for severe, hostile environments.

Altitude
55,000 feet, operating.

Qualifications
FAA TSO-C73.
RTCA DO-160A
Cat.F2B/RTY/EXXXFXXZAZZ.

EMI
MIL STD-461A(4). Some relaxation required.
RTCA DO-160A Cat. Z for conducted, radiated and susceptibility.

Temperature Range
−55°C to +71°C, operating.
−65°C to +85°C, storage and shipment.

Vibration
10g's; 5Hz–2000Hz.

Shock
15g's; each axis.

Humidity
95%, 10 days; 71°C.

Explosion
DO-160A Cat. E.

Salt Spray
DO-160A Cat. S.

Sand and Dust
DO-160A Cat. D.

Fungus
DO-160A Cat. F.

Quality Assurance
MIL-I-45208A
MILQ-9858A upgrade in process
FAA TSO-C73

Protection
Cannot be damaged by any short circuit.
Input under/over voltage.
Output overvoltage.
Output under/over frequency.
Thermal overheat.
Reverse polarity.
Fault light indicator.

APPLICATIONS

Radio/Communications
RPVs and Drones

Avionic Instruments, Inc.

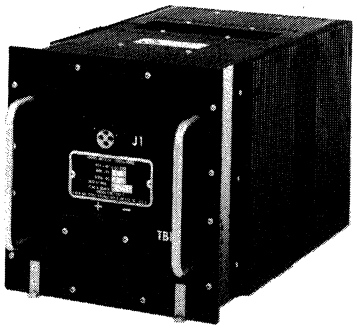
Static Inverter
1C 1000-( )
21 lbs.
12.60" L x 7.52" W x 7.65" H



Specifications

Input Voltage
28VDC ± 10VDC.

Output Voltage
115VAC ± 5VAC.

Output Frequency
400Hz ± 5Hz.
50,60 Hz available.

Output Power
1000VA.

Overload
1500VA linear load, 5 minutes.

Distortion
5% THD maximum.

Efficiency
82% minimum at full load.

Power Factor
0.8 lag to 0.9 lead.
Not damaged by any power factor.

Temperature Range
−55° C to +71° C.

Short Circuit Current
25 Amps minimum.

Qualified for use on the following Boeing Aircraft:

737	757
747-400	767

Consult AI2 for details on retrofit program

Qualification

Shock
Vibration

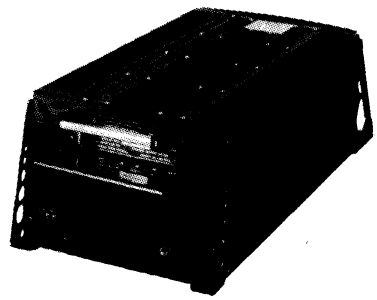
Static Inverter
1C 2400-( )
32 lbs.
22.6″ L × 9.0″ W × 6.0″ H



Qualified for use on Douglas MD-11

Consult AI2 for details on DC-10 retrofit program.

Features

- Military Components
- Overvoltage Protection
- Fault Bit
- 25ms Turn On
- Lightning Protection

Specifications

Input Voltage
28VDC ± 10VDC.

Output Voltage
115VAC ± 2.3VAC.
Single phase.

Output Power
2400VA continuous.

Overload
3000VA for 5 Minutes.

Output Frequency
400Hz ± 4Hz.
50,60 Hz available.

Distortion
3% THD. maximum at full load.

Efficiency
75% minimum at full load
and input voltage > 21VDC.

Power Factor
0.8 lag to 0.9 lead.
Not damaged by any power factor.

Temperature Range
– 55° C to + 71° C.

Short Circuit Current
44 Amps minimum.

Hearst Engineering Software

ICMASD...IC Alternate Source Directory

The all new 1991 version of the world famous Alternate Source Directory is now available in floppy disk form for your IBM XT & AT and 100% compatible personal computer with hard drive.

The **1991 ICMASD** contains the more than 180,000 listings that appear in the Alternate Source Directory Section contained in Volume Two of the printed version of the 1991 IC Master ...plus additional discontinued parts. The database includes complete vendor addresses and phone numbers.

You can personalize the **ICMASD** for your application. The program allows you to add comments, up to 20 digits long, to each listing. These comments can be part numbers, prices, or any information specific to your needs. You may also add, delete and/or discontinue devices!

For greater flexibility the base number search feature enables you to access parts by base number, i.e., the device number stripped of prefixes and suffixes. You don't need to know the manufactures codes to call up any of the alternates to these devices.

The **1991 ICMASD** is fast, convenient and very user friendly!

Complete program documentation is included. When ordering, be sure to specify if you want the **1991 ICMASD** on three, double-sided, double-density disks OR on one high-density disk.

For immediate delivery you can order the **1991 ICMASD** at $179.50* simply by charging your Visa or MasterCard credit card. To place your order or for more information, call or write:

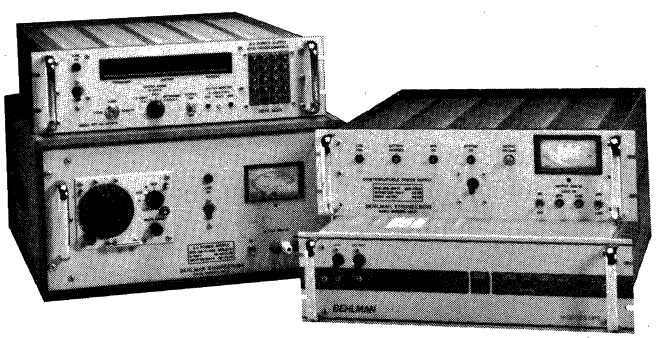
AC POWER

...For Every Application and More

From computer-controlled AC power sources for test labs through back-up power at remote sites, to efficient frequency converters, Behlman covers the entire spectrum of AC power requirements. For nearly four decades the Behlman name and AC power were inseparable. And today that tradition continues. Behlman solves the most exacting AC power applications with quality products and personal service.

INSTRUMENT-QUALITY AC POWER SOURCES

Behlman Instrument-Quality AC Power Sources greatly enhance your testing capabilities and effectiveness for complex computer-controlled or simple manual tests. These efficient linear sources are widely used in ATE systems, laboratories, production lines, test facilities, quality control and many other applications. For computer controlled applications the ACP Series reports actual measurements over the IEEE-488 interface. And the ACM Series offers precision, manually controlled power.



SOURCES FOR DC POWER SUPPLY TESTING

The DCT-Series AC Power Source provides the specific technical features required for the testing of DC power supplies at a lower cost than conventional AC power sources.

The DCT-Series is an enhanced programmable AC source which speeds up the testing of DC power supplies for manufacturers, OEMs and quality control departments. All output variables for DC power supply evaluation, inspection and checkout are remotely controlled by a computer via an EEE-488 Bus. This computer control broadens testing variables on the work bench and in larger test systems with absolute control of the output waveform for all aspects of DC power supply testing. Types of tests include numerous power line faults such as dropouts and surges, long-duration transients, frequency variations, low/high line power and more.

FREQUENCY CHANGERS

Behlman's Frequency changers provide economical, high quality power for a wide range of technical military, industrial and marine requirements. The cost effective PA Series offers solid-state 45 to 500 Hertz power in fixed, variable and IEEE-488 computer controlled models. These efficient units are designed for high reliability, lowering the cost of ownership in relation to rotary equipment.

UNINTERRUPTABLE POWER SYSTEMS

The H Series UPS by Behlman continuously guards against power line failures while protecting sensitive electronic equipment from line anomalities. The range of applications spans from mobil communications/transportable shelters to factory automation and process control. Small size and rugged design make the H Series the right choice for any rack-mount UPS application.

A WORD ABOUT BEHLMAN'S RATING METHOD

Full-rated VA is delivered to the load under the worst-case combination conditions of zero power factor loads, 10% low line and output voltage at 74% of maximum.

Continuous operation at 150% is possible for extended time periods under more optimum conditions, such as unity power factor loads, maximum output voltage, nominal input voltage, middle 60% frequency range and 25°C ambient.

Simply stated, Behlman's ACM and ACP Series AC Power Sources are designed to deliver 150% of rated power. This means that 50% more power is available to the load making these models more cost effective, versatile and reliable.

It is this unique design philosophy that results in Behlman's unsurpassed reliability and cost effectiveness.

H-SERIES

1kVA to 5kVA
UNINTERRUPTABLE POWER SUPPLY

FEATURES

- Instrument quality design.
- True on-line UPS.
- Smallest, lightest package avaliable . . . 1000 VA only 5.25" high with batteries.
- Rugged standard rack mounting.
- 50Hz and/or 60Hz input or output frequencies.
- Uninterrupted operation under transient overloads.
- Low-distortion sine wave output.
- Outstanding line/load regulation.
- Low EMI/RFI.
- High effiency.
- RS-232 Interface options available.

APPLICATIONS

- Mobile communications
- Transportable shelters
- Process control
- ATE consoles
- Laboratory instrumentation
- Factory automation
- Remote facility/site
- Telecommunications
- Militarized versions available.

INSTRUMENT QUALITY, RACK MOUNTABLE UNINTERRUPTABLE POWER SYSTEMS

Behlman recognized the need for a unique power protection companion for electronic systems outside the conventional computer room UPS. The H-Series UPS now provides the array of benefits these applications demand, namely: small size, performance, ruggedness, reliability and value.

In features, operation and power rating requirements, the Behlman H-Series family meets and exceeds your most demanding applications. We've taken the hassle out of systems integration by offering an array of features that satisfy the most stringent applications.

Unique linear/switching power technologies are incorporated to reduce rack space requirements (H-1000 is only 5.25" high) and weight of each model to an absolute minimum. These same technologies provide unbeatable regulation and efficiency.

The family of H-Series units handle load crest factors well over two times their normal operating capacity without need for bypass to the utility line. Conservatively rated components allow them to drive the most unusual loads, even down to power factors of 0.5 leading or lagging. H-Series units are highly tolerant of input power variations yet produce a low distortion output. Emitted and radiated interference is extremely low making the H-Series family suitable for the most sensitive electronic equipment. Highly effecient electronics minimize fan noise and heat build-up.

Both contact closure and RS-232 are available on all models for communications and control. Input and output frequencies of 50Hz and/or 60Hz are also available. Continuous monitoring of voltage parameters are clear and accurate. Battery run-time can be extended by adding auxiliary battery packs.

TECHNICAL SPECFICATIONS, DIMENSIONS/WEIGHT

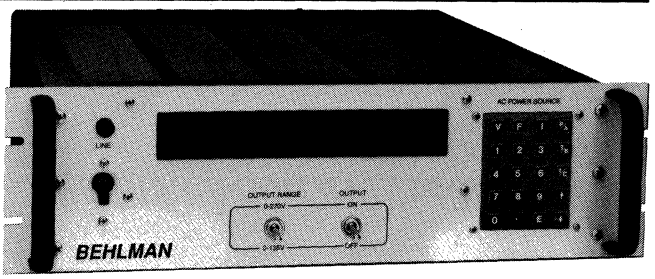
100VA to 9kVA AC POWER SOURCE



FEATURES

- 200% peak short-term current capability
- Computer interface reduces ATE system complexity
- Microcomputer-based crystal referenced, synthesized sinewave
- Built-in measurement system reduces support equipment
- Very low EMI/RFI
- Smaller, lighter – saves rack space
- Complete input and output transformer isolation
- Vacuum fluorescent display

APPLICATIONS

- MIL-STD-704 testing
- Military systems
- EMI/RFI test systems
- Areospace systems testing
- Power supply testing
- Acceptance testing
- Motor testing

PROGRAMMABILITY

- IEEE-488
- Output voltage
- Output frequency
- Output phase angle on three-phase models
- Current limit

OUTPUT MEASUREMENTS

- Voltage, Average responding (TRMS optional)
- Current, Average responding (TRMS optional)
- True power, Watts (optional)
- Power factor (optional)
- Frequency

GPIB PROGRAMMABLE SINGLE AND THREE PHASE

Behlman's ACP Series precision AC Power source is designed for wide usage in ATE systems, laboratories, production lines, test facilities, and many other applications. They are small in size and weight, increasing ease of handling and minimizing valuable rack space required.

Used in various computer controlled applications, Behlman's ACP Series AC power source provides truly independent and simultaneous output measurements while tests are in progress. This makes testing easier and faster because expensive voltmeters, ammeters, frequency counters or power meters are eliminated.

Programming is accomplished by the front panel keyboard or the IEEE-488 host interface computer, allowing for incrementing and decrementing of the output values with user definable resolution. On command, measurements are reported over the computer interface and the front panel, easy-to-read, display.

Fault Monitoring and diagnostic Self Tests are carried out by Built-In Test (BIT) circuits that report conditions through the interface and front panel display. The internal Fault Monitoring examines operating conditions and parameters on a continuous basis. The Self Test compares published specifications with actual output values.

The ACP Series delivers more power and features in the smallest, lightest package available. Valuable rack space is saved and testing capabilities and effectiveness are improved.

ACP SERIES TECHINICAL SPECIFICATIONS

THIS SUMMARIZES THE SPECIFIC PERFORMANCE CHARACTERISTICS FOR AN ACP SERIES PRECISION, PROGRAMMABLE AC POWER SOURCE. ALL RATED SPECIFICATIONS ARE BASED ON 25°C AMBIENT TEMPERATURE, NOMINAL INPUT LINE, UTILITY POWER FACTOR LOAD AND OPERATION AT 74-100% OF VOLTAGE OUTPUT RANGE, UNLESS OTHERWISE SPECIFIED. ALL MODELS ARE IN 19" RACK MOUNTING ENCLOSURE EXCEPT AS NOTED WITH (1) BELOW. THESE MODELS ARE MOUNTED IN A CABINET WITH A DIMENSION OF 52" H X 24" D X 31" W. SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

MODEL NO.	TOTAL POWER OUTPUT	CURRENT OUTPUT (AMPS)		WEIGHT (lbs.)	RACK DIMENSIONS	NO. OF RACK MOUNT CHASSIS
	RATED	135 V RANGE RATED	270 V RANGE RATED			
Single Phase		PER PHASE	PER PHASE			
ACP-100	100 VA	1.0	0.5	28	5.25"H x 22"D x 19"W	1
ACP-250	250 VA	2.5	1.3	40	5.25"H x 22"D x 19"W	1
ACP-350	350 VA	3.5	1.8	53	5.25"H x 22"D x 19"W	1
ACP-500	500 VA	5.0	2.5	63	7.00"H x 22"D x 19"W	1
ACP-750	750 VA	7.5	3.8	69	7.00"H x 22"D x 19"W	1
ACP-1000	1,000 VA	10.0	5.0	90	8.75"H x 24"D x 19"W	1
ACP-1500	1,500 VA	15.0	7.5	126	14.00"H x 22"D x 19"W	2
ACP-2000	2,000 VA	20.0	10.0	153	14.00"H x 22"D x 19"W	2
ACP-3000	3,000 VA	30.0	15.0	189	21.00"H x 22"D x 19"W	3

ACP-3X1500	4,500 VA	15.0	7.5	294	33.25"H x 19"D x 19"W	5
ACP-3X2000	6,000 VA	20.0	10.0	342	35.00"H x 19"D x 19"W	5
ACP-3X3000(1)	9,000 VA	30.0	15.0	410	42.00"H x 22"D x 19"W	5

INPUT CHARACTERISTICS

Frequency:	48-72 Hz	
Voltage:		
Single-Phase Models:	ACP-100 through ACP-1500:	115/230 Vac ± 10%, 1Ø.
	ACP-2000 and ACP-3000:	120/208 or 230 Vac ± 10%, 3Ø.
Three-Phase Models:	ACP-3X100 through ACP-3X500:	115/230 Vac ± 10%, 1Ø.
	ACP-3X750 through ACP-3x3000:	120/208 or 230 Vac ± 10%, 3Ø.

OUTPUT CHARACTERISTICS

Frequency:	45-2000 Hz
Voltage:	
Single-Phase Models:	0-135, 0-270, or 0-270 Vac, 1Ø, with automatic range change at 135 Vac. Switch selectable or IEEE-488 programmable.
Three-Phase Models:	0-135, 0-270, or 0-270 Vac, 3Ø with autorange at 135 Vac. Switch selectable or IEEE-488 programmable.
Load Regulation:	± 0.5% No load to full load.
Line Regulation:	± 0.1% for ± 10% line change.
Distortion:	1.0% maximum total harmonic distortion at rated power output.
Rated Power Output:	Obtainable from 74% to 100% of either voltage output range.
Maximum Power Output:	Up to 150% of rated power output available depending on operating conditions (54 Hz-1600Hz, nominal line, unity power factor).
Rated Current Output:	Obtainable from 50% to 100% of either voltage output range.
Maximum Current Output:	Up to 120% of rated current output for a maximum of one-half hour.
Peak Short-Term Current Output:	200% of rated current output.
Power Factor:	100% of rated power output available into any power factor load (unity to zero, leading or lagging).
Fault Protection:	Fast acting, main circuit breaker.
Overload Protection:	Electronic overload and short circuit protection with instantaneous automatic recovery when overload is removed.

WAVEFORM GENERATION

Oscillator Type:	Microcomputer-based, crystal referenced, synthesized sinewave.
Frequency Accuracy:	±0.005%

FRONT PANEL CONTROLS AND DISPLAY

Display Type:	40 Character, alphanumeric, blue vacuum fluorescent display to monitor operation.
Displayed Information:	Any combination of 3 (4 on 3Ø models) of the following measurements is available: -Frequency -Voltage (by phase on 3Ø) -Current (by phase on 3Ø) -Phase angle on 3Ø models Programming Information Internal Self Test/Fault Monitor error status
Programming Medium:	Alphanumeric Keypad
Output Control:	ON/OFF Toggle Switch.
Master Power:	ON/OFF circuit breaker for line power input control with indicator light.
Output Voltage: Range Select	Switch Selectable, 0-135 Vac, or 0-270 Vac with automatic range change at 135 Vac. There is a 200-300ms output dead-time when unit switches ranges.

STANDARD MEASUREMENTS AVERAGE RESPONDING

Voltage:	Measured at output sense terminals	
	Resolution:	0.1 Vac
	Accuracy:	± 0.7 Vac, ± 1 LSD
Current:	Resolution:	0.1 Amp AC
	Accuracy:	(both output ranges) ± 0.5% of maximum current output of 0-135 range, + 1 LSD
Frequency:	Resolution:	45-1000 Hz: 0.1 Hz 1000-2000 Hz: 1.0 Hz
	Accuracy:	0.005% of reading ± 1 LSD of resolution

STANDARD PROGRAMMING

Voltage:	Resolution:	± 0.1 Vac
	Accuracy:	± 0.6 Vac
Adjustable Current : Threshold Monitor	Resolution:	0.1 Amps AC
	Accuracy	(Both Output Ranges) ± 2.0% of maximum current output of 0-135V range.
	Minimum Programming Value:	Under 500 VA per phase 0.3 amps AC. Above 500 VA per phase 0.5 amps AC.
	Maximum Programming Value:	120% of rated current output of the 0-135V output range.
Frequency	Resolution:	0.1 Hz
	Accuracy:	0.005% of setting
Phase Angle (Three Phase Models Only):	Range:	0-360 degrees referenced to A phase
	Resolution:	1.0 degree
	Accuracy:	± 1.0 degree
		Also allows for independent or simultaneous programming of: –Voltage Output –Adjustable current, Threshold Monitor

STANDARD FEATURES

Remote Interface:	IEEE-488 (GPIB) Listener/Talker controls all operating parameters and reports measured values in addition to operating status.
Self Test:	A user requested test which compares published specifications with actual output values. Out of tolerance conditions are indicated via the front panel display and remote interface.
Internal Fault Monitor:	Examines operating conditions and parameters on a continuous basis. Parameters Include: Input line voltage, Internal cabinet temperature, Output characteristics in relation to specifications, Accidental overvoltage of output Faults are reported via the front panel display and remote interface.
High Rate Programming Mode:	Allows host computer to program rapid voltage and frequency deviations.
	Voltage: Programming range 0-100% of range
	Accuracy: + 0.6 Vac
	Response Time: 50 Microseconds to ± 90% of programmed value. 500 milliseconds to rated specifications of standard programming.
	Up-date Rate: Once every 175 microseconds
Frequency Programming:	45-2000 Hz in one Hz increments
	Accuracy: 0.005% of setting
	Response Time: 50 microseconds
	Up-date Rate: Once every 100 microseconds
Remote sense:	External sensing and correcting of load voltage via a barrier terminal block on back panel.

PHYSICAL

Mounting:	19" rack mount chassis with provision for slide mounting.
Paint:	Light grey and dark lettering.
Physical Size:	Dependent on VA rating.
Cooling:	Forced air, internal fan.
Output Connections:	Rear mounted barrier terminal block.
Operating Temperature:	0 to +55 degrees Celsius. (+32 to 130 degrees Fahrenheit).

OPTION #01:

Option #01 features include all of the standard features listed above and the following.

Event Programming:	A feature designed to simulate events such as line dropouts, voltage transients surges, etc.
	No. of events: 4
	Voltage
	Changes per Event: 1,2,or 3
	Programming: 0-100% of selected voltage range
	Resolution: 0.1% of selected voltage range
	Accuracy: ± 0.6 Vac
	Timing
	Duration: 0 to 6553.5 milliseconds
	Resolution: 0.1 millisecond
	Accuracy: ± 0.1 millisecond except at 0 duration which is ± 0.2 milliseconds.
	Output Response Time: 50 microseconds to 90% of programmed value. 500 milliseconds to rated specifications of standard programming.
Programmable Transition Time:	Allows the user to specify a point in time when programmed voltage changes occur after zero crossing.
	Delay
	Range: 0-25.5 milliseconds
	Resolution: 0.1 milliseconds
	Accuracy: ± 0.1 milliseconds
	Repeatability: ± 0.05 millisecond
	Accuracy of zero crossing Trigger: ± 0.1 millisecond
External Frequency Sync Input :	Allows output to be frequency sycronized to an external source.
	Input: 2-10 V peak square wave (50% duty cycle)
	Phase Lock: ± 5° referenced to zero crossing of output
Frequency Sync Output:	5.1 volt square wave syncronized to "A" phase.
Voltage/Frequency Transition Time:	5 volt pulse of approximately 20 microseconds duration generated at the time a programmed voltage or frequency change takes place.
Output Inhibit By TTL Input:	Allows output to be disabled remotely by a high TTL level input.

OPTION #02:

Package #02 options include all standard features and #01 features.

Measurements:	RMS Responding /True Power/Power Factor. Replaces Standard Measurement Specifications.
	Voltage Measured at output sense terminals
	Resolution: 0.1 Vac
	Accuracy: ±0.9 Vac ±1 LSD Crest Factor <3:1
	Current
	Resolution: 0.1 Amp AC
	Accuracy: (Both output ranges) Crest Factor <3:1: ±0.7% of maximum current output of 0-135 V range ± 1 LSD Crest Factor < 10:1: ±1.5% of maximum current output of 0-135 V range ±1 LSD
	Frequency
	Resolution: 0.1 Hz.
	Accuracy: 0.005% of reading ± 1LSD of resolution
	True Power
	Resolution: 1 Watt
	Accuracy: ± 2.0% of maximum power output
	Power Factor
	Resolution: 0.001
	Accuracy: (Both Output Ranges): ±0.03 over ranges of 27-270 Vac and 10 - 120% of rated current output of 0-135 Vac range.
	Programming
	Voltage Accuracy: ± 1.1 Vac
	All other programming specifications per standard programmin and option #01.

OPTION #03

Option #03 provides the input power of 220/380 Vac, 3Ø, 48 tc 72Hz for units 2000 VA and above.

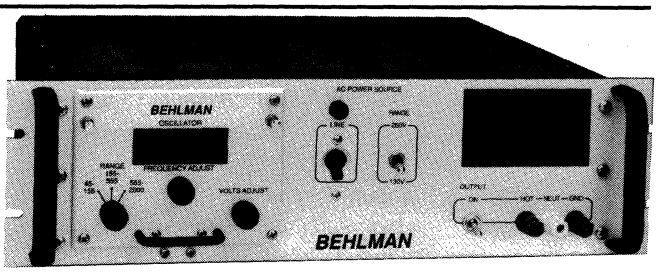
ACM SERIES

100VA to 9kVA AC POWER SOURCE



FEATURES

- Negligible EMI/RFI
- Smaller,lighter– saves rack space
- Tight regulation, low distortion
- Overload protection with instantaneous recovery
- Complete input/output transformer isolation
- 0.1% to 0.001% frequency accuracies
- 200% peak short-term current capability

APPLICATIONS

- Motor generator replacements
- Power supply testing
- Relay testing
- Avionics and missile test systems
- General laboratory support
- Motor testing
- Transformer testing
- Military test systems
- Automatic test equipment
- Acceptance testing
- Airborne, marine, ground support

MANUAL CONTROL
SINGLE AND THREE PHASE

Behlman's ACM Series AC Power source is a uniquely efficient linear power amplifier driven by plug-in oscillators, or an external synchronization source. These units are used in a wide variety of applications such as calibration facilities, laboratories, production lines and other test requirements where manually controlled AC power is required.

Incorporating an entirely unique design concept in linear power amplifiers, Behlman's units greatly increase stability into low power factor loads while reducing circuit complexity. This design is combined with advanced magnetics reducing size and weight, saving in valuable rack space and easing equipment handling.

The ACM Series is unparalleled, generating virtually no EMI/RFI emission, either conducted or radiated. To further decrease electronic noise and increase flexibility, both the input and output are coupled by isolation transformers. The output can be left floating or one side grounded. Complete overload, short circuit protection is provided by a combination of instantaneous automatic recovery circuitry and fast acting circuit breaker.

The ACM Series front panel is well organized with easily accessible control and digital readout on variable frequency models.

ACM SERIES TECHNICAL SPECIFICATIONS

THIS SUMMARIZES THE SPECIFIC PERFORMANCE CHARACTERISTICS FOR THE ACM SERIES PRECISION, MANUALLY CONTROLLED AC POWER SOURCE. ALL RATED SPECIFICATION ARE BASED ON 25° C AMBIENT TEMPERATURE, NOMINAL INPUT LINE, UNITY POWER FACTOR LOAD AND OPERATION AT 74-100% OF VOLTAGE OUTPUT RANGE, UNLESS OTHERWISE SPECIFIED. ALL MODELS ARE IN 19" RACK MOUNTING ENCLOSURE EXCEPT AS NOTED WITH (1) BELOW. THESE MODELS ARE MOUNTED IN A CABINET WITH A DIMENSION OF 52" H X 24" D X 31" W. SPECIFICATIONS SUBJECT SUBJECT TO CHANGE WITHOUT NOTICE.

MAINFRAME AMPLIFIER

MODEL NO.	TOTAL POWER OUTPUT	CURRENT OUTPUT (AMPS)		WEIGHT (lbs.)	RACK DIMENSIONS	NO. OF RACK MOUNT CHASSIS

OSCILLATOR SPECIFICATIONS

The below oscillators are designed to plug into the front panel of Behlman's Precision ACM Power Sources. They are available in a variety of fixed and variable frequency outputs. Variable oscillators provide digital readout of frequency.

MODEL NO. SINGLE PHASE	MODEL NO. THREE PHASE	FREQUENCY RANGE	FREQUENCY ACCURACY	NOTES
Fixed Frequency	**Fixed Frequency**			
OSC-1-XXX-H	OSC-3-XXX-H	50, 60, or 400Hz	0.1%	Replaces XXX with the selected fixed frequencies of 50, 60 or 400Hz. Example: OSC-1-50-H or OSC-1-400-K
OSC-1-XXX-K	OSC-3-XXX-K	50, 60, or 400Hz	0.001%	
Variable Frequency Digital Readout	**Variable Frequency Digital Readout**	**FREQUENCY RANGE**	**FREQUENCY ACCURACY**	**Digital Readout Number of Bands**
OSCD-1-300/500-G	OSCD-3-300/500-G	300 to 500Hz	0.25%	One
OSCD-1-45/66-G	OSCD-3-45/66-G	45 to 66Hz	0.25%	One
OSCD-1-45/2000-E	OSCD-3-45/2000-E	45 to 2000Hz	1.0%	Three

GENERAL SPECIFICATIONS

INPUT CHARACTERISTICS

Frequency: 48-72 Hz

Voltage:

Single-Phase Models

ACM-100 through ACM-1500:
115/230 Vac ± 10%, 1Ø.

ACM-2000 and ACM-3000:
120/208 or 230 Vac ± 10%, 3Ø.

Three-Phase Models

ACM-3x100 through 3x500:
115/230 Vac ± 10%, 1Ø.

ACM-3x750 through 3x3000:
120/208 or 230 Vac ± 10%, 3Ø.

PHYSICAL

Mounting: High strength metal 19" rack mount chassis with provision for slide mounting.

Metering: Digital readout of output voltage.

Paint: Light grey and dark lettering.

Output Connections: Front panel binding posts and rear mounted barrier terminal block.

Cooling: Forced air, internal fan.

Operating Temperature: 0 to 55 degrees Celsius (+32 to +130 degrees Farenheit)

Physical Size: Dependent on VA rating.

FRONT PANEL CONTROLS AND INDICATORS

Output Control: ON/OFF toggle switch Range Select

Oscillator: Opening for selected plug-in oscillator. Provides applicable voltage and frequency control.

External Input: The Optional External Input Module replaces the plug-in oscillator for external control of the amplifier. Amplifier Drive: 0-9.2 Volts RMS. 15K ohms impedance.

OUTPUT CHARACTERISTICS

Frequency: 45-2000 Hz

Voltage:

Single-Phase Models: 0-135 or 0-270 Vac, 1Ø, switch selectable.

Three Phase Models: 0-135 or 0-270 Vac, 3Ø, switch selectable.

Load Regulation: ± 0.5%. No load to full load. Adjustable through zero for specific loads.

Line Regulation: ± 0.1% for ± 10% line change.

Distortion: 0.5% maximum total harmonic distortion at rated power output.

Rated Power Output: Obtainable from 74% to 100% of either voltage output range.

Maximum Power Output: Up to 150% of rated output available depending on operating conditions (54 Hz-1600 Hz, nominal line, unity power factor).

Rated Current Output: Obtainable from 50% to 100% of either voltage output range.

Maximum Current Output: Up to 120% of rated current output for a maximum of one half hour.

Peak Short-Term Current Output: 200% of rated current output.

Power Factor: 100% of rated power output available into any power factor load (unity to zero, leading or lagging).

Fault Protection: Fast acting, main circuit breaker.

Overload Protection: Electronic overload and short circuit protection with instantaneous recovery when overload is removed.

OPTION #03

Option #03 provides the input power of 220/380 Vac, 3Ø, 48 to 72Hz for units 2000 VA and above.

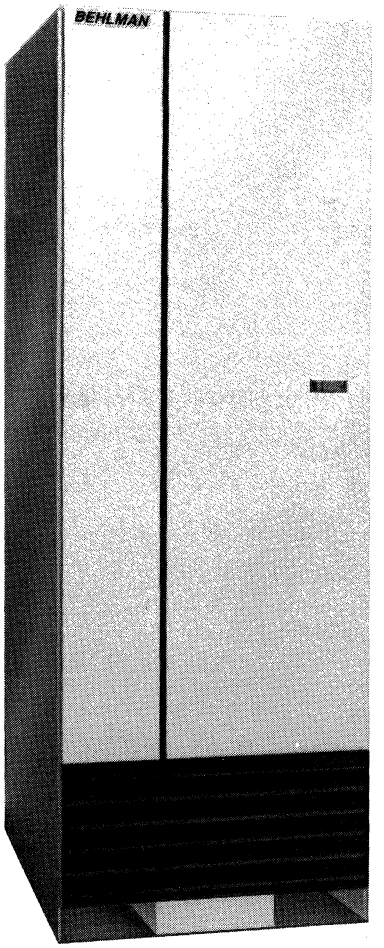
PA SERIES

Up to 100 KVA FREQUENCY CONVERTER



APPLICATIONS

- Automatic test equipment.
- Computer programmable power.
- Facilities power.
- Avionics support testing.
- Motor generator replacements.
- 50Hz power requirements.
- 400Hz military power.
- Variable frequency testing, 45 to 500 Hz.
- Flightline power.
- Electronic product burn-in and testing.
- Dock-side marine power.
- International power requirements.

FIXED, VARIABLE GPIB PROGRAMMABLE

The PA Series Frequency Converter is typically used in laboratories, testing applications and facilities that require efficient, cost effective power conversion. Applications range from avionics and international product testing to frequency conversion for airborne and shipboard equipment.

The Solid-State PA Series is specifically designed to reduce downtime. Self-clearing power transistors help eliminate needless, expensive power shutdowns, maximizing maintenance-free operation. In the unlikely event a transistor device failure should occur, the device will automatically clear itself from the circuit without disturbing or derating the system's output specification. Self-diagnostics and monitoring give the user the benefit of servicing at his convenience. Modular construction further reduces down time. Each unit is assembled from the same basic plug-in modules, making it easy to configure, expand and service.

By incorporating a unique input circuit design, the PA Series minimizes input current distortion reflected on the utility service, as required by DoD 1399, Section 300. Input start-up surges are also reduced through the use of special soft-start circuitry, eliminating the need for oversized utility requirements.

The highly efficient PA Series outputs are configured for either fixed, variable or IEEE-488 computer control. Input voltage combinations range from 120/208 VAC to 277/480VAC. All standard models are available in either Wye or Delta connection. Output frequency is fixed or variable from 45 Hz to 500 Hz.

Unlike noisy motor generators, the PA series incorporates quiet solid-state technology. These are compact and do not require special site preparation. By offering solid-state efficiency and reliability the cost of ownership is lower than for rotary equipment.

FEATURES

- Self-diagnostics and module level replacement of electronics allow rapid and easy servicing.
- Redundant power circuits allow system operation in case of individual power device failure.
- Lowers operational cost. High efficiency of 88-90%.
- Small footprint saves up to 50% over the space of competitive units.
- Soft-start ramp-up eliminates input power line surges and the need for oversized utility service.
- Low input distortion using 36-phase rectification per DoD 1399, Section 300.
- Easy installation, no special connections.
- Workplace compatible with low audible noise.
- Expandable models using plug-in modules eliminate obsolescence.
- Precision output provides precisely controlled power into extremely complex loads.
- Very cost effective at all VA levels.
- Input isolation provided by power transistors.
- Versatile voltage ratings offer wide range of input and output combinations in Wye or Delta configurations.
- Optional IEEE-488 interface allows user control and monitoring for remote applications.

TECHNICAL SPECIFICATIONS

INPUT

Voltage:	All models are provided with a multi-tapped input transformer which accommodates most forms of 3-phase power (Specify when ordering).
Frequency:	57Hz to 63Hz indefinitely. 47Hz to 63Hz option is available.
Current:	Unique 36-phase input rectification available.
Distortion:	IAW DoD-STD-1399, Section 300.
Power Factor:	Greater than 0.95.
Soft-Start:	Limits input surge currents on start-up.
Efficiency:	Typically 88-90%.

OUTPUT

Power:	Single and Three-Phase through 100kVA.
Voltage:	Adjustable from 0 to 140VAC L-N. Configurable in Wye or Delta outputs. Higher voltages are also standard.
Load Regulation Adjustment:	-5% to +10%.
Frequency:	Fixed at 50, 60 or 400Hz, or variable from 45 to 500Hz.
Repetitive Peak Rating:	250% of nominal at 60Hz. 200% of nominal at 400Hz.
Current Distortion:	2% THD at 60Hz. 4% THD at 400Hz.
Phase Separation:	120 degrees ± 1 degree.
Load Imbalance:	100% load imbalance acceptable.

MECHANICAL

Dimensions:	77"H x 26.5"W x 33.5"D. Incorporates fork lift base.
Weight:	1000 to 1800 lbs., depending on model.

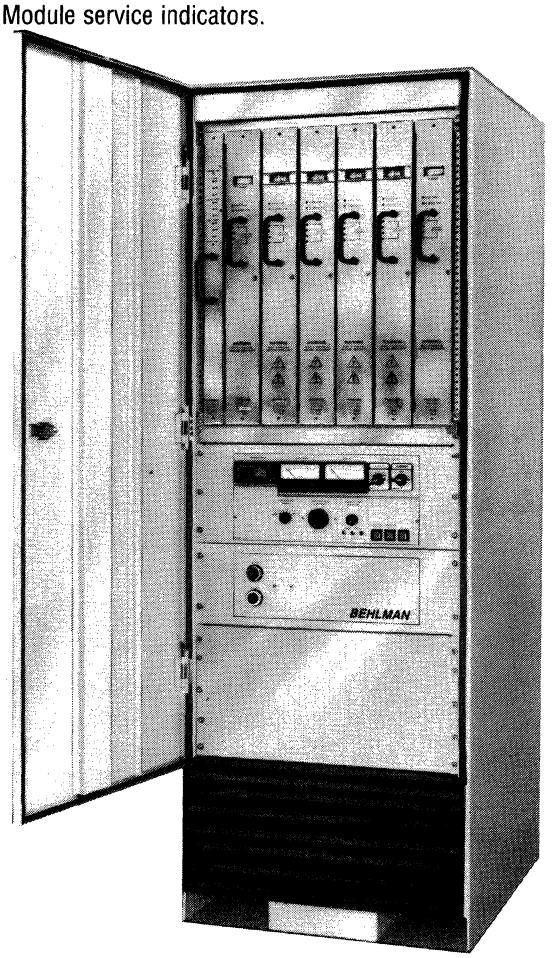
Specifications subject to change without notice.

ENVIRONMENTAL

Temperature:	Operating: 0°C to +55°C(+32°F to +131°F). Storage: -20°C to +70°C(-4°F to +158°F).
Humidity:	0 to 95% Rh, noncondensing.
Audible Noise:	≤60 dBA at five feet.
Cooling:	Forced air with reusable air filter.

MONITORS & CONTROLS

- Input power Start/Stop.
- Overload reset.
- Output current meter.
- Frequency meter.
- Overtemp indicator.
- Output On/Off.
- Output voltmeter.
- Amplitude control.
- Module current meter.
- Module service indicators.



MODELS

PA 3331:	50 kVA output.
PA 6331:	50 kVA expandable output.
PA6631:	100 kVA output.

Standard models available. All PA-Series models are available with variable or fixed output frequencies and a wide selection of input voltage configurations.

SERVICE AND SUPPORT

Behlman's proven solid-state technology offers outstanding performance and reliability. Self-clearing transistors repackaged within individual power modules help to ensure product uptime and low MTTR of less than thirty minutes. If your system shoul require servicing, Behlman Customer Services group is dedicated to providing unparalleled assistance. Product repair or technical documentation questions are handled quickly and competently. Extended and On-site warranties are available as well as spares provisioning kits.

SINE WAVE DC/AC INVERTERS

- **SMALL, LIGHT WEIGHT**
  At 2lb. 5 oz. Belmont Inverters are ideal for use in portable battery powered equipment.
- **SINE WAVE OUTPUT**
  Frequency stable to less than 1% over full temperature range.
- **CSA CERTIFIED, PATENTED**
  Model SINE-125, illustrated, CSA certified at 50, 60 Hz. Exclusive technology protected under U.S. Patent #4,907,145.

Model Sine-125,200VA/125 Watt Output, Specifications:

OUTPUT POWER: 125 W resistive load or 200 VA max with pf = 0.6 lag load
SIZE: 8.18 in. x 5.03 in. x 1.66 in. (20.8 cm x 12.8cm x 4.21 cm)
WEIGHT: 37 oz. (1.05 Kg)
EFFICIENCY: Typical 80% for resistive loads, greater than 70% for all loads @ 100W
FREQUENCY: 50 Hz, 60 Hz, or 400 Hz available, standard
OUTPUT VOLTAGE: 110 VAC Sine Wave **POWER FACTOR (LOAD):** 1 to 0.6 lag
INPUT VOLTAGE RANGE: 22 to 28 VDC normal operation, maximum range: 20 to 30 VDC
MAXIMUM OUTPUT CURRENT: 1.8 A rms (@ pf = 0.6)
OPERATING TEMPERATURE (CASE): 0° C to 70° C **STORAGE TEMPERATURE:** -40° C to 85° C
PROTECTION: Short circuit, Thermal overload
ISOLATION: 1250 VAC input to output, 1250 VAC input to case, 1250 VAC output to case
FREQUENCY STABILITY: ± 0.5 Hz or 1% over operating temperature range
RELATIVE ACCURACY (25° C): ± 0.5 Hz or 1% whichever is greater
OUTPUT VOLTAGE DRIFT: ± 3% over temperature range
OUTPUT LOAD IMBALANCE: 0 to 50% **MINIMUM LOAD:** None
SHORT CIRCUIT INPUT CURRENT: Less than 8A **OUTPUT CURRENT:** 2.2A
INPUT CURRENT (NO LOAD): 400 mA typical @ 24 VDC, 500 mA maximum
REMOTE TURN ON/OFF: Yes

Other Available Models

Input Voltage	Output Frequency	Output Power
12, 24 V DC	50, 60, 400 Hz	125, 500, 1000 Watts

Digital Oscilloscope Recording of Output Voltage @ 100 W. Inverter Output

Announcing a breakthrough in Computer Power Protection...

New advanced, on-line uninterruptible power systems protect your micros, minis, workstations and LANs from power problems

Your computer is bombarded daily by spikes, sags, surges, noise, brownouts and blackouts. Bad power eats away at fragile electronic circuits, increases service costs, damages disks and causes downtime.

You can eliminate these problems by investing in an Uninterruptible Power System (UPS). Your investment in a UPS will mean reduced downtime, increased equipment life and lower service costs. Typically, a UPS will pay for itself in less than one year. But not all UPS are created equal. Many are off-line, standby systems. Most won't even provide isolation from the power line or a separately-derived neutral. Only BEST's UPS meet all six requirements of quality computer power protection.

Best Power Technology's UPS range in capacity from 500 VA to 18 KVA. They will protect your micros, minis, workstations, LANs and anything else that needs clean, continuous power.

FERRUPS Meets Six Requirements of Quality Power Protection

Best Power Technology, Inc.'s new, advanced, on-line uninterruptible power systems called FERRUPS are truly a breakthrough in computer power protection. FERRUPS meets all six requirements of quality computer power protection:

☑ **Lightning and surge protection.** Outstanding 2000 to 1 spike attenuation. Passes both Class A and the higher Class B ANSI/IEEE C62.42-45 tests.

☑ **Isolation, including output neutral to ground bonding.** Provides isolation required by Federal Information Processing Standard #94. Qualifies as a true, separately-derived power source as defined by National Electric Code Article 250-5D.

☑ **Regulation.** Output voltage regulated to within standards set by Computer Business Equipment Manufacturer's Association (CBEMA) and ANSI C84.1.

☑ **Continuous, no-break power.** On-line system provides continuous, no-break power during complete blackouts or momentary interruptions (not like a standby system).

☑ **Sine-wave power.** Computer-grade, sine-wave power.

☑ **Switch-mode power supply rated.** All VA ratings based on computer-type loads with switch-mode power supplies. No derating required when used with computers.

FERRUPS Is Intelligent and Interactive

FERRUPS not only meets all six requirements of quality power protection, it is also intelligent and interactive. FERRUPS is equipped with full duplex communication features for screen display of meter functions such as voltage, current, watts, battery status, etc. FERRUPS is the smartest, most interactive, communicative UPS in the business today!

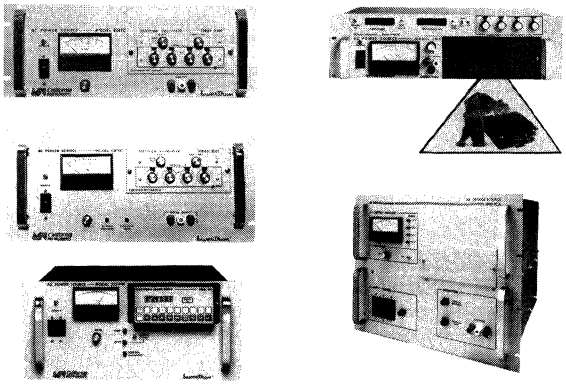
California Instruments

AC POWER SYSTEMS

T SERIES POWER AMPLIFIERS



- Full VA output with Wide Voltage Range
- 1ϕ, 2ϕ, 3ϕY
- 50 Model Selection
- Modular Design
- 100 to 36000VA
- Voltages 0-270V
- 20-20kHz Optional

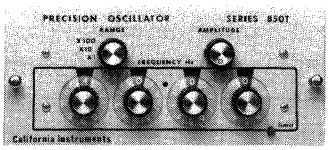
Model	Std. Voltage	R.P.F.R.①	Std Input Voltage	Panel Ht.
101T	1 Range	45-10kHz	115V, 1ϕ	3.5"
251T	3 Ranges	45-20kHz	115V, 1ϕ	5.25"
351TC	0-120, 0-240	45-5kHz	115V, 1ϕ	5.25"
501TC	0-135, 0-270	45-5kHz	115V, 1ϕ	7.0"
1001TC	0-130, 0-260	45-5kHz	230V, 1ϕ	8.75"
1501TC	4 Ranges	45-5kHz	230V, 1ϕ	14.0"
3001TCA	4 Ranges	45-2kHz	208V L-L, 3ϕ	15.75"

① Full Power Frequency Range

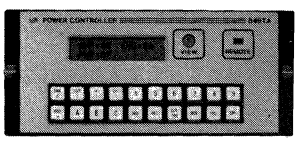
T SERIES PLUG-IN OSCILLATORS AND CONTROLLERS

Manual Oscillators

Model 850T
- 45Hz - 9999Hz
- 0.001% Accuracy
- Crystal Control
- Amplitude/Current Servo



Programmable Controllers



Model 849TA
- Control-Remote/Local
- IEEE-488 GPIB (Listen/Talk)
- Independent Phase Control
- Store Variable Sweeps & Ramps

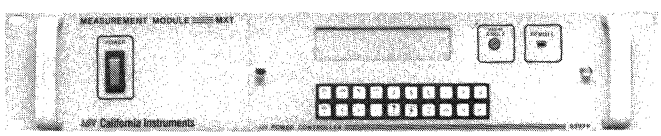
NOTE: Consult Factory for full line of Manual and Programmable Oscillators/Controllers

LDS SERIES LINE DISTURBANCE SIMULATOR

Programmable AC Power to simulate power line dropouts, spikes, sags and distortion.

LDS Series will consist of:
- Model 959XPT Controller
- Model MXT10 Interface Module
- Any California Instruments model AC Power Amplifier

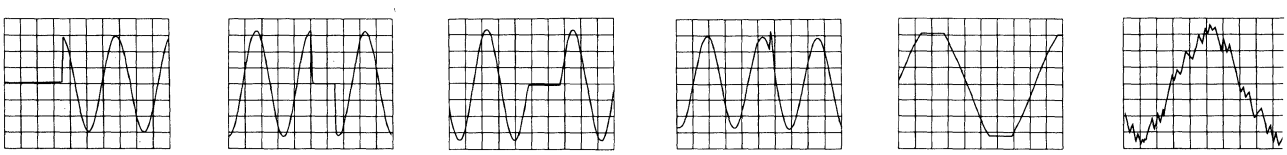
Features:
- Full IEEE-488 Listener/Talker
- 16 Linking Memory Registers
- Variable Speed Up/Dn Keys
- Bus or Keypad calibration



Provides California Instruments T & XP Series AC Power Amplifiers and many competitive model AC power amplifiers with the capability to program and measure output parameters, including current limit.

Program to control, display and report RMS Volts and Amps, Watts, VA, Pf, Phase Angles and Frequency. Can be used from 100VA to 36kVA in single and multiple phase configurations.

IEEE-488 or Front Panel Keyboard control to program Line Distortion Simulations like those shown below...or specify your particular line distortion.



Programmable start | ½ cycle dropouts | 10 ms dropout at 0° (or any angle) | 2 ms surge (at any angle) | Programmed distortion (0-20%) | Custom waveshape to custome requirement

1200 DCS SERIES – MODULAR DC POWER

Exclusive Features:

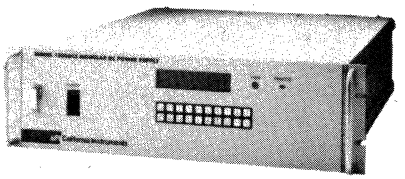
- Eight separate and isolated Outputs/ Chassis
- 5-1/4" Rack Height
- Front Chassis Module Loading
- Full Current Output, 10-100% Full Scale Voltage
- 38 Lbs (17.3 Kg) with Eight Power Modules/Chassis
- Over 80% Efficient
- Complete Automatic Self-Test of Each Output on Start-up
- Protection:
- Output Overload • Temperature
- Short Circuit • Open Sense Lead
- Over Voltage

This new modular design provides up to 1200 Watts of power, each chassis, with only 5-1/4" of panel height.

Designed to provide a selectable DC voltage and current from a single plug-in module, it maximizes flexibility for systems applications. DC power modules are front panel loaded, isolated by 50 Mohms with opto-isolation on the digital interface lines.

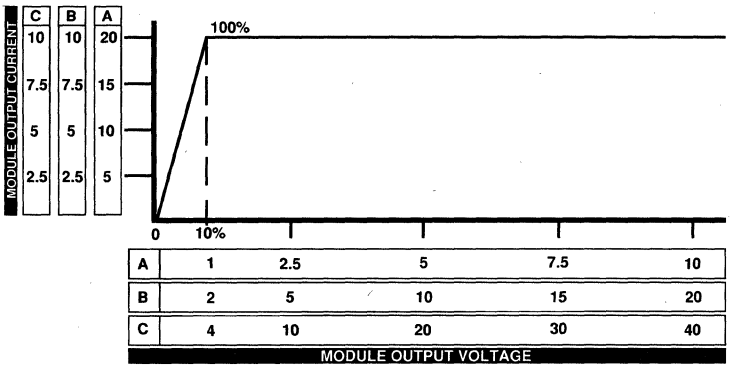
Module output voltages are 0 to 10, 20 or 40 volts with current capability of 0-10 or 20 Amperes. Over voltage – current – temperature protection is provided with automatic shut down.

The DCS Series DC Modular Power Supply overcomes the size, power, temperature and technology limitation of presently available supplies.



For full specifications, features and availability contact California Instruments.

OUTPUT CURRENT VS VOLTAGE RATINGS



L SERIES — SWITCHING AC POWER AMPLIFIERS

Exclusive Features:

Drive Linear Loads Without Derating
- Full output power—zero to unity power factor

High Frequency Power Available
- Output frequency range—45Hz to 5000Hz

Save up to 50% Rack Space
- Smallest front panel height per power level—Saves Rack Space

Much Less Heat Dissipated
- Efficiency—Greater than 80% typical

Versatility For Your Applications
- 4500 VA three-phase models can be programmed for single-phase output with Model 4503L-4154

Drive Off Line Switchers
- Crest factor of 2.5

Test for Ride-Through
- Programmable dropout feature

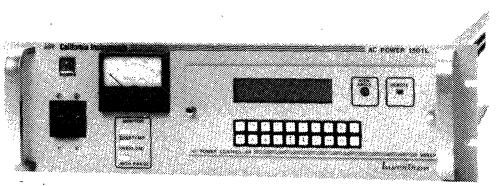
The L Series is the most compact and versatile series of AC Power Sources in the testing industry.

California Instruments offers:
- Model 1501L;1500VA, 1Ø, 5 1/4 Inch Ht.
- Model 1503L;500VA/Ø, 3Ø, 5 1/4 Inch Ht.
- Model 4503L;1500VA/Ø, 3Ø or 4500VA 1Ø, 10 1/2 Inch Ht.

NOTE: Manual or Programmable Controller built into module

All L Series Amplifiers have overload, short circuit and thermal protection with automatic reset after fault is removed and front panel fault indication. The built-in oscillator/controller has programming and measurement capability of volts, amps, power, phase angle, frequency and current limit and has the added feature of being able to ramp the programmable functions.

For full specifications, features and availability, contact California Instruments



Additional Features:
- Automatic remote calibration
- Complete self test with module status on faults with programmable controller
- Display/Bus reporting of load parameters:
  - Volts RMS
  - Amps RMS
  - Watts
  - Frequency
  - Phase Angles
  - VA
  - Power factor
- 26V/5V regulated outputs optional
- MATE conformance optional
- Output Relay standard all units
- 135V/270V Standard, 67.5V/135V or 156V/312V optional outputs
- To 13,500VA 1Ø or 4500VA 1Ø or 4500VA/Ø 3Ø

AC POWER SYSTEMS

XP SERIES AMPLIFIERS, PLUG-IN CONTROLLERS AND MONITORS

Single Phase Amplifiers

FEATURES:

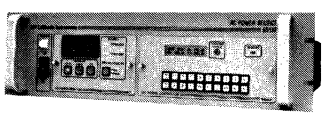
- Modular Design
- System Control
- Low Profile
- High Power-Low Cost
- Multi-Bus Control
- Combine into Poly-Phase Systems

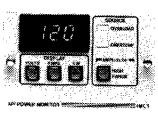
Model 321XP
420 VA Total Power

Model 971XP
1260 VA Total Power

Model 651XP
835 VA Total Power

Model 1301XP
1680 VA Total Power





Monitors

Model IMA1

- Overload & Overtemp Indicators
- Hi/Lo Range Switch

Model IMCI

- Voltage, Current & Power Display
- Hi/Lo Range Switch
- Overload & Overtemp Indicators

Three Phase Amplifiers

FEATURES

- 3 Independent Outputs in one enclosure
- Low Profile, High Power/cu.in.
- Automatic Rerating on Variable Load Conditions
- MATE/CIIL Option

SPECIFICATIONS:

- Multiple Voltage Ranges up to 270V, L-N
- Low Distortion; .05 to .5%
- Wide Band Frequency; up to 50kHz
- Complete Fault Protection and Thermal Derating
- Configurable in 10, 20 or 30 Outputs

Model 153XP
217 VA Total Power

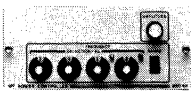
Model 653XP
810 VA Total Power

Model 1953XP
2500 VA Total Power

Controllers

Model 920XP

- Decade Dialing
- 45.0 to 10 kHz



Model 948XP

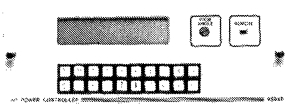
- Full IEEE-488 Talk/Listen
- Local or Remote Control
- Programmable Outputs

Model 949XP

- Full IEEE-488 Talk/Listen
- Independent Programming - Phase Angles & Amplitude
- Programmable Current Limits
- Simultaneous Sine/Square Wave Outputs on Different Phases
- Programmable Ramps, Sweeps & Drop-outs
- Measures and reports all load values
- MATE/CIIL option

Model 959XP Controller
(use with 653XP and 1953XP Amplifiers)

- Front panel keyboard or full IEEE-488 Talk/Listen
- Independent programming of phase amplitude
- 16 Linking Memory registers
- Variable speed Up/Dn keys
- Bus or Keypad calibration
- Program to control, display and report RMS volts and amps, watts, PF, phase angles and frequency.
- 10, 20 or 30

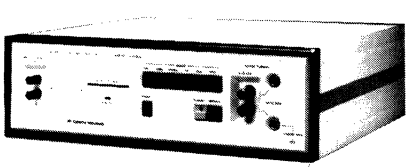


TRANSCONDUCTANCE AMPLIFIERS (PRECISION CURRENT SOURCES)

MODEL 3213K AC/DC Precision 100 Amp Current Source

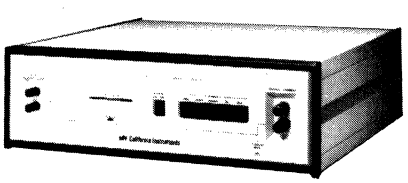
- 2-20 VAC/DC Input for Stability
- DC and 10 Hz to 10 kHz
- 200 nA to 100A (six ranges)
- 10 Volt Compliance

Note: Multiple units of Model 3213K Precision Current Source can be wired together in parallel for higher current applications, such as a full 1000 ampere controlled source in less than 84" of rack space.



MODEL 3220K AC/DC Precision 20 Amp Current Source

- 2-20V AC/DC Input
- DC to 1 kHz
- 200nA to 20 Amp (5 ranges)
- .005% Basic Accuracy



MODEL 3225K AC/DC Precision 20 Amp Current Source

- DC and 10 Hz to 100 kHz Output
- Full Output Current to 100 kHz
- 200nA to 20 Amp (5 ranges)
- 10 Volt Compliance

Chloride/UPSystems
• Uninterruptible Power Supplies

Transistorized PWM Technology
20KVA - 250KVA Models
Parallelability up to 1500 KVA
Field Upgradable

Our Markets

Chloride/UPSystems product is designed to provide continuous high quality filtered power to critical load applications during power outages or input power abnormalities. Our systems are found in the following applications:

- Mainframe Data Processing
- Telecommunications Systems
- Military/Aerospace
- Medical Equipment
- Industrial
- Communications
- Security

One Technology Place, Caledonia, NY 14423

Manufacturing Capabilities

Chloride/UPSystems has the resources to support your critical UPS needs. Our manufacturing operation performs to the "Baldrige" level quality standards.
Our Capabilities include:

- Facility: 140,000 square feet of efficient manufacturing space located just south of Rochester, NY.
- Quality: Statistical Process Control has been implemented on a plant wide basis. Chloride/UPSystems is producing manufacturing in a 6 sigma environment. Our facility is benchmarked against ISO-9001 standards. Quality systems are controlled by Mil-Std-9858A and Mil-I-45208A.
- Reliability testing: Each unit receives a complete functional testing before shipment as well as extended loaded Burn-In testing.
- Planning Systems to Assure On Time Delivery: Chloride utilizes sophisticated materials and manufacturing planning systems to assure your product is shipped on time, meeting your delivery needs.

Product Features

The Chloride/UPSystems product offers a wide variety of features including:

- Power History Recorder
- Alarm Log
- High Efficiency
- Low Noise Operation
- Low 2% Output Harmonic Distortion

CHLORIDE
POWER ELECTRONICS
UPSYSTEMS

HIGH PEAK CURRENT UNITS AVAILABLE NOW!

NEW TECHNOLOGY — HERE TODAY!

GENERAL:

- Ideal for operating or testing avionics, synchros, gyros, triac and SCR phase controllers, motors, fans, transducers, shaker tables, transformers, power supplies, relays, AC line-operated equipment for either foreign or domestic use; or any other system requiring a precision AC power source.
- Conveniently designed and small enough for easy use on either bench-top or fixed rack-mount installations.
- 70%-82% efficiency *across the full output voltage range* means low power consumption and cool operation at *any* output level.
- Comprehensive "soft-start" circuitry removes all supply-line and power supply output current and voltage surges.
- Whisper quiet operation.
- High power to weight ratio, results in excellent portability and decreased freight costs.
- Lightest and most efficient AC power source on the market today.
- Latest amplifier technology using "Pulse Width Modulation" (PWM) and patented, thick-film, power hybrid circuitry.

INTERFACE:

- Full digital metering of frequency, voltage, and current.
- Use internal sinewave oscillator or external input source.
- Convenient, front panel mounted 130V/260V voltage range switch, three-way binding posts and standard NEMA AC receptacles.
- Inputs and outputs both completely isolated and floating with respect to ground.

OUTPUT CAPABILITY:

- 165 VA, 500 VA, 1 KVA, 2 KVA, 3 KVA, 4 KVA, 5 KVA, and 6 KVA systems available.
- Use multiple 1 KVA mainframes with single master oscillator for power up to 6 KVA.
- Bandwidth: usable 45 Hz-20 KHz, full output 45 Hz-15 KHz.
- Stable, full output voltage and current without derating into *any* reactive load with power factor from unity to zero, leading or lagging.
- Full-current output at *any* output voltage with *no* confusing derating curves.
- Low sinewave distortion, excellent load and line regulation.
- High peak current rated units available.

PROTECTION:

- Output is completely overload and short-circuit-proof, with automatic and smooth recovery.
- Unit can operate safely and continuously into *any* type of symetrical AC load without derating, overheating, or shutdown.
- In the event of an internal fault, a self-diagnostic fault-isolation system will completely shut the unit down and prevent any catastrophic failures.
- Thermal protection will shut down unit if ventillation is choked off.

SERVICE:

- Totally modular design allows for easy service, if required.
- Immediate Availability.
- One year warranty.

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

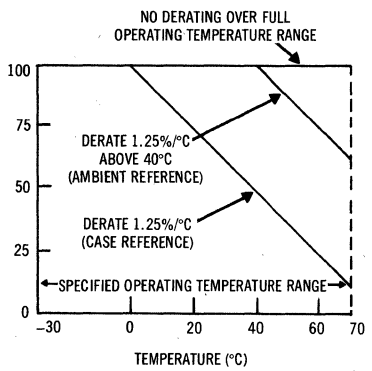

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

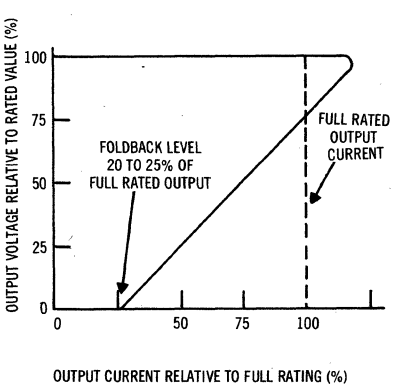

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

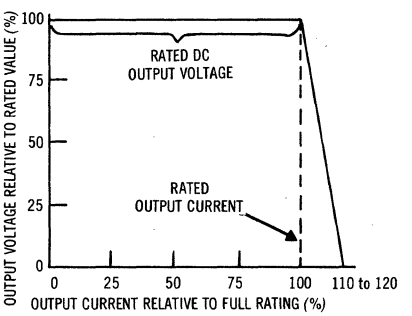

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

INSTALLATION FLEXIBILITY AND EFFECTIVE POWER CONDITIONING WITH POWER DISTRIBUTION

The Model D Distribution Model is designed for maximum application flexibility. The back panel of the Model D will interface with computer peripherals in any one or combination of three configurations. Systems can be ordered with known output receptacles, extension receptacles or field wired extensions. Changes can be made later by installing the proper output distribution panel. The three optional output configurations are:

1. Receptacle Interface:

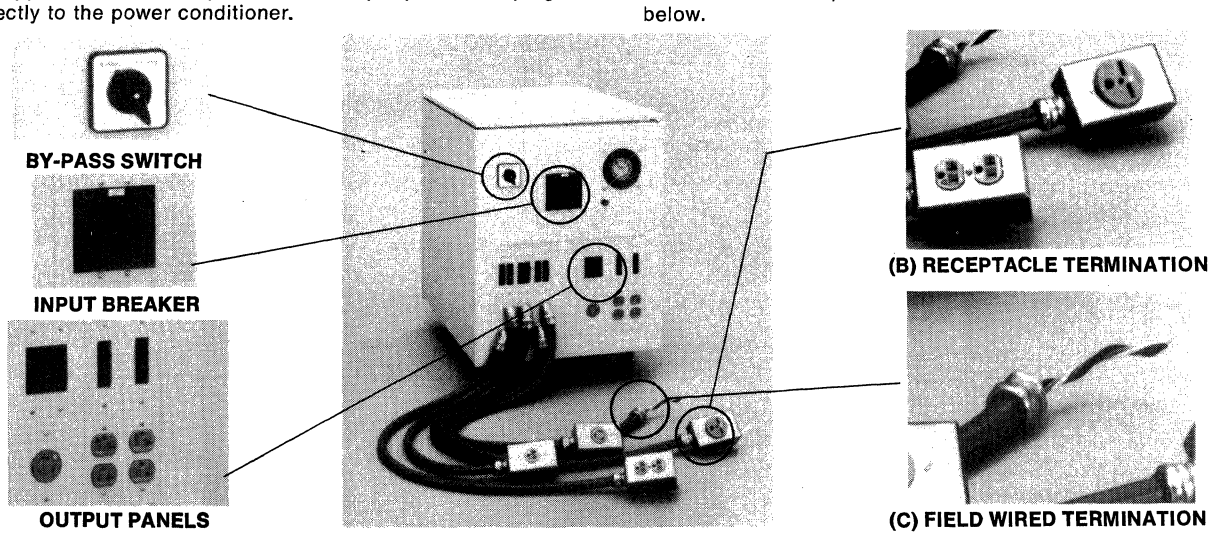
The back panel can be customized to mount a large variety of receptacles. The number of receptacles that can be mounted will depend on the number of spaces a given receptacle will occupy. This interface option will allow peripherals to plug in directly to the power conditioner.

2. Flexible Extension with Receptacle Termination:

The back panel is designed to accommodate a Flexible Extension with a large variety of receptacle termination available. The desired length of the Flexible Extension can be specified in 5 foot increments. The desired receptacle termination and number of receptacles can be selected. See Figure B below.

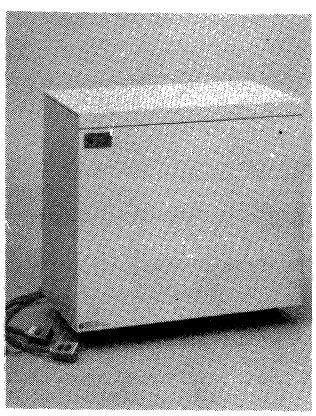
3. Flexible Extension with Field Wired Termination:

The third configuration is very similar to the configuration noted above (2) expect that the terminaiton is field installed wiring instead of receptacles. The desired length of the Flexible Extension can be specified in 5 foot increments. See Figure C below.



SERIES 500 MODEL D LINE VOLTAGE REGULATOR

The Series 500 Model D is a light weight efficient, distortion free method of regulating the voltage. It utilizes a tapped auto-transformer to automatically regulate output voltage quickly, efficiently and inexpensively. This unit should be applied where brownouts or surges are the main power line problem.



KVA	PHASE	OUTPUT DISTRIBUTION PANELS AVAILABLE	CABINET NO. AND DIMENSIONS
3, 5, 8 10, 15, 20, 25	Single	8	C-47588 21½″ x 29″ x 30″
9, 15	Three	8	C-47588 21½″ x 29″ x 30″
25, 30, 45, 50	Three	12	C-47589 45″ x 29″ x 44″

SPECIFICATIONS

Response Time: ¼ Cycle

Correction Time: 1 Cycle for 100% Correction

Efficiency: 98%

Output Distortion: Less than 1% added

Load Regulation: Less than ±2% from no load to full load

KVA Ratings: Single Phase 3, 5, 8, 10, 15, 20, 25
Three Phase 9, 15, 25, 30, 45 50

Logic Circuit: Micro-processor based

Input Frequency: 60 Hertz, ±3 Hertz (50 Hertz Models available)

Audible Noise: 40 db to 50 db depending on size

Operating Temperature: 0 Degrees C to 40 Degrees C

Voltage Monitor: Output Voltage Monitor indicates when input voltage is in or out of range.

Bypass Switch: Optional Bypass Switch is available.

LINE VOLTAGE REGULATION			
STANDARD UNIT		OPTIONAL 7-TAP UNIT

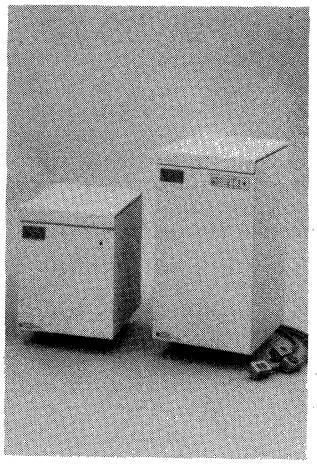
SERIES 600 MODEL D MAX-E-ISOLATION TRANSFORMER

The triple shielded, all copper isolation transformer is ideal where electrical noise and transients are a major problem. The unit provides common mode noise attenuation of 140 db. These common power line disturbances are caused by such things as lightning, electric motors starting and stopping, heavy duty relays tripping and network switching by utilities.



CABINET OUTPUT DISTRIBUTION PANELS			
KVA	PHASE	OUTPUT DISTRIBUTION PANELS AVAILABLE	CABINET NO. AND DIMENSIONS
3, 5, 8 10, 15 ,20, 25	Single	8	C-47588 21½″ x 29″ x 30″
3, 6, 9 15, 24, 30	Three	8	C-47588 21½″ x 29″ x 30″
45	Three	12	C-47589 45″ x 29″ x 44″

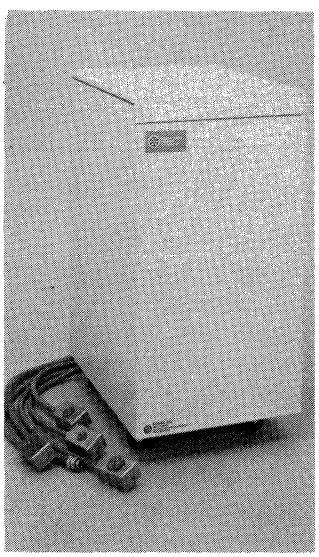
SPECIFICATIONS

Common Mode Noise Attenuation: 140 db
Transverse Mode Noise Attenuation: 3 db down at 600 Hertz, 40 db per decade to well below 50 db with resistive load.
Efficiency: 97%
Output Distortion: 0.1% Total Harmonic Distortion Added
Load Regulation: ±2% No Load to Full Load
Input Frequency Range: 60 Hertz, ±3 Hertz (50 Hertz units available)
KVA Ratings: Single Phase 3, 5, 8, 10, 15, 20, 25
Three Phase 3, 6, 9, 15, 24, 30, 45
Audible Noise: 40 db to 50 db depending on size.
Operating Temperature: 0 degrees C to 40 degrees C.
Input/Output Voltages: The following input/output voltages are available:

SINGLE PHASE		THREE PHASE	
INPUT VOLTAGE	OUTPUT VOLTAGE	INPUT VOLTAGE	OUTPUT VOLTAGE
208/240	120/240	208	208Y/120
		240	208Y/120
		480	208Y/120
		600	208Y/120

SERIES 700 MODEL D POWER LINE REGULATOR & CONDITIONER

The Series 700 Model D combines the characteristics of the Series 500 Line Voltage Regulator and the Series 600 Max-E-Isolation Transformer to solve all power line disturbances except blackouts. The Series 700 Power Line Regulator and Conditioner operates at an overall efficiency in the order of 97% while holding output voltage to ±5% over an input voltage variation of +10%, −20%. Other regulation ranges are available as noted below.



CABINET OUTPUT DISTRIBUTION PANELS			
KVA	PHASE	OUTPUT DISTRIBUTION PANELS AVAILABLE	CABINET NO. AND DIMENSIONS
3, 5, 8 10, 15, 20, 25	Single	8	C-47588 21½″ x 29″ x 30″
3, 6, 9, 15	Three	8	C-47588 21½″ x 29″ x 30″
24, 30, 45	Three	12	C-47589 45″ x 29″ x 44″

SPECIFICATIONS

Line Regulation: Less than ±2% from no load to full load.
Response Time: ¼ Cycle
Correction Time: 1 Cycle for 100% Correction
Efficiency: 97% typical
Output Distortion: No spikes, adds less than 1.0% total harmonic distortion.
Operating Frequency: 60 Hertz, ±3 Hertz
KVA Rating: Single Phase 3, 5, 8, 10, 15, 20, 25
Three Phase 3, 6, 9, 15, 24, 30, 45
Voltage Monitor: Output Voltage Monitor indicates when input voltage is in or out of range.
Bypass Switch: Optional Bypass Switch available to bypass regulator portion of system.
Operating Temperautre: 0 degrees C to 40 degrees C
Transverse Mode Noise Attenuation: 3 db down to 600 Hertz. 40 db per decade to well below 50 db with resistive load.
Common Mode Noise Attenuation: 140 db
Audible Noise: 40 db to 50 db depending on size.
Logic Circuit: Microprocessor Based.

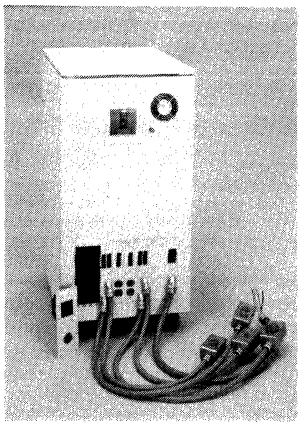
SERIES 800 MODEL D POWER PURIFICATION SYSTEM

This ferroresonant transformer protects sensitive electronic equipment against nearly all power line disturbances and problems including sags, surges, spikes, line noise and transients. The Series 800 provides a unique "ride-through" capability over a loss of input for one complete cycle.



CABINET OUTPUT DISTRIBUTION PANELS			
KVA	PHASE	OUTPUT DISTRIBUTION PANELS AVAILABLE	CABINET NO. AND DIMENSIONS
3, 5, 8, 10	Single	8	C-47588 21½″ x 29″ x 30″
15, 20	Single	12	C-47589 45″ x 29″ x 44″
25	Single	17	C-47590 56″ x 29″ x 44″

SPECIFICATIONS

Line Regulation: Output voltage will maintain constant to within ±3% with input voltage variations of +10% to −25%. In addition, usable voltages are available with an input range of +20% to −40%.

Load Regulation: The output voltage will maintain itself to within ±2% with output load variations of 0 to 100%.

Frequency Variations: A 1% change in line frequency from the nominal design frequency changes ouptut voltage approximately 1.5% in the same direciton as the frequency change.

Efficiency: Full load efficiency is in the order of 90% for standard input and output voltage levels.

Operating Temperature: −20 degrees C to +50 degrees C

Distortion: On harmonically neutralized systems harmonic content is 3% or less.

KVA Rating: Single Phase 3, 5, 8, 10, 15, 20, 25

Input/Output Voltages: The following input/output voltages are available:

Transverse Mode Noise Attenuation: 120 db

Common Mode Noise Attenuation: 140 db

Audible Noise: 45 to 50 db depending on size.

SINGLE PHASE	
INPUT VOLTAGE	OUTPUT VOLTAGE
208/240	120/240

SERIES 7000/ POWER DISTRIBUTION AND CONDITIONING SYSTEM

Controlled Power Company Series 7000 Power Distribution and Conditioning Systems provide conditioned, purified and reliable electrical power for: • Large and small computer installatoins • Data processing systems • Point of sale terminals • Multiple process and production programmable controllers • Sensitive medical test and diagnostic systems • Electronic laboratory test and control equipment • Any multiple, power sensitive, electronic installtaion.

Why Use A Series 7000 Power Distribution and Conditioning System?

The computer and electronic equipment industries have two special requirements that make the use of a Series 7000 Power Distribution and Conditioning System essential.

Computers and other electronic equipment operate by using a complex series of electrical impulses at speeds measured in nanoseconds. Power line transients, noise, brownouts, sags and surges in power can seriously affect these impulses resulting in scrambled results or equipment malfunction. Today, electrical power received directly from the power company is frequently subject to all of these problems.

Computers and other electronic installations are also subject to frequent change, expansion or rearrangement. An efficient, flexible method of distributing power to this equipment, without going through expensive, time consuming permanent wiring changes, greatly increases system flexibility while rdeucing total system cost.

The Advantages of Using Series 7000 Power Distribution Systems

INSTALLATION ADVANTAGES:

A centralized, pre-wired power distribution system provides:

- shorter installation time
- assured proper grounding
- reduced installation problems such as incorrect plugs, improper layout, improper phasing and many more
- easy accommodation of last minute planning changes
- easy device relocation resulting from layout errors
- growth with ease by simply adding flexible cables with the correct plugs

Most computer installations change every year with a major change or location move every three years. Series 7000 Power Distribution Systems greatly simplify such changes and moves.

Reliability Advantages

Series 7000 pre-engineered, pre-tested quality manufactured distribution systems provide:

- facotry assembly and pre-testing
- carefully selected and coordinated system components
- elimination of workmanship errors and variations in interpretation of requirements
- correct grounding techniques

Operating Adantages

A Series 7000 Power Distribution System offers:

- dramatic reduction in power related equipment problems through isolation regulation and noise attenuation of power disturbances
- flexible, adaptable power distribution for temporary or permanent changes without total system shutdown
- complete power system monitoring with fault readouts for rapid repairs, reducing lost time
- complete, full time electronic device protection with unit or system shutdown if necessary to prevent equipment damage

Economic Advantages

A Series 7000 Power Distribution System also offers a number of economic advantages.

- the system is portable and can be moved to a new location with the equipment
- a power distribution system is capital equipment, and receives capital equipment and invesmtent tax treatment
- protection of electronic system operation and equipment results in substantial cost savings in reliable system results and reduced maintenance and repair costs.

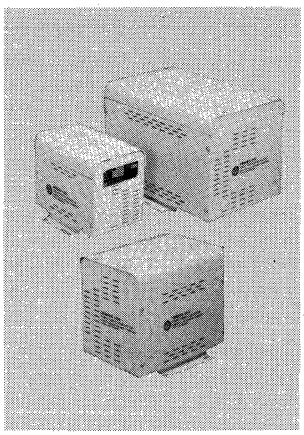
SERIES 800 MODEL P

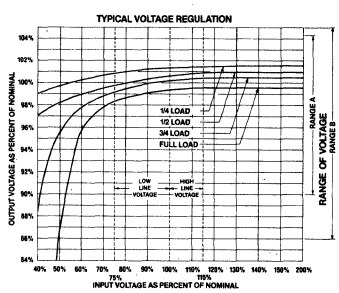
The Series 800 Model P is the solution to 99.5% of the problems defined at right: all but long duration power outages are solved. The regulating, saturating, isolation transformer will protect your sensitive electronic equipment against fluctuating voltages, short duration blackouts (1 cycle), brownouts, spikes and transients, all of the unexpected power problems that cost a company time and money.



SPECIFICATIONS

• Exceptional Regulation Bandwidth

The Model P regulation performance exceeds the performance of any product on the market today. The graph below illustrates the superiority of the product.



• **Protection Against Extreme Voltage Fluctuations and Irregularities:**

The Series 800 Model P will protect equipment when voltage drops to 50% of nominal or rises to 200% of nominal. Over this range, the output voltage will vary to some degree depending on the percent of load, but within usable limits.

• **Immunity to Distortion of Input Wave Form Irregularities:**

The input wave form can be distorted, and laden with transients. However, the output wave form is transient free and independent of the irregularities of the input. The input wave form can even be a square wave and still generate a good sine wave output. The oscillograph representations below are actual photographs of the input and output of a typical unit.

• **Unique "Ride Through" Capability:**

The output of the Model P does not go to zero with the loss of input power for a ¼ cycle (4 msec), a ½ cycle (8 msec) or even for a complete cycle (16.6 msec, depending on the load). The voltage from the Model P is generated essentially by a circuit operating as a powerful oscillator with energy stored in the unit. For this reason, the output is much more immune to the input than other regulating systems.

• **Isolation and Regulation in One Device:**

The Model P combines the common mode noise rejection and isolation capabilities of a multi-shielded transformer with regulating capability. In addition to rejecting common mode noise it virtually eliminates transverse noise and distortion on the power line. The Model P also has a step-up or step-down voltage capability which eliminates a step up/down transformer in many applications.

• **Voltage Recovery:**

The output voltage returns to 95% of nominal level within 2 cycles and to 100% within 3 cycles when going from no load to full load or vice-versa. Recovery from partial load changes is corrected in a shorter period of time.

• **Transverse-Mode Noise Attenuation:**

120 db

• **Common-Mode Noise Attenuation:**

140 db

ADVANTAGE SERIES 1000A
UNINTERRUPTIBLE POWER SYSTEM WITH POWER DISTRIBUTION & EXPANDABILITY

The Series1000A is a continuous duty, highly efficient, solid-state uninterruptible power system designed to provide 100% power protection during all phases of operation. Available in single phase, 4.5 KVA to 25 KVA.

Reliable Power Protection and Reliable Expandable Prescription Power

In the Normal Mode of operation (utility power is present) the Advantage provides completely conditioned and regulated power to the critical load. The upgrade ability permits KVA expansion in the field in less than a few hours.

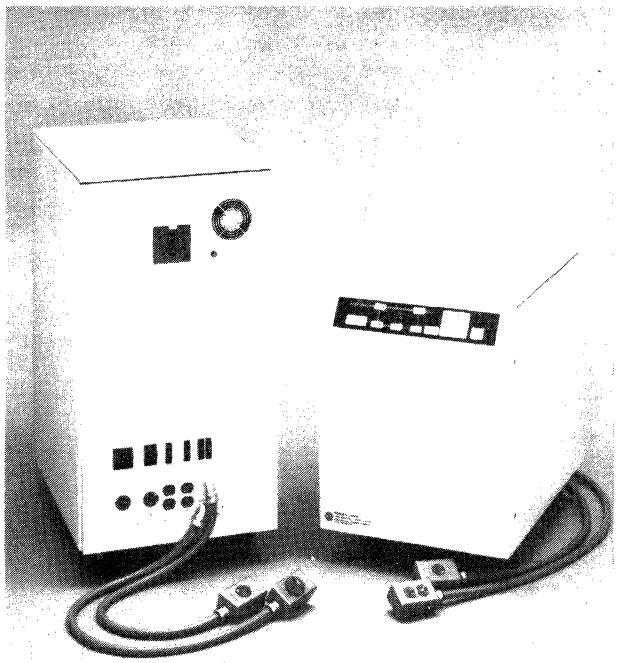
100% Uninterrupted Power

In the Emergency Mode of operation (power outage) battery power is fed through the Power Purification System so conditioned, regulated power is supplied to the critical load. The transition from Normal Mode to Emergency Mode takes place with no power interruption to the critical field.

Installation at a Fraction of the Cost

Because of the total distribution capability, installation costs are a fraction of the cost of installing a conventional UPS.

An efficient flexible method of distributing power is provided by the Advantage via exchangeable output distribution panels. The Advantage method of power distribution eliminates the high cost, time consuming method of permanent wiring changes incurred with a conventional installation. Flush mounted receptacles, flexible cable for hard wiring are available to distribute power to the equipment.



SPECIFICATIONS:

- Line Regulation: Output voltage is regulated to within ±3% of nominal with input voltage range of +20% to –25%. In addition, usable voltages are available with an input range of +20% to –40% (Applicable when in manual bypass or low battery condition for a limited time).
- Load Regulation: The output voltage will maintain itself to within 3% with output load variations of 0 to 100%.
- Overload: Will withstand an overlaod of 125% for ten minutes.
- Audible Noise: 45 to 55 db depending on size.
- Handles non-linear loads.

ADVANTAGE SERIES 1000C
UNINTERRUPTIBLE POWER SYSTEM

The Advantage Series 1000C Uninterruptible Power System performs the overall function of providing transient free, regulated AC power to the critical load during normal line power operation and during blackouts and brownouts. The Advantage offers a solid state inverter and long lasting battery pack, providing immunity to all line disturbances and power interruptions with no break in AC output power.

This product is designed for *Mini Computers, LAN's, Process Controllers, Telephone Systems, Electronic Cash Registers* and other sensitive electronic equipment. The Advantage is *compact in size, efficient, & has a low cost.*

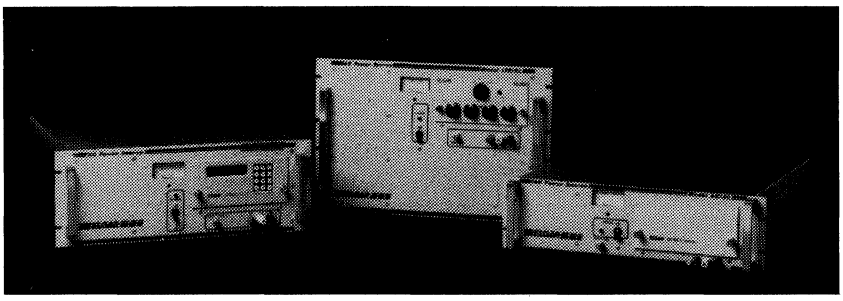
SL/SX Series AC Power Sources



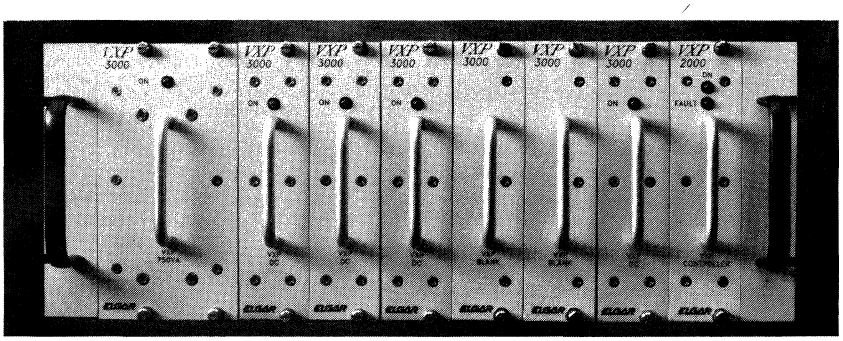
Elgar's SL Series solid-state frequency changers are small and lightweight in design. These linear power sources save critical panel space and money because they can provide up to 50% more power density and weigh nearly one-third less than most competitive models.

The SL Series is ideal for general purpose test applications, as well as ATE systems and avionics testing.

Elgar's SX Series AC linear power sources are designed to drive non-linear, rectifier loads. They meet all the electrical power requirements for the testing of modern switch-mode DC power supplies.

The 4:1 (or greater) crest factor capability which provides repetitive peak current up to 70A, makes the SX Series ideal for testing any equipment that causes a peak load on the AC power line.

VXP3000 Programmable Power System



Elgar's VXP3000 Programmable Power System is the state-of-the-art solution for test systems where high power density, small size and flexibility are the key priorities.

The unique chassis design employs 1.8 inch wide slots which accept one controller module and up to eight power modules or three 750VA AC modules. The ability to provide both AC and DC power in one chassis and at one GPIB address is further enhanced by an Auxiliary Drive Module (ADM). This module allows the VXP controller to program external bulk or high power DC power supplies as if they were standard VXP power modules.

CONTROLLERS
IEEE-488 controller With ABLE or CIIL (MATE) syntax
Slave controller For use with expansion chassis or as an interface to a VXP1000 power programmer located in a VXI chassis

DC POWER MODULES
Output voltage range 0-7, 10, 14, 20, 32, 40, 60, 100 and 200 VDC 1.8" standard width (up to 8 modules per chassis)
Full rated output power 200 W for 10, 14, 20, 32, 40, 60, 100 and 200 VDC modules; 140 W for 7 VDC module. 1.5 KW, 4-side module available at 100 VDC
Parallelable For load sharing (available for 140W and 200W modules)
Series connectable Up to 400 VDC

AC POWER MODULES
Full rated output power 750 VA
Output voltage range 0-135 VAC, 3.6" double-wide size
Frequency range 350-999.9 Hz (45-350Hz with reduced specifications)
Configurable For up to 2250 VAC single-phase or up to 6750 VA three-phase
Parallelable For higher power requirements by using the special plug-in VXP-LSM module
Auxiliary output A 0-26 VAC/2 A output proportional to the main output voltages provided. An optional 5 VAC/5A auxiliary output is available.
Fast current limit protection Against short circuits
Efficiency Over 80%

NEW Digitally Modulated AC Power Systems

Elgar/Ling Digitally Modulated AC (DMAC) power systems with"linear" specifications offer unmatched efficiency and flexibility in a wide range of switching AC applications. They can be used for upgrading or replacing motor generators and their quiet operation means they can be located next to test stands or in control rooms without disturbing operators.

With optional Elgar Plug-In Programmers (PIP), DMAC's can serve as powerful Automatic Test Equipment (ATE) tools. A PIP can be installed in a DMAC to furnish full IEEE listener/talker capabilities and allow complete control of voltage on any phase, frequency or phase angle.

Modular construction produces a low MTTR and an extremely wide range of single and three-phase systems in 6 KVA steps from 18 to 260 KVA. DMAC's have the output purity standard normally found in a linear supply of 0.5% Total Harmonic Distortion (THD).

DMAC Series AC power sources drive any load from zero to unity power factor and can provide uninterruptible power for UPS applications when ordered with optional battery backup. With higher efficiency at all load levels, DMAC's use less commercial power and generate less heat, resulting in significant operating cost savings.

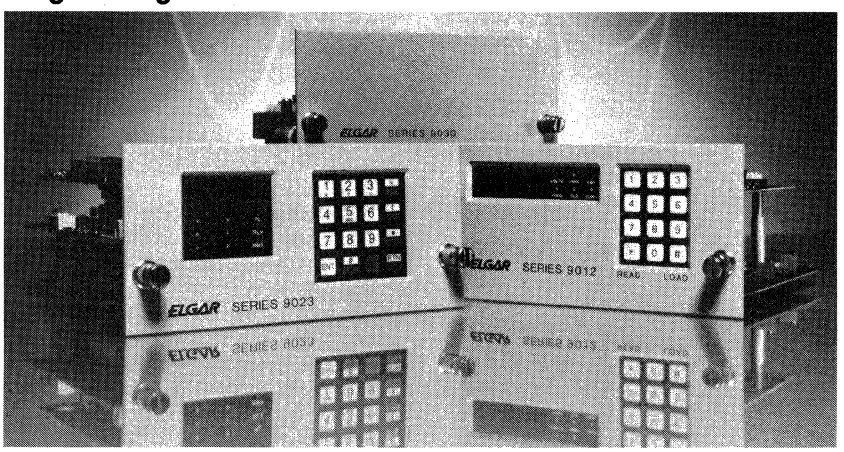
VXP1000

Elgar's VXP1000 Power Programmer allows the user full integration of Elgar AC & DC Power Systems and loads into the VXIbus environment. The VXP1000 is an interface card which co-resides in any VXI instrument chassis, slot 1-11. The PowerProgrammer operates with slightly modified versions of Elgar's standard AC Programmable SL/SX, DC Programmable AT8000 and VXP3000 PowerSystems.

Size: C Module
Interface Capability of three AC or DC power systems from one card

In addition to the standard AC & DC Programmable features, the VXP1000 provides the user exceptional capability for automatic calibration, timed-based event programming and continuous power source monitoring.

Plug in Programmers



Programmable Oscillators

Plug-in Programmable oscillators (PIP's) which provide the interface between a computer and any Elgar AC Power Source System, are available for programming frequency, voltage amplitude, and phase angle in multi-phase systems. Elgar's PIP's are microprocessor controlled and offer more power options than ever before. Our latest PIP provides programmable current limiting and is CIIL compatible to meet Air Force MATE/TMA specifications.

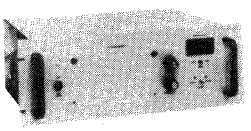
Elgar's Atlas Based Language Extension (ABLE) makes programming simple via IEEE-488 (GPIB). Most PIP models provide keypad and LED read-out for convenient local control. And with Elgar's PIP, rack space is cut to a bare minimum since it is designed as a plug-in component for AC Power Sources.

PIP704 Transient Generator

The PIP704 Plug-In Programmable Transient Generator is designed to meet the MIL-STD-704 (revisions A through D) "Aircraft Electrical Power Characteristics" test requirements for 400Hz power. It's also an effective tool for Bu-Ships 1399 testing and for general purpose testing that requires AC transient generation.

The PIP704 can be programmed and monitored locally or remotely for simultaneous or independent transients including 704D ramps, voltage surges/sags, frequency deviation, voltage phase differentiation and waveform distortion in any single-phase or in all three phases. Standard frequency range is 45Hz to 1 KHz with voltage drop-outs from 1 millisecond to 222.2 seconds.

The New EL Series AC Frequency Changers



Now You Can Meet Smaller Power Conversion Applications That Do Not Require Critical Test and Measurement Standards

The Elgar El Series utilizes switching technology. These frequency changers are specially designed to power electronic equipment, motors and other high current-consuming loads.

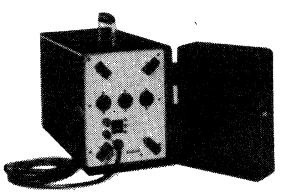
We offer a wide selection of fixed and variable frequencies with a full or narrow range voltage control.

The output of all models is transformer isolated. The frequency is either fixed or continuously variable. On fixed frequency models, the output voltage is fixed at 115VAC or 230VAC. On variable frequency models, the output is adjustable from 0-130VAC or 0-260VAC.

Features:

- 1.2-15KVA
- Peak current to 3.0 X RMS
- Zero to unity power factor
- 200 microseconds response time for 100% load changes
- Soft start circuit prevents power line disruptions
- Available in 6 models - single and three phase

Convert Any Voltage/Frequency to 117VAC/60Hz



Elgar's 1.0 KVA portable AC power source converts unstable, "dirty" AC power anywhere, worldwide into regulated 117VAC, 60 Hz sine-wave power without range switching or other adjustments.

The GPS 1000 can accept 45-450Hz with voltage ranging from 85VAC to 140VAC and 170VAC to 280VAC.

Three convenient outlets are included. Optional input adapter cables are available for plug-in power anywhere in the world. The GPS1000 weighs only 44 pounds. Efficiency is 80%; operation is quiet and cool.

Applications include powering of:

- Data processing, communications or other sensitive electronic equipment.
- Unstable generator outputs at construction sites.
- Other remote sites anywhere in the world.

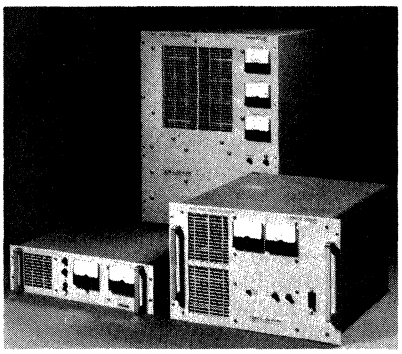
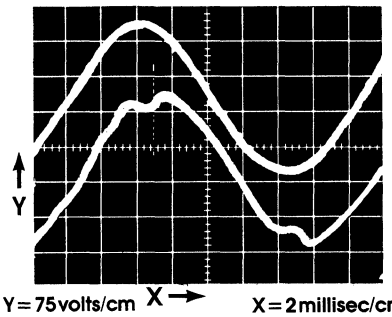
Ultra Precision Line Contitioners



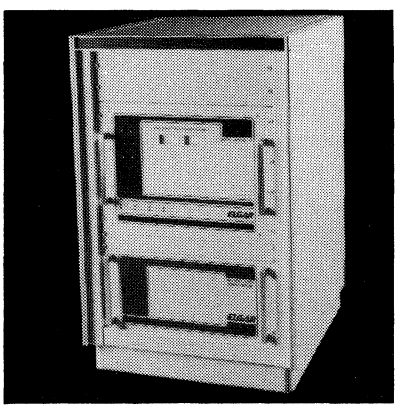
Elgar's Ultra Precision AC Line Conditioners provide precise, clean AC power to critical loads by eliminating high-speed AC line and load transients and distortion as well as providing precise regulation. These versatile instruments have response times 5,000 times faster than the fastest conventional AC line regulators and line isolation of 70 to 100dB, far superior to mere isolation transformers. All Elgar AC line conditioners are designed for continuous operation and are contained in rack-mount enclosures. Front panel controls include meters to monitor input and output voltages and output load current, an overload indicator and an input circuit breaker.

WAVEFORM COMPARISION CHART



The lower trace shows a very distorted input AC line waveform with a 75 volt peak spike riding on it. The upper trace shows the output of the Elgar AC Line Conditioner which shows no trace of the AC input anomalies.

Uninterruptible Power Systems



1 and 3 KVA Cabinet System

Elgar solid-state, non-ferroresonant Uniterruptible Power Systems (UPS) combine a battery charger, battery bank, solid-state inverter and bypass switch to provide clean, continuous power to critical loads.

Elgar UPS's are on-line systems so that power is continuously supplied through an inverter. Upon power failure, the battery automatically supplies the load with no switching.

In case of overload, or in the unlikely event of a component failure within the Uninterruptible Power System, the bypass switch is activated. The critical load automatically transfers to the input AC line or bypass input AC. All Elgar solidstate UPS's are available with a static bypass switch (SBS) that can make the transfer with less than 1ms interruption.

102-1B and 302-1B Uninterruptible Power System

Elgar's 102-1B and 302-1B UPS's are rugged, reliable rack-mount units with excellent dynamic characteristics and an extremely wide (+10% /-20%) AC input voltage range.

The UPS 102-1B is a 1 KW, 1 KVA, 60Hz system, while the UPS 302-1B is a 3 KW, 3 KVA, 60 Hz system. All other specifications are the same.

502-1T Uninterruptible Power System

Elgar's free-standing 5 KW/5 KVA UPS 502-1T provides excellent dynamic characteristics and quiet (56 dBa at 1 meter) operation. It's specifically designed for compatibility with micro and minicomputers in industrial and scientific installations — eliminating power line problems without major modifications to facilities or air conditioning systems. Its small size (40" high with a 24" by 30" footprint) saves space in confined environments. The 502-1T employs a high-efficiency PWM static inverter to minimize cooling requirements.

Global Uninterruptible Power System

Elgar has developed the world's most versatile Global Uninterruptible Power System (GUPS). It can operate from:

- Any available AC input power,
- a 28 VDC input or
- From its own internal battery for a minimum of 5 minutes in the event of an extended power failure.

Ruggedized military-grade construction for portable transit case or rack mounting make it the ideal international power conversion system for computers, communications equipment, instrumentation, oil logging equipment, field-environment laboratory instrumentation, remote chart-recorder operation, data acquisition equipment and motor generator output conditioning.

Maximum output rating 1.2KVA
Output voltage 120 VAC ±2%
Output frequency 60Hz ±1% crystal controlled
Line & Load regulation ±2%
Load power factor 0 lead 0 lag
RMS current 10 amps
Efficiency 80% from AC line, 70% from DC input
Input frequency 45-450 Hz
Input voltage 95-140 VAC, 190-280 VAC, 24-37 VDC
Weight 97 lbs including internal batteries
Dimensions H-W-D Rack configuration 7"-19"-21"

INVERTERS—SILENT AC POWER ANYWHERE

Provide INVERSION of DC Power to Pure Sine Wave AC Power.

Energy, Ltd. presents a superior line of solid state inverters from 50VA to 1KVA. Our state-of-the-art inverters supply precise frequency control, and are used wherever it is necessary to obtain completely noise-free, pure sine wave, alternating current power, from a DC source.

With stable, low-distortion output, quiet operation, and light-weight portability, Energy's inverters are designed for applicatoins requiring the highest reliability standards, such as video and telecommunications, (mobile, marine, and fixed) medical and computer equipment, microwave systems, motors, and instrumentation.

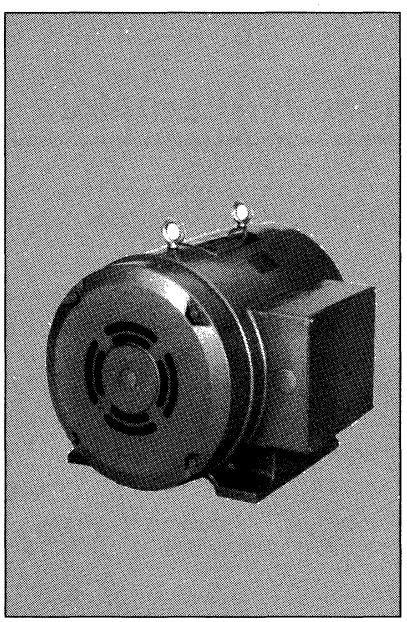
FREQUENCY CONVERTERS SERIES 30 60 TO 400 / 50 TO 400 HZ



Designed for use in any application requiring a clean, reliable source of 400 Hz power. Inherent regulation provides excellent voltage and frequency stability. Exceptional MTBF with minimal maintenance. Compact and quiet, motor and generator are assembled horizontally in a common housing.

Specifications

Power Ratings: 150 VA to 3 KVA

Motor Type: Induction

Alternator Type: Permanent magnet excitation

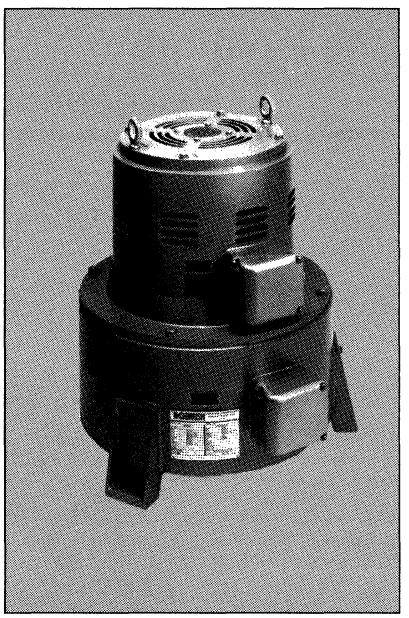
Waveform: THD less than 4% (usually)

Ambient Temp.: -20°C to +50°C

Approx. Dimensions: 15"L x 14"W x 12" H

Standard and non-standard input/output voltages available.

FREQUENCY CONVERTERS SERIES 33 60 TO 400 / 50 TO 400 HZ



Designed for use in any application requiring a clean, reliable source of 400 Hz power. Inherent regulation provides excellent voltage and frequency stability. Exceptional MTBF with minimal maintenance. Motor and generator are assembled vertically.

Specifications

Power Ratings: 2.5 to 20 KVA

Motor Type: Induction

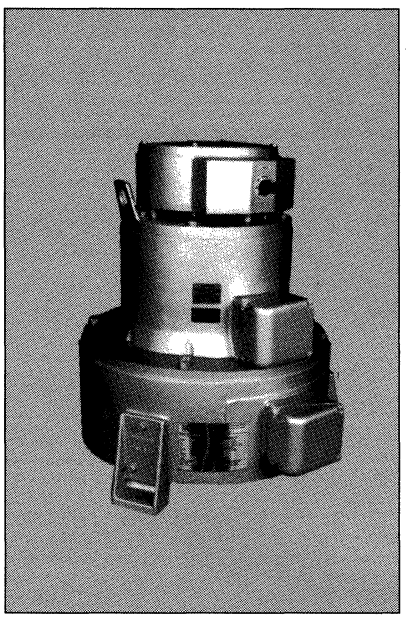
Alternator Type: Permanent magnet excitation

Waveform: THD less than 4%

Ambient Temp.: -20°C to +50°C

Standard and non-standard input/output voltages available.

FREQUENCY CONVERTERS SERIES 39 400 HZ, VOLTAGE REGULATED



Ideal for any application requiring a clean, regulated source of 400 Hz power. All units include a voltage regulator which maintains output at ±1.5%, from NL to FL. Consists of a motor and generator set assembled vertically.

Specifications

Power Ratings: 5 to 15 KVA

Motor Type: Induction

Alternator Type: Permanent magnet excitation

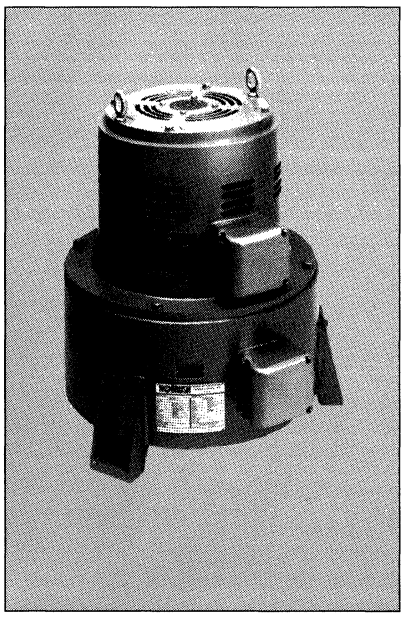
Waveform: THD less than 4%

Ambient Temp.: -20°C to +50°C

Standard and non-standard input/output voltages available.

9617 Center Street, P.O. Box 70, Manassas, VA 22110, Fax 703-368-1078
Call 1-800-523-9938 for complete specifications.

FREQUENCY CONVERTERS 400 HZ, EXACT



Ideal for applications requiring a clean, reliable source of exact 400 Hz power, NL to FL. Both voltage regulated and standard models available. Consists of a motor and generator set, assembled horizontally for 2.5 and 3 KVA units; larger units assembled vertically.

Specifications

Power Ratings: 2.5 to 12.5 KVA

Motor Type: Synduction

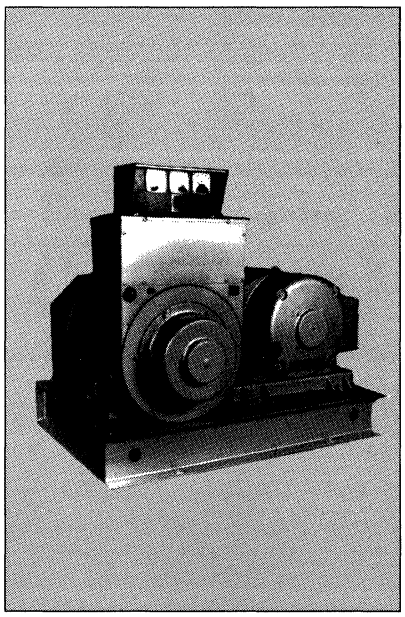
Alternator Type: Permanent magnet excitation

Waveform: THD less than 4%

Ambient Temp.: -20°C to +50°C

Standard and non-standard input/output voltages available.

FREQUENCY CONVERTERS SERIES 37 50 TO 60 / 60 TO 50 HZ



Provides accurate and stable output power, as well as complete isolation from switching transients, voltage fluctuations, and line noise. Units allow for compatibility between U.S. and International power standards. Consists of a separate motor and brushless alternator, mounted on a common base.

Specifications

Power Ratings: 2.5 to 125 KVA

Motor Type:
High efficiency induction
(Synduction optional on 2.5 to 25 KVA)

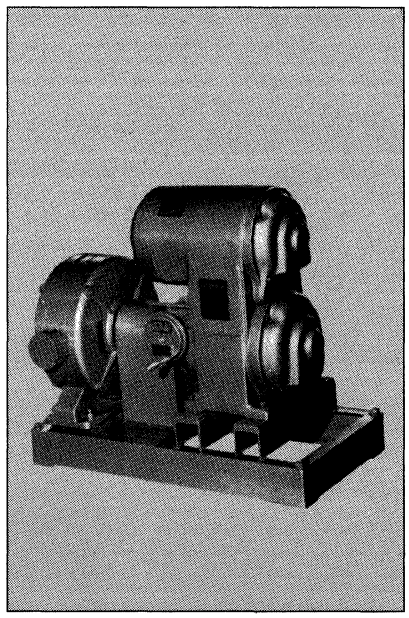
Alternator Type: Synchronous rotating rectifier with voltage regulator mounted.

Waveform: THD less than 5%

Ambient Temp.: Maximum 40°C

Standard and non-standard input/output voltages available.

VARIABLE FREQUENCY CONVERTERS SERIES 32



Allows conversion of 60 or 50 Hz power to a wide range of output frequencies. Consists of an induction motor variable speed drive coupled to a brushless generator, mounted on a common base. Ideal for test applications where power with continuously variable output frequency is needed.

Specifications

Power Ratings: .5 to 62.5 KVA

Frequency: 47 to 63 Hz or 380 to 420 Hz

Motor Type: Induction

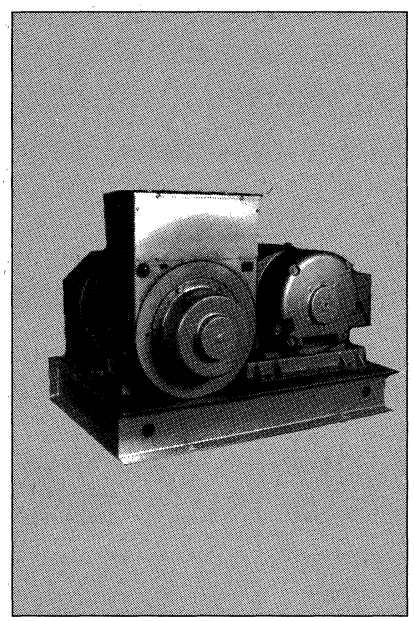
Waveform: THD less than 5%

Ambient Temp.: -20°C to +40°C

Standard and non-standard input/output voltages available.

9617 Center Street, P.O. Box 70, Manassas, VA 22110, Fax 703-368-1078
Call 1-800-523-9938 for complete specifications.

FREQUENCY CONVERTERS SERIES 37 400 HZ, HIGH-POWER



Designed for applications requiring higher output ratings of 400 Hz power. Provides accurate, reliable power and complete isolation from voltage fluctuations, switching transients, and line noise. Consists of a separate motor and brushless alternator, mounted on a common base.

Specifications

Power Ratings: 25 to 75 KVA

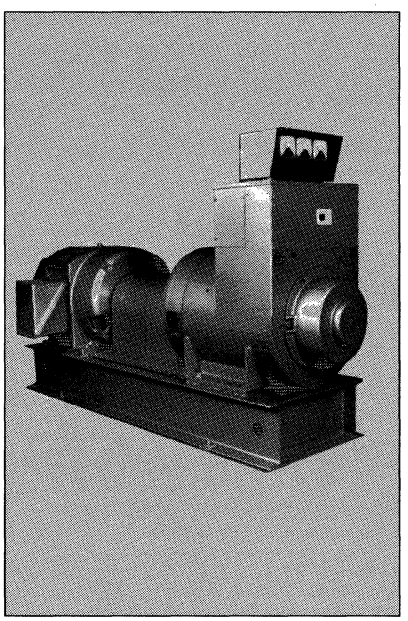
Motor Type: High efficiency induction

Waveform: THD less than 5%

Ambient Temp.: Maximum 40°C

Standard and non-standard input/output voltages available.

POWER CONDITIONERS SERIES 37 60 TO 60 HZ



Provides complete isolation between the load and input power, eliminating voltage fluctuations, switching transients and line noise. Maintains approx. 100 milliseconds of ridethrough during power outages. Consists of a coupled in-line motor and brushless alternator, mounted on a common base.

Specifications

Power Ratings: 2.5 to 125 KVA

Motor Type:
High efficiency induction
(Synduction optional on 2.5 to 25 KVA)

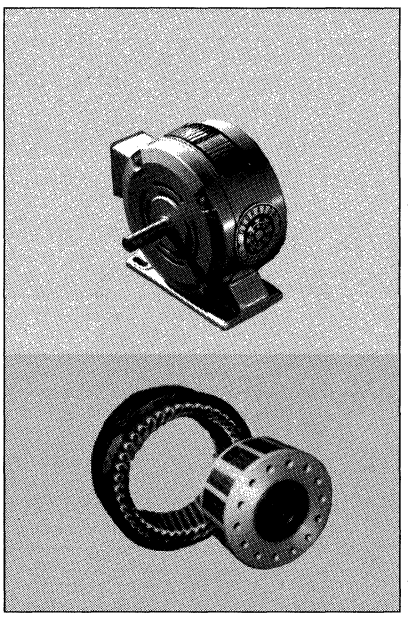
Alternator Type: Synchronous rotating rectifier with voltage regulator mounted.

Waveform: THD less than 5%

Ambient Temp.: Maximum 40°C

Standard and non-standard input/output voltages available.

PM ALTERNATORS ROTORS AND STATORS SERIES 36 AND 38



NoBrush® alternators may be used wherever rotational mechanical energy is available for conversion into DC or high-frequency AC power. Standard models as well as units built to customer specs available with or without aluminum alloy housings or bearings.

The high efficiency, compact size and rugged design of these alternators make them ideal for use in special industrial applications, main generator pilot excitation or tachometer feedback, and high voltage isolation.

Specifications

Power Ratings: .25 to 20 KVA

Frequency: 50 to 1000 Hz

9617 Center Street, P.O. Box 70, Manassas, VA 22110, Fax 703-368-1078

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

1) BYPASS SWITCH
2) TRANSIENT FUNCTION
3) MAIN CIRCUIT BREAKER

- INDIVIDUAL PHASE REGULATION AVAILABLE FOR THREE PHASE UNITS
- 99% EFFICIENT
- NO WAVEFORM DISTORTION
- VERY LOW INTERNAL IMPEDANCE
- NO PHASE SHIFT
- NO EFFECT ON POWER FACTOR
- UP TO 20 VOLTS PER SECOND CORRECTION RATE
- TEMPERATURE RANGE - 10 °C to + 50° C
- OUTPUT ACCURACY ± 1% ADJUSTABLE TO ± 5%
- VOLTMETER WITH EXPANDED SCALE
- DRY TYPE, CONVECTION COOLED

The Peschel Automatic Voltage Regulator is a 50/60 Hz., wye connected, dry-type, convection cooled, ac line voltage regulator. It is designed to maintain line voltage to within ±1% of nominal, with an input voltage variation of +9/-14% or ±20%, due to line and/or load changes. The PAVR introduces no harmful waveform distortion, has a very low internal impedance, causes no phase shift, is insensitive to load power factor, has no effect on system power factor, and is approx. 99% efficient.

The PAVR is neither an impedance changing nor a ferroresonant device and uses no SCRs. It is an electro-mechanical device using electro-magnetic transformer action to regulate. Its high efficiency and reliability make it the best solution to today's voltage problems.

Single Phase Input Voltage Range: +9%/-14% of Nominal

*Includes battery-charging requirements and 125% overload capacity with 0.8 power factor load.
**Nominal with ac load at 0.8 power factor for 120Vdc nominal inverter input.

The ultimate in line conditioning equipment for heavy duty use in industrial applications, the Hitran HD Series UPS eliminates power outages, line interruptions, brownouts and short term transients such as line spikes and sags. It protects the load against line disturbances resulting from switching in the transmission system, clearing of line faults, starting of motor loads and even lightning strikes.

The Hitran HD Series is intended for critical process and/or manufacturing control computer installations which cannot tolerate power interruption either in an emergency or even for normal maintenance of the UPS or batteries.

Every effort has been made to build a family of systems which offer the highest levels of reliability and, at the same time, are safe and easy to test, service, and maintain without ever disrupting power to the critical load.

Hitran HD series uninterruptible power systems are three phase input/single phase output. They are intended for 120V, 60Hz loads with either sinusoidal or nonsinusoidal current wave form characteristics and excessive surge current requirements.

Electrical Characteristics & System Requirements

Rectifier/Battery Charger

- Input Voltage Variations: ±10%
- Input Frequency: ±5%
- Transient Protection: As high as 4000V for 10 microseconds with 40 ohms or greater transient source impedance.
- Walk-in: 3 seconds from zero to full load.

Inverter

- Overload Design Capability: 125% of full load current for 10 minutes; 150% for 30 seconds; 200% for 0.1 seconds.
- Output Voltage Regulation: ±3% of output voltage steady state for line, load and temperature.
- Output Voltage Transient Response and Recovery: Less than ±15% with recovery to ±3% within 5 cycles
- Output Harmonic Distortion: <5%
- Output Power Rating: Rated KVA from 0.8 lag to 0.8 lead power factor range.
- Frequency Stability: 0.25%
- Output Frequency Regulation: 1.0%

Static Transfer Switch

- No-break forward or reverse transfer capability in less than ¼ cycle

Manual Maintenance Bypass Switch

- Manual, no-break, forward and reverse transfer capability
- Isolates the static switch and inverter from the bypass line and load

Test Load Terminals

- For testing all functions of inverter without interrupting output

Noise Level

Less than 65dBA sound power level at a distance of five feet from enclosure

Ventilation

Natural convection

Control Panel — Status/Alarm/Command

The control panel shows the complete status of the system at a glance via:
- LED indicators for circuit status of all major system operating parameters
- Digital panel meters for critical voltages, amperages and frequencies
- LED alarm indicators for all critical system conditions. Alarms are also audible and can be connected to remote annunciators via a terminal block.

Commands may be entered through the control panel to transfer load to bypass or inverter, cancel and reset audible alarms, reset inverter, test indicator LEDs and to reset the transfer counter display. For security, load transfer commands may be disabled by an internal switch.

System Options

- Remote status alarm panel
- Special input/output voltages

Batteries, Racks & Accessories

Twenty-year lead-calcium batteries are normally supplied mounted in a separate two-tier steel rack. Other battery types are available on request.

Designs and specifications subject to change without notice.

SFR SERIES — SINUSOIDAL FERRORESONANT REGULATOR

The SFR provides low distortion, sinusoidal, computer grade power. It provides a high degree of electrical noise rejection as well as output voltage regulation. Designed to eliminate power line problems caused by brownouts, short term transients and electrical noise, the SFR protects against switching disturbances, clearing of line faults, starting of motor loads and lightning strikes.

Standard Features

- Computer grade sinusoidal output - less than 5% harmonic distortion.
- Electrical noise rejection - Common Mode: greater than 120dB, 1 KHz to 1MHz. - Transverse Mode: greater than 60dB, 10KHz to 1MHz.
- Wide input voltage range - +10%, −20% of nominal input
- Tightly regulated output - ±1% of nominal output voltage.
- Input to Output Coupling Capacitance - Less than 0.005pF.
- Operating Temperature - 0-50°C.

Electrical Specifications

Input

- Nominal Standard Voltages - 1φ: 120, 208, 240, 480 (+10, −20%)
- Frequency - 60Hz or 50Hz ±2Hz.

Output

- 1φ - 120/240V ±1%
- Frequency - Same as Input.
- Regulation - Static: ±1%; Dynamic: ±4% with recovery to ±1% in 50ms.
- Load PF - 0.8 lagging
- Overload Recovery - Automatic within 50ms.
- Ride Through - Continuous power during line outages lasting as long as 25ms (1.5 cycles).
- Protection - Self current limiting
- Efficiency - Greater than 90%

Complete Line Conditioner Systems

The SFR Series is also available as a Complete Line Conditioner System. It includes all the standard features listed plus the following accessories:

- *Output Ammeter and Voltmeter*
- *Input Circuit Breaker*
- *Input Power "ON" Indicating Light*
- *Output Fusing and Receptacles*
- *Input Receptacles or Line Cord*
- *19-inch Rack Mount or Free-Standing Assembly*

UIS SERIES — ULTIMATE ISOLATION SYSTEM

The UIS effectively eliminates common-mode and transverse-mode power line noise in transformer applications for computers, programmable controllers and sensitive instruments.

Standard Features

- High degree of electrical noise rejection,- Common-mode: greater than 140dB, 1KHz to 1Mhz; Transverse-mode: greater than 60db, 10KHz to 1MHz.
- Input to output capacitance coupling - 0.001pF
- DC insulation resistance - 10,000MΩ
- Dielectric strength - 4000Vac min.
- Operating Temperature - 0-50°C
- Efficiency - 97% min. at full load.
- Line Cord & Output Receptacles - Standard on 120V single phase models up through 2.4KVA.

INDUSTRIAL TEST EQUIPMENT COMPANY, INC.

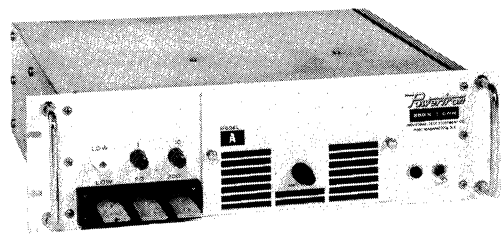
Powertron® AC Current Sources

Constant Current AC Supplies

In addition to constant voltage amplifiers a full line of constant current amplifiers is available. The inherent ability of these amplifiers to maintain a preset current through a load whose impedance may vary makes them ideally suited tot he testing of ammeters, wattmeters, relays circuit breakers, current transformers, and other current sensitive devices. These amplifiers may be driven by the plug-in oscillators. All amplifiers are protected for open load circuit conditions.



GENERAL SPECIFICATIONS:

Output Frequency: Determined by plug-in oscillator.

Current Regulation: ± 1% for loads ranging from short circuit to maximum rate load impedance for the respective amplifier.

Output Distortion: Less than 1%

Constant current amplifiers may be used with similar outputs in parallel when it is desired to increase the current capacity. Constant current supplies may also be used for 3ϕ wye connected load applications. As the standard output transformers may not always provide the optimum current range and compliance voltage, special output transformers may be supplied to meet user requirements.

MODEL	CURRENT AMPS	NUMBER OF RANGES	COMPLIANCE VOLTS
250S-1-CR	0–15	five	7.0
500S-1-CR	0–3	five	7.0

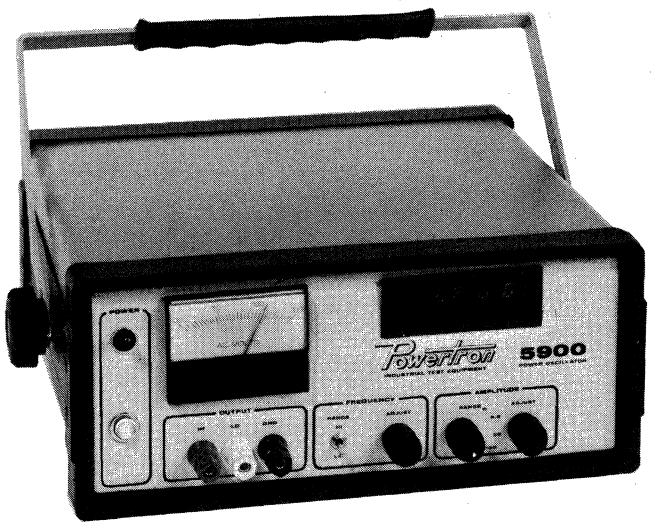
Powertron® Sine Wave Power Supply



Model 5900 Portable

GENERAL SPECIFICATIONS

Output:	Low Range	0 to 8.5 V @ 8.2 A
	Middle Range	0 to 38 V @ 1.8 A
	High Range	0 to 130 V @ .53 A
Power:	Max	70 VA
	Continuous	50 VA
Frequency:	Low Range	45 to 2 KHz
	Middle Range	2K to 19.99 KHz
	Also available with fixed frequency output.	
Distortion		0.3% typ.
Power Requirements		120 V 50 to 400Hz
Dimensions (inches)		12-1/4 x 5-1/4 x 12-1/2
Weight		23 lbs.

Available on Special Order

- With Fixed Frequency
- With 260 V Output

THE "STANDARD" OF THE INDUSTRY SINCE 1929

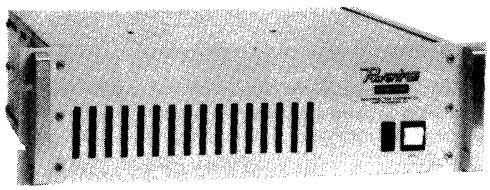
INDUSTRIAL TEST EQUIPMENT COMPANY, INC.

Powertron® Frequency Converters



Convert the AC line frequency to other frequencies for aviation and foreign equipment power.

GENERAL SPECIFICATIONS:

Input power.....115/230 V @ 50 Hz, 60 Hz, or 400 Hz

Distortion.....Less than 1%

Output Voltage.....Adjustable 110 – 130 V AC
220 – 260 V AC on request

Protection.....Short Circuit, overheat

MODEL #	INPUT POWER
80C–* 250C–* 500C–* 1000C–*	120 or 240 Volts 50, 60 or 400 Hz Single Phase
1500C–* 2000C–* 3000C–*	3 Phase 208 VOLTS 50 or 60 Hz

The model # designates the output watts. The " * " designates the output frequency. (The "C" signifies "converter".)

For example, model # 250C-400 is a converter with a 250 watt, 400 Hz output.

ELECTRO-PAC®

Uninterruptible Power Systems

Continuous Regulated AC Power

ELECTRO-PAC Series E power systems are reliable, ferroresonant designs providing true uninterruptible AC power for critical control and communication applications. The system consists of an electronically regulated battery charger, sine wave inverter, a fast acting static power switch and a storage battery bank. The Series E system protects against outages and blackouts; voltage sags, surges, spikes and transients; electrical noise; frequency deviation and wave form distortion. The design also provides inherent protection from momentary overloads and short circuits. A storage battery bank is specified to match the back-up time required by the application.

Quality Features

- *Pure sine wave output.*
- *Regulates, filters & conditions power . . . continuously.*
- *Standard capacities 1 - 20 kVA.*
- *Regulation ±2%.*
- *Up to 85% inverter efficiency.*
- *High output battery charger.*
- *Soft-start charger circuitry.*
- *Overload and short circuit protected.*
- *High quality meters.*
- *Input circuit breakers.*
- *Seven operation indicator lights.*
- *Five alarm contacts.*
- *Full accessibility for service.*
- *Reliable convection cooling.*
- *Class H insulation on magnetics.*

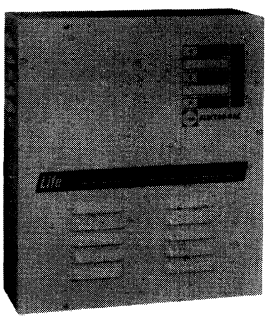
UPS

All *ICS* - Built Power Systems are Made in The United States of America

Lifeline® Uninterruptible Power



Always on-line with regulated, clean power.

LIFELINE® UPS systems provide economical, no-break AC power, protecting micro computers from power outages, line noise and voltage fluctuations which cause data losses.

Power Conditioner built-in.

LIFELINE delivers filtered, conditioned, regulated AC sine wave all the time, not just when the utility power is out. Patented circuit gives you full featured UPS at an affordable price.

Quality Features

- *Instant response. No power break.*
- *Up to 90% efficiency.*
- *Capacities from 200 VA or 600 VA.*
- *Maintenance-Free internal battery.*
- *Operates from standard office outlets.**
- *Illuminated status indicators.*
- *Input Voltage: 120 VAC, +10%, −15%, 60 Hz.*
- *Output Voltage: 120 VAC, ±3%, 60 Hz.*

Additional hours of run time can be achieved with external batteries, and/or chargers.

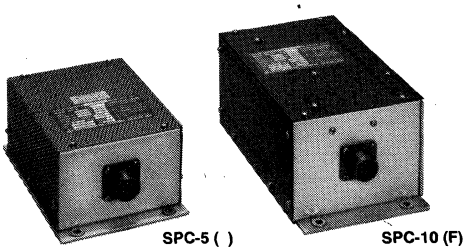
TSO'D 400 Hz STATIC INVERTER

The KGS ELECTRONIC'S static inverter utilizes solid state circuitry to convert 28 VDC to 115 VAC, 400 Hz sine wave power. Design features include sine to sine or square to sine wave power conversion permitting lightweight and reliable operation.



SPC-5 ( ) SPC-10 (F)

GENERAL SPECIFICATIONS

Input Voltage:	20 to 32 VDC
Output Voltage:	115 VAC and/or 26 VAC
Phase/Waveform:	Single/Sine Wave
Frequency:	400 Hz ± 1%
Ampl. Distortion:	Less than 7% (3% typical)
Power Factor:	0.8 to – 0.95
Input Overvoltage:	Operates up to 37 VDC input while supplying full rated VA output power. Output voltage under this condition is 115 VAC + 5%, – 7%
Input Transient:	Withstands transients of 88 volts lasting 1 millisecond on the 28 VDC input line
Overload & Short-Circuit Protection:	Withstands transient damage or degradation load exceeding 150% of rated output to an output dead short. Inverter delivers rated output on removal of above condition
Altitude:	45,000 ft.
Temperature:	– 65°F to + 160°F (– 55°C to + 71°C)
Humidity:	Tested to greater than 95% for 10 days, temperature was cycled between 75°F to 160°F
Environmental:	Meets RTCA Paper DO-160 Env. Cat. D2BREXXXXSXBBBA

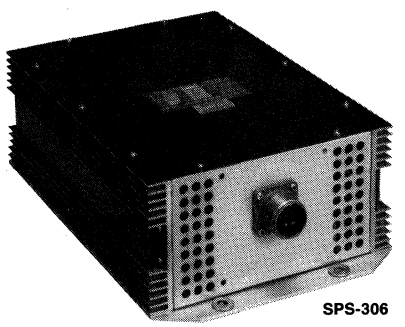
TSO'D 60 Hz/50 Hz STATIC INVERTER

These inverters are particularly applicable as a source of 60 Hz power for the operation of Projectors, Tape Records, TV systems, Typewriters, on Aircraft that have a 28 Volt DC electrical system. For applications requiring greater power, these inverters can be paralleled for higher output.
Inverters available in various voltages, frequency and power are listed in the table below.



SPS-306

GENERAL SPECIFICATIONS

Input voltage:	1. 28 VDC ± 2 Volts, 14 VDC for SPS-316 2. Withstands 88 Volt Transient for 1 millisecond
Power Factor:	0.8 to 1.0
Amplitude Distortion:	Less than 7%
Wave Form:	Sine
Phase:	Single
Short-Circuit:	Withstand for 1 minute or longer
Temperature:	– 65°F to + 160°F (– 55°C to + 70°C)
Altitude:	45,000 ft.

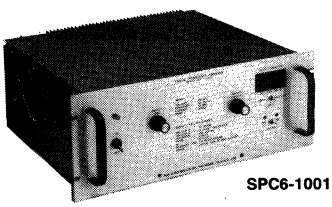
FREQUENCY CHANGER
MODEL SPC-6-( ) SERIES 50 to 60 Hz to 400 Hz

KGS ELECTRONICS' solid state frequency changer converts 115 VAC 50 to 60 Hz to 115 VAC 400 Hz sine wave power. These frequency changers are suitable for use on test benches or labs to check radars, compasses, gyros, synchros, fuel flow gauges, etc. SPC-6-750 is single phase output. SPC-6-1000-3φ is three (3) phase output. Output is monitored via analog meter and is adjustable from 105 to 126 VAC line to neutral. Amplitude distortion is typically 2%.
For SPC-2250-3pH the input is 3 phase 47 to 440 Hz and the output is 3 Phase WYE 400 Hz fixed voltage and frequency.



SPC6-1001

KIK AC SOURCES

AC Product Qualification Testing

Via GPIB or Local Remote Control • Full Talker/Listener

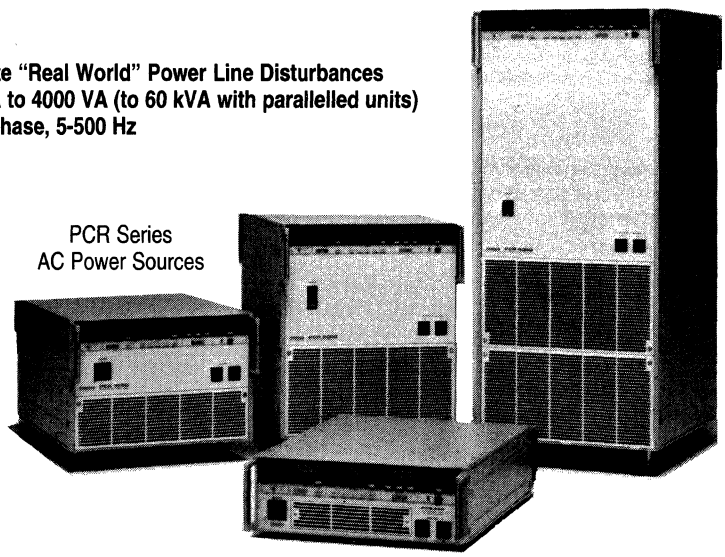
Applications:

Production/engineering/environmental testing
MIL-Std testing
Burn-in program cycling
Aircraft power simulation
Power line disturbance simulation
Frequency testing

For:

All electronic systems
Uninterruptible power supplies
AC motors
AC-DC power supplies
Office equipment
Computers
Appliances

Emulate "Real World" Power Line Disturbances
500 VA to 4000 VA (to 60 kVA with paralleled units)
Multi-phase, 5-500 Hz



PCR Series
AC Power Sources

CAN BE USED AS A TRUE LINEAR POWER AMPLIFIER
Also — Auxiliary Input, Power Amplifier, For Any AC Signal Source

Features:

- GPIB compatibility
- Total programmability from remote control via IEEE-488 or RC01-PCR for steady state and transient control and display of RMS volts, amps, watts, VA and frequency
- 99 step memory for repetitive tests
- Crystal controlled digital waveform synthesizer
- Remote function expansion - power supply start phase, voltage rise and fall times, voltage fluctuation times, power recovery times, fluctuation starting polarity
- Program phase lead and lag
- Output frequency stability $\pm 5 \times 10^{-5}$
- Sync to input voltage is selectable and fully isolated from output voltages
- <1% total harmonic distortion
- 0.2% load regulation, 0.1% line regulation
- 50 microsec. output voltage response
- Field parallel slave units
- Load and power source protection - overvoltage, overheat, overload
- Quiet operation
- For 19" rack mounting

Complete Power Distribution and Control For Rack Mount Systems

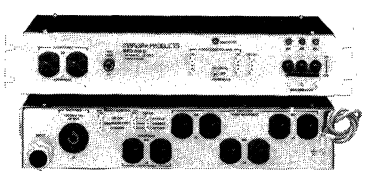
Marway power controllers are a convenient solution for power distribution in rack mount systems. The power controller provides a single point of entry for AC power to the rack. EMI filtering, transient supression and overload protection support the entire rack. Power distribution outlets furnish AC to each system component in the rack. Remote ON/OFF control allows system power up from a single system switch.

Warranty

Marway provides a 10-year limited warranty on all AC power distribution equipment, with a pass-through provision through the OEM to the end user.

THREE PHASE DISTRIBUTION UNITS

MPD-208B



120/208V, 3φ, 15A/φ

- 120/208V, 3φ, 15A/φ (45 total)

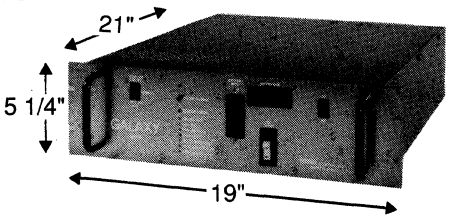
2,3 & 5KVA UPS



1 & 1.5KVA UPS

COMPACT RACK-MOUNT SYSTEMS

NEW

- 2, 3, & 5 KVA Units: 8¾" High
- 1 & 1½ KVA Units: 5¼" High
- 1 & 1½ KVA Units include 10 minute battery back-up
- Additional battery packs in 7" High racks.

RELIABLE

- MTBF: 30,000 Hrs
- MTTR: Less than 30 Minutes

MILITARY DESIGNS

- MIL-STD-810D
- MIL-STD-1399
- MIL-STD-461C for Class 4A Equipments
- EMP Protection
- Operate from field generators

OEM DESIGNS

- International models automatically accept common global voltages & frequencies
- Can fit in *your* computer cabinet!

GALAXY™ UPS SYSTEMS HAVE BEEN SELECTED BY MAJOR DEFENSE CONTRACTORS AND OEM's FOR CRITICAL TACTICAL AND COMMERCIAL PROGRAMS

GALAXY™ CABINET MODEL UPS SYSTEMS

3KVA TO 10KVA

Galaxy UPS systems include all the features that usually cost you much more. NO SURPRISES!

Supply uninterrupted conditioned, transient-free power to computers, process control equipment, emergency lighting and communications systems.

Employ modern PWM transistor technology. Nova systems feature high efficiency and quiet operation.

- No limit on back-up time
- Backed by world wide service
- Smallest 3-10KVA cabinet models available
- Cabinet models include up to 60 min. internal battery back-up
- Three phase input available
- Small
- Casters
- Receptacle Panels
- Maintenance Bypass Switch
- Front access controls
- Up to 60 min. internal no maintenance battery system
- Proven PWM technology
- Up to 90% efficient

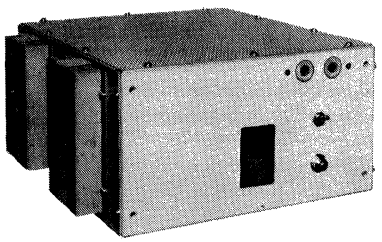
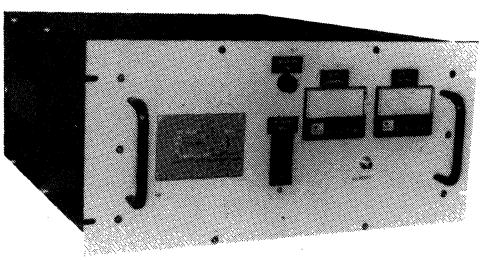
Applications and Solutions

SOLID STATE SINE WAVE INVERTERS

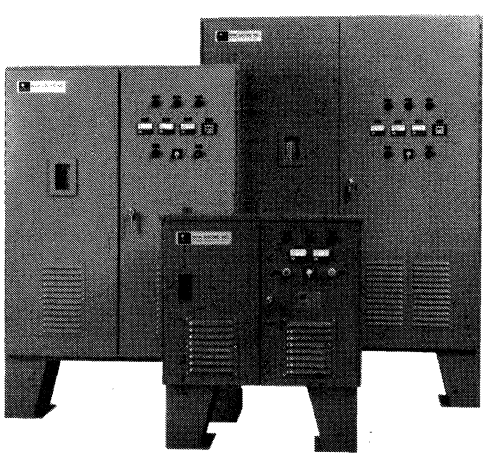


- Input from 10 VDC to 800 VDC
- Output power: 125VA to 90KVA
- 12 VDC inverters for mobile use
- 24 VDC inverters for communications and security systems
- 48 VDC inverters for TELECOMMUNICATIONS
  .5KVA to 3KVA
  Optional solid state transfer switch
- 125 VDC inverters for electric utilities
- 240 VDC inverters for steel mills
- 600 VDC inverters for rapid transit
- Rated for operation to 50°C.



1KVA to 5KVA

SOLID STATE SINE WAVE FREQUENCY CONVERTERS



- 50 Hz, 60 Hz, 400 Hz Output
- Single Phase from 125VA to 15KVA
- Three Phase from 5KVA to 120KVA
- 400 Hz systems for Aviation and Avionics
  Up to 96% Efficiency
  Self Diagnostics
  Paralleling
- Rated for continuous operation at 100% loading
- Input Frequency Range 47-440 Hz
- Operate from field generators
- All output voltages in use anywhere in the world.

7.5KVA to 60KVA

High Performance AC Power Sources

PACIFIC POWER SOURCE CORP.

AC to AC Converters for Power Test Applications, High Quality Laboratory Power, and UPS Requirements

PAGE 1

- **Manual and Programmable AC Test Power up to 500kVA**
- **20 - 5000 Hertz Frequency Changers**
- **Precision Lab Power**
- **High Reliability UPS Equipment**

Product Line Overview -- Pacific Power Equipment covers the range from 250VA to 625kVA. All of Pacific's products feature excellent load regulation, fast response to load transients and very low waveform distortion. The benefit of this performance is the ability to supply high quality power to loads that utilize high frequency switching regulators or multiple pulse rectification. Pacific equipment is unconditionally stable into any power factor load. Each phase is independently regulated and has no load balance restrictions.

Pacific Equipment Series

Each equipment series has application capabilities based on technology and design. For example, Pacific's G-Series is highly modularized, flexible, field expandable, and is serviceable with absolutely minimum spares or logistic support. When driven by an internally mounted 301-E Transient/Signal Generator, G-Series Test systems are unsurpassed in the Power Range of 6-90kVA. Tables I and II provide assistance in selecting the best series for your application. Please call your Pacific Representative or the Factory direct if you would like to discuss your requirements.

TABLE I - Key Specifications By Series

	Power Range (kVA)	Output Freq. (Hz)	Output Reg. (%)	Transient Responge (Microsec.)	Harmonic Distortion (%)
Programmable Test Power					
3120-3600 LN-Series	50-500	50-500	1.0	<250	1.0

Transient/Signal Generator

PACIFIC POWER SOURCE CORP.

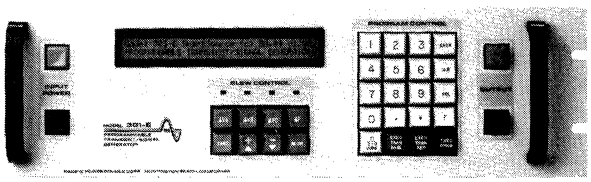
PAGE 2

Applications

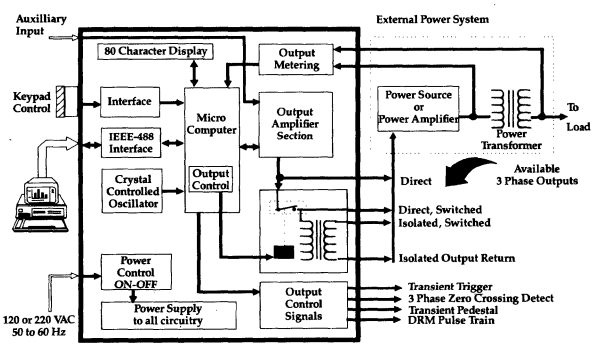
- **Precision 1-3 Phase Signal Source**
- **Mil-Std Transient Simulation**
- **Controller for PPSC G-Series AC Test Power Systems**

Precise, Intelligent Control

The 301-E Transient/Signal Generator is a high performance signal source that provides both steady state and transient AC sinewaves to drive power test equipment.



MODEL 301-E BLOCK DIAGRAM



G-Series AC Test Power

The Model 301-E Generator is located in the top portion of G-Series power source cabinets. This combination provides an AC Test Power System of exceptional flexibility and performance.

Please refer to Page 4 for G-Series system capabilities.

- Single or three phase, switch selectable
- 6 to 90 kVA, field expandable power
- Frequencies from 47 to 5000 Hz
- Full steady state and transient control of AC power

Steady State AC Sinewave Generation

- Programmable via front panel keypad or GPIB
- Output voltage, frequency and phase separation are independently programmable
- Output voltages are ± 10V peak into 600 ohms and are short-circuit protected
- Frequency range is 47 to 5000 Hz - crystal controlled
- Output distortion 0.5% max. from 47 Hz to 2000 Hz
- Output monitoring provided for both primary and secondary voltages
- Operating information displayed on 80 character LCD or may be read via GPIB

Transient AC Sinewave Generation

- Transient generation can be either repetitive or single event
- Both envelope and sub-cycle transients are supported
- Transient complexity can include up to 20 individual segments with segment durations from 0 to 30 seconds in 1 ms increments
- Transients can be programmed to begin at any angle relative to phase A
- 301-E provides output signals for transient sync and zero crossing detection
- Complex waveform simulation is accomplished by summing an external signal with the 301-E's internally generated signal via an auxiliary input

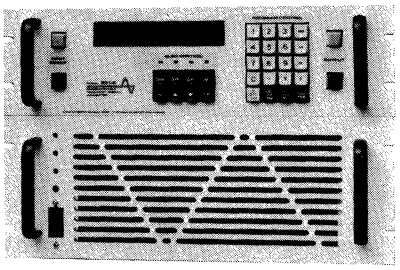
** NEW PRODUCT **

AT-Series High Performance Programmable Power From 2.25 to 6.75 kVA

These new high performance, high efficiency power sources provide 2.25 kVA of very high quality power in 12.25 inches of rack space. Three units are field parallelable to achieve 6.75 kVA of single or three phase power.



Key features of this equipment are:

- 6:1 Peak current (crest factor)
- Choice of programmable or manual plug-in controller
- Output power forms include:
  - 0-132 VAC direct coupled
  - 0-264 VAC direct or transformer coupled
  - 1, 2, or 3 phase output
- Automatic range changing
- Remote voltage sensing with disable
- No load power factor restrictions for output stability
- Electronic current limiting with auto recovery
- 0.1%/10% line regulation
- 0.25% load regulation
- 0.75% total harmonic distortion
- Output current direct coupled

	Single Phase	Three Phase
Rms	18 amps	6 amps per phase
Peak	100 amps	36 amps per phase
Short, P-P	40 amps	13 amps per phase

- Bandwidth, full power
  - ± 0.1 db, 47-500 Hz
  - ± 0.25 db, 47-5000 Hz
- Less than 15 microsecond response time to a step load transient

Programmable Controller

This programmer provides total control over output voltage, current limit, phase, and frequency from front panel or GPIB BUS up to 99 steady state and one transient program may be stored for execution. Up to 32 programmed wavesets simulating distortion, rectifier loads, squarewaves, etc., are easily accessed for the most stringent test application.

Output Voltage:	0-132/264 VAC ± 1% in 0.1/1.0V steps
Current Limit:	0-64 Amps ± 2% in 0.25A steps
Frequency:	47.00 to 49.99 Hz in 0.01 Hz steps 50.00 to 999.99 Hz in 0.01 Hz steps 1000 to 5000 Hz in 1 Hz steps ± 0.01% ± 1 count
Phase, B&C Ref A:	0-360 degrees in 1 degree steps

Other features include full monitoring, steady state and transient sync signals, and an auxiliary input/phase to superimpose harmonics, etc on the output.

Manual Controller

This controller generates both fixed and manually variable single and three phase sinewaves. The unit also accommodates AM, FM and SUMMED external inputs to drive the power source. Digital meters and a meter select switch provide monitoring of output voltage, current, and frequency.

Output Voltage:	0-132/264 VAC, switch selectable
Master Adjust:	0-full range
Phases B&C:	± 10% around phase A
Output Frequency:	5 position switch 50 Hz fixed 60 Hz fixed 400 Hz fixed 45-500 Hz Var. 450-5000 Hz Var. External input
Accuracy:	0.5%
Display resolution:	0.1 Hz, 45-500 Hz 1 Hz, 450-5000 Hz

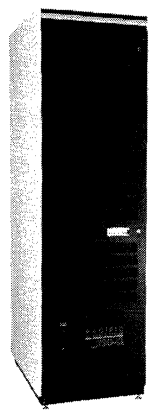
The G-Series - The Ultimate in Power System Flexibility

AC power sources utilize high performance linear technology to provide the ultimate in a clean waveform. Key features of this equipment are:

- Modular design/expandable/flexible
- Fail safe circuitry with built-in diagnostics
- Delivers peak currents to 300% of rated capacity
- Fast 10 microsecond response time
- Less than 0.75% total harmonic distortion
- ± 0.1% output regulation at sense point
- No power factor restrictions



Features

- Field parallelable up to 90kVA
- 1Ø/3Ø switch selectable
- Easy installation
- On-line module exchange
- All std. power forms
- Many standard options

Standard Models are complete systems ready for use, including cabinets, oscillators, input circuit breakers and output contactors

OUTPUT TRANSFORMER: Add "T" for autoformer with universal tap options

CONTROL OPTIONS: Specify "C" for 301-C, "E" for 301-E, or "F" for 301-F options

POWER MODULES: Specify "O" for 120-GO or "R" for 120-GR modules

Control and Power Options

301-F Universal Control Module

- Provides for selection of three different control options:
  1. Internal oscillator at fixed frequencies of 50, 60, 400 Hz
  2. External signal generator
  3. Input from the 301-E programmable transient/signal generator from 45-5000 Hz
- Provides for selection of the output power form:
  1. Single phase operation or
  2. Three phase operation
- Provides control of the mainframe output contactor to turn output power on and off

301-E Transient/Signal Generator

- Provides total control of the output signal from either the fron panel keypad or from a remote computer via the IEEE bus. Programmable parameters are:
  1. Frequency
  2. Frequency transients
  3. Phase angle separation
  4. Phase transients
  5. Amplitude
  6. Amplitude transients

Power Modules

- 120-GO; Standard modules for applications from 45-500 Hz
- 120-GR; Enhanced modules for applications requiring motor starting, high short circuit current, frequencies to 5000 Hz and fast transient and harmonic reproduction

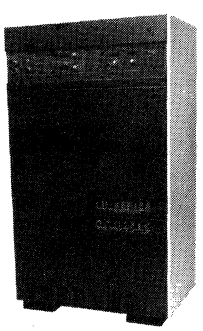
Systems may be configured to provide fixed, variable or programmable frequency, voltage, and phase. Frequency range - 25 to 500 Hz.

The LN-Series - High Efficiency, High Power Systems From 50 to 500kVA

AC power sources utilize advanced patented solid state switching technology to provide a high quality waveform with excellent regulation 80 ft. or more from the power source location. Key features of this equipment are:

- Modular design/expandable/flexible
- Fail safe circuitry with built in diagnostics
- ± 1.0% NL to FL. Regulation at sense point
- Less that 1% total harmonic distortion
- Fast 250 microsecond transient response time
- No power factor or load balance restrictions
- Fully isolated output
- Full load efficiency - 85-90%
- Convertible to UPS



- Full Digital Instrumentation

Model	Output Power (kVA)	Output Power (kW)	Number of Cabinets	Output Power Form
3120-LN-50	50	37.5	1	
3120-LN-100	100	75	1	120/208 Direct Coupled.
3240-LN-150	150	112.5	2	
3240-LN-200	200	150	2	
3360-LN-250	250	187.5	3	All Std. US & INTL Power Forms with Magnetics.
3360-LN-300	300	225	3	
3480-LN-350	350	262.5	4	
3480-LN-400	400	300	4	
3600-LN-450	450	337.5	5	3 Phase.
3600-LN-500	500	375	5	

Systems may be configured to provide fixed, variable or programmable frequency, voltage, and phase. Frequency range - 25 to 500 Hz.

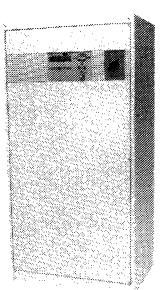
The MR/MS Series - Very High Efficiency, Cost Effective AC Power Systems From 15-500kVA

NEW

AC power sources provide the highest performance available at very competitive costs. This new Series offers the same high quality performance as the LN-Series.

- ± 1% NL to FL regulation
- Less than 1% total harmonic distortion
- Fast 250 microsecond transient response time
- No power factor or load balance restrictions
- Fully isolated output
- Full load efficiency - 88-92%

Up to 10 MS cabinets may be paralleled to provide easy upgrade or downgrade of facility power. MR Series is not parallelable.



- Full Digital Instrumentation

Model	Output Power (kVA)	Output Power (kW)	Number of Cabinets	Output Power Form
3030-MR/0015	15	12	1	
3030-MR/0020	20	16	1	120/208 Direct Coupled.
3030-MR	30	24	1	
3062-MS	62.5	50	1	
3125-MS	125	100	2	All Std. US & INTL Power Forms available with Magnetics
3187-MS	187.5	150	3	
3250-MS	250	200	4	
3312-MS	312.5	250	5	
3375-MS	375	300	6	3 Phase.
3437-MS	437.5	350	7	

MS Systems may be paralleled in 62.5 kVA increments to 625 kVA. Systems provide fixed frequencies from 45-500 Hz.

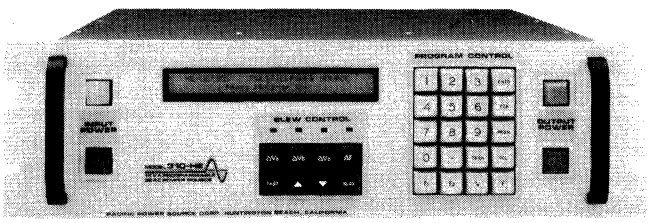
The HE-Series With Smart Source™ Interpreter

This programmable power source is better by design. High efficiency and superior performance are brought neatly together in a compact package that is competitively priced. Rack mount or benchtop, these 5 1/4" high units combine high power and low profile -- delivering 1000 VA into any power factor load. An IEEE-488 interface enhances application flexibility by providing a variety of talker/listener capabilities which allow the HE to interface just about any ATE setup.



HE, K & E Series Legend

Model	Output kVA	Chassis

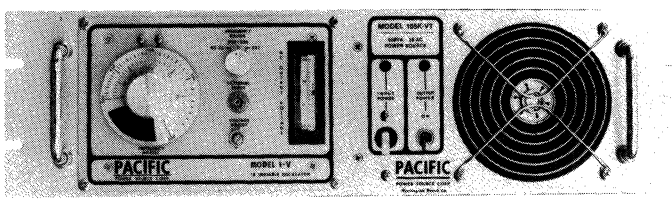
310HE - x	1.0	5.25"
1xxK - xx 2xxK - xx 3xxK - xx	.25 - 1.5 .43 - 2.6 .75 - 4.5	5.25/10.5" 5.25/10.5" 5.25/10.5"
110E - xx	1.0 - 3.0	10.5"

R - 0 to 125V output
T - 0 to 250V output
Oscillator type
Product Series
Output power (x100VA)
1 - single phase
2 - three phase DELTA
3 - three phase WYE



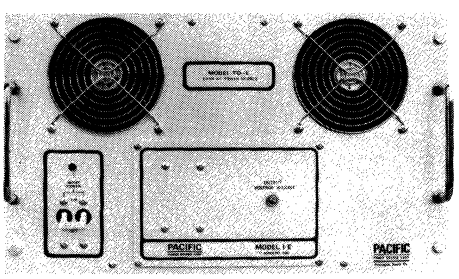
CASE A -- 5 1/4"H x 19"W x 19'D

The K-Series family covers the power range 250 to 4500 VA single and three phase, in lightweight one-man portable units. A variety of plug-in signal generators are available for adaptation to either laboratory variable or fixed parameter OEM applications.

Controller Types

Type	Function	Frequency Rance	Metering	Frequency Control
V	Variable freq.	47 - 500	± 3% analog	Dial. ± 3%
F	Fixed freq.	20 - 2000	± 3% analog	Preset ± .25%

Notes:
1) HE-Series uses its own integrated controller and does not require an optional oscillator.
2) K-Series models are configured in 250 or 750 VA increments. For example a 315K-VR is a three phase WYE model with an output of 1500VA, a variable frequency analog oscillator and 0-125V output.
3) The "E" oscillator listed is compatible only with E-Series equipment.



CASE B -- 10 1/2"H x 19"W x 19"D

The E-Series Units can be paralleled to supply up to 3kVA. The output is fully isolated. Either leg may be grounded. Two types of plug-in oscillators are available to cover fixed, variable, or OEM applications.

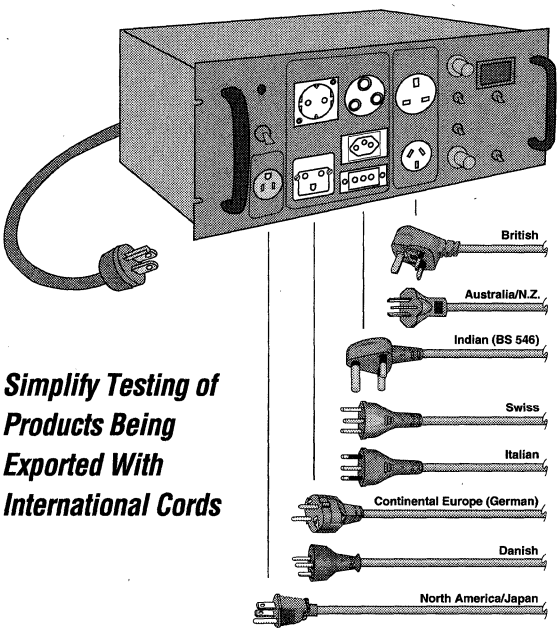
Interpower™ International Power Source

—test your product before export



Simplify Testing of Products Being Exported With International Cords

The International Power Source provides a low-cost, convenient source of 50 Hz power which is important for testing many products that are exported. At 50 pounds, the International Power Source is sufficiently portable that it can be easily moved between work stations or lab positions as needed. Output power is delivered through one of eight standard international sockets so that products can be conveniently powered during development or just prior to shipment.

Output voltages are adjustable in the 0-250 VAC range. Frequencies can be adjusted in the 47-500Hz range. This flexibility permits testing of products with varying input voltages and frequencies in order to simulate real-world power mains conditions.

The power output capacity of the International Power Source varies by model and depends at least in part on the power factor characteristics of the load. In general, the lower the load power factor, the greater the power capacity of the International Power Source. The power rating on the International Power Source is 750VA or 1500 VA, depending on model.

Three models are available to accommodate U.S. input voltages of either 120V (supplied through a NEMA 5-15P or 5-20P plug) or 230V (supplied through a NEMA 6-15P plug). Dimensions: 19" wide x 7" tall x 19" deep behind the panel (20" deep including handles). Delivery: stock to six weeks; call PCC Customer Service Department for stock level.

SPECIFICATIONS:

Input Voltage:	
#85510500	115 VAC – NEMA 5-15P plug
#85510510	115 VAC – NEMA 5-20P plug
#85510520	230 VAC – NEMA 6-15P plug
Input Frequency:	45 to 65 Hz
Output Voltage:	0 to 130 VAC or 0 to 260 VAC; set from the front panel potentiometer
Output Frequency:	47–150Hz or 150–500Hz; set from the front panel potentiometer
Output VA:	
#85510500	750 VA , single phase
#85510510, 85510520	1 KVA, single phase
RMS Output Current:	
#85510500	130 VAC range: 750 ÷ output volts, 7.5 amps max. below 100 VAC 260 VAC range: 750 ÷ output volts, 5A RMS max. below 200 VAC
#85510510, 85510520	130 VAC range: 1000 ÷ output volts, 10A RMS max. below 100 VAC 260 VAC range: 1000 ÷ output volts, 5A RMS max. below 200 VAC
Monitor Accuracy:	0.25%
Peak Output Current:	2 x RMS (standard models)
Line & Load Regulation:	2% to 100Hz, 3.5% 100-500Hz
Frequency Stability:	0.25%
Efficiency:	75% with full linear load
Harmonic Distortion:	1% maximum into full linear load
Power Factor:	0 to 1
Response Time:	200 µsec with 100% load change
Output Protection:	Automatic peak current limiting; automatic RMS current shutdow; automatic thermal shutdown; automatic shorted output shutdown
Operating Temperature:	-10°C to + 40°C
Storage Temperature:	-40°C to +75°C

Three models accommodate different U.S. input voltages:

#85510500: Interpower™ International Power Source converts North American voltage and frequency (120VAC/60Hz) to international voltages and frequencies, typically 220-240VAC/50Hz, single phase. Digital output monitor displays RMS voltage, current, frequency.

Input voltage: 120VAC/60Hz (supplied through NEMA 5-15P plug)
Output voltage: Variable voltage from 0-260VAC
Output frequency: Switch allows range of 47-150Hz or 150-500Hz
Output capability: 750VA

#85510510: Similar to #85510500 above except input voltage is supplied through a NEMA 5-20P plug; output capability is 1.5KVA, single phase.*

#85510520: Similar to #85510500 above except input voltage is 230VAC supplied through a NEMA 6-15P plug; output capability is 1.5KVA.

** 400Hz input frequency available on special order*

International Power Source includes the following sockets and the standard single-phase voltage and frequency at which they are used:

	For use at	
• Continental Europe CEE 7/7	220VAC*	50Hz
• Australia/New Zealand (Also used in People's Republic of China)	240VAC	50Hz
• British BS 1363	240VAC*	50Hz
• Denmark	220VAC*	50Hz
• India (old British standard BS 546)	220VAC*	50Hz
• Italy 10A	220VAC*	50Hz
• Switzerland	220VAC*	50Hz
• North America NEMA 5-15R (also Japan)	120VAC 100VAC	60Hz 50 & 60Hz

* Note: European standard voltage will be changed from 220V to 230V by 1995.

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

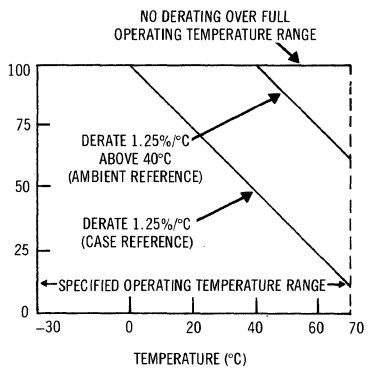


Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

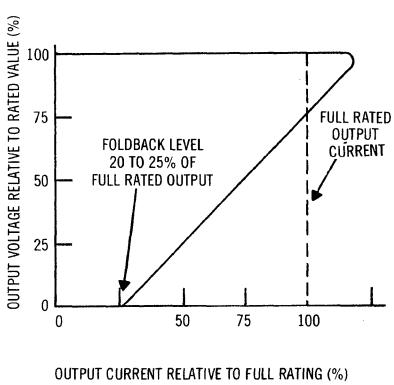

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

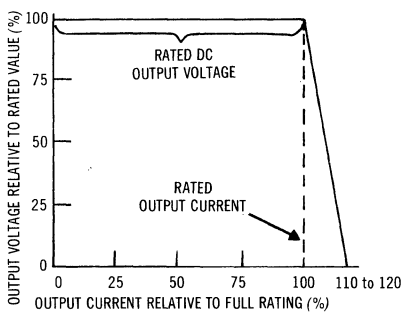

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

Z-LINE® power distribution and control systems.

GENERAL SPECIFICATIONS COMMON TO ALL Z-LINE® POWER DISTRIBUTION AND CONTROL SYSTEMS

TRANSIENT VOLTAGE SPIKE PROTECTION
Multi stage voltage clamping devices have been incorporated for maximum transient protection. 150V A.C. RMS clamping. Transient peak current, 6500 A (8x20 μs). Transient energy to 80 joules (10x1000 μs). Response time approx. 50 nanoseconds.

SPIKE AND SURGE PROTECTION:
LINE TO LINE, LINE TO GROUND, AND NEUTRAL TO GROUND.

RUGGED, 16 A.W.G. STEEL CONSTRUCTION EXCEPT LPC & TPC, 18 A.W.G. STEEL.
Zinc Plated with black silkscreening.

GSA, FSS: 92704-PUL-001
GOV. FSCM #70513
Federal Supply Code for Manufacturers

SAFETY PROTECTION:
Most components.

UL Recognition

CSA Certification

VDE Approval

EMERGENCY SHUTDOWN PROTECTION
Allows easy interfacing with your mechanical, electronic or thermo-switching devices thru the remote power control bus connectors (all but LPC 115 & TPC 115-8.)

EMI/RFI FILTER SPECIFICATIONS

Rated Voltage: 115/250 VAC
Operating Frequency: 50/60 HZ
Operating Temperature: -10° C to 60° C
Dielectric withstanding voltage: 2250 VDC (Line-Case)
(1 minute duration) 1450 VDC (Line-Line)
Maximum Leakage current: .5 mA @ 250 VAC, 60 HZ
(each line to ground)

PC 115
POWER DISTRIBUTION AND CONTROL SYSTEM

EMI/RFI FILTER
20 Amp, Dual Protection:
Common mode, line to ground.
Differential mode, line to line.

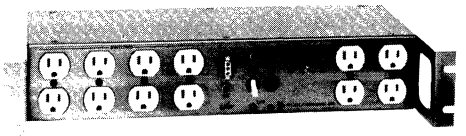
Remote Control
Local Switch (Optional)

12 OUTLETS
8 outlets, switched
4 outlets, unswitched, always "on" for added convenience

POWER CORD
Heavy duty, 9 ft. long.

RACK MOUNTED
Designed to fit standard 19" wide IEC STD. Rack, maximum height only 3½", depth 8⅝". Front panel recessed 2½", with convenient side cut outs for cable routing. Weight: 13 LBS.

PILOT LIGHTS
Power to controller switched circuits on.

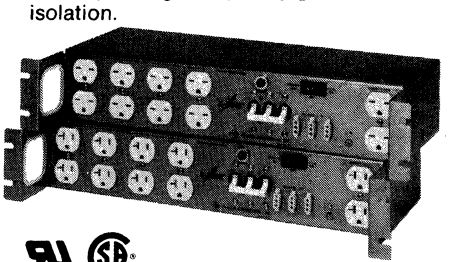


PC 125
POWER DISTRIBUTION AND CONTROL SYSTEM DEC® COMPATIBLE WITH MODEL 871, MODEL 861

10 OUTLETS
8 outlets switched
2 outlets, unswitched, always "on" for added convenience.

Power Cord
Heavy duty, 9 ft. long.

EMI/RFI TRIPLE NOISE PROTECTION
Both common mode and differential mode, plus high frequency ground isolation.

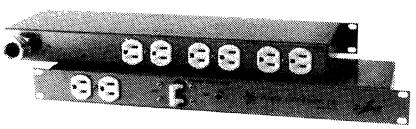


DEC is a trademark of Digital Equipment Corporation

REMOTE POWER CONTROL BUS
3 Remote I/O Connectors for either:
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo-switching device.
C) Power-up additional equipment down line with a sequenced time delay.

CHASSIS RACK MOUNTED
Designed to fit standard 19" wide IEC STD. Rack maximum height only 3½", depth 8⅝". Front panel recessed 2½", with convenient side cut outs for cable routing.
Weight: A & B 12 LBS., C-F 16 LBS.

TPC 115-8
POWER DISTRIBUTION AND CONTROL SYSTEM



EMI/RFI FILTER
Dual Protection:
Common mode, line to ground.
Differential mode, line to line.

PILOT LIGHT
Power to Controller switched on.

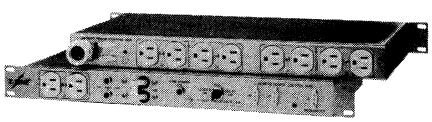
POWER CORD
Heavy duty, 9 ft. long.

RACK MOUNTED
Designed to fit standard 19" wide IEC STD. Rack only 1¾" high, 5" deep.
Weight: A & B 7 LBS., C-F 8 LBS.

TPC 115-10/MTD™
POWER CONTROLLER AND LINE CONDITIONER DEC® COMPATIBLE

RACK MOUNTED
Designed to fit standard 19" wide IEC STD. Rack 1¾" high, 8" deep.
Weight 14 LBS.

10 OUTLETS
8 outlets, switched
(Multiple Time Delay™, standard)
2 outlets, unswitched, always "on" for convenient AC Power requirements.



EMI/RFI FILTER DUAL PROTECTION
Common mode, line to ground.
Differential mode, line to line.

POWER CORD
Heavy duty, 9 ft. A & B, 15 ft. C-F.

PILOT LIGHT
Power to controller switched on.

Time Delay and Multiple Time Delay™ (MTD™) Power Up

Designed by ***"Z-LINE"*** to provide a four second Time Delay (T.D.) between powering up the switched 1 and switched 2 outlets. You will find this standard on the TPC 115-10/MTD™, PC 874 and PC 861 models.
T.D. is a necessity for those systems with a High Inrush Power problem. The theory behind T.D. is as follows: By allowing the disc drives or other power hungry components in switched 1 to power up and drop down to their proper operating level prior to powering up the components in switched 2 you will avoid power Inrush related problems and expense. Please note that Multiple Time Delay™ (MTD™) is an option that provides a delay between each duplex or any combination of duplexes and remote I/O ports.

PLEASE NOTE: ***"Z-LINE"*** Designs and Manufactures CUSTOM Power Controllers and Line Conditioners to meet your specific engineering requirements.
Multiple Time Delay™ and MTD™ are trademarks of Pulizzi Engineering Inc.

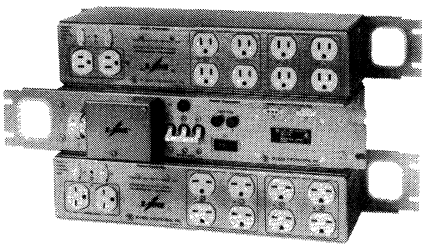
Santa Ana, CA 92704-6865 (714) 540-4229
FAX: (714) 641-9062

PC 874
POWER DISTRIBUTION AND CONTROL SYSTEM DEC® COMPATIBLE WITH MODEL 874



10 OUTLETS
8 outlets switched 2 outlets unswitched always "on" for convenient AC power requirements.

EMI/RFI TRIPLE NOISE PROTECTION
Both common mode and differential mode, plus high frequency ground isolation.

PILOT LIGHTS
Power to controller
Power to switched 1 outlets
Power to switched 2 outlets

TIME DELAY, POWER UP
Time delay, approximately 4 seconds between switched outlets 1 and switched outlets 2, provides sequential power up through the 8 switched outlets (models C., D., E & F.).

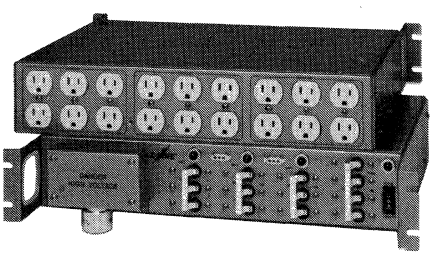
REMOTE POWER CONTROL BUS
4 bussed remote I/O connectors allows for multiple interfacing with your mechanical, electronic or thermo-switching protective controls for emergency shutdown.

CHASSIS RACK MOUNTED
Designed to fit standard 19" wide IEC STD. Rack. Maximum height only 3½" high, 6¾" deep.
Weight: A & B 15 LBS., D-F 18 LBS.

Power Cord
Heavy duty, 15 ft. long

PC 726 and PC 726 MTD™
3-PHASE INPUT, SINGLE PHASE OUTPUT

PENDING



RACK MOUNTED
Only 3½" high, 14½" deep and 19" rack mounted. Recessed 2½" to either the front or back panel. Flush mounted panels are also available.

EMI/RFI FILTER
30 amps per phase, triple noise protection. Both common mode and differential mode, plus high frequency ground isolation.

18 OUTLETS
Located on the back panel. 6 switched receptacles alloted per phase.

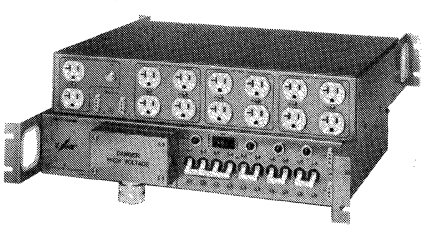
PILOT LIGHT
1 light to indicate "power on" to system. 3 additional lights to indicate "switched power on" to all phases (X,Y,Z).

POWER CABLE
Heavy duty, 15' long.

TIME DELAY, POWER UP
Time delay approximately 4 seconds between phase X, Y and Z provides Multiple Time Delay™ power up through the 18 switched outlets. Optional: The 6 switched outlets per phase can be divided into 4 outlets switched and 2 outlets unswitched per phase, thus providing 1 unswitched Duplex per phase for convenience power.

REMOTE POWER CONTROL BUS
2 bussed remote I/O connectors allows for:
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment down line.

PC 300 and PC 300 MTD™
POWER DISTRIBUTION AND CONTROL SYSTEM 3-PHASE



REMOTE POWER CONTROL BUS
4 bussed remote I/O connectors allows for multiple interfacing with your mechanical, electronic or thermo-switching protective controls for emergency shutdown. (3 on both the front & rear panel.)

CHASSIS RACK MOUNTED
Only 3½" high, 14½" deep, the 2nd smallest 19" rack mount 3-phase power controller and line conditioner currently available on the market. Weight: 20 LBS.

EMI/RFI FILTER 30 Amp Per Phase
TRIPLE NOISE PROTECTION. Both common mode and differential mode, plus high frequency ground isolation.

PILOT LIGHTS
3 lights to indicate "power on" to system. 3 additional lights to indicate "switched power on" to all phases (X, Y, Z).

UNIQUE UNIVERSAL MOUNTING
Recessed 2½" to either the front or back panel. We just assemble the mounting brackets to fit your specifications.

14 OUTLETS
Located on the back panel. 4 switched receptacles alloted per phase plus two utility outlets.

Power Cord
Heavy duty, 15 ft. long

OPTIONS

MULTIPLE TIME DELAY™ POWER UP PROTECTION
Time delay, approximately 4 seconds between phase X, Y & Z provides Multiple time Delay™ power up through the 12 switched outlets.

SEQUENCED POWER REMOTE BUS
4 connectors provide independent remote control over each phase as well as sequenced delayed remote control over additional controllers and equipment down line.

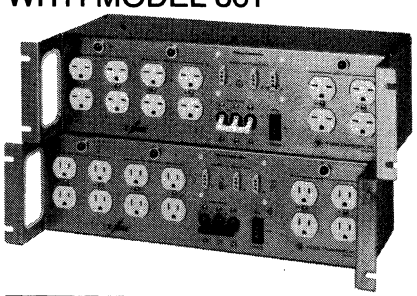
PC 861
POWER DISTRIBUTION AND CONTROL SYSTEM DEC® COMPATIBLE WITH MODEL 861



EMI/RFI TRIPLE NOISE PROTECTION
Both common mode and differential mode, plus high frequency ground isolation.

PILOT LIGHTS
Power to controller
Power to switched 1 outlets
Power to switched 2 outlets

REMOTE POWER CONTROL BUS
3 Remote I/O Connectors for either:
A) Remote Power On/Off
B) Emergency shutdown with a mechanical, electronic or Thermo-switching device.
C) Power-up additional equipment down line.

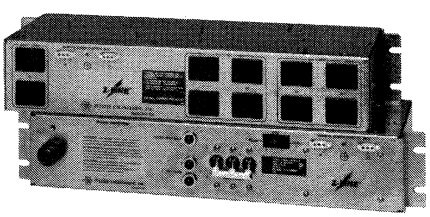
Power Cord
Heavy duty, 15 ft. long

TIME DELAY, POWER UP
Time delay, approximately 4 seconds between switched outlets 1 and switched outlets 2, provides sequential power up through the 8 switched outlets.

CHASSIS RACK MOUNTED
Designed to fit standard 19″ wide IEC STD. Rack 5¼″ high, 8⅝″ deep, front panel, recessed 2½″, with convenient side cut outs for cable routing.
Weight: 18 LBS.

12 OUTLETS
8 outlets, switched
(time delay, standard)
4 outlets, unswitched, always "on" for convenient AC power requirements.

PC 500
DEC® COMPATIBLE



RACK MOUNTED
Designed to fit standard 19″ wide IEC STD. Rack 3½″ high, 6¾″ deep, with a 1″ inset mount. Weight: 18 lbs.

EMI/RFI FILTER
Triple noise protection.
Both common mode and differential mode, plus high frequency ground isolation.

10 OUTLETS
8 outlets switched, 2 outlets unswitched, always "on" for convenient AC power requirements. IEC rated at 10 AMPS/ 250 VAC.

POWER CABLE
Heavy duty, 15′ long.

PILOT LIGHT
Power to controller.
Power to switched 1 outlets.
Power to switched 2 outlets.

TIME DELAY, POWER UP
Time delay approximately 4 seconds between switched outlets 1 and switched outlets 2, provides sequential power up through the 8 switched outlets.

REMOTE POWER CONTROL BUS
4 Remote I/O Connectors for either:
A) Remote Power On/Off.
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment.

Z-LINE®

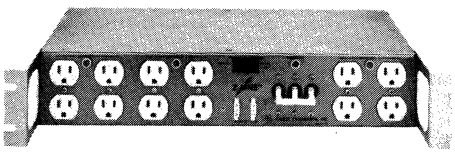
AC Power Distribution And Control Systems

DEC is a trademark of Digital Equipment Corporation

PC 585/MTD™ POWER DISTRIBUTION AND CONTROL SYSTEM

DEC® COMPATIBLE



RACK MOUNTED

Designed to fit standard 19″ wide EIA STD. Rack 31½″ high, 10½″ deep.
Weight: 18 lbs.

EMI/RFI FILTER

Triple noise protection:
Common mode and differential mode, plus high frequency ground isolation.

12 OUTLETS

4 outlets for each of the three switched sections.

PILOT LIGHT

Power to controller.
Power to switched 1 outlets.
Power to switched 2 outlets.
Power to switched 3 outlets.

TIME DELAY POWER UP

MTD systems incorporate Multiple Time Delay power up and down between the switched sections. This is approximately 4 seconds between switched outlets 1, 2 and 3 powering up and powering down. 1/MTD systems incorporate Multiple Time Delay power up between the switched sections only. 585 systems without MTD do not incorporate Multiple Time Delay at all. All three switched sections power up at one time.

REMOTE POWER CONTROL BUS

2 Remote I/O connectors for either:
A) Remote Power On/Off.
B) Emergency shutdown with a mechanical, electronic or Thermo switching device.
C) Power up additional equipment.

NOTE:
Specifications are listed below for models C through F.

SPECIFICATIONS FOR MODEL NUMBERS: PC 585, PC 585-1/MTD, PC 585/MTD

MODEL	C	D	F
A.C. VOLTAGE INPUT	90/135	90/135	180/270

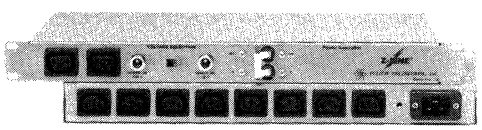
OUTLETS-NEMA	5-15R	5-20R	6-15R

TPC 884 INTERNATIONAL

DUAL VOLTAGE, SWITCHABLE POWER DISTRIBUTION AND CONTROL SYSTEM



■ The IEC Advantage

Equipment can be manufactured utilizing the IEC 320 inlet regardless of final destination.

RACK MOUNTED

Designed to fit standard 19″ wide EIA STD.
Rack 1¾″ high, 5″ deep.
Weight: 8 lbs.

EMI/RFI FILTER

Dual Protection:
Common mode, line to ground.
Differential mode, line to line.

10 OUTLETS

8 on the rear and 2 on the front panel-switched, always on for convenient AC power requirements. IEC 320: rated at 10 AMPS/250VAC (VDE) or 15 AMPS/250VAC (UL/CSA) as well as 15 AMPS/125VAC (UL/CSA)

PILOT LIGHT

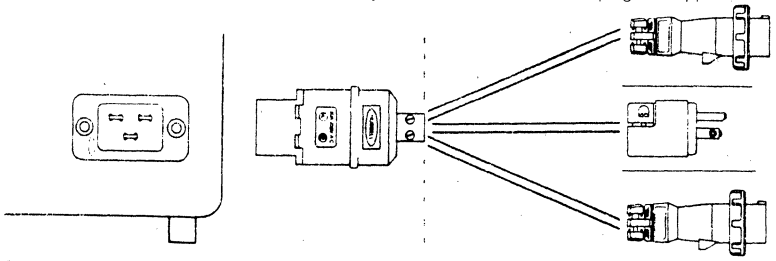
Power available to the 120VAC. System
Power available to the 240VAC. System

VOLTAGE SELECTABLE

Select to operate on 120VAC input: 15 AMP or 20 AMP
Select to operate on 220-240VAC input 15 AMP, 16 AMP or 20 AMP
Please verify that the power input matches what you have selected

NOTE:
Specifications are determined via the input power you provide and the voltage selection switch. Please note the configuarations listed below.

Provided by PEI — Power cable and plug not supplied



Panel Mount Inlet — Detachable Connector — Portable Cord — Detachable Plug

3-Wire 20A. 250VAC. IEC 309 plug for the North American Market.

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

Wilmore DC-To-AC Inverters

- **Power Ratings From 50 To 1000 Watts**
- **High Efficiency**
- **Rugged Design And Construction**

Wilmore manufactures solid-state transistor-switching dc-to-ac inverters to power loads up to 1000 volt-amperes from a dc power source. These inverters are characterized by conservative electrical and thermal design. Attention to detail in areas such as mechanical layout and structural integrity ensures trouble-free operation in harsh electrical and mechanical environments.

Inverters on this page provide a three-level step waveshape having peak, average, and rms voltages that approximate those of a pure sine wave while maintaining operating efficiencies comparable to square-wave inverters. They are suitable for powering sensitive electronic loads including microcomputers, chart recorders, communications equipment, and test instruments. Most models also provide a 2:1 output-power surge capability for powering loads with high inrush current, such as small motors, heating elements, lighting equipment, and small power tools. Additional features include excellent frequency stability (±0.15 Hz), wide operating ambient temperature range (-20°C to 55°C), and low idle-current demand.

Protection

All inverters are protected either electronically or by a front-panel circuit breaker from overloads or short circuits on the output. Protection against accidental reversal of dc polarity at the battery terminals is also provided. The 250-, 500-and 1000-VA units include an electronic cutout circuit to protect against excessive discharging of the battery source (undervoltage) or brief exposure to an overly high dc-input voltage (overvoltage).

Availability

Standard models are generally available from stock. For information about custom-designed inverters or standard inverters available in custom enclosures, contact our sales department.

Output Power (Volt-Amps)	Nominal Input Voltage (Vdc)	Nominal Output Voltage (Vac)	Output Frequency (Hz)	Dimensions (h" x w" x d")	Weight (Pounds)	Efficiency (Typical)	Model Number

NEW

The first products in our new Series 1600 sine-wave inverters are being introduced in 1991:

- **Regulated Sine Wave**
- **Rackmount, Convection-Cooled**
- **5¼" High, 20 Lbs. (500-VA Version)**

For more information, request Bulletin 1061

WILMORE ELECTRONICS CO., INC.

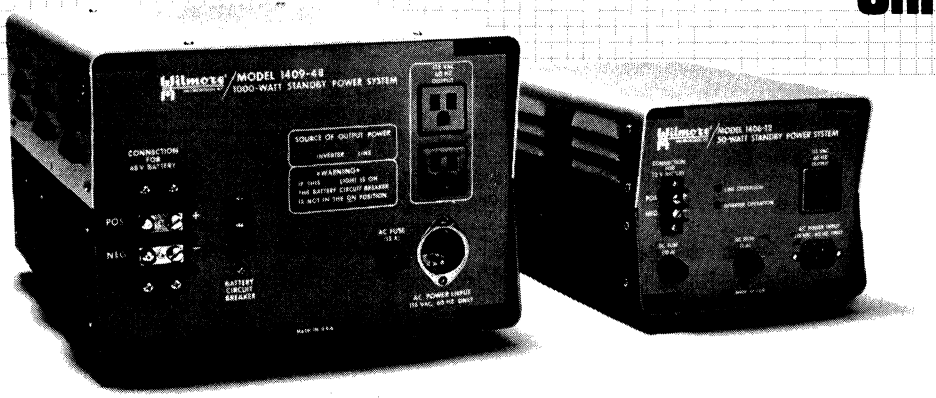
Wilmore

Uninterruptible Power Systems



- **Power Ratings To 1000 Watts**
- **Economical Standby Operation**
- **High Efficiency For Longer Backup Times**

Serious problems may result when commercial ac power is unexpectedly interrupted to sensitive equipment such as point-of-sale terminals, PABX and communications equipment, small computers, or security systems. Wilmore's point-of-use uninterruptible power systems protect these critical loads from severe brownouts and loss of commercial power.

Each Series 1400 Uninterruptible Power System (UPS) consists of a dc-to-ac inverter, a battery charger and sensing/transfer circuitry. In normal operation, commercial power is presented directly to the load, and the Series 1400 UPS float charges the battery and monitors the ac line. When commercial power is interrupted, the sensing circuitry detects the loss of power and the UPS is automatically transferred to inverter operation. This transfer takes less than 15 milliseconds. When the commercial power returns, the sensing circuitry will sample the ac line for a period of 5 to 7 seconds to ensure that proper ac voltage is maintained. The reverse transfer from inverter operation to normal ac operation is then accomplished, also in less than 15 milliseconds. With the load again being supplied directly from the commercial line, the battery charger begins to recharge the batteries. Systems which operate in this standby mode are inherently less expensive to purchase and more economical to operate than "on-line" systems which must always power the user's equipment from the inverter.

Batteries

Standby power for the system is provided by external batteries which are maintained at full charge by the built-in battery charger. Batteries are not supplied with Wilmore's UPS units. They can be purchased locally and easily installed by the customer. The capacity of the user-supplied battery bank determines the backup time available from the UPS. Contact our sales department for assistance in sizing a battery bank for your particular application.

Inverter Output

The dc-to-ac inverter in each Series 1400 UPS provides a three-level step waveshape having peak, average, and rms voltages that approximate those of a pure sine wave. It is suitable for powering sensitive electronic loads including microcomputers, point-of-sale terminals, and communications equipment. Most inverters in this series also provide a 2:1 output-power surge capability for powering loads that demand high inrush current, such as small motors and lighting equipment.

Protection

All models are protected against output overloads and against accidental reversal of dc input-voltage polarity. An undervoltage sensing circuit helps to protect the batteries from excessive discharging.

Availability

The 115-volt, 60-Hz version of each model is normally shipped from stock. Allow two weeks delivery time for 230-volt, 50-Hz versions. For information about custom designed UPS products or standard units available in custom enclosures, contact our sales department.

Output Power (Volt-Amps)	Battery Input Voltage (Vdc)	Battery Charger Current (Adc max)	Nominal Output Voltage (Vac)	Frequency (Hz)	Dimensions (h" x w" x d")	Weight (Pounds)	Model Number

Xentek
EXTREME ISOLATION TRANSFORMERS

FEATURES

- Commercial, industrial and medical applications
- Guaranteed to stop noise problems
- Eliminates power and system ground loops
- Up to 160dB common-mode rejection
- UL listed
- CSA approved
- VDE certified models
- TWO-YEAR WARRANTY

SPECIFICATIONS

Input:
Nominal voltage ±15% (1 KVA and up); ±10% (750 VA and below); 50-60 Hz.

Load Regulation:
±3% of input voltage, no load to full resistive load.

Common Mode Rejection:
160dB (-3x models); 140dB (-2x models); 120dB (-1x models).

Normal Mode Rejection: 60dB.

Isolation:
Resistance: 10,000 MΩ.
Capacitance: 0.0001pf (-3x models); 0.001pf (-2x); 0.005pf (-1x).

Leakage Current:
≤50μA (EIT, TRI and VDE Series).
≤10μA (LGT Series).

Dielectric Strength:
2500VAC (all EIT, TRI and LGT);
3750VAC (all VDE Series).

Efficiency: Greater than 92%.

Operating Temperature:
Full load up to 40°C ambient.

Approvals:
UL 1012; CSA 22.2-066 and UL 544 (ordinary patient care) on all models.
VDE 0550 on VDE prefix models.
UL 544 (patient connected) on all LGT Series.

Life Guard™ *Medical Isolation Transformers*

FEATURES

- UL 544 Listed for isolated patient connected applications
- Leakage Current less than 10μA
- Hospital Grade line cord and receptacles on most models
- TWO-YEAR WARRANTY

Special care must be taken in medical and dental applications to *isolate* the equipment from common-mode noise and ground-loops and *insulate* the equipment against potentially harmful leakage currents.

All Xentek extreme isolation transformers comply with UL544 leakage requirements for non-patient connected equipment. And Xentek Life-Guard extreme isolation transformer models comply with UL544 requirements for isolated patient connection.

Xentek Life-Guard extreme isolation transformers offer the ultimate in leakage current protection. These top-quality units are fully certified under UL544 for isolated, patient connected applications. Leakage current is limited to under 10μA. And all LGT Series models provide complete protection against common-mode noise and transients.

125 VA - 2.5 KVA MEDICAL ISOLATORS

INPUT: 120VAC		OUTPUT: 120VAC	
RATING	MODEL	INPUT	OUTPUT
125 VA	LGT 125-11	Hospital Grade Cord[1]	Hosp. Grade Duplex Recep.
250 VA	LGT 250-11	Hospital Grade Cord	Hosp. Grade Duplex Recep.
500 VA	LGT 500-21	Hospital Grade Cord	Hosp. Grade Duplex Recep.
750 VA	LGT 750-21	Hospital Grade Cord	Hosp. Grade Duplex Recep.
1.3 KVA	LGT 1.3K-20	Barrier	Barrier
2.5 KVA	LGT 2.5K-20	Barrier	Barrier

Note: models shown with "-2" in the model number suffix are rated for 140dB CMR. For 160dB CMR, replace "-2" with "-3", e.g., for 750 VA with 160dB CMR, specify model LGT 750-30.
[1] Models from 125VA to 750VA are equipped with hospital grade 6.5' line cord and duplex receptacles.

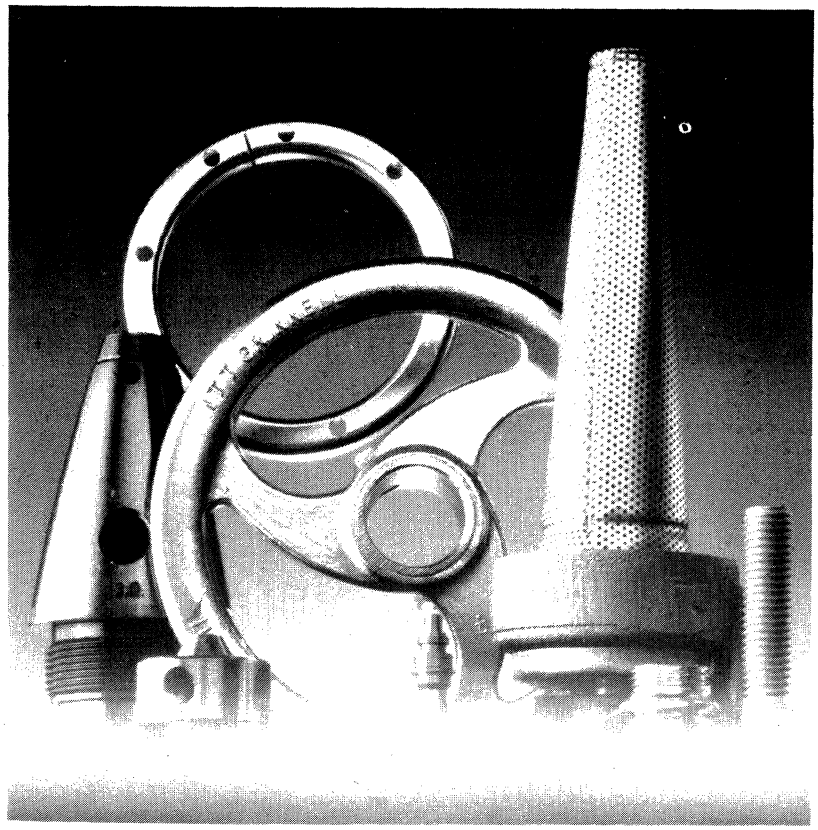
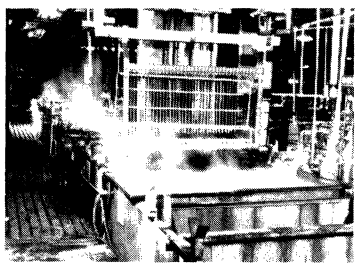
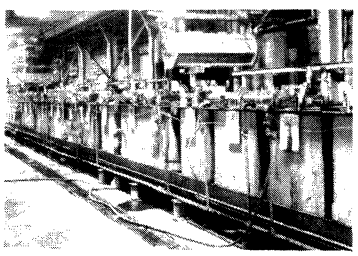
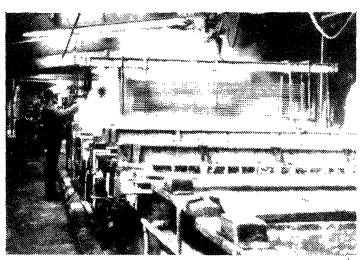
QUALITY METAL FINISHING









Heritage incorporates the latest and most advanced plating techniques for finishing metal parts and for strict adherence to MIL-SPEC and industrial specifications to ensure accurate quality.

Our plating facilities consist of eleven process lines with computer controlled plating cycles. We can plate a wide variety of parts ranging from nuts and bolts to 12 foot long rods, and 20 foot long shafts for hard chrome.

Finishing Processes Available

- Nickel
- Nickel-Chrome
- Rack Zinc
- Barrel Zinc
- Hard Chrome
- Electroless Nickel
- Electro-polishing
- Anodizing
- Aluminum Conversion Coating
- Phosphating
- Passivate
- Buffing & Polishing

MEMBER OF NAMF NATIONAL ASSOCIATION OF METAL FINISHERS

3M Introduces Compact Electric Air Ionizer

Unique Ionized Air Blower intrinsically generates ion-balanced air

The new 3M 961 Ionized Air Blower will neutralize static charge on non-conductors such as insulative tapes, plastics, and circuit board substrates. This will remove the hazard that these objects present to static sensitive electronic components.

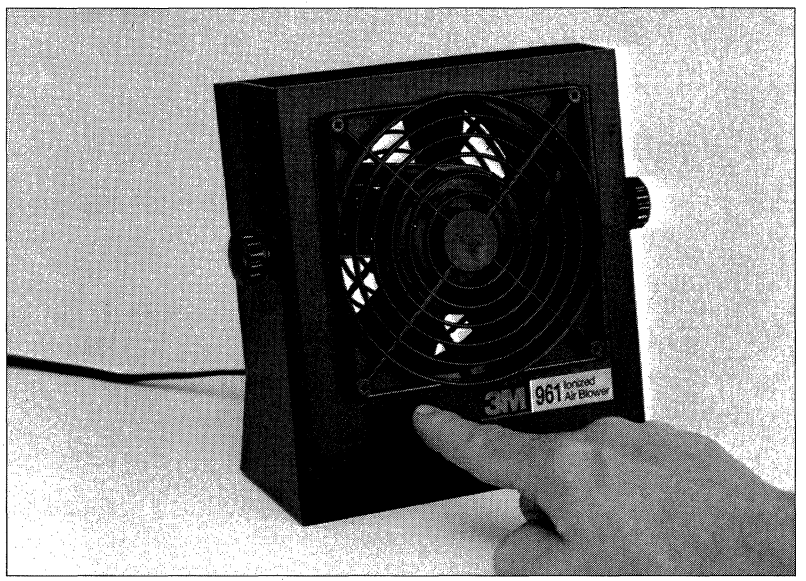
The 3M 961 Electric Ionized Air Blower delivers an equal number of positive and negative ions to effectively neutralize charged objects.

The proprietary self-balancing power supply circuitry will continue to deliver a balanced ion stream even if emitter points become dirty or corroded. The ion balance feature never needs calibration or periodic adjustment.

The air delivery is so gentle and quiet that a red monitor light has been added to let operators know that the unit is on.

The air blower's small size requires very little workbench space and weighs only two pounds for easy movement. The light weight also makes it practical for service technicians to carry in their tool kits.

Call 1-800-328-1368



Small, but powerful enough to gently bathe the work place with balanced ionized air.

Choose the 3M 705 Bag Check to get continued use from 3M 2100/2100E Series Static-Shielding Bags

Quick, easy way to identify bags suitable for reuse

The 3M 705 Bag Check is a quick and easy-to-use test unit designed to measure the "around-the-bag" resistance of the 3M 2100/2100E Series of static-shielding bags.

Three resistance ranges can be selected to measure the electrical condition of used or new bags and their corresponding shielding capability.

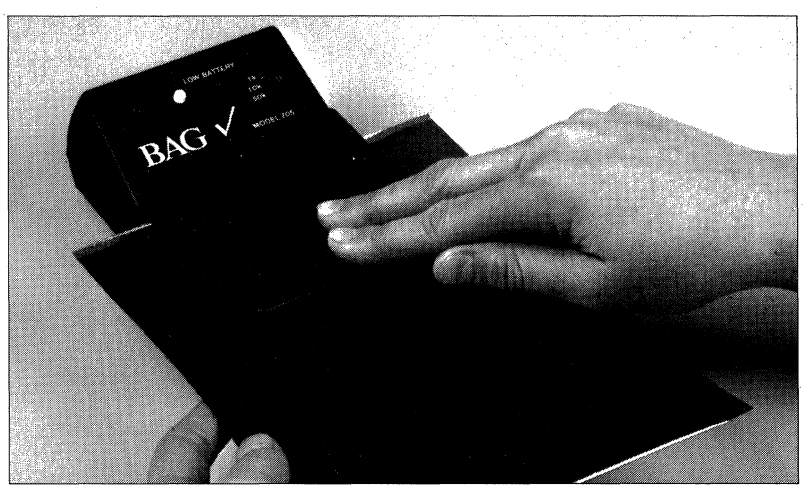
Red and green LEDs indicate whether or not the bag's electrical resistance is within the selected range. The tester operates from an AC adaptor for bench type use or from a 9-volt battery.

Customers who regularly test and reuse their bags report considerable savings on the total applied cost of the bags.

The Model 705 has special electrodes designed to provide positive contact with the conductive layer of the 3M 2100/2100E Series Static-Shielding Bags.

A calibration check is included with every Model 705 to verify its accuracy.

Call 1-800-328-1368



Static-shielding bags should not be reused unless they are tested.

Choose the 3M bags that best fit your static control requirements

You can now select static control bags from 3M based on the level of protection that you feel your products need. Read the descriptions, select the appropriate bags, then write one order.

You will be getting the right bags, for the right applications, from the right source, at the right price, worldwide.

You can also use the services of our experienced Sales Representatives to help you in your bag selection process. In addition, they are also available to provide management seminars, plant surveys, employee training and on-site testing of static control products.

For more information, contact a 3M Sales Representative or authorized distributor by calling 1-800-328-1368.

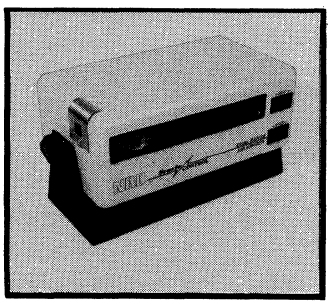
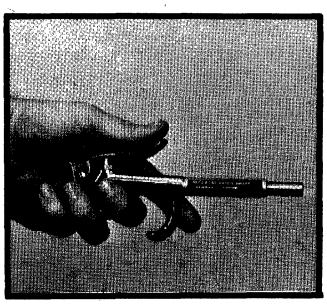
For More Effective Control of Static Electricity in Manufacturing, Assembling, Handling, Shipping



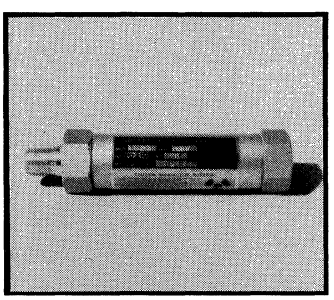
Dual Range Ion Air Blower Model 4062

Neutralizes static charges on non-conductors. Two fan speeds. At low speed covers work areas with a gentle flow of ionized air. At high speed controls static charges even on equipment. Heater and filter are included. Replaceable ion cartridge available on annual lease basis.



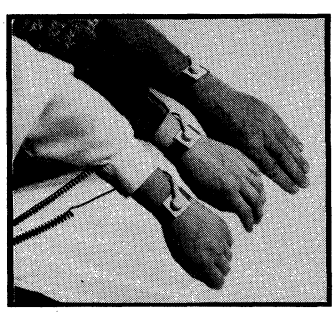
Nuclecel Ion Air Gun P-2051

An effective, flexible, versatile means to neutralize static charge, remove surface particles and control the attraction of contaminants. Constant balanced ion output, unequaled reliability and simplicity. Available on annual lease basis.



Nuclecel In-Line Ionizer P-2031

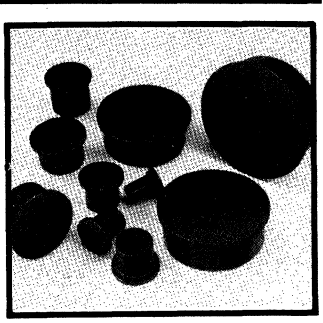
Control static and remove particles in fixed compressed gas line applications. Move large volumes of air at low input pressures to cover irregular surfaces and cabinet interiors. Available on annual lease basis.



Wrist Strap Assembly 5057-06

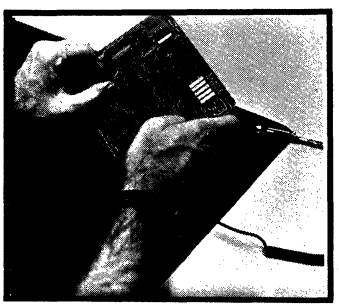
Soft, easy wearing assembly. Retains its shape for a long service life. Three color coded sizes require no operator adjustments. Six foot curl cord.

Small—Gray
Medium—Maroon
Large—Blue



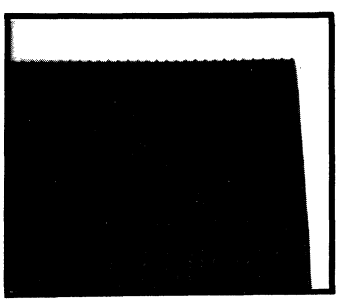
Caplugs Conductive Protectors DCC, CEC, CEP

These cost effective plugs and caps provide both physical and ESD protection to sensitive connectors, pins and leads. They meet MIL. STD 1686-A and are available in sizes to fit round and sub-miniature "D" type connectors.



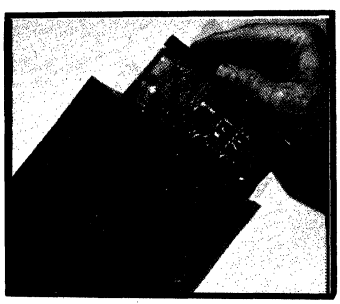
Softouch Mats 5046

Soft, attractive long service mats that provide a comfortable work surface. Includes snap fasteners and groiund cord. Colors: putty, light blue, chocolate brown. Sizes: 24" x 36", 24" x 48" or 24" and 48" rolls to 100' long. Additional sizes available on request.



Softouch V-Groove Floor Runners/Mats 5049

Comfortable and lightweight, these static dissipative mats & runners are ribbed to prevent dirt buildup, retain positive contact longer and make cleaning easier. Color: Black.
Sizes: 36" x 72" or roll 36" wide to 100' long.



Static Shielding Bags 5070

Transparent, humidity independent and heat sealable, these bags protect parts from electrostatic discharges and fields while allowing easy parts identification.

Sizes: (opening × length)
3" × 5", 4" × 6", 5" × 8",
6" × 10", 8" × 10", 8" × 12",
10" × 12", 10" × 14", 11" × 15",
15" × 18", 10" × 24", 10" × 30"

Plus these other fine products

- Conductive DIP Shunts, Edgeliners.
- Instruments
- Static control heel straps
- Warning labels
- Air ionizers: in line, fixed, portable
- Clean room ionizers

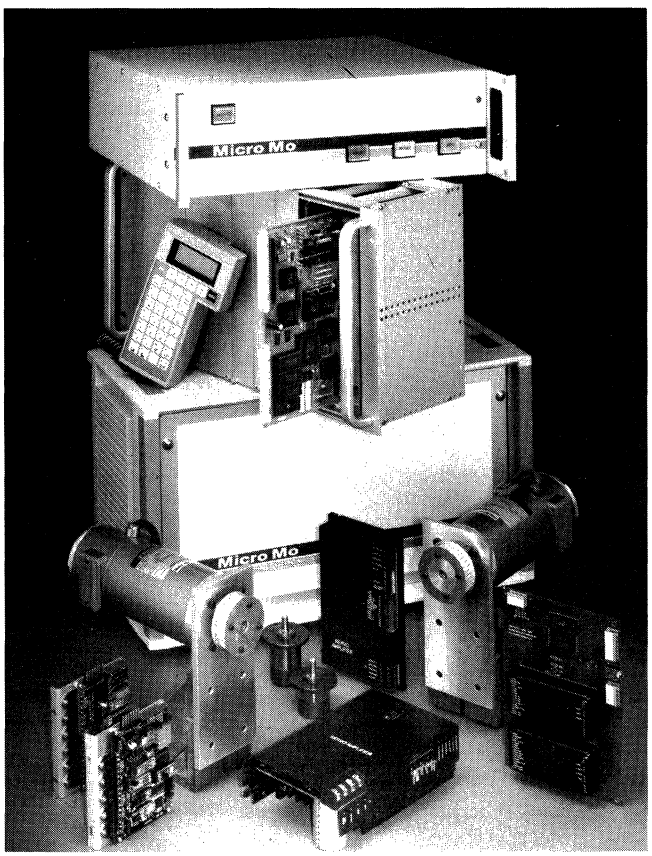
Micro Mo®

MCX SERIES SERVO SYSTEMS:

System Faulhaber® Minimotor™ and Micro Mo® Products

With over 30 years of engineering and applications experience in your field of interest.



If you specify, program, or build Motion Control Systems for:

- ☐ Robotics
- ☐ Pick and Place
- ☐ Material Handling
- ☐ Factory Automation
- ☐ Cutting & Grinding Eqt.
- ☐ Machinery Retrofit
- ☐ Coil Winders
- ☐ Soldering & Semiconductors
- ☐ Test & Inspection Eqt.

...you should be using Micro Mo® brand products.

WHY?

- ☐ Factory Support for OEMs
- ☐ NEMA, 19", and Euro-style enclosures
- ☐ Complete system availability
- ☐ Custom software to your spec.
- ☐ 8 axes linear & 2 axes circular interpolation
- ☐ 3rd axis (Z) helical functions
- ☐ Complete position & velocity control of DC Servo & brushless motors

Options:

- ☐ Optical & magnetic encoders
- ☐ Special version actuators & commutations
- ☐ Amplifiers & power supplies
- ☐ Interface modules
- ☐ Custom software & systems

Personalized Service:

- ☐ On-site installation, training & support for OEMs
- ☐ "Guaranteed Stock Program" for engineering samples (optional next-day delivery)
- ☐ "On-Line Inventory" arrangements for your particular production requirements
- ☐ Replacement parts available in 15 countries worldwide for exporting OEMs
- ☐ Specialty lubricants, shafts, adapters, and sub-assemblies

For application assistance, call our applications engineering team at (813) 822-2529 FAX (813) 821-6220

Micro Mo ELECTRONICS INC.
742 Second Avenue S. / St. Petersburg, Florida 33701 / Phone: 813/822-2529 / Telex: 807-982 / Fax: 813/821-6220

MINIGLOSSARY SERVO COMPONENTS

SPECIFICATIONS

Excitation: The input voltage and frequency.

Transformation Ratio: The ratio of the output voltage, at maximum coupling, to the input voltage.

Phase Shift: The lead or lag of the output voltage with respect to the input voltage. For most synchros and resolvers, the phase shift can be approximated by the angle whose tangent is the ratio of the primary winding's DC resistance to its reactive component.

Impedance: Specified as R + jX, where R is the AC resistive component and X is the reactive component. Important impedances are: (a) Z_{po} (or Z_{ro} for rotor primary units), which is the impedance of the primary winding with the secondary open; (b) Z_{so}, which is the impedance of the secondary winding with the primary open; and (c) Z_{ss}, which is the impedance of the secondary with the primry shorted (essentially when driven by a low impedance).

Null Voltage: The voltage remaining when the unit is at electrical zero or in the minimum coupling position.

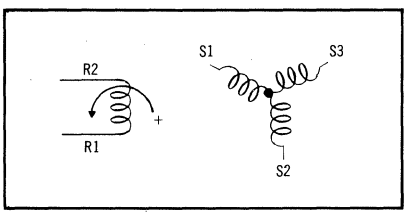
Accuracy: The error of the position of the rotor with respect to the electrical angle. It is defined as the output voltage driven by the "speed" (pole pairs) of the unit, referenced to the starting point of the calibration (usually the electrical zero position). Error is commonly expressed in minutes of arc (1/60 of a degree) or in seconds of arc.

Loads: For a transmitting unit, the impedance that the output voltage signal faces. This can be a receiver, a differential with its load, a control transformer, an A/D converter, etc.

Operation Temperature: The ambient temperature range over which the unit performs its primary function.

FUNCTIONS

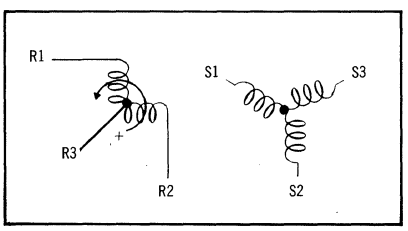
Transmitter: A unit with a Y-connected stator that outputs a signal proportional to the position of its single-phase excited rotor. High power units, called "torque transmitters," are used to drive one or more receivers. Low power transmitters are used to drive control transformers.



Receiver: A unit with a three-phase stator excited by the input, usually from a torque transmitter, and a single-phase rotor that follows the resulting stator field. Usually used to drive a position pointer.

Control Transformer: A unit with a three-phase stator excited by the input from a transmitter and a single-phase rotor mechanically driven to the null position by an external motor or other device.

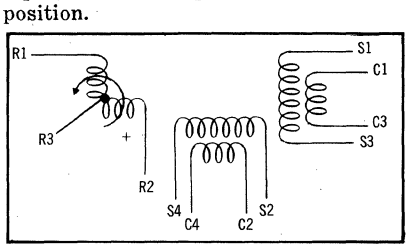
Differential: A unit with a three-phase stator and a three-phase rotor. It is usually connected between a transmitter, which excites its stator, and a receiver or control transformer. It can be used to "dial in" correction factors for the synchro chain.



Transolver: A unit with a three-phase stator and a two-phase rotor that can be used either as a control transmitter (with one rotor phase excited and the other shorted), or as a control transformer with the signal obtained from one phase of the rotor—making sure the other phase is equally loaded to prevent unbalances.

Differential Resolver: A unit with a two-phase stator and a three-phase rotor that is used as a transolver with the advantage that when connected as a control transformer, the signal does not travel through slip rings.

Resolver: A unit with a two-phase rotor and a two-phase stator that is used to create or receive SIN-COS signals such as vector resolutions for solving inertial platform coordinate transformations, unknowns of right triangles, etc. Resolvers can also be used as transmitting, differential, or receiving elements by proper choice of impedances. It is also possible to use resolvers as phase shifters where, in one mode, one rotor phase is excited and the two stator windings are feeding an appropriate RC network and indicating a phase shift, referred to the input, that corresponds to the rotor position.



Compensated Resolver: A unit with a "2×2" phase stator and a two-phase rotor used as a resolver with the added benefit of feedback windings in parallel with the stator windings that increase the useful accuracy over a wide range of environmental operating conditions.

Linear Transformer: A unit with a single-phase stator and single-phase rotor designed to provide a linear output voltage that is directly proportional to the rotor input angle. It operates over a range of less than ±90°, and is analogous to a potentiometer providing infinite resolution, but without contact between the elements. It can be used only with AC voltages.

Brushless Synchro: Available in two types—hairspring and bobbin. Hairspring synchros use spiral wound conductor springs to pick off the rotor signal, and are generally limited to a ±165° rotation. Most have mechanical stops to prevent damage due to overrotation. Bobbin synchros pick off the rotor signal with rotary transformers inside the unit, allowing the rotor unlimited motion.

Pancake Unit: A name derived from the physical dimensions of the unit, which has a diameter that exceeds axial length. Sizes range from under 1" to 20" or more. The unit is frequently used as a gimbal pickoff element and is designed to fit a particular application envelope. It can be supplied as a rotor and stator only.

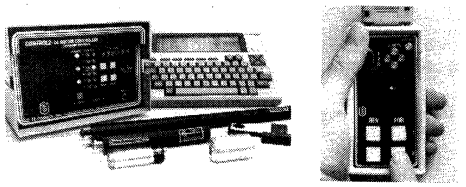
LINEAR/ROTARY COMPONENTS FOR MICRO-POSITIONING
CLOSED/OPEN LOOP CONTROLLERS FOR IRONLESS-CORE DC-MOTORS
CUSTOM MOTION SYSTEMS • OEM CONFIGURATIONS

μ-PROCESSOR CONTROLLERS

CONTROL2 "SMARTBOX"



Designed for TSP actuators, **CONTROL2** links an IBM computer via RS-232 and/or IEEE-488 to DC-motors and quadrature-phase encoders. Operating through an external velocity servo, it provides closed-loop position and velocity control. Numerous ASCII commands assure operational flexibility. Coupled with the 1000C2-RT REMOTE TERMINAL, **CONTROL2** becomes a stand-alone motion system with programming capability. A JOYSTICK controls six axes from front-panel or optional remote location.

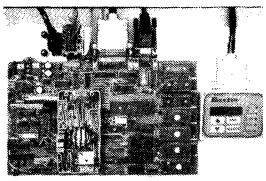
Digital Velocity Control creates a speed range of .01 to 20,000.00 encoder counts per second (1 part out of 2,000,000 regulation). Programmable start and stop ramps accommodate various motor dynamics/loads.

Continuously improved from user suggestions, **CONTROL2** features zero overshoot on point-to-point movements and high stability in the presence of external loads.

FEATURES

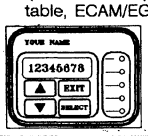
- Simultaneous 2/4/6 axes
- Jog/Slew Buttons
- Digital Velocity Control
- Backlash compensation
- Triple encoder filter
- Multilayer driver board
- Limit detection/backoff
- Emergency STOP buttons
- Power condition outputs
- No move @ Pwr ON/OFF
- Rackmount Option
- Accepts external power
- Watchdog timer
- Remote E-stop input
- Internal non-volatile program memory
- Concurr. RS-232/IEEE-488
- Programmable ramps
- Velocity mod during travel
- Conditional movement
- Heidenhain encoder OK
- H/P HCTL-2000 Counters
- 16/32/48 TTL inputs
- 8 TTL outputs
- Motion condition outputs
- Int/Ext Status Indicators
- 1/2/4x counting factors
- Accepts ext limit switches
- Pwr OFF coord retention
- 1ms-2.4hr Delay command
- EMI shielding option
- Remote Terminal

CONTROL3



Stand-alone, programmable 2-axis DC-motor controller in 6"x10"x2" modules. Designed to be *customized* and installed into small spaces. Controls TSP linear/rotary actuators as well as many types of DC motors. Executes an internally-stored program or ASCII commands from RS-232/IEEE-488 Host computer.

- 32 axes Master/Slave gang
- Written in "C" for customization
- Point-to-point, external tracking, trapezoidal/triangular, circular-/parabolic interpolation, look-up table, ECAM/EGEAR.



Remote Panel displays/inputs information from/to menu tree.

IRONLESS-CORE DC-MOTORS

TSP components feature formed cylinder and flat armature configurations with *high accelerations* due to absence of moving heavy iron laminations or magnets.

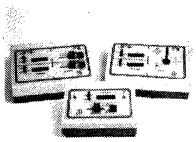
BENEFITS: High torque/size (weight) ratio • low acoustic/electronic noise • long brush life • vibrationless • straight-line torque/velocity response • closed-loop operation • zero resonance.

MANUAL CONTROLLERS

1000-SERIES

INTEGRATED

Controlling one or two motors, the 1000INT-1, -2, -J are our smallest, lowest-cost, open-loop Controllers with position display.



•Joystick version • 6-digit Position Display for each axis • 2x/4x Encoder Counting • 10:1 Slewing and Jogging Range • Limit indicators • Computer interface option.

MODULAR

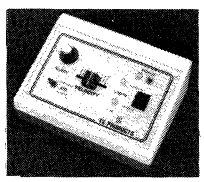
The 1000MOD-series controls 1 to 3 motors constructed from the following modules:

- 1000S Single-axis Speed Controller
- 1000JM Joystick
- 1000D Single-axis Position Display
- 1000PE 3-axis Position Entry
- 1000M Mainframe
- 1000R Remote Control
- 1000P Power Supply

1200-SERIES

4-AXIS SPEED CONTROLLER

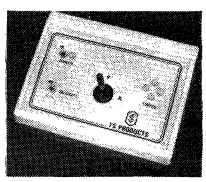
A simple mover without precision position information, the 1200SC controls 1 out of 4 axes.



- 10:1 Slewing speed range
- Direction selection
- Limit sensing with backoff
- Small step JOG function
- 1200SC-C computer-interface
- 1200-OEM version to integrate into an operator's control panel.

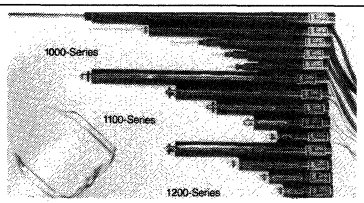
2-AXIS JOYSTICK

Controlling two-axes simultaneously, the 1200J features an elegant feeling joystick with fast/slow ranges. With a simple computer-interface, the 1200JC, duplicates all front panel functions. Built on a single PCB, the 1200J-OEM version economically fits into your system.



ACTUATORS

LINEAR

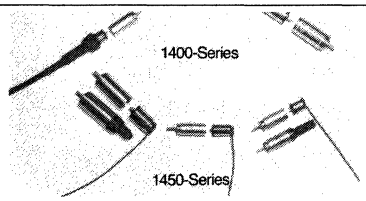


1000-Series High-quality, high-precision for semiconductors, optics, metrology, medicine. • Non-rotating plunger • Position encoder • ½", 1", 2", 4", 6" travel • 100 lb thrust max • 15mm/sec max • 2.5nm resolution min • 2μm/in accuracy • Integral velocity servo & limit-of-travel/torque sensor

1100-Series Smaller, less accurate with encoder. • ½ length of 1000-series • ¼", ½", 1", 2", 4", 6", 8", 10", 12" travel • Visual display of position • Adaptable to push/pull

1200-Series Smallest, simple mover • ¼", ½", 1", 2", 4", 6", 8", 10", 12" travel • Use external encoder • Adaptable to push/pull

ROTARY



1400-Series

- Built-in encoder
- Up to 640,980 counts per revolution
- Smooth velocity from .04 to 1300 RPM
- Torques to 2514 in-lb
- 13 gearratios

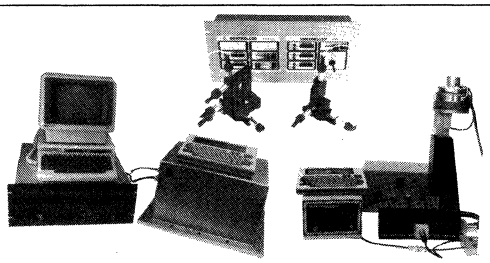
1450-Series

- Similar to 1400-series but 3/4" shorter
- No built-in encoder
- External encoder OK

SLIDES/TABLES/STAGES

1300-Series ROTARY Heavy-duty, high-accuracy, robust construction for abusive environments • #1300: 6" dia • #1310: 4" dia
1500-Series ROTARY Compact; #1500 has encoder feedback; use #1550 where position is not critical or is determined by other means.
1600-Series LINEAR Compact, low-profile, single axis with integral leadscrew • gang into X/Y/Z • with 1400 or 1450-series Actuators.
CUSTOM STAGE ASSEMBLIES Linear/rotary motion subsystems assembled to your specifications from new designs or our vendors.

CUSTOM MOTION SYSTEMS



We take full responsibility for your motion subsystem. Using our own or other technologies, we meet your motion, mechanical fit, and delivery time specifications. For a quick solution, we use our **CONTROL2**. Instead of complex cams and open-loop control, we use **CONTROL3** for programmable synchronized movement. Replace bulky, inefficient movements with our compact, cost-effective designs.

TS PRODUCTS welcomes the opportunity to supply high-quality motion-producing and motion-controlling products. Although we pay special attention to one-of-a-kind needs, we emphasize OEM configurations of our standard products. Please talk to one of our applications sales engineers about your special needs. Qualifying OEMs may receive a quantity discount. A catalog of our standard items together with dimensional specifications is available on request.

$\geq$	larger than or equal to
$\gg$	much larger than
$\equiv$	identical to or equivalent
$\uparrow$	increases
$\downarrow$	decreases

PREFIXES FOR SI UNITS

Multiple	Prefix	Symbol
10^{12}	tera	T
10^{9}	giga	G
10^{6}	mega	M
10^{3}	kilo	k
10^{-3}	milli	m
10^{-6}	micro	μ
10^{-9}	nano	n
10^{-12}	pico	p

Quantity	Symbol	SI Unit	Symbol	Derivation
acceleration	a	m s^{-2}	—	velocity/time
acceleration due to gravity	g	m s^{-2}	—	velocity/time
amount of substance	n	mole	mol	mole fraction (n) used
amplification factor	μ	*a ratio*	—	—
angle	$\theta_1,\varphi_1,\alpha_1$	—	—	—
angle of incidence	i	degree or radian	°	—
angle of refraction	r	degree or radian	°	—
angle, Bragg	θ	number	—	—
angle, critical	c	degree or radian	°	—
anode slope resistance	R_A	ohm	Ω	$\Delta V_a / \Delta I_a$
area	A	metres squared	m^2	$l \times b$
atomic number	Z	a number	—	number of protons
Avogadro constant	L, N_A	number	—	—
breadth	b	metre	m	fundamental unit
capacitance	C	farad	F	charge/p.d.
charge, electric	Q	coulomb	C	current × time
charge on electron	e	coulomb	C	$1{\cdot}6 \times 10^{-19}$ C
conductance	G	ohm^{-1}	Ω^{-1}	reciprocal of resistance
current, electric	I	ampere	A	fundamental unit
decay constant	λ	*a ratio*	—	—
density	ρ	kg m^{-3}	—	m/V
distance along path	s	metre	m	fundamental unit
efficiency	η	*a ratio*	—	work output/work input
electrochemical equiv.	z	g C^{-1}	—	mass/charge
electromotive force	E	volt	V	energy/charge
electron	e	—	—	—
energy	E	joule	J	N m
energy, kinetic	E_k	joule	J	N m. $E_k = 1/2mv^2$
energy, potential	E_p	joule	J	N m. $E_p = mgh$
Faraday constant	F	coulomb mol^{-1}	C mol^{-1}	96,500 C mol^{-1}
field strength, electric	E	V m^{-1}	—	potential gradient: p.d./dist.
field-strength magnetic	H	ampere-turns	—	current × no. of turns
flux, magnetic	Φ	weber	Wb	e.m.f/rate of change of flux
flux density	B	tesla	T	flux/area
focal length	f	metre	m	—
force	F	newton	N	kg m s^{-2}
free energy	ΔG	joule	J	—
frequency	f	hertz	Hz	oscillations/time
gas constant	r	joule	J	energy
half-life,radioactivity	$t_{1/2}$	second	s	fundamental unit
heat capacity	C	J K^{-1}	—	quantity of heat/temp. rise
heat of reaction	ΔH	joule	J	heat energy
heat capacity, specific	c	J K^{-1} kg^{-1}	—	heat capacity/mass
heat, quantity of	q	joule	J	energy

SI UNITS
